(a) Where an existing classification and rate are not shown to operate injuriously to the carriers from a given point, or to give undue advantage to shippers, a change is not justifiable that materially injures an important industry and a class of shippers at that point who have there built up the industry in reliance on a continuation of the previous classification and rate, first established and long maintained by the carriers themselves with-

out complaint from any quarter. Bates v. Pennsylvania R. Co. (Com.), 2 I. C. R. 715

(b) Continuance of a system of unjust rates cannot be required or excused on the ground that parties have made investments and entered into the business affected thereby on the faith of assurances from carriers of their maintenance, although a change might work injury to the parties whom such rates had unduly favored. Potter Manufacturing Co. v. Chicago & G. T. R. Co., 4 I. C. R. 223.

IMPORTANT CASES SINCE 1908

(c) The Commission has never understood that it could dictate the policy of a carrier in the making of its rates in so far as there was just room for the exercise of a policy. It has several times explicitly so declared. It has, however, believed that it might consider what the policy of a carrier had been in determining whether the rates resulting from a change in that policy were just and reasonable. It often happens that the very existence of an industry depends upon the rate accorded to it. If, now, a carrier has established a particular rate for the express purpose of enabling an industry to exist, and if upon the strength of that rate money has been invested which must be destroyed if the rate is withdrawn, this fact might properly be considered in passing upon the reasonableness of the proposed change in the rate. Such fact is not controlling, but is one of the circumstances which may properly be kept in view. The Commission might in a proper case order the continued maintenance of a rate upon which the investment of money had been induced, even though it would not in the first instance as an original proposition have directed the establishment of that rate. Oregon & Washington Lumber Mfrs. Assn. v. S. P. Co., 21 I. C. C. 389, 394.

(d) The fact that contracts have been entered into on the basis of a lower rate will not of itself preclude the increasing of such rate. Rates on Crushed Stone from McCook and Thornton, Ill., 29 I. C. C. 136, 137.

(e) In a typical case it appeared that complainant had invested large sums in their plants, and said that they had built up their business on the assumption that no substantial change would be made in a transit arrangement. They suggested that it is now neither right nor fair for the carriers to burden them with a transit charge. Little, if any weight however, may be given that consideration, in view of the Supreme Court's decision in So. Pa. Co. v. I. C. C. 219 U. S. 433, 426; Mercantile Lumber Co. v. I. C., 53 I. C. C. 663, 665.

(f) Complainant, acting in good faith, made extensive changes in its plants at considerable expense on the presumption that a special rate would be established. Contention that present rates are higher than the traffic will bear, based primarily upon a showing that traffic has been diverted to water routes; that it has become necessary to scrap some plants; and that it will be impossible to continue operation unless the increases under the Fifteen Per Cent case, 45 I. C. C., 303, and Ex Parte 74, 58 I. C. C., 220, are removed. HELD, the reasonableness of rates may not be measured by the commercial necessities of shippers. Peninsular Portland Cement Co. v. Director General, as Agent, 73 I. C. C. 542.

Op. 2024; Colorado Alfalfa Meal & Mfg. Co. v. M. P. Ry. Co., 41 I. C. C. 540, 544; Lumber Rates from Helena, Ark., and Other Points, 41 I. C. C. 565, 577; Milk and Cream Rates to New York City, 45 I. C. C. 412, 429; General Porcelain Co. v. Director General, as Agent, 66 I. C. C. 681; Atlas Portland Cement Co. v. C., B. & Q. R. R. Co., 81 I. C. C. 1, 15.

§28. Local rates and combinations.

See Local Rates and Combinations; Through Routes and Joint Rates §13½, §15.

IMPORTANT CASES SINCE 1908

(a) Where the combination of local rates is less than the through rates the adjustment is prima facie unreasonable. Greater Des Moines Committee v. C. M. & St. P. Ry. Co., 18 I. C. C. 73, 80.

(b) The existence of a lower combination over another route does not present a combination lower than the through rate on which the presumption obtains such through rate is unreasonable. Lull Carriage Co. v. C. K. & S. Ry. Co., 19 I. C. C. 15, 17.

(c) Where the spread between the local rates and the divisions of through rates between the same points is large the local rates should be carefully scrutinized. R. R. Com. of Nev. v. N. C. O. Ry. Co., 22 I. C. C. 205, 210.

(d) The combination and through rate should not be equal. El Dorado, etc., Co. v. C. R. I. & P. Ry. Co., 22 I. C. C. 286, 287.

(e) A carrier has no right to single out a piece of expensive road and make the local traffic bear an undue portion of the expense of its maintenance or construction. Norman Lumber Co. v. L. & N. R. R. Co., 29 I. C. C. 565, 569.

(f) Rate applicable alleged to be excessive because it is a combination rate, but this fact in and of itself affords no basis for condemning the rate. Lookout Paint Mfg. Co. v. N. Y. C. R. R., 45 I. C. C. 539, 540.

ALL OTHER CITATIONS

St. Louis Blast Furnace Co. v. V. Ry. Co., 21 I. C. C. 215, 220; Webster Grocer Co., v. C. & N. W. Ry. C., 21 I. C. C. 20; Wells-Higman Co. v. G. R. & I. Ry. Co., 19 I. C. C. 487, 488; Webster Grocery Co. vv. G. R. & I. Ry. Co., 19 I. C. C. 487, 488, 493, 495; Crombie & Co. v. A. T. & S. F. Ry. Co., 18 I. C. C. 57, 59.

§29. Long Continuance of Voluntary Rate.

See Infra §43; Advanced §5 (4); Evidence §68; Express Companies §22; Reasonableness of Rates §16, §16½, §25.

CASES 1887-1908

(a) A railroad company, while long maintaining a rate without the presence of competition on other than equal terms, is making evidence that such rate is not too low. Northwestern Iowa Grain & Stock Shippers Asso. v. C. & N. W. R., 2 I. C. C. 431, 434.

(b) Rates on shipments of strawberries and vegetables from Charleston to Jersey City are prima facie excessive where the carrier has previously charged the same rates for a series of years for similar shipments from the same place to New York by way of Jersey City. Truck Farmers' Asso. v. Northeastern R. Co., 6 I. C. C. 295.

(c) A railroad company putting in force a rate of charges furnishes evidence that the rate is profitable, which is more convincing when such rate is long maintained. Truck Farmers' Asso. v. Northeastern R. Co., 6 I. C. C. 295, 321.

(d) The long continued carriage of any article of freight at certain rates, while establishing a presumption that such rates are reasonable and remunerative, is not alone conclusive, but to carry such presumption must show a settled practice or policy. Warren Mfg. Co. v. Southern Ry., 12 I. C. C. 381, 387.

IMPORTANT CASES SINCE 1908

(e) Undoubtedly the fact that a rate has been voluntarily maintained by a carrier for a period of years is evidence tending to show that it is reasonably remunerative, and when it is sought to be increased the burden on the carrier would seem to require stronger proof of justification than in a case where the proposed increase relates to a rate that has been in effect but a short time. It not infrequently occurs, however, that increases in rates that have been maintained for many years are found to be amply justified. Freight Rates from Minnesota Points, 32 I. C. C. 361, 364.

(f) The contention that carriers should not be permitted to increase rates voluntarily established and maintained for several years, not sustained. Excelsior from St. Paul, Minn., 36 I. C. C. 349, 364.

(g) A rating that has been long continued should not be disturbed unless it is found to cause the exaction of an unreasonable or an unjustly discriminatory or unduly prejudicial charge. McCrory Stores Corp. v. Director General, 55 I. C. C. 423, 424.

(h) Carrier contended that rate on butter when applied to oleomargarine was unremunerative, but the continued maintenance of the rate on butter justifies the conclusion that carrier regarded it as a compensatory rate, and if compensatory for butter, it would have been compensatory for oleomargarine. Armour & Co. v. Director General, as Agent, 60 I. C. C. 663, 665.

(i) A voluntary rate, established to meet competition, is not to be taken as

the measure of what is reasonable. L. & N. R. R. Co. v. I. C. C. 195, Fed. 541. 558.

Co., 22 I. C. C. 149, 151; Chamber of Commerce of New York v. N. Y. C. & H. R. R. Co., 24 I. C. C. 55, 74; Dupont de Nemours Powder Co. v. C. R. R. of N. J., 25 I. C. C. 19, 20; Advances on Iron Ore, 26 I. C. C. 675, 676; Topeka Traffic Assn. v. A. & V. Ry. Co., 27 I. C. C. 428, 435; In re Basket Rates from Points East of to Points West of the Missouri River, Unrep. Op. A-490; Lumber Rates S. Ry. Points to Eastern Points, 31 I. C. C. 244, 253; Nix & Co. v. S. Ry. Co., 31 I. C. C. 145, 149; Grain Rates to Pittsburgh, 30 I. C. C. 383, 384; Rates on Bananas from Gulf Ports, 30 I. C. C. 510, 515; Augusta Cotton Exchange and Board of Trade v. S. Ry. Co., 30 I. C. C. 704, 706; Stuart's Draft Milling Co. v. S. Ry. Co., 31 I. C. C. 623, 625; Birdsboro Stone Co. v. Penn. R. R., 37 I. C. C. 577; Alamo Iron Works v. N. Y. O. & W. Ry. Co., Unrep. Op. 2237; Capital City Oil Co. v. Y. & M. V. R. R. Co., 39 I. C. C. 141, 145; Pacific Coast-Southwest Lumber, 40 I. C. C. 387, 394; Grain Reshipped from Peoria, 50 I. C. C. 185, 190.

§30. Low Rates in Opposite Direction. See Comparative Rates; Discrimination §11; Reasonableness of Rates §27¾.

CASES 1887-1908

(a) There is no necessary connection or relation between the rates on traffic of the same kind or class transported between the same points in opposite directions over the same road or line, and the fact that such rates in one direction is materially higher than that in the opposite direction does not, as in case of hauls over the same line in the same direction, establish prima facie the unreasonableness of the higher rate. This is especially true where the hauls are of great length. Duncan v. A. T. & S. F. R. Co., 4 I. C. C. 385, 393.

(b) There is no necessary connection or relation between the rates on traffic of the same kind or class transported between the same points in opposite directions over the same road or line, and the fact that such rate in one direction is materially higher than that in the opposite direction does not, as is case of hauls over the same line in the same direction, establish prima facie the unreasonableness of the higher rate. This is especially true where the hauls are of great length. Blanton Duncan v. A. T. & S. F. R. R. Co., et al, 6 I. C. C. 85.

(c) Upon the evidence as presented, it does not appear that the rate of 62 cents per hundred pounds on "wool in the grease" from Philadelphia, Pa., to Ft. Wayne, Ind., is unjust in comparison with the rate on the same commodity of 43 cents east bound from Ft. Wayne to Philadelphia. Weil v. Pennsylvania R. Co. 11 I. C. C. 627.

(d) Upon complaint that the rates on wire-screen doors and windows eastbound from Fenton, Mich., a place near Detroit, to Winooski, Vt., and certain other eastern points, are higher than the rates on such articles westbound from Winooski to Detroit, and certain other western points, and result in unreasonable rates and unjust discrimination against such eastbound shipments. HELD: That somewhat lower rates on westbound than on eastbound traffic seems, from the difference in conditions, to be justified; but no satisfactory reason appears why there should be a great-

er disparity between the rates on the traffic in question eastbound and westbound than that which prevails on articles of substantially the same character in the classes. A. J. Phillips Co. v. Grand Trunk W. R. Co., et al, 11 I. C. C. 659.

(e) Complainant attacked rates on wirescreen doors and windows from Fenton, Mich., to Winooski, Vt., as unjust and unreasonable as compared with the rates in the reverse direction. From Winooski to Detroit 20c, eastbound 36c. The eastbound rates are commodity rate and are practically the same as fourth class while the westbound rates are pratically fifth class. There is a greater movement of empty cars under light power westbound, which increases the cost of transportation to the carriers. Generally rates are lower for the transportation of westbound traffic than for eastbound. Some disparity seems to be justified but not as much as is shown. HELD, carriers will be expected to make some readjustment in the eastbound rates, no order to be entered at this time. A. J. Phillips & Co. v. G. T. W. Ry., 11 I. C. C. 659.

(f) Complainant attacked as unreasonable and unjustly discriminatory carload commodity rates on woodenware from Menasha, Wis., to north Pacific coast terminal points higher than from such Pacific coast terminals to Missouri and Mississippi River points and to Chicago. HELD, there is no sufficient basis for a conclusion that the rates involved are unreasonably excessive; that existing disparities in the rates eastbound and westbound on the traffic constitute undue discrimination against complainant, but this record furnishes no basis for specific order, carriers are expected to make a readjustment that would fulfill the requirement of the law as to justice and equality, complaint dismissed. Menasha Woodenware Co. v. A. T. & S. F. Ry., 11 I. C. C. 666.

(g) It appears that defendant's rates on woodenware are higher from Menasha, Wis., to north Pacfiic coast terminal points than from such Pacific coast terminals to Missouri River and Mississippi River points and to Chicago common points, including Menasha. Upon complaint that such rate adjustment results in unreasonable rates from Menasha and undue preference to Pacific coast woodenware shipments,—HELD: (1) That there is no sufficient basis in the record for a conclusion that the rates involved are unreasonably excessive; (2) that existing disparities in the rates eastbound and westbound on the traffic in question constitute undue discrimination against complainant, but this record furnishes no sufficient basis for such specific order respecting the exact adjustment of the rates on the different articles involved as would fulfill the requirements of the law as to justice and equality; and (3) that no order will be made at this time, but it is expected that defendants will so readjust the rates as to remove the undue discrimination. Menasha Wooden Ware Co. v. Atchison, T. & S. F. R. Co., 11 I. C. C. 666.

(h) To whatever extent long previous existence of lower rates in actual use may justify an inference or presumption that they are sufficiently high, the mere publication of such rates, under which there has been no appreciable movement of traffic, is not conclusive proof that they are reasonably remunerative to the carriers. R. R. Shiel & Co. v. Ill. Cent. R. R. Co., et al, 12 I. C. C. 211.

IMPORTANT CASES SINCE 1908

(i) But differing rates in opposite directions over the same lines require explanation. Producers Sales Co. v. N. Y. N. H. & H. R. R., 48 I. C. C. 438.

(j) While the rate in one direction is not always a fair test of what the rate should be in the opposite direction, the greater volume of the traffic may well justify a somewhat lower rate. Merchants Freight Bureau of Little Rock v. M. P. R. R., 50 I. C. C. 247.

(k) Where the transportation conditions affecting the movements in opposite directions between the same points are substantially similar there should be no material disparity in the rates. Rates to and from Nashville, 61 I. C. C. 308, 334.

(l) The Commission has repeatedly said that where the transportation conditions affecting the movements in opposite directions between the same points are substantially similar there should be no material disparity in the rates. Moore Oil Refining Co. v. Director General, 64 I. C. C. 621, 622.

(m) Rates on emergency shipments of gas, oil, gasoline, and distillate, in tankcar loads, from Oklahoma points to Potwin, Kans., found not unduly prejudicial as compared with lower rates to other Kansas refining points, which rates

were subsequently made applicable to Potwin. Rates assailed compare favorably with those in the reverse direction prescribed in National Petroleum Asso., 47 I. C. C. 355. Vickers Petroleum Co. v. Director General, as Agent, 73 I. C. C. 578.

(n) Where the transportation conditions affecting movements in opposite directions between the same points are substantially similar, the rates should be substantially on the same basis. Memphis-Southwestern Investigation, 77 I. C. C. 473, 495.

(o) Though the maintenance of a higher rate than that which applies for a movement between the same points in the opposite direction ordinarily requires explanation, the higher rate can not be condemned solely on that circumstance. Hyman Michaels Co. v. Director General, 80 I. C. C. 703, 705, 706.

(oa) A rate in the reverse direction is not a controlling test of reasonableness. International Paper Co. v. Director General, 88 I. C. C. 211, 212.

(p) The mere fact that a rate is higher one way between the same points than it is the other does not prove that the higher rate is unreasonable, and this is particularly true where there is a preponderance of empty cars moving in the one direction. L. & N. R. R. Co. v. I. C. C. 195 Fed. 541, 559.

(q) It is well established that a rate between two points in one direction is not necessarily the measure of a reasonable and non-discriminatory rate in the opposite. Rate on windmills and towers from Superior, Wis., to Washington, Iowa, not found unreasonable. Duplex Mfg. Co. v. C. M. & St. P. Ry. Co., Unrep. Op. A-858.

C. 538; Gypsum Plaster and Stucco to North Pacific Coast, 83 I. C. C. 753, 759.

§31. Manufactured Products.

See Classification §10, §11 IV; Evidence §31, §44; Reasonableness of Rates §17.

CASES 1887-1908

(a) Upon a rehearing of this case the additional evidence warrants a finding contrary to what appeared and was found in the original hearing, that the cost to the defendants of transporting the direct products of corn, including terminal expenses, properly chargeable as freight charges, between Indianapolis and seaboard points, is greater on the product than on raw corn. Bates v. Penn. R. Co. 3 I. C. R. 296.

IMPORTANT CASES SINCE 1908

(aa) The general rule is that manufactured products bear higher rates of transportation than does raw material, and is founded in reason, because ordinarily there is a substantial difference between the value of the one and that of the other, and frequently there is a greater degree of risk incident to the transportation and care of the manufactured product than of the raw material. The practice, however, is not universal, and is departed from in some instances because

the reasons for the distinction are lacking and in other cases because of countervailing commercial and market conditions and considerations. Within the last main class of exceptions would fall the case of grain and grain products, which are generally carried at the same rate. The rule, however, more nearly universally applies with respect to the primary or principal product or products than to the secondary products or by-products from the same raw material. East St. Louis Cotton Oil Co. v. St. L. & S. F. R. R. Co., 20 I. C. C. 37, 40, 41.

(b) Manufactured products generally take higher rates than the raw materials, although there are exceptions to the rule. Straw Rates from St. Louis to Anderson, Ind., 36 I. C. C. 30, 33.

(c) It appears to be a debatable question as to when in the process of manufacture iron and steel articles become finished products. In certain circumstances bar iron might properly be considered a finished article, while in others it might be considered rough material. The final use to which the articles is put may determine whether it should be considered finished or unfinished. The Iron and Steel Cases, 36 I. C. C. 86, 107.

(d) The general rule a manufactured artcile should take a higher rating than the raw material is subject to exceptions based on considerations arising out of varying conditions. For example, the manufactured article might be a better transportation unit than the raw material. Official Classification Ratings, 37 I. C. C. 166, 183.

(e) Ordinarily a manufactured product is rated higher than its components. Wilckes, Martin & Wilckes Co. v. Director General, as Agent, 74 I. C. C. 13, 15.

(f) Where certain grades of a commodity made and sold for common grades are not mere by-products of the production of higher grades, and otherwise fully conform to description and loading requirements of common grades, incidental final use by purchaser of a selected few thereof for better purposes should not be regarded as affecting their essential character for rate-making purposes, although exclusive or predominant use of grades for a given purpose is a circumstance to be considered, along with other facts, in determining proper description to be applied. National Paving Brick Mfgs. Asso. v. A. & Y. Ry. Co., 80 I. C. C. 179, 183.

(g) Maintenance of lower rates on finished articles than are applicable on commodity from which manufactured, must be justified, if at all, by clear, positive, and convincing evidence. Oklahoma Iron Works v. Director General, as Agent, 80 I. C. C. 327, 331.

(h) Manufactured articles ought generally to pay a higher transportation charge than the raw material, but this rule is by no means inflexible, and facts and circumstances surrounding the movement of the raw materials may be such as to warrant a higher rate. Mississippi Railroad Commission v. A. & V. Ry., 89 I. C. C. 47, 67.

§31½. Maps.

See Market Competition.

IMPORTANT CASES SINCE 1908

(a) A privately published set of maps such as is in the Rand-McNally Atlas is not an official publication of carriers and cannot control rates. Crescent Coal & Mining Co. v. C. & E. I. R. R. Co., 24 I. C. C. 149, 154.

§32. Market Competition.

See Analogous Commodities; Long and Short Hauls §8; Equalization of Rates §3, §6; Express Companies §19; Market Competition.

CASES 1887-1908

(a) Competition at St. Paul with sugar from the east refined in New York, although necessitating low rates to St. Paul on sugar from the west refined at San Francisco, does not justify a greater charge on the latter to Fargo than to St. Paul. Raworth v. Northern P. R. Co. (Com.) 3 I. C. R. 857.

(b) A town favorably situated with respect to one through route, but competing in a common market with another town more favorably located on another through route, should not have a reduction of the local rate over roads connecting the two through routes for the purpose of overcoming the natural advantage which the latter competing town enjoys. Chamber of Commerce of Minneapolis v. Great Northern R. Co., 4 I. C. R. 230.

(c) The "drive" of shingle logs down rivers which flow past the place of cut in Maine to a seaport in Canada where shingle mills are located, and from which the product may go by sea to market ports, affects shingle traffic from competing mills located along these rivers at a place in Canada and a place in Maine, but operates with less force at the latter point. The rail rate from the Canadian mill to market being fixed with especial reference to the effect of the log drive to and water competition for shingle traffic from the seaport, the rate from the Maine mill should be made upon the same basis. James & Abbott v. Canadian Pacific R. Co., 4 I. C. R. 274.

(d) Competition of market with market may not be so direct in its effect, as competition of carrier with carrier; but when it does exist, it is influential, and perhaps as effective and controlling with carriers, as to their rates, as other competition. It may, therefore, constitute a part of the circumstances and conditions which a carrier can consider in fixing rates for the transportation of goods. Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 4 I. C. R. 332.

(e) When a method of regulation would have the effect of throwing many competitors out of the trade, and centralizing it in the hands of one or more dealers, it would not be permissible if another method, without doing wrong to any one, would have the effect of leaving the market open to all competitors; for it is undoubtedly true that both the law and good business principles favor all fair competition. Schumacher Milling Co. v. C. R. I. & P. R. R. Co., 4 I. C. C. 373, 384.

(f) Each locality competing with others in a common market is entitled to reasonable and just rates at the hands of the carriers serving it and to the benefit of all its natural advantages, and no departure from the rule requiring rates in all cases to be reasonable in themselves can be justified on the ground that it is necessary in order to maintain existing trade relations, or to "protect competing markets," or to "equalize commercial conditions," or to secure to carriers traffic from certain territory assumed to be exclusively theirs. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 592.

(g) Division of territory between lines to a common market is without warrant in law, when made for the benefit of the carrier without regard to the interest of shippers in the territory so divided, to whom it is in effect a denial of the privilege of shipping their goods or produce to market by the line or route they may prefer. Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., (Conn.) 4 I. C. R. 592.

(h) Division of territory between lines to a common market is without warrant in law when made for the benefit of the carrier without regard to the interest of shippers in the territory so divided to whom it is in effect a denial of the privilege of shipping their goods or produce to market by the line or route they may prefer. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 6 I. C. C. 195.

(i) Each locality competing with others in a common market is entitled to reasonable and just rates at the hands of the carriers serving it and to the benefit of all its natural advantages, and no departure from the rule requiring rates in all cases to be reasonable in themselves can be justified on the ground that it is necessary in order to maintain existing trade relations, or to "protect competing markets," or to "equalize commercial conditions," or to secure to carriers traffic from certain territory assumed to be exclusively theirs. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., et al, 6 I. C. C. 197.

(j) The competition of markets or the competition of carrying lines subject to regulation under the Act to Regulate Commerce does not justify carriers in making greater short haul or lower long haul charges over the same line in the same direction (the shorter being included within the longer distance) in the absence of an order of relief issued by the Commission upon application therefor and after investigation. H. W. Behlmer v. Memphis & Charleston R. Co., et al, 6 I. C. C. 257.

(k) The law requires regulation of railroad charges according to the ascertained rights of persons and places; it is not an agency for the regulation of trade by enabling shippers and communities to do business, or putting them on even terms with rivals more remote from competitive territory. Therefore, the fact that one town is able, under existing rates to and from that point, to compete with another town on practically even charges for the aggregate in and out transportation, cannot be regarded as an excuse for any injustice in the rates to the former town; the rates to the two competing towns should accord with their relative situation. Daniels v. Chicago, R. I. & P. R. Co., et al, 6 I. C. C. 458.

(l) Coal transported from Corona, Birmingham or Blocton, Ala., to Vicksburg, Miss., must go by railroad, and the competition of such coal and coal from other Alabama mines in the Vicksburg market is with coal brought over long distances down the Ohio and Mississippi Rivers from Pittsburg, Pa., and other points in that mining district. HELD, That this is not competition between rail and water lines for transportation from a particular locality, but the competition of markets or mines for the supply of coal at Vicksburg, the force and effect of which is determined by commercial considerations peculiar to the business of shippers and wholly disconnected from the circumstances and conditions under which transportation is conducted. Fewell v. Richmond & D. R. Co., 7 I. C. C. 354.

(m) It is neither sound in principle nor equitable in practice for railway lines to create artificial differences in market conditions by an arbitrary differential in rates whereby the product of one section of the country is assigned to one market and the product of another section of the country to another market. Export Rates from Points E. & W. of Mississippi River v. 8 I. C. C. 185.

(n) A carrier can not lawfully establish and maintain an adjustment of rates which in practice prevents ship-

pers on its line from availing themselves of a principal market, which they have long been using, and confers a substantial monopoly upon a new market in which, for reasons of its own, it has greater interest. Savannah Bureau of Freight & Transportation v. L. & N. R. Co., 8 I. C. C. 377, 405.

(o) When a carrier makes rates to two competing markets, which give the one monopoly over the other, because it can secure reshipments from the favored locality and none from the other, it goes beyond serving its fair interest, and disregards the statutory requirement of relative equality as between persons, localities and particular descriptions of traffic. Savannah Bureau of Freight & Transportation v. Louisville & N. R. Co., 8 I. C. C. 377.

(p) It is the province of the Commission to interfere and secure, if possible, a fair adjustment in cases of unreasonable rates or unjust discrimination; but the Commission has no more authority to place competing millers in different states upon precisely the same footing than it has to equalize conditions in all localities and in every industry. Wichita v. Missouri P. R. Co., 10 I. C. C. 35.

(q) In the adjustment of rates as between places on its line, a carrier can not rightfully ignore the relative cost of the respective services, but there are other matters equal in importance to that of the cost of service, and often more controlling, which must also be considered, and this includes competition of carriers and competition of markets. Cannon v. M. & O. R. R., 11 I. C. C. 537, 542.

(r) Carrier may not control competition as between mills. Texas Cement Plaster Co. v. St. L. & S. F. R. R. Co., 12 I. C. C. 68.

IMPORTANT CASES SINCE 1908

(s) While market competition must always be considered and while it may alone in some cases, perhaps, justify the granting of relief under section 4, it does not justify such relief in this case. In re Rates on Salt, 24 I. C. C. 192, 194. See also Kellogg Toasted Corn Flake Co. v. M. C. R. R. Co., 24 I. C. C. 604, 606.

(t) Market competition may be considered in determining a violation of section 3, but it is no defense to a charge of undue prejudice that competition compels the low rate at the favored point when similar conditions obtain at the point discriminated against. North Fork Cannel Coal Co. v. A. A. R. R. Co., 25 I. C. C. 241, 246.

(u) To a certain extent carriers are justified in placing competitive markets upon an equal basis. Minneapolis Civic & Commerce Asso. v. C. M. & St. P. Ry. Co., 30 I. C. C. 663, 672.

(v) Jobbing points not concerned as to measure of the rate itself but interested solely as to relative adjustment between them. Rates on Sugar, 31 I. C. C. 495, 509.

(w) Efforts to equalize market competition may not justify or require rates unreasonably low nor permit unjust discrimination. Hide Rates to Los Angeles, Cal., 31 I. C. C. 633, 636.

(x) Only some peculiar circumstances or condition can warrant the maintenance of a commodity rate from a few points of manufacture in a limited locality. Westbound Lake-and-Rail Knit Goods Commodity Rates, 32 I. C. C. 54, 57.

(y) A rate adjustment should not be so made that shippers at one point or certain points can control the field in a territory properly tributary to another shipper. Kansas Wholesale Grocer Co. v. A. & W. Ry. Co., 32 I. C. C. 139, 141.

(z) Market competition between dealers located on two lines of railroad is of itself insufficient to warrant an order requiring carriers to equalize thei rrates. Nebraska State Railway Comm. v. U. P. R. R. Co., 34 I. C. C. 381, 382.

(aa) The Commission will not condemn lightly a system which gives satisfaction at many important markets. Kansas City Live Stock Exchange v. A., T. & S. F. Ry. Co., 34 I. C. C. 423, 427.

(bb) The competition of markets, of producers, and of rival carriers, especially by water, has resulted in a freight-rate system which can not be assumed to be so adjusted that rates effective result in earnings proportioned nicely to respective costs involved. 1915 Western Rate Advance Case, 35 I. C. C. 497, 562.

(cc) When carriers undertake to lay aside transportation conditions and to create a rate relationship based largely on commercial factors, they must do it consistently so as to avoid artificial and undue advantages for some shippers to the prejudice and disadvantage of others. Pardee Works v. C. R. R. Co. of N. J., 39 I. C. C. 162, 165.

(dd) If places A and B are competing in or for same markets, the fact that carrier serving them both has elected to make its rates to or from A with regard or relation to rates to or from another place, and its rates to or from B with regard or relation to rates to or from still another place, can not be accepted as justification for depriving either A or B of the benefits of its natural location or for unjust discrimination against either A or B. Goldcamp Mill Co. v. N. & W. Ry. Co., 39 I. C. C. 433, 444.

(ee) Competition alone is not the only factor to be considered in the fixing of groups and rates. To take into consideration commercial and competitive conditions only would be to disregard distance and transportation conditions and to revert to the discarded equalization of cost theory; and to carry this theory to its logical conclusion would compel the consideration of the cost to the industry of manufacturing its products, which, of course, is clearly beyond the Commission's powers under the law. The Grouping of Monessen and Donora, 48 I. C. C. 650, 653.

(ff) A carrier has no right to limit markets on behalf of industries located on its line. Pikes Peak Cons. Fuel Co. v. Director General, 55 I. C. C. 249, 251.

(gg) A mere showing of competition in a common market with a competitor enjoying a lower and preferential rate does not establish damage in the amount of the difference in rates on every shipment made at the higher rate regardless of the number of shipments at the lower rate made by the competitor. Hormel & Co. v. C. G. W. R. R., 56 I. C. C. 419, 425.

(hh) The freight rate is but one of the factors that effect the marketing of paper, and even though it be shown that a shipper is able to meet competition, that fact would not be evidence that he is receiving all of the transportation advantage to which he is entitled. Michigan Paper Mills Traffic Asso. v. A., T. & S. F. Ry. Co., 59 I. C. C. 649, 654.

(ii) It is not within the Commission's power to determine where certain cities or persons should transact their business and such power is not vested in carriers. As a matter of sound policy a carrier is not justified in attempting to restrict its traffic to movements between points on its own line. Lumber Rates from Pacific Coast, 63 I. C. C. 125, 128.

(jj) It is one thing to give consideration to the condition of all competing carriers in fixing rates between competitive points on a reasonable basis, but quite a different matter to lift the entire rate structure of an important territory solely for the purpose of enabling carriers operating through a different and higher-rated territory to compete at border with the carriers operating within that territory on a rate equality without reducing the rates at intermediate points in such higher-rated territory. Rates to, from, and between Points south of Ohio River, 64 I. C. C. 306, 329.

(kk) A complainant is entilted to an equal opportunity with its competitors in disposing of its product along the lines of carriers and may not be denied that opportunity because of a preference on their part for a longer haul and consequently greater revenue from their coal traffic. Roundup Coal Mining Co. v. Director General, 66 I. C. C. 249, 254.

(ll) It is well established that the inability of jobbing points generally to compete in their contiguous territory is a condition that may or should be considered in determining whether the rate adjustment to the jobbing points is just and reasonable and free from undue prejudice. Certain Teed Products Corp. v. A. T. & S. F. Ry., 73 I. C. C. 82, 86.

(mm) Rates may not be made solely with regard to the resultant ability of shippers to meet commercial competition. If carriers elect to reduce rates in order to enable shippers to find a market for their products in a particular field, they must, under the law, acord equal opportunity to competing shippers at other points who are dependent upon them for transportation. Pig Iron from Southern Producing Points, 74 I. C. C. 330, 334.

(nn) Thriving communities, all in the same general section of the country, striving for population, industry, and business growth, do not need elaborate evidence to show that they are entitled to relief if the rates are not properly related. Graham & Gila Counties Traffic Asso. v. A. E. R. R. Co., 81 I. C. C. 134, 143.

C. 448, 454; Minimum Weights on Furniture, 83 I. C. C. 64, 66; Cairo Board of Trade v. A. G. S. R. R. Co., 83 I. C. C. 761.

§33. Merger of Terminals.

IMPORTANT CASES SINCE 1908

(a) The cities of San Pedro and Wilmington, situated on the harbor of San Pedro, are about twenty-two miles distant from Los Angeles, which is inland. These communities were merged into the city of Los Angeles and connected therewith by a narrow strip of land half a mile in width, locally known as "the shoestring." HELD, while these communities have been merged into one municipality for the purposes of civil gov-

ernment and administration this does not necessarily merge the two into one community from a transportation point of view. Harbor City Wholesale Co. v. S. P. Co., 19 I. C. C. 323, 331.

§34. Mineral Lands Owned by Carrier.

See Reasonableness of Rates §18.

IMPORTANT CASES SINCE 1908

(a) Where the coal lands owned by a carrier are leased to an independent company, which makes a profit out of their operation, the carrier should not be permitted to use the value of such property for the purpose of swelling the amount upon which it may demand an income from rates to be paid by the public. City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 407.

ALL OTHER CITATIONS

City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 408; Pridham Co. v. S. P. Co., 30 I. C. C. 117, 120.

§34¼. Mixed Shipments.

IMPORTANT CASES SINCE 1908

(a) There is no provision of the Act and no rule of the Commission which prescribes what rate shall apply on a combination of commodities made in course of transportation. Mixed Car Dealers Asso. v. D. L. & W. R. R., 33 I. C. C. 133, 138.

§34½. Motives.

See Advanced Rates §14½; Reasonableness of Rates §18½.

IMPORTANT CASES SINCE 1908

(a) The intent or motive actuating carriers in the establishment of rates can not outweigh other considerations when determining their present reasonableness. Curry & Whyte Co. v. D. & I. R. R. Co., 32 I. C. C. 162, 164.

ALL OTHER CITATIONS

Norris v. St. L. & S. F. R. R. Co., 25 I. C. C. 416, 423; American Round Bale Press Co. v. A. T. & S. F. Ry. Co., 32 I. C. C. 458, 468.

§35. Municipal Charter or Investment.

CASES 1887-1908

(a) The right of one locality to equal rates with another is not diminished by municipal subscriptions for the building of the road. Lincoln Board of Trade v. Burlington & M. R. R. Co. (Com.), 2 I. C. R. 95.

IMPORTANT CASES SINCE 1908

(b) A municipal charter is not determinative of the relations which a community bears to a railroad which gives it service. Enterprise Fuel Co. v. Pa. R. R. Co., 16 I. C. C. 219, 223.

§36. Need for Revenue.

See Infra §50, §51, §58; Advanced §5, (4); Reasonableness of Rates §20, §30, §36.

IMPORTANT CASES SINCE 1908

(a) The fact that a road may be operated at a loss does not justify rates unreasonably high for the service performed. Railroad Commissioners of Iowa v. I. C. R. Co., 20 I. C. C. 181, 186.

(b) The relative lack of financial prosperity of carriers, considered in determining the reasonableness of a rate. Michigan Copper & Brass Co. v. D. S. S. & A. Ry. Co., 25 I. C. C. 357, 363.

(c) The question of revenue should be kept separate from the question of classification. Western Classification Case, 25 I. C. C. 442, 453.

ALL OTHER CITATIONS

Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 295; Boileau v. P. & L. E. R. R. Co., 22 I. C. C. 640, 655; R. R. Com. of Nev. v. N. C. O. Ry. Co., 22 I. C. C. 205, 210; Lindsay Bros. v. P. M. R. R. Co., 25 I. C. C. 368, 369; 1915 Western Rate Advance Case, 35 I. C. C. 497, 520, 522.

§37. New Lines.

See Advanced Rates §12 (2); Branch Lines §2; Cars and Car Supply.

IMPORTANT CASES SINCE 1908

(a) Rates on a branch line may lawfully be higher than on main lines through well-developed territory where the density of traffic is much greater Commercial Club of Omaha v. C. & N. W. Ry. Co., 19 I. C. C. 156, 159.

(b) A new line ought to be worth what it cost and ought to earn a return upon that amount. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 171.

(c) If the branch lines of a railroad are judiciously planned and constructed they should certainly be taken into account in determining the value of the railroad, for although they may not earn a large return upon the cost considered as an independent proposition, they do add to the traffic and the earning power

of the entire system; but it must be assumed that the new branches which have been constructed are good investments, otherwise they would not have been built, and that they will add to the earnings of the property in proportion as they have added to its cost. No increase in rate should be called for on this account. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 171.

ALL OTHER CITATIONS

Billings Chamber of Commerce v. C. B. & Q. R. R. Co., 19 I. C. C. 71, 75; In Re Advances in Rates—Eastern Case, 20 I. C. C. 243, 264.

§38. New Rates.

IMPORTANT CASES SINCE 1908

(a) Where a new short line meets a rate voluntarily established and long maintained by a long line, it must be assumed that if the rate is compensatory for the long line it is compensatory for a materially shorter line. Railroad Commissioners of Florida v. S. A. L. Ry., 16 I. C. C. 1, 5.

ALL OTHER CITATIONS

Maxwell v. W. F. & N. W. Ry. Co., 20 I. C. C. 197.

§39. Notices.

See Cars and Car Supply §9; Notice.

IMPORTANT CASES SINCE 1908

(a) While a long course of dealing between the shipper and the carrier involving daily or frequent shipments of automobiles from a definite station might so familiarize the carrier's agents at that point with the requirements of the shipper in the way of equipment, as to justify a holding that an order for a car for three automobiles was sufficient to charge the carrier with notice that a 36-foot car was wanted, such a relationship between shipper and carrier must be clearly made out before reparation can be awarded on that basis for the exaction by the carrier of the minimum for a larger car than the one alleged to be ordered. Pope Mfg. Co. v. B. & O. R. R. Co., 17 I. C. C. 400, 403.

(b) Where a lower export rate had been in effect for more than six months prior to the date of the first shipment, complainant was charged with notice thereof. Port Arthur Rice Milling Co. v. T. & Ft. S. Ry. Co., 28 I. C. C. 697, 700.

(c) The courts have repeatedly held that in so far as rulings of the Commission are administrative they may be availed of by any person in a position to do so. Plymouth Coal Co. v. L. V. R. R. Co., 36 I. C. C. 143, 144.

§40. Oral Testimony.

IMPORTANT CASES SINCE 1908

(a) The reasonableness of rates cannot be proven by categorical answers by which the witness testifies that the goods are worth so much per pound or the services worth so much a day. I. C. C. v. U. P. R. R., 222 U. S. 541, 549, 32 S. Ct. 108, 56 L. ed. 308.

(b) Although the oral testimony of witnesses as to the existence of a lawful rate is not the best evidence, still such evidence cannot be disregarded where it is admitted without objection. Kansas City So. Ry. v. Albers Comm. Co., 223 U. S. 573, 595, 32 Sup. Ct. 316, 56 L. ed. 556.

(c) All must concede weight and force to be attached to explanations given by railroad officials for fixing particular rates. Penn. Tobacco Co. v. Old Dominion S. S. Co., 18 I. C. C. 197 199.

ALL OTHER CITATIONS

Brown Bros. Mfg. Co. v. C. B. & Q. R. R. Co., 21 I. C. C. 513, 514; Penn. Tobacco Co. v. Old Dominion S. S. Co., 18 I. C. C. 197, 199.

§40½. Origin of Traffic.

See Advanced Rates §5 (8); Origin of Traffic; Through Routes and Joint Rates §9.

CASES 1887-1908

(a) Rates of carrier under desire to keep upon its line a material for which it has use or to keep the price low for its own advantage cannot be justified. Reynolds v. Western New York & P. R. Co., 1 I. C. R. 600, 685. 688.

(b) Carriers are allowed to prefer one locality to another under stress of competition in some instances, for the reason that the interest of the carrier requires it, but every preference is to a degree a hardship upon one community against which it is enforced, and that hardship should be, in a way, set over against the interest of the carrier. New York Produce Exchange v. B. & O. R. Co., 7 I. C. C. 612, 661.

IMPORTANT CASES SINCE 1908

(c) The right of a carrier to get long haul out of traffic which it originates is

subordinate to the public interest. Toledo Produce Exchange v. A. A. R. R. Co., 27 I. C. C. 536, 543.

(d) But a carrier cannot reserve to itself the long haul if to do so works to the detriment of shippers. Paducah Board of Trade v. I. C. R. R. Co., 29 I. C. C. 583, 591.

(e) A carrier's contention that it is entitled to the longer hauls described by it is without merit since it does not originate the traffic. West Lumber Co. v. St. L. & S. F. R. R. Co., 38 I. C. C. 401, 404.

(f) The theory that it is good business policy for a railroad, by adjustment of rates, to give its industries a practical monopoly of traffic on its line can not be sanctioned. Lumber to C. M. & St. P. Ry. Stations., 38 I. C. C. 587, 588.

(g) Certain carriers refused to establish joint rates because they desire to reserve markets on their lines for mills on their lines; but the right of a carrier to so reserve or restrict markets on its own lines has repeatedly been denied by the Commission. Eastern Oregon Lumber Producers' Asso. v. C. B. & Q. R. R. Co., 39 I. C. C. 316, 317, 318.

(h) The law upholds the carrier in retaining tonnage on its line where the transportation can be performed with reasonable dispatch and without undue discrimination. West Coast Lumber Mfrs. Asso. v. T. E. R. R., 45 I. C. C. 227, 229.

(i) While it is clearly in the interest of carriers to hold traffic which it originates to its own rails, by forcing it under pressure of lower rates to points of consumption on its own line, they should not be permitted to do so when the result is to restrict in number the markets that otherwise would be available to shippers. Kansas City Hay Dealers' Asso. v. C. R. I. & P. Ry. Co., 49 I. C. C. 350, 352.

(j) The act forbids the Commission to order a carrier to short haul itself unless its route is unduly circuitous. Routing on Fruits and Vegetables from Texas Points to Certain Defined Territories, 74 I. C. C. 575, 578.

(k) In absence of undue prejudice or an unduly circuitous route, the commission can not, because of jurisdictional limitation contained in paragraph (4) of section 15 of the act, require a carrier to turn traffic over to a connecting line when to do so would require it "to participate in a through route embracing substantially less than entire length of its line." The New York Harbor Case, 47 I. C. C. 643, 722. Miller Paper Co. v. P. R. R. Co., 80 I. C. C. 317.

(ka) A carrier originating or receiving traffic from connections should be allowed to carry it as far as it can before delivering it to a connecting line, if public interest does not suffer thereby. Routing on Coal from Western Maryland Ry. Mines, 66 I. C. C., 103. Intermediate Routing, 81 I. C. C., 272, 275.

(l) The Commission approves a settlement which relieves one carrier of traffic it does not want when entirely satisfactory to shipper. In re Wrapping Paper Rates from East Moss Point, Miss., Unrep. Op. A-546.

C. 643, 722; Proportional Class Rates from Interior Iowa Points, 83 I. C. C. 93, 97.

§41. Original Cost of Road.

See Classification; Reasonableness of Rates §15.

IMPORTANT CASES SINCE 1908

(a) The original cost of a carrier's property devoted to the public use is an element to be considered in determining the reasonableness of rates. Portland Chamber of Commerce v. O. R. R. & N. Co., 19 I. C. C. 265, 280.

ALL OTHER CITATIONS

Omaha Grain Exchange v. N. P. Ry. Co., 30 I. C. C. 572, 578.

§41½. Ownership of Shipment.

See Classification §12; Reasonableness of Rates §23; Reduced Rates §6.

IMPORTANT CASES SINCE 1908

(a) To determine whether or not it will transport a shipment the carrier cannot inquire into its ownership. St. Louis, Springfield & Peoria R. R. v. P. & P. U. Ry. Co., 26 I. C. C. 226, 237.

(b) The carrier's ownership or operation of a plant for treatment of ties can not affect its right and obligation to charge just and reasonable rates. Nashville Tie Co. v. L. & N. R. R. Co., 40 I. C. C. 377, 378.

§42. Panama Canal.

See Panama Canal.

IMPORTANT CASES SINCE 1908

(a) Competition, especially in view of the Panama Canal, must be a dominant factor in determining both the present rates and the future policy of transcontinental lines. City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 387.

§42¼. Paper Rates.

See Supra §25¾; Advanced Rates §5 (4) (7½); Reasonableness of Rates §24.

CASES 1887-1908

(a) To whatever extent long previous existence of lower rates in actual use may justify an inference or presumption that they are sufficiently high, the mere publication of such rates, under which there has been no appreciable movement of traffic, is not conclusive proof that they are reasonably remunerative to the carriers. R. R. Shiel & Company v. I. C. R. R., 12 I. C. C. 211, 215.

IMPORTANT CASES SINCE 1908

(b) The Commission should not ordinarily require a maintenance of rates on a given article if in point of fact no traffic was likely to move under them. In re Advances on Potatoes, 25 I. C. C. 247, 248.

(c) A comparison of actual rates with paper rates affords a very insecure basis for a finding of undue or unlawful prejudice against complainants in favor of Memphis or northern Mississippi Mills. Capital City Oil Co. v. Y. & M. V. R. R. Co., 39 I. C. C. 141, 145, 146.

(d) A rate loses its persuasive force when it is not shown that any substantial traffic moves under it. Molasses from Texas and Louisiana, 40 I. C. C. 435, 441.

(e) The fact that there is no movement of a commodity between two points is not justification for the permanent maintenance of rates out of line with the general adjustment. Paper rates serve no useful purpose. In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 625.

(f) In southwestern territory a great many commodity rates, substantially lower than the class rates, apply on most traffic moving in carloads, which has the effect of making the class rates largely paper rates. Certain-Teed Products Corp. v. A., T. & S. F. Ry. Co., 73 I. C. C. 82, 91.

ALL OTHER CITATIONS

Pacific Creamery Co. v. S. P. Co., Unrep. Op. A-356; Rates on Potash and Other Commodities, 29 I. C. C. 626, 628; Rates on Tropical Fruits from Gulf Ports, 30 I. C. C. 621, 631; Muskogee Refining Co. v. A. T. & S. F. Ry. Co., Unrep. Op. A-805; Platts v. N. Y., N. H. & H. R. R. Co., 43 I. C. C. 504, 508; Mosby v. Y. & M. V. R. R., 48 I. C. C. 499, 500; Meridian Cellulose Co. v. Director General, 57 I. C. C. 283, 284; Du Pont de Nemours & Co. v. Director General, as Agent, 58 I. C. C. 427, 428; Lookout Planing Mills v. Director General, as Agent, 58 I. C. C. 751; Rates Between Ohio River and Cumberland River Points, 61 I. C. C. 10, 15; Farley & Loetscher Mfg. Co. v. Director General, as Agent, 62 I. C. C. 721, 724; Rosin & Turpentine Export Co. v. A. C. L. R. R., 73 I. C. C. 141; Gulf Refining Co. of La. v. Director General, as Agent, 73 I. C. C. 729; Indiana State Highway Commission v. C. R. I. & P. Ry. Co., 83 I. C. C. 577, 578.

§43. Past Rates.

See Advanced Rates §5 (4); Supra §29; Reasonableness of Rates §25.

CASES 1887-1908

(a) A railroad company, while long maintaining a rate without the presence of competition on other than equal terms, is making evidence that such rate is not too low. Northwestern Iowa Grain & Stock Shippers Asso. v. Chicago & N. W. R. Co., (Com.), 2 I. C. R. 431.

(b) Where carriers frequently put in force and continue for considerable periods of time tariffs of rates and charges, it is a fair inference that such rates and charges are profitable. Re Rates & Charges on Food Products (Com.), 3 I. C. R. 93.

(c) In case of a change of delivery of shipments from Charleston to New York from New York to Jersey City, and the maintenance after the change of the same rates to the latter as had been in force to the former city for a series of years preceding the change, the carriers are charging for a less service the compensation which they had presumably deemed adequate for a greater, and the rates as applied to Jersey City are prima facie excessive. Truck Farmers' Asso. v. Northeastern R. R. Co., et al, 6 I. C. C. 295.

(d) The presumption as to the reasonableness of rates long kept in effect by carriers as a voluntary act on their part does not attach in a case where such rates have been established by carriers in compliance with a decision and order of the Commission. Proctor & Gamble Co. v. C. H. & D. Ry., 9 I. C. C. 440, 488.

(e) A presumption that rates are reasonable arises from the voluntary action of the carriers in keeping rates in effect for a long period. Procter & Gamble Co. v. C. H. & D. R. Co., 9 I. C. C., 440, 490.

(f) Where a rate is comparatively the lowest in its territory on a given article by freight and by reason thereof has been made the basis of reductions from competitive points, it will not be further reduced on the ground alone that it had at stated periods in the past been somewhat lower, unless it be shown that it is unreasonably high for the service performed. Warren Mfg. Co. v. Southern Ry., 12 I. C. C. 381, 387.

(fa) There are no prescriptive rights to past rates. Quimby v. Clyde S. S. Co. 12 I. C. C. 392.

IMPORTANT CASES SINCE 1908

(g) The Commission must be largely influenced in many instances in passing upon the reasonableness of a given rate by the adjustment which has grown up in the particular locality under consideration. In Re Advances in Rates for the Transportation of Fresh Meats, 23 I. C. C. 652, 655.

(h) Past rates can be considered in determining the reasonableness of a rate Augusta & Savannah Steamboat Co. v. O. S. S. Co. of Savannah, 26 I. C. C. 380, 387; Memphis Freight Bureau v. L. & N. R. R. C., 26 I. C. C. 402, 404; Robinson Land & Lumber Co. v. M. & O. R. R. Co., 26 I. C. C. 427, 429.

(i) Time has undoubted weight in rate matters. Mississippi River Case, 28 I. C. C. 47, 54.

(j) And where a particular rate has been in effect for several years, the presumption is that it is compensatory, and it will not be disturbed except upon proof that present conditions are such as to demand it. Chicago Switching Charges, 28 I. C. C. 677, 679.

(k) But when important and long-standing relation is sought to be changed justification must be clear and convinc-

ing. Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 594.

(l) In view of competitive elements and presumption attaching to long existing general adjustments, disparities in distance are not controlling. Eastern Fruit Growers Asso. v. B. & O. R. R. Co., 33 I. C. C. 343, 353.

(m) It is well settled that an increase in rates which are unreasonably low is not precluded by the fact that investments were made in expectation that such rates would be continued in effect. Duffney Brick Co. v. B. & M. R. R., 39 I. C. C. 118, 122.

(n) Where individual rates are attacked, the fact that in the past defendants operations have been profitable is not of controlling importance. Brundred Brothers v. Prairie Pipe Line Co., 68 I. C. C. 458, 460.

ALL OTHER CITATIONS

Burnham, Hanna, Munger Dry Goods Co., v. C. R. I. & P. Ry. Co., 14 I. C. C. 229, 312; Board of Mayor and Aldermen v. V. & S. W. Ry. Co., 15 I. C. C. 453, 458; Lagomarino-Grup Co. v. I. C. R. R. C. 635, 637; Paducah Board of Trade v. Director General, 53 I. C. C. 559; Tanner & Co. v. C. B. & Q. R. R. Co., 53 I. C. C. 401, 406; Memphis Southwestern Investigation, 55 I. C. C. 515, 543; National Council, Farmers' Assos. v. Director General, 56 I. C. C. 399; Phelps Dodge Corp. v. Director General, 57 I. C. C. 714, 718.

§43¼. Percentage Contracts.

See Percentage.

IMPORTANT CASES SINCE 1908

(a) Percentage contracts enabled carriers to obtain control of coal production of independent operators and prevent it from being sold in markets in competition with output from their own mines. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220.

(b) Rates based on a percentage of the selling price of a commodity whose selling price increased from year to year would naturally climb to an excessive basis. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 230.

ALL OTHER CITATIONS

Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 231.

§43½. Permanent Improvements.

IMPORTANT CASES SINCE 1908

(a) Improvements which required expenditures of large sums of money, which have added to the efficiency of the service, and therefore to its value to the commuters, are entitled to some recognition in determining the reasonableness of the increased commutation rates. Commutation Rate Case, 21 I. C. C. 428, 444.

(b) If the carriers were to equip themselves with cars, motive power, tracks, and terminals so as to meet at any moment the maximum demand for transportation, the shipping public would be obliged to pay interest upon that investment, and for the maintenance of these facilities. In re Mine Ratings, 25 I. C. C. 286, 293.

(c) Where extensive improvements are going on, a higher operating cost is necessarily involved. Trains are delayed, the free movement of traffic unin-

terrupted, and many unusual expenses incurred. L. & N. R. R. Coal and Coke Rates, 26 I. C. C. 20, 26.

(d) Traffic moving during a given year should not be made to bear the entire cost of permanent improvements and betterments. L. & N. R. R. Coal and Coke Rates, 26 I. C. C. 20, 26.

(e) Rebuilding and strengthening bridges and trestles and laying heavier rails are expenses incident to increased tonnage and are indicative of prosperity rather than distress. Memphis Freight Bureau v. L. & N. R. R. Co., 26 I. C. C. 402, 405.

(f) By reason of the great cost of such structures, a bridge has been regarded more or less generally as adding a constructive mileage to the carrier's line. East Dubuque Supply Co. v. I. C. R. R. Co., 28 I. C. C. 425, 427.

(g) Ownership of bridge does not render carriers using it any the less liable to contribute to its maintenance in proportion to the use made of it. Norman Lumber Co. v. L. & N. R. R. Co., 29 I. C. C. 565, 570.

(h) For unproductive betterments a railroad, no doubt, is justified in accumulating a reasonable amount of surplus. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 271.

ALL OTHER CITATIONS

Paducah Board of Trade v. I. C. R. R. Co., 29 I. C. C. 583, 591; Lum. v. G. N. R. R. Co., 33 I. C. C. 541, 550; New York-Jersey City Ferry Rates, 37 I. C. C. 103, 110; City of Astoria v. S. P. & S. Ry. Co., 38 I. C. C. 16, 22, 23, 25; Fruits and Vegetables from Norfolk, Va.,38 I. C. C. 252, 256; Southeastern Lumber, 42 I. C. C. 548, 554.

§43½a. Physical Valuation.

See Physical Valuation.

ALL CITATIONS

Reduced Rates, 1922, 68 I. C. C. 676, 684, 685; Indiana Passenger Fares of C., L. S. & S. B. Ry. Co., 69 I. C. C. 180, 183

§43¾. Population.

ALL CITATIONS

Export Grain from Colorado, 42 I. C. C. 114, 118.

§44. Previous Haul on Raw Material.

IMPORTANT CASES SINCE 1908

(a) The fact that freight has been shipped once and paid one rate cannot be taken into consideration in fixing charges for a subsequent transaction. in Re Reduced Rates on Returned Shipments, 19 I. C. C. 409, 416.

(b) While the fact that a given line both brings in the raw materials for a furnace and likewise serves the community which such furnace has built up may warrant such line in making some moderate allowance in the construction of its transportation charges, it cannot proceed to the point of establishing charges so disproportionate as by comparison to be unjust or unreasonable. Low Moor Iron Co. v. C. & O. Ry. Co., 30 I. C. C. 615, 619.

ALL OTHER CITATIONS

Paragon Plaster Co. v. N. Y. C. & H. R. R. R. Co., 19 I. C. C. 480; Pacfic Creamery Co. v. S. P. Co., Unrep. Op. A-356; Am. Round Bale Press Co. v. A. T. & S. F. Ry. Co., 32 I. C. C. 458, 468; Knight Woolen Mills v. C. & N. W. Ry. Co., 32 I. C. C. 490, 491; Delphos Mfg. Co. v. P. Co., 33 I. C. C. 400, 401; Carey Mfg. Co. v. G. T. W. Ry. Co., 36 I. C. C. 203, 204; Oklahoma Traffic Assn. v. A. & S. Ry. Co., 36 I. C. C. 329, 347.

§44¼. Prior Decision of Commission.

See Advanced Rates §14¾; Blanket Rates §4; Panama Canal; Previous Decisions of Commission; Through Routes and Joint Rates.

CASES 1887-1908

(a) A decision of the Commission in one case is not necessarily controlling in all similar cases. Such decision hardly has the effect of an estoppel, and there is not the same reason for applying the maxim stare decisis which exists in courts of law. Board of Railroad Commissioners of Kansas v. A. T. & S. F. R. Co., 8 I. C. C. 304, 308.

(b) A decision by the Commission in one case is not necessarily controlling in all similar cases. Such decision hardly has the effect of an estoppel, and there is not the same reason for applying the maxim stare decisis which exists in courts of law. But when the relation in freight rates determines where and how business should be done, the decisions of this Commission fixing or approving a given relation should only be reversed for imperative reasons. Board of R. Comrs. v. Atchison, T. & S. F. R. Co., 8 I. C. C. 304.

(c) One case can seldom be an exact

precedent for another, for each traffic situation presents points of difference and each complaint must be considered upon its own peculiar facts. City of Danville v. Southern Ry. Co., 8 I. C. C. 409, 429.

(d) Decision of Interstate Commerce Commission not necessarily controlling in all similar cases. Board of R. Comrs. v. Atchison, T. & S. F. R. Co., 8 I. C. C. 304.

(e) A decision by the Commission in one case is not necessarily controlling in all similar cases. But when the relation in freight rates determines where and how business should be done, the decisions of the Commission fixing or approving a given relation should be reversed only for imperative reasons. Board of R. Comrs. v. Atchison, T. & S. F. R. Co., 8 I. C. C. 304.

(f) One case can seldom be an exact precedent for another, for each traffic situation presents points of difference, and each complaint must be considered upon its own peculiar facts. Danville v. Southern R. R. Co., 8 I. C. C. 409.

(g) Until general review, rates fixed with reference to old cases. Dallas Freight Bureau v. G. C. & S. F. Ry. Co., 12 I. C. C. 223.

(h) The Commission having upheld a rate of $1.15 per 100 pounds on cotton goods from southern cotton mills to Pacific ports, in Enterprise Manufacturing Company v. Georgia R. R. Co., 12 I. C. C. Rep. 130, and held a rate of 10 cents higher to Asiatic ports from the same points to be reasonable, in China & Japan Trading Company v. Georgia R. R., et al, 12 I. C. Rep. 236, the latter case is followed and the rate of $1.25 per 100 pounds under present condition again approved. Enterprise Mfg. Co., et al. v. Georgia R. R. Co., et al, 12 I. C. C. 451.

IMPORTANT CASES SINCE 1908

(i) When the Commission, upon a given state of facts, reaches a conclusion regarding a certain rate, it will adhere to that conclusion in subsequent proceedings regarding the same rate, unless (a) some new facts are brought to its attention, (b) conditions are shown to have undergone a material change, or (c) it proceeded on a misconception or misapprehension. Traffic Bureau of Nashville v. L. & N. R. R. Co., 43 I. C. C. 366, 369.

(j) In determining a proper level of rates for the future consideration must be given the commission's findings made in other proceedings affecting the rates. South Dakota R. R. Comrs. v. Director General, 73 I. C. C. 347, 356.

(k) Approval by the commission of rate schedules submitted in Transcontinental Commodity Rates, 48 I. C. C., 79, was general, individual rates not being passed upon. Under no circumstances can commission's orders therein be interpreted as warranting rate increase in violation of contractual obligation previously assumed by carriers parties thereto. Brenner Lumber Co. v. Director General, as Agent, 81 I. C. C. 241, 244.

ALL OTHER CITATIONS

Wheland Co. v. A. G. S. R. R. Co., 43 I. C. C. 53, 54; Mississippi Dairymen's Asso. v. I. C. R. R., 44 I. C. C. 297, 298; Iron Ore Rate Cases, 44 I. C. C. 368, 369; Traffic Bureau of the Toledo C. C. v. A. A. R. R., 45 I. C. C. 527; Swift & Co. v. B. & O. R. R., 45 I. C. C 8, 10; Beall & Co. v. O. W. R. R. & Nav. Co., 47 I. C. C. 474; Fort Smith Com. Co. v. K. C. S. Ry., 50 I. C. C. C. 213, 217; Swift & Co. v. Director General, as Agent, 66 I. C. C. 409; Beaumont Chamber of Commerce v. A. & W. Ry. Co., 66 I. C. C. 544; Brooks-Scanlon Lumber Co. v. Director General, as Agent, 73 I. C. C. 109; Iten Biscuit Co. v. Director General, as Agent, 73 I. C. C. 281; Wilson & Co. v. Director General, as Agent, 73 I. C. C. 438; South Dakota Ry. Commrs. v. A. & W. Ry. Co., 74 I. C. C. 295; R. Mohr & Sons v. New England Steamship Co., 80 I. C. C. 205.

§44½. Public Interest.

See Advanced Rates §14; Blanket Rates §4; Panama Canal Act; Public Interest; Through Routes and Joint Rates II.

CASES 1887-1908

(a) Carriers in making rates can not arrange them from an exclusive regard to their own interests, but must respect the interests of those who may have occasion to employ their services, and subordinate their own interests to the rules of relative equality and justice which

the act prescribed. Freight Bureau v. C. N. O. & T. P. R. Co., 4 I. C. C. 592, 615.

(b) The welfare of the communities occupying the localities where goods are delivered is to be considered, as well as that of the communities which are in the locality of the place of shipment, in considering the question of undue preference or disadvantage between localities. Texas & P. R. Co. v. Interstate Commerce Commission (U. S. Sup.) 5 I. C. R. 405.

(c) The public at large is greatly interested in competition, and the more favorable prices which it brings, and for that purpose the public is interested in keeping open the larger markets of the country to all points of production and supply. Where traffic from a distance can compete with traffic nearer the market the public is interested in having the greater distance traffic carried at rates which will enable it to compete with the traffic which is nearer the market. Interstate Commerce Commission v. L. & N. R. R. Co., 5 I. C. R. 656.

(d) The carrier's business of transporting goods involves the rights of, and the necessity of doing justice to, three parties. The interest of the seller at the point of departure, the interest of the carrier, and the interest of the trade or consumer at the point of delivery, are all concerned in a given transaction, and must be duly considered by a tribunal or court in the decision of any case involving the carrier's freight tariff. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(e) It is the duty of the Commission to consider all circumstances and conditions that reasonably apply to the situation, the legitimate interests of the carrying companies as well as those of traders and shippers and the welfare of the communities at localities where the goods are delivered as well as that of communities in the places of shipment. (Texas & P. R. Co. v. Interstate Commerce Commission, 162 U. S. 197, 40 L. ed. 940, 5 I. C. C. Rep. 405, 16 Sup. Ct. Rep. 666), and to give effect to this rule a much broader view must be taken than that of the competition of carriers alone. Mayor and Council of Tipton v. L. & N. R. R. Co., et al, 9 I. C. C. 160.

IMPORTANT CASES SINCE 1908

(f) The public interest can be best served by careful consideration of all facts which bear upon reasonableness of rates. Union Tanning Co. v. S. Ry. Co., 26 I. C. C. 159, 164.

(g) The public interest is always considered in determining rate question Wichita Board of Trade v. A. & S. Ry. Co., 29 I. C. C. 376, 380.

(h) So the trap-car service has developed until the movement of less-than-carload shipments by this means is of great magnitude, and with respect to which commercial and transportation interests of the country are vitally interested. Trap or Ferry Car Service Charges, 34 I. C. C. 516, 527.

(i) The distribution of terminals tends to prevent undue concentration of industries and consequent concentration of population, thus aiding the solution of one of our social problems. Car Spotting Charges, 34 I. C. C. 609, 619.

(j) The public interest is served in many ways by permitting carriers to use tracks of industrial plants as a part of their terminal facilities. Car Spotting Charges, 34 I. C. C. 609, 619.

(k) Arguments of hardship and inconvenience to carriers should not be given too great weight to the exclusion of the interests of the employees and of the public. Extension of Time to Comply with Safety Appliance Acts, 36 I. C. C. 370, 375.

(l) The movement in carloads also results in economy of transportation facilities, and is therefore greatly to be desired in the interests of the public as well as the carriers. Brunswick-Balke Collender Co. v. C. G. W., 56 I. C. C. 340, 342.

(m) In the absence of a showing that the public interest would not suffer by routing traffic through a specified point, a carrier should be allowed to handle traffic in its possession over its own line as far as it can. Routing Coal from Western Maryland Mines to Eastern Destinations, 74 I. C. C. 127.

C. 622, 624; In the Matter of Private Cars, 50 I. C. C. 652, 676; Boston Wool Trade Asso. v. B. & A. R. R. Co., 78 I. C. C. 178, 185.

§44¾. Public Records.

See Supra §39.

IMPORTANT CASES SINCE 1908

(a) Any public record which contains matter relevant to the issues may be introduced in evidence in any hearing before the Commission. And division sheets or statements that are filed with the Commission must be considered public records. Filing Divisions on Railway Fuel Coal, 38 I. C. C. 169, 170.

§45. Profit to Shipper.

See Infra §62; Advanced Rates §6 (6) §13; Express Companies §24; Reasonableness §27.

CASES 1887-1908

(a) The rate of compensation which railroad companies may lawfully receive for transportation services cannot be so limited that the shipper may in all cases realize the actual cost of production. In the Matter of Alleged Excessive Freight Rates and Charges on Food Products. 3 I. C. C. 93, 101.

(b) The cost of the production of pig iron at a furnace situated like that of petitioner on the Hudson River in the State of New York is much greater than at Youngstown, Ohio, or Birmingham, Alabama, or at other points in the west and south; and while the aggregate rate charged petitioner to New England mills is a great deal lower than the aggregate rate charged on these western and southern irons to the same mills, yet it is not sufficiently so to overcome the difference in the cost of production; and the consequence is that petitioner finds itself at a serious disadvantage in competing with these western and southern irons in the markets and mills of the New England States where there is a very great demand for this class of property. Pougekeepsie Iron Co. v. N. Y. C. & H. R. Co., 3 I. C. R. 248.

(c) Where the market price yields but a scant return for the labor and expense of production, the cost of transportation needs to be as moderate as may be consistent with justice to the carrier. Newland, Hauschild & Reeder v. N. P. R. Co., 4 I. C. C. 474, 481.

(d) In passing upon the reasonableness of rates, the question whether they afford the carrier a proper return for the service rendered is to be considered as well as the result of the business to the shipper or producer of the traffic. Loud v. South Carolina R. Co., 4 I. C. C. 205, 211.

(e) Where the market price yields but a scant return for the labor and expense of production, the cost of transportation needs to be as moderate as may be consistent with justice to the carrier. Evans v. U. P. R. Co., 6 I. C. C. 520, 547.

(f) The varying cost to shippers in delivering freight to the carrier for shipment can have no bearing in a case which has sole reference to what are unlawful rates from the carriers stations. Chicago Fire Proof Covering Co. v. C. & N. W. R. Co., 8 I. C. C. 316, 330.

(g) A rate adjustment by a carrier in favor of a mine owned by it is not justified, as against an independent coal operator, by the fact that the output of the carrier's mine has less value for domestic purposes, where its cost of mining is much less. McGrew v. Missouri P. R. Co., 8 I. C. C. 630.

IMPORTANT CASES SINCE 1908

(h) A railway may not impose unreasonable rates merely because the business of the shipper is so profitable he can pay it. R. R. Com. of Kans. v. A. T. & S. F. Ry. Co., 22 I. C. C. 407, 410.

(i) The profit accruing to the shipper

on traffic hauled is not a recognized basis in the fixing of a rate. Newport Mining Co. v. C. & N. W. Ry. Co., 33 I. C. C. 645, 656.

(j) And reasonableness of rates on low-grade commodities is not to be gauged by the ability or inability of shippers to market their products with profit. Nashville Tie Co. v. L. & N. R. R. Co., 40 I. C. C. 377, 381.

(k) If it is true that the Commission may find existing rates unjust and unreasonable and require that they be reduced below what would be justified by standards heretofore recognized, because an industry is not prospering, then the converse must be true, that at times when the industry prospers the Commission may find justified rates higher than those which under accepted standards would be just and reasonable. The foundations of what is just and reasonable are not set on such shifting sands. National Live Stock Shippers' League v. A., T. S. F. Ry. Co., 63 I. C. C. 107, 116.

§46. Rate to Carrier as Shipper or Consignee.

See Discrimination §6.

IMPORTANT CASES SINCE 1908

(a) If carriers insist upon making preferential rates to each other they may confidently expect such voluntary action on their part will be accepted and taken as evidence of unreasonableness of higher rates which they may undertake to enforce against other shippers. Hitchman Coal & Coke Co. v. B. & O. R. R. Co., 16 I. C. C. 512.

§47. Rate via Competing Carrier.

See Comparative Rates; Equalization of Rates §4 (2); Rate Via Competing Line; Reasonableness of Rate §27½, §27¾; Reparation §11; Routing and Misrouting §4½, §5, §5½; Through Routes and Joint Rates §15½.

CASES 1887-1908

(a) A carrier operating parallel lines and accepting lower rates on one line should make corresponding charges on other line. Board of Trade Union v. Chicago, M. & St. P. R. Co., 1 I. C. R. 608.

(b) Rates and charges in force on lines of rival companies or on different branches or lines of the same company

are entitled to consideration in connection with the question of reasonable charges for transportation services rendered under like conditions. C. O. Morrel v. Union Pacific Ry. Co., 6 I. C. C. 121.

IMPORTANT CASES SINCE 1908

(c) The rate of one comepting line is not necessarily the measure of reasonableness of the rate of another competing line. Ryland & Brooks Lumber Co. v. C. & O. Ry. Co., 21 I. C. C. 520, 521; Simon Cooke Co. v. W. R. R. Co., 21 I. C. C. 563, 564.

(d) A lower rate via a longer route is no measure of reasonableness, in absence of other evidence, of higher rate via shorter route. Carstens Packing Co. v. U. P. R. R. Co., 22 I. C. C. 8, 10.

(e) Nor is the subsequent reduction of the rate over the particular route sufficient to establish the unreasonableness of the previous rate. Tallahatchie Lumber Co. v. Y. & M. V. R. R. Co., 38 I. C. C. 501, 502.

(f) The mere fact that the rate between two points is higher over one route than over others does not of itself establish that the higher rate is unreasonable. Roxana Petroleum Company of Oklahoma v. Director General, 68 I. C. C. 77, 80.

(fa) The existence of a lower rate over another route or routes is insufficient to establish the unreasonableness of the rate applicable over route of movement. Shafer Lumber Co. v. Director General, 88 I. C. C. 472, 473.

(g) The fact that two roads use same tracks does not follow same rate applies. Hedden-Clark Lumber Co. v. B. & O. R. R. Co., Unrep. Op. A-301.

C. 135; International Paper Co. v. D. & H. Co., 50 I. C. C. 75; Martin Brokerage Co. v. S. P. Co., 51 I. C. C. 91, 93; Dewey Bros. Co. v. S. Ry., 51 I. C. C. 160; Syracuse Chamber of Com. v. N. Y. C. R. R., 51 I. C. C. 197, 198; Jennings-Jarrett Co. v. Director General, as Agent, 59 I. C. C. 93; Western Stoneware Co. v. C. B. & Q., 63 I. C. C. 215, 216; South Chester Tube Co. v. M. K. & T. Ry., 64 I. C. C. 78, 80; Pfeister & Vogel Leather Co. v. Director General, 64 I. C. C. 437, 438; Great Lakes Dredge & Dock Co. v. Director General, 68 I. C. C. 274, 276; Salem Glass Works v. Director General, 68 I. C. C. 643, 644; Midland Linseed Products Co. v. Director General, 69 I. C. C. 753, 756; Warren Oil Co. of Pa. v. Director General, as Agent, 73 I. C. C. 745; Northwestern Traffic & Service Bureau v. C. & N. W. Ry. Co., 80 I. C. C. 81 Matthews & Sons v. G., M. & N. R. R. Co., 80 I. C. C. 99; Kempner v. Director General, as Agent, 80 I. C. C. 347.

§48. Rebates.

See Crimes.

IMPORTANT CASES SINCE 1908

(a) The granting of a rebate does not raise a presumption that the lawfully established rate is unreasonable by the amount of the concession. Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 15 I. C. C. 370, 373.

(b) The fact that rebates were granted has no very direct bearing upon the reasonableness of the rate. In Re Transportation of Wool, Hides and Pelts. 23 I. C. C. 151, 163.

(c) Long continued granting to allied coal companies concessions from and offsets against established tariff rates, presents strong evidence that rates are excessive. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 283.

§48½. Repair of Equipment.

See Cars and Car Supply §32⅛.

IMPORTANT CASES SINCE 1908

(a) Upon the resumption of corporate control and operation, the Pennsylvania R. R. Co. awarded to the Baldwin Locomotive Works a contract for the repair of 200 locomotives, while maintaining shops on its own line for such work. Upon investigation, the cost to the carrier was over $3,000,000 in excess of the cost at which the work might have been done in its own shops, and included work paid for twice in some instances. Such work could have been done in the carrier's own shops within a reasonable time by an appropriate coordination of efforts and reasonable added exertion. Construction and Repair of Ry. Equipment: Penn. R. R. Co., 66 I. C. C. 694.

(b) Report relates to locomotive equipment of the Chicago & Northwestern Ry. and is pursuant to an investigation, instituted upon motion of the Commission, to determine whether common carriers by railroad subject to the act

have caused or are causing certain of their locomotives or other equipment to be constructed or repaired at construction or repair shops other than their own, or have purchased or are purchasing from or through such shops material and supplies used in such construction or repair, at costs in excess of those for similar work in their own shops, including material and supplies therefor, in disregard of efficient and economical management, resulting in unreasonable expenditures, or otherwise contrary to law. At the beginning of federal control respondent owned 1,991 locomotives, of which number 175 or 8.79 percent were out of service awaiting classified or unclassified repairs. March 31, 1920, the total ownership had increased to 2,045, of which 386 or 18.87 percent were similarly out of service. This was when federal control ended. In 1919, with the approval of the railroad administration, 30 locomotives were sent to the American Locomotive Co., and in 1920, 15 more were forwarded. Respondents seven shops were undermanned, and persistent efforts to increase the machinist and other shop forces met with little success. Needed repair material was difficult to obtain. Respondent has refused to pay the bills of the American, covering the last 35 locomotives repaired deeming them excessive, and litigation will no doubt follow. HELD, the record abundantly establishes the critical condition of respondents motive power and respondents inability to cope with the situation in its own shops, and, subject to the possibility that preliminary estimates might have resulted in better terms, fully justifies the resort to outside shops for assistance. Construction and Repair of Railway equipment, C. & N. W. Ry., 69 I. C. C. 143.

(c) This report relates to locomotive equipment of respondent Seaboard Air Line Ry. and is pursuant to an investigation to determine whether common carriers by railroad subject to the act have caused or are causing certain of their locomotives or other equipment to be constructed or repaired at construction or repair shops other than their own, or have purchased or are purchasing from or through such shops material and supplies used in such construction or repair, at costs in excess of those for similar work in their own shops, including material and supplies therefor, in disregard of efficient and economical management resulting in unreasonable expenditures or otherwise contrary to law. No question concerning the construction of locomotives is here involved but, beginning soon after the end of federal control, respondent entered into various contracts with industrial concerns under which 51 of their locomotives were given class repairs, at an aggregate cost of $813,424.41. Testimony of respondent is that the motive power was returned at the end of federal control in a condition much inferior to that in which it had been taken over by the Government. The shop records indicate that, with the exception of those made at the Baldwin plant, the contract repairs were generally lighter than the same class of repairs on the same classes of locomotives in respondents shops, while those at the Baldwin plant were average class E. repairs. The determinative facts in the record are few. There were more locomotives on the line at the end than at the beginning of federal control, which increased respondents capacity to move traffic, but all were actively engaged and likewise increased the demands upon the shops by so much. The figures also indicate that the shops were so fully utilized from the time private control was resumed and the striking increase in traffic on the line began that no substantial increase in the output would have been reasonably possible. HELD, it does not appear that the awards of the contracts were unjustified. Construction and repair of Ry. equipment, S. A. L. Ry., 69 I. C. C. 151.

ALL OTHER CITATIONS

Construction and Repair Equipment, A. C. L. R. R. Co., 66 I. C. C. 727; Construction and Repair of Railway Equipment, N. Y. C. R. R. Co., 66 I. C. C 732.

§19. Reproduction Value of Road.

See Reasonableness of Rates §26.

CASES 1887-1908

(a) While the value of the property transported is an important element in rate making, there are others, such as the cost of the service, net revenue of the carriers from the traffic involved, character of the goods as being perishable and liable to breakage, and others matters. Duncan v. A. T. & S. F. R. Co., 4 I. C. C. 385, 393.

(b) The value of the entire property of a road can shed but little, if any, light upon the question whether the rate on one among thousands of articles of traffic yields its proper proportion of a fair return upon that value, and, moreover, the voluminous and conflicting testimony in this case on that subject does not enable the Commission to determine the value of defendant's respective properties. Central Yellow Pine Asso. v. Illinois C. B. Co., 10 I. C. C. 505.

(c) The value of the entire property of a road employed in the public convenience can shed but little, if any, light upon the question whether the rate on one among thousands of articles of traffic yields its proper proportion of a fair return upon that value. Central Yellow Pine Asso. v. I. C. R. R. 10 I. C. C. 505, 538.

IMPORTANT CASES SINCE 1908

(d) The cost of reproduction may be considered in determining the reasonableness of a rate. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 170; Portland Chamber of Commerce v. O. R. R. & N. Co., 19 I. C. C. 265, 280.

(e) Work by the Commission has not as yet sufficiently advanced to afford definite knowledge of the true value of railroad properties involved in this proceeding. The Commission has been obliged to determine the justice and the reasonableness of rates without having available for its use authoritative valuations of the carriers' property. 1915 Western Rate Advance Case, 35 I. C. C. 497, 504.

(f) In establishing rates for the two-year period prescribed by paragraph (3) of section 15a, the Commission has no discretion as to the amount of fair return except that it may add to the per centum provided by law "a sum not exceeding one-half of 1 per centum of such aggregate value . . ." Having determined the per cent, the Commission is called upon to perform the administrative task of establishing rates that will yield in the aggregate, as nearly as may be that per cent until March 1, 1922. Increased Rates, 1920, 58 I. C. C. 220, 226.

(g) But while the valuation of railroads under section 19a is still incomplete, the work has progressed so far that the results are of value and informative in reaching the determination the Commission is now required to make, and consideration given thereto. Increased Rates, 1920, 58 I. C. C. 220, 228.

ALL OTHER CITATIONS

Boileau v. P. & L. E. R. R. Co., 22 I. C. C. 640, 652; City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 403, 415; Lum. v. G. N. Ry., 33 I. C. C. 541, 549, 552; Lum. v. G. N. Ry. Co., 33 I. C. C. 541, 551, 553; City of Astoria v. S. P. & S. Ry. Co., 38 I. C. C. 16, 21; Railroad Commission of Louisiana v. A. H. T. Ry. Co., 41 I. C. C. 83, 154; City of East Liverpool, Ohio, v. S. E. L. & B. V. T. R. R., 51 I. C. C. 563, 566, 567; Increased Rates, 1920, 58 I. C. C. 220, 229; Constructive Mileage over Poughkeepsie Bridge, 66 I. C. C. 230, 232;

§50. Return on Investment.

See Supra §36; Infra §51; Advanced Rates §6.

CASES 1887-1908

(a) That railroad investments may be as secure as other property, the reasonable rates should be liberal until earnings are sufficiently large for a fair return on actual expenditure. Newland v. Northern Pacific R. Co., 4 I. C. R. 474.

(b) Railroad companies have the right to earn a proper return upon some investment; just what has not been very definitely determined; but in earning such return they must operate their properties in accordance with the provisions of the statute forbidding discrimination between localities and charging more for the short haul than for the long haul. Brewer & Hanleiter v. L. & N. R. Co., 7 I. C. C. 224, 225, 238.

(c) The fact that a rate over a road or line in one direction is materially higher than the rate on the same class of traffic over the same road or line and between the same points in the opposite direction does not, as in case of hauls over the same line in the same direction, establish prima facie the unreasonableness of the higher rate. MacLoon v. B. & M. R. R., 9 I. C. C. 642, 645.

IMPORTANT CASES SINCE 1908

(d) Granting that those who assume great risks are entitled to commensurate rewards if their ventures prove successful, one can not ignore the fact that where a risk assumed by carriers has been richly compensated in the past, when the original investment has been returned several times, and the property

greatly improved out of earnings, this element of risk should not be considered for the future. Lum. v. G. N. Ry., 33 I. C. C. 541, 556.

(e) Transcontinental railroads can fairly expect such consideration as will permit them to continue to earn a reasonable return upon their property devoted to public use. Transcontinental Rates, 46 I. C. C. 236, 269.

(f) By "profit" is meant a return upon investment in the proportion that is devoted to the service. Reconsignment Case, 47 I. C. C. 590, 600.

(g) Carriers have a right to demand and it is the duty of the Commission to approve, just and reasonable rates sufficient to yield fair returns upon the value of the property devoted to public use after necessary expenditures for wages, fuel, and supplies. Unification of Railroad Operation, 47 I. C. C. 757, 759.

(h) But the law neither provides nor contemplates that short lines shall receive compensation out of line-haul rates that will yield a return upon the value of the carrier property. They are certainly not entitled to such returns from that source upon the value of facilities which are not used by or open to the public generally. Wyandotte Southern Ry. Co., 61 I. C. C. 756, 760.

(i) It has been held by the courts that a rate may not lawfully be fixed by a regulatory tribunal which is based alone on the out-of-pocket costs ascribable to that particular traffic, but that to be lawful the rate must be sufficient to cover a ratable proportion of the average cost of freight traffic generally, including a return on the property devoted to public service. To hold otherwise would compel the performance of a certain specified kind of service at less than average cost. The extension of this principle to other classes of traffic, if pursued far enough, would bankrupt the road. Transcontinental Cases of 1922, 74 I. C. C. 48, 69.

(j) In the opinion of the Commission each branch of the service should contribute its share of the cost of operation and of return upon the property devoted to the service of the public. Express Rates 1922, 89 I. C. C. 297, 304.

ALL OTHER CITATIONS

C. C. 200, 203; Reduced Rates 1922, 68 I. C. C. 676, 680.

§51. Revenue of Road.

See Supra §36; Advanced Rates §5 (4), §7 (7), §6 (6), §15; Express Companies §24; Reasonableness of Rates §11, §30, §36.

CASES 1887-1908

(a) A fundamental rule of equity as well as of the statute is that all business done by a carrier must yield some profit, so that other business is not made to bear a burden that does not belong to it. Lehmann Higginson & Co. v. S. P. Co., 3 I. C. C. 80, 89.

(b) That railroad investments may be as secure as other property, the reasonable rates should be liberal until earnings are sufficiently large for a fair return on actual expenditure. Newland v. Northern P. R. Co. (Conn.), 4 I. C. R. 474.

(c) That railroad investments may be as secure as other property, the reasonable rates should be liberal until earnings are sufficiently large for a fair return on actual expenditure. A. S. Newland v. Northern Pacific R. R. Co., et al, 6 I. C. C. 131.

(d) The financial necessities and conditions of a carrier should be given proper weight in fixing rates, but are not controlling to the extent that, independent of other circumstances, any rates are reasonable until the earnings are sufficient to operate the road and meet all the obligations of the carrier. Jerome Hill Cotton Co. v. Missouri, K. & T. R. Co., 6 I. C. C. 601.

(e) The financial necessities and conditions of the carrier should be considered and given proper weight in fixing rates, but are not controlling to the extent that independent of other circumstances any rates are reasonable until the earnings are sufficient to operate the road and meet all the obligations of the company. Jerome Hill Cotton Co. v. M. K. & T. R. Co., 6 I. C. C. 601, 622.

(f) Railroad companies have the right to earn a proper return upon some investment; just what has not been very

definitely determined; but in earning such return they must operate their properties in accordance with the provisions of the statute forbidding discrimination between localities and charging more for the short than for the long haul. Brewer & Hanleiter v. Louisville & N. R. Co., 7 I. C. C. 224.

(g) Transportation charges should be liberal until the earnings are fully sufficient for a fair return on actual investment, but it does not follow that rates long maintained and grossly discriminative must be continuous or may be lawfully exacted year by year. Cary v. Eureka Springs R. Co., 7 I. C. C. 286.

(h) If a rate is so high as to yield a large profit to a carrier and to deprive its patrons of any profit and make their business ruinous then the interests of its patrons and the general public interest as well require the carrier to remit a portion of its profits and accept a rate more equitable both to carrier and public. This is indispensable to make a rate reasonable and just. Board of Railroad Commissioners of South Carolina v. Florence R. Co., 8 I. C. C. 1, 19.

(i) The rate on one article of traffic may be reasonably high and the carrier fail to earn a fair return on the value of the entire property employed for the public convenience because of unreasonably low rates on other traffic, and, vice versa, the rate on one article of traffic may be unremunerative or unreasonably low and the return to the carrier for its entire business may be fair and reasonably high, the deficiency under the rate on the one article of traffic being made up by the rate on the balance of the traffic. Society of American Florists and Ornamental Agriculturists v. United States Express Company, 12 I. C. C. 121, 126.

IMPORTANT CASES SINCE 1908

(j) The ultimate test of reasonableness of rates with the carrier itself is the return for the use of its equipment and facilities. National Hay Ass'n v M. C. R. R. Co., 19 I. C. C. 34, 48.

(k) The question of revenue must play a not inconsiderable part in determining reasonableness of rates. In Re Advances in Rates—Western Case, 20 I. C. C. 307, 315.

(l) A railroad furnishing part of refrigeration service, the ice haulage, and still turning over entire refrigeration revenue to refrigerator company with which it is not associated in interest would seem to indicate that it is not properly conserving its revenues. R. R. Comm. of California v. A. G. S. R. R. Co., 32 I. C. C. 17, 21.

(m) The Commission is interested in the maximum rather than the minimum earnings of industrial roads and sees that their earnings as a whole and on particular descriptions of traffic do not exceed a fair return for the services performed. Johnstown, Pa., Switching, 43 I. C. C. 654, 660.

(n) Individual carriers in their own interests are not free to jeopardize the revenues of carriers generally. Iron and Steel Articles from New Orleans Group Points to Texas, 74 I. C. C. 146, 152.

(o) In N. P. Ry. Co. v. North Dakota, 236 U. S. 585, and Vandalia R. R. v. Schnull, 255 U. S. 113, the court held that a carrier can not be required to haul any class of traffic at rates which fail to yield it a reasonable return even though its business as a whole is remunerative. Neither directly nor by implication do the cases lay down the principle that rates on each particular class of traffic must be fixed at amounts which will yield not more than a stated percentage of the value of the carrier's property used in transporting that particular traffic. Adriatic Mining Co. v. C. & N. W. Ry., 78 I. C. C. 611, 631.

(p) Congress in enacting section 15a of the act, directing that rates should be so fixed as to give carriers as a whole a fair return on the aggregate value of their railway property, recognized the right of individual carriers to earnings in excess of that return in permitting them to retain one-half of their excess income above 6%. Adriatic Mining Co. v. C. & N. W. Ry., 78 I. C. C. 611, 632.

(q) Impracticability of using revenue on all freight as yardstick by which to measure rates on a particular commodity is obvious. Wood Iron & Steel Co. v. P. R. R. Co., 83 I. C. C. 503, 506.

ALL OTHER CITATIONS

§52. Risk of loss or damage.

See Infra §6, §61; Classification §9; Reasonableness of Rates §32.

CASES 1887-1908

(a) The danger from transportation of oil to Washington through the city of Pittsburgh is not sufficient to justify a rate of 50 cents per barrel as against 40 cents for an equal distance to other places. Brady v. Pennsylvania R. R. Co. (Com.), 2 I. C. R. 78.

(b) The danger from transportation of oil through Pittsburgh when apportioned upon all the business is deemed so unimportant as not to materially affect the rates which should be charged. Brady v. Pennsylvania R. Co., 2 I. C. R. 78.

(c) The liability of a carrier as an insurer of freight against all loss except such as is occasioned by the act of God or of the public enemy is elemental and the greater the value the greater the risk. Howell v. N. Y. L. E. & W. Ry., 2 I. C. C. 163, 172.

(ca) To the extent that loss or damage is peculiar to a particular kind of traffic that fact may be properly recognized in the rate. but charges of transportation should not be advanced to make good the negligence of the carrier itself. New Orleans Live Stock Exchange v. T. & P. R. Co., 10 I. C. C. 327, 331.

(d) Cotton goods easily damaged. Riverside Mills v. Southern Ry. Co., 12 I. C. C. 388.

IMPORTANT CASES SINCE 1908

(e) Rates cannot be made solely with reference to loss and damage claims arising from transportation. National Hay Ass'n v. M. C. R. R. Co., 19 I. C. C. 34, 47.

(f) Carriers are fairly entitled to a moderate margin over cost as an allowance for the factors of hazard and profit. Perishable Freight Investigation, 56 I. C. C. 449, 522.

(g) The Commission has the impression that the inherent qualities of the commodities should also be taken into consideration in determining the charges for protective service against cold. The element of hazard apparently varies materially with the commodity. Carnation Milk Products Co. v. A. T. & S. F., 63 I. C. C., 60, 63.

(h) The amount of loss and damage claims normally accruing in the course of transportation is a factor which is properly taken into account in the fixation of the rates for transportation. Rates on Grain, Grain Products and Hay, 64 I. C. C. 85, 93.

§52½. River crossings.

See River Crossings.

CASES 1887-1908

(a) The location of Cincinnati, north of the Ohio river, and the fact that railroads to the south must cross the river upon expensive bridges, for which allowance is charged or made in the division of rates, justify a higher differential from Cincinnati in respect to rates from Louisville on the south bank of the river to points in the region surrounding Montgomery, Alabama, and points between such region and the Mississippi river. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 7 I. C. C. 180.

(b) A difference in rate is justified by the different location between Council Bluffs on the east bank of the Missiuri river and Omaha on the west side, as to traffic with points in Iowa, although the rates to all other points are substantially the same, in view of the tolls upon the expensive bridge connecting the two cities. Commercial Club v. Chicago & N. W. R. Co., 7 I. C. C. 386.

IMPORTANT CASES SINCE 1908

(c) The fact that the net revenues of a carrier from its ownership of a bridge on which an arbitrary is charged for passengers and freight carried across the same may be greater than the returns on ordinary business enterprises is not sufficient in itself to justify a holding that the bridge tolls are excessive. Bridges are and have been regarded as precarious property. They may be damaged or entirely swept away by floods and erection of other bridges nearby may draw away their tenants, and thus seriously affect their earning capacity. The net revenues have an undoubted and also an important bearing upon the question of the reasonableness of rates, but the value of the service to the shipper and the other elements so often referred to as entering into the reasonableness of rates must also be taken into consideration. A railroad company may be operated with a less return than it ought to enjoy, or even at a loss, but neither condition of affairs would justify the exaction by it of rates that are higher than they reasonably should be for service performed, all things being considered. So also the fact that the net earnings of a carrier may be large does not of itself justify the Commission fixing a rate at less than is reasonable for the service, all other things being considered. Railroad Commissioners of Iowa v. I. C. R. R. Co., 20 I. C. C. 181, 186.

(d) The difference in density of population, volume of traffic and other conditions affecting railroads operating in southern territory and in c. f. a. and trunk line territories are sufficient to warrant higher rates south of the Ohio River than north thereof. Commercial Club of Carrollton, Ky., v. Director General, 55 I. C. C. 697, 700.

ALL OTHER CITATIONS

Constructive Mileage over Poughkeepsie Bridge, 66 I. C. C. 230; Memphis-Southwestern Investigation, 77 I. C. C. 473, 483.

§52½a. Seasonal rates.

CASES 1887-1908

(a) A railway company may make a different rate upon coal during the summer months from that charged for the winter months. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.), 5 I. C. R. 656.

§53. Size of community.

IMPORTANT CASES SINCE 1908

(a) San Pedro, a city of 6,000 or 7,000 population, situated on the harbor of San Pedro, pays a rate from the east of the through rate to Los Angeles, which is twenty-two miles inland, plus the local rate from Los Angeles to San Pedro. Los

Angeles has a population of about 300,000. HELD, the difference in the importance of the two communities cannot in law be accepted as a justification for an undue discrimination in rate. Harbor City Wholesale Co. v. S. P. Co., 19 I. C. C. 323, 331.

(b) The fact that two communities may be one, from a commercial point of view, does not necessarily make them one for transportation and rate making purposes. The Illinois Coal Cases, 32 I. C. C. 659, 680.

§54. Size of load.

See Evidence §53.

IMPORTANT CASES SINCE 1908

(a) The fact that certain traffic is hauled in trainload lots, while complainant's traffic moved in carloads, cannot be made the basis of a difference in rates. Rickards v. A. C. L. R. R. Co., 23 I. C. C. 239, 240.

ALL OTHER CITATIONS

Bentley & Olmstead Co. v. L. S. & M. S. Ry. Co., 17 I. C. C. 56; Virginia-Carolina Chemical Co. v. St. L. I. M. & S. Ry. Co., 18 I. C. C. 1; Anaconda Copper Mining Co. v. C. & E. R R. Co., 19 I. C. C. 592, 596; Amer. Round Bale Press Co. v. A. T. & S. F. Ry. Co., 32 I. C. C. 458, 463.

§54½. Speed of Train.

IMPORTANT CASES SINCE 1908

(a) Speed of milk trains to New York City and that of trains to Boston, is an element which has been considered in fixing rates on milk. New England Milk Case, 40 I. C. C. 699, 718.

ALL OTHER CITATIONS

Shreveport-Texas Cattle, Lignite, Wood and Tanbark, 48 I. C. C. 283, 287.

§55. Standard of lines.

See Advanced Rates §15; Reasonableness of Rates §32.

CASES 1887-1908

(a) A classification of railroads as those which have been in operation for a certain length of time and those which have been recently built and limiting the rates which may be charged on the old roads is not an arbitrary classification denying such roads the equal protection of the laws, nor does it make the statute invalid as class legislation. Ames v. Union Pacific R. Co. 4 I. C. R. 835.

IMPORTANT CASES SINCE 1908

(aa) In determining rates between two points, neither that railroad which can afford to handle traffic at the lowest rate nor that whose necessities might justify the highest rate should be exclusively considered City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 415.

(b) And rates are not to be fixed without reference to all lines operating in the territory. Atlanta Freight Bureau v. N. C. & St. L. Ry., 29 I. C. C. 476, 485.

(c) The needs of certain weak lines can not justify a course of action that is unwarranted by the condition of the larger number of strong and successful lines. The Fifteen Per Cent Case, 45 I. C. C. 303, 315.

(d) It is not alone the line that can handle the traffic with the least cost that determines the question whether proposed rates are justified. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 115.

(e) Rates over standard-gauge lines are not comparable, with those over narrow-gauge lines. Chaney Co. v. G. N. Ry., 50 I. C. C. 332, 336.

(f) Rates to sections served by several lines of railroad should not necessarily be based upon the short line distance or established with regard to either the weakest or strongest line but should be determined with reference to all reasonably direct lines. South Dakota Railway Commissioners v. A. & W. Ry., 74 I. C. C. 295, 306.

C. 312, 367; Proposed Increases in New England, 49 I. C. C. 421, 430, 431, 460; Rio Grande Chamber of Commerce v. St. L., B. & M. Ry. Co., 81 I. C. C., 703, 712; Commodity Rates from Jacksonville to Miami, 83 I. C. C. 207, 210.

§56. Standard of rates.

See Supra §55; Advanced Rates §15; Branch Lines §4; Discrimination §5 II; Reasonableness of Rates §32.

CASES 1887-1908

(a) When a carrier, acting in good faith, has adopted an exceptional rate, not unreasonable in itself, on a portion of its line, because that rate has been forced upon it by an independent state railroad company in direct competition with it and not subject to the Act to Regulate Commerce, the reasonableness and justness of rates on other portions of the carrier's line, extending into a far interior region of the country where no such conditions exist, cannot be measured, alone, by the standard thus furnished, but must be governed by considerations which fairly and justly apply to them. Business Men's Asso. v. Cg. St. P. M. & O. R. C., 2 I. C. R. 41.

(b) Exceptional cases of rates made lower than other rates by a carrier on one portion of its line by the action of a competitor, and in which it is without fault itself, under the operation of the Act to Regulate Commerce can not be adopted as the standard as to other rates upon a far distant portion of its line where no such exceptional conditions exist and the reasonableness of its rates must be determined by altogether different considerations. Business Men's Asso. v. Cg. & N. W. R. Co. 2 I. C. R. 48.

(c) If a carrier can profitably make a low rate for the purpose of obtaining traffic in existence which would otherwise pass over a competing line then it may profitably under some circumstances, make a low rate for the purpose of bringing into existence traffic which would not otherwise pass over any line. Grain Shippers' Asso. v. I. C. R. Co., 8 I. C. C. 158, 177.

(d) The defendant's rates on potatoes in carloads from Mankato and Good Thunder to Washington, Scranton, and other eastern destinations are unreasonable and unjust, and the St. Paul rate may be used, for the purposes of this case, as a standard of comparison. Hoerr v. Chicago, M. & St. P. R. Co., 11 I. C. C. 547.

(e) From St. Paul to Boston via Lake Michigan ports, a reasonable basis for fixing rates for service rendered in transporting shipment between same points via Duluth. American Grass Twine Co. v. St. Paul, M. & O. R. Co., 12 I. C. C. 141.

IMPORTANT CASES SINCE 1908

(f) There is no exact standard by which the reasonableness of a rate can be measured. National Wool Growers' Asso. v. O. S. L. R. R. Co., 25 I. C. C. 675, 677,.

(g) If the Commission should dispose of rate questions and controversies by resort alone or mainly to comparative distances, ton-mile earnings, and estimated relative earnings above the estimated so-called "out-of-pocket" cost to the carrier for each service performed, there are always to be found standards for the reduction of their rate to the basis of the loss, whatever may have compelled or induced its establishment. For the Commission to adopt such a course would inevitably lead to a continuous process of reducing the carriers' revenue, a result which would be detrimental to the public interest as well as unjust to the carriers. Union Tanning Co. v. S. Ry., 26 I. C. C. 159, 164.

(h) Rates fixed by the carrier from no other motive than to obtain a fair compensation for the service rendered are entitled to greater weight than rates which the carrier admits were fixed by it from other motives. Augusta Cotton Exchange and Board of Trade v. S. Ry. Co., 30 I. C. C. 704, 706.

(i) It should not be necessary to tear a rate apart in order to determine what proportion of it was intended as compensation for each distinct service performed. Iron Ore Rate Cases, 41 I. C. C. 181, 203.

(j) Where rates are higher, distance considered, than those generally prevailing from near-by points to the same destinations or to points in that vicinity, over the same or other routes, whether they are unreasonable or unduly prejudicial can not be determined from that standpoint alone, but consideration must be given to all the circumstances and conditions surrounding the traffic. National Fireproofing Co. v. Director General, as Agent, 62 I. C. C. 49, 55.

(k) In considering individual rates mere method of construction or of applying increases does not screen from scrutiny the measure of such rates. National Petroleum Asso. v. Director General, as Agent, 78 I. C. C. 711, 716.

§56½ Statistical Tables.

See Accounting §3 (1).

IMPORTANT CASES SINCE 1908

(a) Statistical tables showing the percentage division of all traffic among different ports are of little value in determining whether one port is being deprived of its just share of tonnage from a particular territory by reason of unfair rate adjustments. Chamber of Commerce of New York v. N. Y. C. & H. R. R. R. Co., 24 I. C. C. 55, 67.

(b) The commission sees no impropriety in making use of the information contained in the special reports submitted by the carriers or in other exhibits to which objection was made, and must regard the data contained therein as properly of record and a part of the evidence in the case. Sections 10 and 20 of the Act cited for authority. Lake Cargo Coal Rates, 46 I. C. C. 159, 183, 184.

(c) Statistics contained in the annual or other reports of the carriers made to the Commission under Section 16, are competent evidence. Lake Cargo Rates, 46 I. C. C. 159, 184.

(d) Rates (including dock service charge) on iron ore from Mesabi, Vermillion, and Cuyuna Ranges in Minnesota to vessels at Two Harbors and Duluth, Minn., and Allouez Bay and Superior, Wis., found not unreasonable, discriminatory, or unduly prejudicial. Evidence consists of statistics and cost studies of operation on roads controlled by U. S. Steel Corporation, upon doubtful assumption that such statistics are representative of all roads considered herein. Fact that Steel Corporation roads earn in excess of return prescribed in the act does not prove discrimination or prejudice or preference, and general reductions of 1922, applied to ore rates, seem to have been fairly proportionate to decreased costs of operation. Adriatic Mining Co. v. C. & N. W. Ry. Co., 78 I. C. C. 611, 617, 634.

§57 Surplus.

See Advanced Rates §6 (4); Express Companies §25; Reasonableness of Rates §33.

IMPORTANT CASES SINCE 1908

(a) Carriers in Official Classification territory increased all class rates and about half their commodity rates. They contended they should be allowed to invest in improvements and additions to the property an amount equal to that paid by way of dividends to stockholders. In the year 1910 railroad dividends aggregated $405,131,650. HELD, that inasmuch as every dollar thus added to the value of the property justifies, according to the claim of the defendants, an added net return, the Commission cannot properly permit an advance in rates with the intent to produce an accumulation of

surplus for this purpose, until the status of the surplus is determined by legislative actions or judicial interpretation. In Re Advances in Rates—Eastern Case 20 I. C. C. 243, 270.

§57½ System Line Haul.

See Branch Lines §2, §3.

CASES 1887-1908

(a) When a railroad company in establishing its charges on the different branches of its road so adjusted them as to divert trade and business to one locality, such unreasonable preference for one place is not excused by the fact that the rates are the result of competition with other carriers. Raymond v. Chicago, M. & St. P. R. Co., 1 I. C. R. 627.

(b) The service of carriers may be rendered under such dissimilar circumstances as to make it lawful to charge more for the same distance on one line or branch than on another line or branch of the same road. Northwestern Iowa Grain & Stock-Shippers' Asso. v. Chicago & N. W. R. Co. (Com.), 2 I. C. R. 431.

(ba) The acquisition and consolidation by a rail carrier under one system of management of different competing lines of road serving the same territory in the carriage of competitive traffic to the same markets, cannot create a right on the part of the carrier to take advantage of the consolidation to deprive the public of the benefits of fair competition, nor afford warrant for oppressive discrimination with a view to its own interests, such as equalizing profits from its several divisions, by making rate and charges for one division that give profitable markets to a portion of its patrons, and higher rates and charges for another division that are destructive to the pursuits of other patrons who are competitors in the same business; but its duty to the public requires that its service must be alike to all who are situated alike. Rice Robinson & Witherop v. W. N. Y. & P. R. Co. 3 I. C. R. 162.

(c) Rates and charges in force on lines of rival companies or on different branches or lines of the same company are entitled to consideration in connection with the question of reasonable charges for transportation services rendered under like conditions. Morrell v. Union Pacific R. Co., 4 I. C. R. 469.

(d) Where a road or system of roads leased and made the road of another company a part of the system, HELD, That the agreed rental cannot be accepted as the amount which the leased property must earn and the lessee may retain before any reduction can be made in the rates over the leased lines. Newland v. Northern Pacific R. Co., 4 I. C. R. 474.

(e) A departure from equal mileage rates on different branches or divisions of a road is not conclusive that the rates are unlawful, but the burden is on the company making such departure to show its rates to be reasonable when disputed. James & Abbott v. C. P. R. Co., 4 I. C. C. 274, 280.

(f) A company operating a system of railways cannot attack as unjust a limitation of rates which deprives it of the ability to make a profit on the business of one branch only of its system. Missouri Pacific R. Co. v. Smith, 5 I. C. R. 348.

IMPORTANT CASES SINCE 1908

(g) What may be a proper rate as between separate railroads may become unreasonable and unjust when these railroads are absorbed by a large system serving an extensive territory. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 292.

(h) A carrier can not claim the right to earn a net profit from every mile, section or other part into which its road may be divided. Stonega Coke & Coal Co. v. L. & N. R. R. Co., 39 I. C. C. 523, 542.

(i) Where two railroads are operated as one property the reasons and justification for different theories of rate making on the two lines are not readily apparent in the absence of a showing of dissimilar transportation conditions. Lamb-Fish Lumber Co. v. A. C. & Y. Ry., 49 I. C. C. 187, 193.

(j) Arbitraries for hauls over two or more lines should not be added where such lines are under the same control and management. Hudson Mule Co. v. L. & N. R. R. Co., 63 I. C. C. 6, 14.

(k) A carrier's business must be considered as an entirety and the company can not claim the right to earn a net profit from every section into which its road might be divided. Abandonment of Branch by Pere Marquette, 72 I. C. C. 303, 306.

(l) In determining application of single-line and joint-line scales, the commission has in numerous cases found that

lines under common control and management, though owned by separate corporations, shall be deemed single units for rate-making purposes. Commercial Club of Superior, Wis., 24 I. C. C., 96, 111; Shreveport Chamber of Commerce, 39 I. C. C. 296, 301; North Vernon Lumber Co., 61 I. C. C., 355, 361; Arizona Packing Co., 81 I. C. C., 115, 125. U. S. War Department v. A. & S. Ry. Co., 83 I. C. C. 742, 744.

Co., 68 I. C. C. 427, 433; Holmes & Hallowell Co. v. G. N. Ry. Co., 69 I. C. C. 11, 17, 18; Boston Wool Trade Asso. v. Director General, as Agent, 69 I. C. C. 282, 293; Hillebrand Co. v. Director General, as Agent, 69 I. C. C. 740, 743; Kansas Rock Salt Co. v. A. T. & S. F. Ry. Co., 69 I. C. C. 745, 751; Control of Big Four by New York Central, 72 I. C. C. 96, 98; Peters Cartridge Co. v. Director General, as Agent, 73 I. C. C. 311, 313; Klamath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 213; Louisville & Nashville v. United States, 242 U. S., 60 Detroit Board of Trade v. W. Ry. Co., 80 I. C. C. 717, 722; Graham & Gila Counties Traffic Asso. v. A. E. R. R. Co., 81 I. C. C. 134, 142; Tovrea & Co. v. Director General, as Agent, 81 I. C. C. 583, 585, 586.

§57½ (a) Taxes.

IMPORTANT CASES SINCE 1908

(a) When a part of a railway system fails to earn operating expenses, the taxing authorities, in the public interest, may well give consideration to the possibility of affording relief to the extent of their authority. Abandonment of Line by Colorado & Southern Ry., 72 I. C. C. 315, 319.

§57¾ Terminal Facilities.

See Terminal Facilities.

IMPORTANT CASES SINCE 1908

(a) The number of carloads to divide into the terminal expenses is obtained by dividing the loaded freight car miles by the average haul per ton. This manifestly overstates the number of carloads of revenue freight, and tends to understate the assignment of the terminal expenses to each carload of revenue freight. The effect of assigning too large a proportion of total expenses to terminal service is to understate the operating expenses for hauls longer than the average. California Citrus League v. Director General, 58 I. C. C. 373, 390.

(b) Terminal service does present one of the greatest problems which now confront the railroads of the country. Greater economies have been made in train operation than in terminal service. New England divisions, 62 I. C. C. 513, 564.

ALL OTHER CITATIONS

§58 Ton-Mile Revenue.

See Supra §20, §36; Advanced Rates §18 (1); Comparative Rates; Evidence §20; Mileage Scale; Reasonableness of Rates 36.

CASES 1887-1908

(a) As a rule in the transportation of freight by railroads while the aggregate charge is continually increasing the further the freight is carried, the rate per ton per mile is constantly growing less all the time, making the aggregate charge less in proportion every hundred miles after the first, arising out of the character and nature of the service performed and the cost of the service; and thus staple comodities and merchandise are enabled to bear the charges of this mode of transportation from and to the most distant portions of the country. The Act to Regulate Commerce so far from tnrowing hampering restrictions or obstacles in the way of operation of this salutary rule, gives it all the aid of its sanction and safeguards by proving that the carrier shall be en-

titled to receive a reasonable compensation for the service performed upon open published rates, against which no competitor can take advantage by allowing shippers secret rebates and drawbacks in order to get the business. Farrar & Co. v. E. Tenn., Va. & Ga. R. Co., 1 I. C. R. 764, 767.

(b) The method of testing the freight rates of a railroad by the rate per ton per mile is one by which these rates may be brought down to the narrowest point of scrutiny, and in this sense is valuable, but it is like looking at them with a microscope, for it ignores all other tests except that which it alone furnishes, and does not take into consideration any of the surrounding circumstances and conditions that enter into the making of the rate, no matter how compulsory or imperious these may be, and for this reason it cannot be considered a controlling rule in determining the reasonableness of rates. Business Men's Asso. v. Chicago, St. P. M. & O. R. Co., 2 I. C. R. 41, 47.

(c) One feature of the transportation of freight by railroads in long hauls on joint rates, or what is usually called through rates, unless there be exceptional conditions which modify the rule, is that the rate per ton per mile grows less in proportion to the greater distance, while the aggregate of the rate increases in proportion to such greater distance; but this is not found to exist in the case of the local rates of a railroad, where the stations are occasionally grouped, but more usually graded according to distance, except as an incident of rare and highly exceptional conditions of the transportation service. Business Men's Asso. v. Chicago, St. P. M. & O. R. Co., 2 I. C. R. 41.

(d) The Act to Regulate Commerce was not enacted to destroy competition, and the establishment of the rule of the rate per ton per mile, insisted upon by the complainant, would have very much the effect of practically making the rates charged for a long distance at the stations along the line of the defendant and its great rivals, the Chicago, Milwaukee & St. Paul Railway and the Minneapolis & St. Louis Railway, in the nature of strict mileage rates, thereby destroying competition to a large extent at these stations, unsettling the business of their shippers, conferring upon them no practical benefits, and loading the business of the carrier and the shipper at every such station with a multitude of infinitesimal fractions nowhere known in the business of railroads. Business Men's Asso. v. Cg. St. P. M. & O. R. Co., 2 I. C. R. 41.

(e) The rule of the rate per ton per mile decreasing for the greater distance while the rate is increasing in the aggregate, examined and discussed by the Commission in its application to the present proceeding, and held to be inapplicable. Business Men's Asso. v. Cg. & N. W. R. Co., 2 I. C. R. 48.

(f) Complainant attacked as unjust and preferential rates on classes from Chicago, Ill., to Janesville, Minn., as compared with rates from Chicago, Ill., to points west of Janesville, Minn., in that the rate per ton per mile increased according to the length of the haul instead of decreasing. The defendant can charge no more than it does charge to Janesville and Mankato on account of the charges made by other competing railroads running through the same section of the country between Chicago, St. Paul, Minneapolis and Lake Superior ports. As to the country west of this territory the evidence shows that this is a new line, expensive to operate, runs through a sparsely settled country, and is not governed by competition of other lines. HELD, the rate per ton per mile increases as the distances gets greater, but as the rates beyond St. Peter, Minn., are not controlled by the same competition east of that point, and as they are reasonable in and of themselves, complaint dismissed. Business Men's Asso. of Minnesota v. C. & N. W. Ry., 2 I. C. C. 48.

(g) The application of the principle that with the increase of distance the ratio of the rate shall decrease, is affected by the fact that the rate for the shorter distance is of itself, alone, often too low to be treated as a fair criterion for points beyond, so that a long line, met at a given point by a short line, and compelled to accept a scarcely remunerative rate, when the point is passed may fairly increase its charges with some consideration of the absolute distance by its own line from the originating point in a ratio more rapid than if it had been able to grade its own rates continuously throughout its line. Water competition and other controlling causes produce a like effect, and a situation upon a navigable river is to be considered, although it does not at present afford active competition with the

railroad. Lincoln Board of Trade v. B. & M. River R. R., 2 I. C. C. 95, 98.

(h) That under like conditions freight can be carried proportionally lower for long than short distances is as nearly settled as anything relating to railroad charges can be. Equal mileage rates would often prevent legitimate competition and give a monopoly in transportation to the best and shortest road. New Orleans Cotton Exchange v. Cincinnati, N. O. & I. P. R. Co., 2 I. C. R. 289.

(i) Transportation charges now made on corn and oats between the Mississippi River and eastern cities, based on twenty cents per hundred pounds from Chicago, and twenty-three cents from East St. Louis, to New York City, are less than 4 4-10 mills per ton per mile and are not excessive. Rates and Charges on Food Products v. 3, I. C. R. 93.

(j) The general recognized principle that cost of carriage is in inverse ratio to distance, and that therefore the charge per ton per mile should diminish with distance, is not a rule required by the statute, and is subject to qualifications and exceptions. Manufacturers and Jobbers Union of Mankato, Minn. v. M. & St. L. R. Co., 3 I. C. C. 115, 118.

(k) Parties at a point beyond a distributing point are not entitled to the same rates per ton per mile from such distributing point that are charged from shipping points at a distance to the distributing point, under the provisions of the interstate commerce act prohibiting discrimination in rates between places under the same conditions and circumstances. Interstate Commerce Commission v. Alabama M. R. Co. (C. C. M. D. Ala.), 5 I. C. R. 308.

(l) Ordinarily the rate per ton per mile diminishes with increasing length of haul, and it does not follow that Sioux Falls rates from Chicago should be 108 per cent of Sioux City rates because the short line distance from Chicago to Sioux Falls is 108 per cent of the short line distance to Sioux City. Daniels v. Chicago, R. I. & P. R. et al, 6 I. C. C. 458.

(m) On complaint that rates charged by defendants for the transportation of melons in carloads from shipping points in South Carolina to New York and other points in northern and northeastern states were unjust and unreasonable, it appeared that the rates were lower than those in force between the same points on cotton and general merchandise, although greater speed and some other exceptional facilities are involved in the transportation of melons from South Carolina; and that the rates per ton per mile afforded by the melon rates ranged from 7.6 mills to 1.1 cents, and for most of the defendant roads were less than the average receipts per ton per mile from all freight. The evidence was sufficient to warrant an estimate of the cost of production or the results of sales during the shipping season. HELD, That the rates complained of were not shown to be unjust or unreasonable, and that the petitions should be dismissed without prejudice. Board of R. R. Commissioners v. Florence R. Co., 8 I. C. C. 1.

(n) The rate per ton per mile brings rates down to the narrowest point of scrutiny, and for that purpose is valuable; but it excludes consideration of other circumstances and conditions which enter into the making of rates, no matter how compulsory or imperious they may be, and it cannot, therefore, be accepted as controlling in determining the reasonableness of rates. Gustin v. A. T. & S. F. R. Co., 8 I. C. C. 277, 288.

(o) The rule that while the aggregate rate should increase, the rate per ton mile should decrease as distance increases, is not one required by the statute, and is subject to qualifications and exceptions. Hilton Lumber Co. v. Wilmington & Weldon R. Co., 9 I. C. C. 17.

(p) The rate per ton per mile is not always the measure of a reasonable rate, as that measure rigidly applied would make distance alone the gauge for transportation charges; but it affords a valuable basis of comparison for relative rate burdens. Farrar v. Southern Ry., 11 I. C. C. 640, 649.

(q) While the revenue per ton per mile over other routes on other lines and to other destinations is often suggestive in arriving at a proper estimate of the reasonableness of a rate over a route complained of, it is by no means conclusive. Varying conditions existing on different lines must of necessity justify differences in rates for hauls of the same distance. The real question in any such complaint is the reasonableness of a particular rate on the particular line between the particular points in question. In testing such a rate the rates on the same or adjacent lines in the immediate

territory where the same conditions exist are of much greater significance and afford a much more accurate basis for the Commission's action. Dallas Freight Bureau v. G. C. & S. F. Ry., 12 I. C. C. 223, 226.

IMPORTANT CASES SINCE 1908

(r) Per-ton-per-mile comparisons are often helpful in reaching a conclusion in respect to the reasonableness of rates, but to take that as the sole test would be a scrutiny from the narowest viewpoint, which would deny consideration to many other potent and frequently controlling forces which must be given due weight in a proper determination. Muskogee Traffic Bureau v. A. T. & S. F. Ry. Co., 17 I. C. C. 169, 173.

(s) Ton-mile statistics, reflecting as they do neither car loading, train tonnage, nor car or train mileage, are far from being infallable guides in fixing freight rates. A high average ton-mile revenue may be due to short hauls, a preponderance of which occasions the traffic manager much uneasiness, while it has been repeatedly shown that traffic low in ton-mile earnings may, because of its farther carriage and greater density, be the most remunerative. Per-car earnings, with distance considered, are much more reliable. Where the comodity moves in trainloads the earnings per train mile furnish the best criterion, not only the car loading, but also such physical conditions as grades, etc., being here reflected. Comparison of any kind, however, to be effective must be analogous or nearly so; that is, the rate charged or gross earnings derived on any basis for the transportation of a given commodity between two points furnishes a guide in arriving at the rate to be charged the same or nearly the same comodity between two other points similarly circumstanced. Traffic Bureau of Nashville, Tenn. v. L. & N. Ry. Co., 28 I. C. C. 533, 535.

(t) It is a well recognized principle that freight rates should yield a lower revenue per ton-mile as distance increases. However, various circumstances may modify the application of this principle. The amount of traffic carried; character of country traversed; whether there is a main line or a branch line service, and other conditions, are to be considered. It does not follow, merely because the rate to one point yields slightly more than that to another point from the same points of origin, that the former is unduly prejudicial within the meaning of the statute. Beatrice Commercial Club v. C. B. & Q. R. R. Co., 31 I. C. C. 173, 177.

(u) Ton mile earnings alone are not controlling as competition between shippers, cities, and railroads may often force and justify departures from a mathematical decrease in ton mile earnings as the hauls increase. Decker & Sons v. Director General, 68 I. C. C. 34, 36.

(v) Ordinarily, ton-mile revenues should decrease as distance increases, but where the more distant points are in regions of lower traffic density than regions in which the intermediate points are located, a departure from this principle may be justified. South Dakota Railway Commissioners v. A. & W. Ry., 74 I. C. C. 295, 303.

(w) Ton-mile earnings which increase as distances increase found contrary to usually accepted principle of rate making that such earnings should decrease as distances increase. Western Coal Rates, 80 I. C. C. 383, 432, 433.

(x) The ton-mile rate is an element considered in determining the reasonableness of a rate. Wisconsin Bridge & Iron Co. v. C. M. & St. P. Ry. Co., Unrep. Op. 582.

§59 Two-or-Three-Line Haul

See Advanced Rates §15½; Comparative Rates; Discrimination §11¼; Mileage Scale; Reasonableness of Rates §37.

IMPORTANT CASES SINCE 1908

(a) A commodity rate to one point over one line affords no basis of comparison with a higher class rate to a longer distance point over two lines. Wells- Higman Co. v. St. L. I. M. & S. Ry. Co., 18 I. C. C. 175, 176.

(b) Each carrier participating in a two-line haul will find that operating expenses for its portion of that haul are less than they would be if only a one-line haul to the junction point were involved, and instead of either delivering the car or receiving it from a connecting carrier, it were necessary to deliver it to the consignee or receive it from the consignor. The one-line haul involves two distinct terminal services. Each carrier's share of a two-line haul involves but one distinct terminal service, plus a switching movement from one-carrier to the other. The entire two-line haul

involves two distinct terminal services, plus the switching movement from one line to the other. In large cities where the terminal of one carrier is far removed from that of the other, switching from one to the other often involves much greater expenditures than in the present case. However, it involves less expenditure than the terminal service of delivering to consignee or receiving from consignor at that station. But where the physical connection between connecting carriers is as simple as in these small western towns, involving no expensive terminal service, the additional cost due to the switching movement is very small, so small, in fact, that it may not properly be made the basis of an additional charge for a two-line haul of substantial length. Sheridan Chamber of Commerce v. C. B. & Q. R. R. Co., 26 I. C. C. 638, 649.

(c) Under the United States scales, the rate for a two-line haul is the sum of the rates for each line separately, minus 10 per cent. Memphis Freight Bureau v. I. C. R. R. Co., 27 I. C. C. 507, 517.

(d) The fact that a two-line haul is to be considered in determining the reasonableness of a rate. Clinton Mfrs. & Shippers' Assn. v. C. & A. R. R. Co., 27 I. C. C. 230, 233; Memphis Freight Bureau v. I. C. R. R. Co., 27 I. C. C. 507, 517.

(e) It is just and reasonable to charge a somewhat higher rate for a two-line haul than would be deemed reasonable for a single-line haul of equal distance. Meridian Fertilizer Factory v. A. & S. Ry. Co., 33 I. C. C., 160, 163.

(f) When the distances of over 500 miles are involved the fact that the service is by two lines is largely negligible. Calivada Fertilizer Co. v. S. P. Co., 73 I. C. C. 496, 504.

(g) While the principle that the rate for a two-line haul, especially for short distances, should exceed rates for single-line hauls for comparable distances has been applied in numerous instances, reasonableness of the higher charge for a two-line haul must be determined from the facts and circumstances, and not from application of that principle alone. Sand and Gravel from Lafayette, Ind., 77 I. C. C. 719, 721.

(h) Carriers may justify a reasonably higher rate for a two-line than for a one-line haul. But the mere fact that one haul is two line and another one line does not of and in itself justify a higher charge for the two line haul. The reasonableness of the higher rate depends solely upon the facts an circumstances made to appear which show an increased cost or some other fact or circumstance which would warrant a higher charge. Henry W. Somers v. N. Y. O. & W. Ry., 78 I. C. C. 243, 245.

§59½ Unearned Increment.

See Advanced Rates §6 (2)

§60 Unpublished Rate.

See Evidence §60; Interstate Commerce Commission §13; Reparation §15; Unpublished Rates.

IMPORTANT CASES SINCE 1908

(a) Rates of a water carrier not filed with the Commission are not lawful factors to be considered by the Commission in determining the reasonableness of a joint rate to which such water carrier is a part. Milburn Wagon Co. v. L. S. & M. S. Ry. Co., 18 I. C. C. 144, 146.

§60½ Use of Commodity.

See Classification §10.

CASES 1887-1908

(a) Upon investigation had in a proceeding instituted by the Commission on its own motion, it appeared that the respondent had in force over its line to Nashville a special rate on coal when used for manufacturing purposes by persons named upon the manufacturers' lists prepared by the railroad company. These lists were furnished to dealers who, on selling coal to such manufacturers, issued certificates which entitled them to obtain a refund from the railroad company amounting to the difference between the regular and special rates. Pending investigation the respondent discontinued the "manufacturers rate" and put in force a new coal tariff to Nashville whereby coal "run of mines, nut and slack," is given a rate of $1.00 per ton the year round, and "screened" coal a rate of $1.15 per ton, April to September, and for the remainder of the year a rate of $1.40 per ton. The rate from the same mines to Memphis, a point affected by water competition for coal traffic, is $1.40 per ton on all coal the year round, and respondent buys coal at the mines and sells it in the Memphis market, HELD,

1. That the practice abandoned by the respondent common carrier of arbitrarily determining what persons should receive the so-called "manufacturers rate" was a clear violation of the Act to Regulate Commerce.

2. That the rate of $1.00 per ton charged by respondent upon coal, "run of mine, nut and slack," is not unreasonably low, nor disproportionate to the rate of $1.40 per ton to Memphis; neither, in view of circumstances affecting coal traffic at Memphis, is a rate of $1.15 on screened coal to Nashville relatively unreasonable as compared with the Memphis rate, but so long as the Memphis rate does not exceed $1.40, rates on said kinds of coal from the mines to Nashville should not during any portion of the year exceed $1.00 or $1.15, respectively, and any reduction in the Memphis rate should be accompanied by proportionate reductions in rates on said different kinds of coal to Nashville. Re Louisville & Nashville R. Co. v. 4 I. C. R. 157.

IMPORTANT CASES SINCE 1908

(b) Carriers can not maintain rates based upon the use to which a commodity is to be devoted. Nagase & Co. v. Director General, as Agent, 62 I. C. C. 422, 425.

(c) When the description of commodity given by shipper, and the rating applied by carrier's inspector are in conflict, the disposition of the commodity may properly be considered, but such evidence is not controlling, particularly when shipments clearly come within description contained in aplicable tariffs. Western Cartridge Co. v. Director General, as Agent, 74 I. C. C. 654, 655.

(d) Where certain grades of a commodity made and sold for common grades are not mere by-products of the production of higher grades and otherwise fully conform to description and loading requirements of common grades, incidental final use by purchaser of a selected few thereof for better purposes should not be regarded as affecting their essential character for rate-making purposes, although exclusive or predominant use of grades for a given purpose is a circumstance to be considered, along with other facts, in determining proper description to be applied. National Paving Brick Mfrs. Asso. v. A. & V. Ry. Co., 80 I. C. C. 179, 183.

(e) The measure of rates is not dependent upon the use to which a commodity is put. Mangelsdorf Seed Co. v. A. T. & S. F. Ry., 88 I. C. C. 120, 125.

ALL OTHER CITATIONS

D'Arcy Spring Co. v. Director General, as Agent, 62 I. C. C. 129; Sanford v. P. R. R. Co., 81 I. C. C. 730, 731.

§61. Value of Commodity.

See Supra §31; Advanced Rates §18 (4), §18 (5); Classification §9, §10, §11, §17; Discrimination §5; Reasonableness of Rates §30; Released Rates.

CASES 1887-1908

(a) The element of value in the commodity transported forms a proper consideration to be taken into account in the establishment of a rate, since the greater the value the greater the carrier's liability as an insurer of freight. Howell v. New York, Lake Erie & Western R. Co., 2 I. C. R. 162.

(aa) Pig iron is one of the lowest classes of freight. Pougekeepsie Iron Co. v. N. Y. C. & H. R. Co., 3 I. C. R. 248.

(b) Taking into consideration the difference in value of the unfinished and finished cheap bedroom sets involved in this case and the greater tonnage per carload which can be hauled of the former, and having in view the interests of both carrier and shipper, it is held, that the rate on unfinished cheap bedroom sets as shipped by complainant from Lansing, Mich., to Oakland, Cal., should not exceed 85 per cent of whatever rate may be adopted for such sets in a finished condition. Potter Manufacturing Co. v. Chicago & G. J. R. Co., 4 I. C. R. 223.

(c) While the value of the service of transportation and the extent of the carrier's risk are measured by, among other things, the value of the property transported, and this is an important factor in rate making, it is to be noted that as shipments of goods of the same kind or class vary greatly in value, for the same weight, some being many times more valuable than others, a uniform rate per hundred weight for any commodity or class of traffic can not bear the same proportion to the value of each shipment of such goods. The carrier can only be expected in establishing uniform class or commodity rates to take into consideration the estimated average value of shipments of the class or commodity to which the rates are applied. Duncan v. A. T. & S. F. R. Co., 4 I. C. C. 385, 393.

(d) The equitable rule doubtless is that rates should bear a fair and reasonable relation to the average cost of the traffic as delivered to the carrier for transportation, and the average market price the freight will command or as it is termed the commercial value of the property. Board of Raidroad Commissioners of South Carolina v. Florence R. Co., 8 I. C. C. 1, 18.

(e) While value is a most important element to be considered in fixing rates, it plainly can not be made an arbitrary standard independent of all other considerations. Grain Shippers' Asso. of Northwest Iowa v. I. C. R. Co., 8 I. C. C. 158, 175.

(f) Transportation by rail is a quasi-public service, not to be sold to the highest bidder, and the charges therefor are not controlled by the law of supply and demand. Freight rates do not rise and fall with changes in the market prices of commodities, though they are often affected by commercial conditions;

and when reductions have been made on account of commercial depression it is difficult to see why corresponding advances may not properly be made with the return of business prosperity. Re Proposed Advances in Freight Rates v. 9 I. C. C. 382.

IMPORTANT CASES SINCE 1908

(g) The value of a commodity is one of the material considerations in the adjustment of rates, and it is just as unsound to say that the rates upon carloads of equal tonnage and equal cost of movement, one of a low-grade, cheap commodity, and the other of a high-grade and valuable commodity, should be made the same, except for the difference that might be allowed for the single item of increased risk, as it is to say that every commodity should be charged all it can stand or bear. It is alike in the public interest and just to the carriers, having regard to their entire business and their right to an opportunity to earn a fair return upon the property in addition to the cost of service, that in the adjustment of rates due weight be given to differences in value of the respective commodities carried, and that such differences be unlimited by the mere measure of difference in risk. Otherwise one of two results would of necessity follow: The rates as a whole would be such that it would be impossible for the carriers to earn what they reasonably might, and, in fact, what they of necessity should, in order to enable them to perform their services, or the rates on many low-grade commodities would have to be such that they would be prohibitory of any movement. Union Tanning Co. v. S. Ry. Co., 26 I. C. C. 159, 163.

(h) While value is an element to be considered in the fixing of a rate, consideration of the profit accruing to the shipper on the traffic hauled is not a recognized basis, and cannot be, since such consideration would lead to the charging of a different rate to different individuals for the identical service where it appeared that one shipper was not able to make as much profit out of his shipment as some other shipper more fortunately circumstanced. Newport Mining Co. v. C. & N. W. Ry., 33 I. C. C. 645, 656.

(i) Value is not the sole controlling element in classification or rate making; and in the absence of a showing that the rating and rates complained of are unreasonable the contention that a schedule of rates, graduated according to value should be established is without merit. Western Felt Works v. Wabash R. R. Co., 40 I. C. C. 7, 8.

(j) Range of prices, depending upon the percentage of purity and method of production of a particular commodity, is inconclusive evidence of impropriety or unreasonableness in the classification or the rates on such commodity. Du Pont de Nemours & Co. v. Director General, as Agent, 73 I. C. C. 129, 131.

(k) Manure is a very low-grade commodity. It moves in any kind of equipment, loss and damage claims are seldom filed, and if such traffic is to move by rail it must necessarily be accorded relatively low rates. Manure from New Orleans, 73 I. C. C. 400, 402.

(l) The Commission has condemned rates on raw materials higher than on the products manufactured therefrom. Crown Willamette Paper Co. v. Director General, 78 I. C. C. 273, 277.

(m) Value is not the only factor to be considered in making rates. N. & G. Taylor Company v. Director General, 81 I. C. C. 663, 664.

(n) The needs of commerce can not be met if rates are to fluctuate with market prices of commodities, but this would not apply to any permanent or long persistent shift of price levels. The element of value of a commodity and the principle of what the traffic will bear would be given due weight in such a case. Kansas Public Utilities Commission v. A. T. & S. F. R. R. Co., 83 I. C. C. 105, 112.

(o) An element of importance in fixing of rates is the value of the article shipped, for that affects the value of the service to the shipper, and within certain limits it is not only proper but necessary that the carrier should consider the value of the article offered for transportation. Graniteville Mfg. Co. v. Director General, 87 I. C. C. 541, 542.

§62. Value of service.

See Supra §45; Advanced Rates §6 (6); Reasonableness of Rates §39.

CASES 1887-1908

(a) Charges for transportation service should have reasonable relation to cost of production and to the value of the service to the producer and shipper, but should not be so low on any as to impose a burden on other traffic. In the Matter of Alleged Excessive Freight Rates and Charges on Food Products. 3 I. C. C. 93, 104.

(b) If the rate is so high as to yield a large profit to a carrier and to deprive its patrons of any profit and make their business ruinous, then the interests of its patrons and the general public interests as well require the carrier to remit a portion of its profits, and accept a rate more equitable both to the carrier and patron. This is indispensable to make a rate reasonable and just. Delaware State Grange v. N. Y. P. & N. R. Co., 3 I. C. C. 554, 562.

(c) Where the market price yields but a scant return for the labor and expense of production, the cost of transportation needs to be as moderate as may be consistent with justice to the carrier. A. S. Newland v. Northern Pacific R. R. Co., et al, 6 I. C. C. 131.

(d) Fairness to the shipper requires that under no circumstances should he be forced to pay a rate greater than the value of the service rendered to him by the carrier, and this involves a determination of the value to him individually of the carriage and also of the cost to the carrier of the particular carriage. Society of American Florists and Ornamental Agriculturists v. United States Express Company, 12 I. C. C. 121, 126.

(e) Carriers may not establish prohibitive rates on any commodity, on the ground that it is not desirable traffic. Poor Grain Co. v. C. B. & Q. R. Co., 12 I. C. C. 418.

IMPORTANT CASES SINCE 1908

(f) The doctrine however, of charging what the traffic will bear is not accepted by the Commission. In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 156.

(g) Where bare expenses are covered by the rate and an increase would kill the traffic, commercial necessities may make the rate the best paying rate on the commodity which the carriers can obtain. 1915 Western Rate Advance Case, 35 I. C. C .497, 562.

(h) The value of the service is generally regarded as the most important factor in fixing rates. It furnishes theoretically, at least, a foundation for an equitable apportionment that takes into account all interests, those of the carriers, the owners of the property carried, and the public, as well as the dissimilarities of merchandise. The value of the service to a shipper in a general sense is the ability to reach a market and make his commodity a subject of commerce. Allegheny Ore & Iron Co. v. C. & O., 53 I. C. C. 415, 418.

(i) On each raw material the freight charge must be properly apportioned to the service performed. Trunk Line and

Ex Lake iron ore rates 69 I. C. C. 589 601.

(j) The Commission is to administer, and, as far as possible, give force and life to all the provisions of the Act. Section 1 requires that no more than just and reasonable rates for transportation be exacted, and in determining what is just and reasonable it has always been recognized that, among other factors, not only the cost of the service, but its value to the user, must be considered. Public Utilities Commission of Kansas v. A. T. & S. F. R. Co., 83 I. C. C. 105, 108.

§63. Volume of Traffic.

See Advanced Rates §5 (1½) §18 (3); Classification §4, §5; Reasonableness of Rates §10; Train Load Rates.

CASES 1887-1908

(a) Although the traffic to Omaha from St. Louis, in relation to that to Lincoln, is much the largest, and upon a comparison of volume simply the expense of handling the Lincoln business may be two-and-three-fourths times that of handling the Omaha business, yet it is obvious that in such a matter many other things besides the mere volume of business must beconsidered, including the comparative length of the two pieces of road, the grades, crossings and bridges, and interest upon the cost, the facilities with which trains may be handled, and many other matters fairly material to render such a comparison useful. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. R. 98.

(b) In the carriage of great staples, which supply an enormous business and which in market value and actual cost of transportation are among the cheapest articles of commerce, rates yielding only moderate profit to the carrier are both necessary and justifiable, and where the carriers frequently put in force and continue for considerable periods of time tariffs of rates and charges, it is a fair inference that such rates and charges are profitable. Rates and Charges on Food Products V. 3, I. C. R. 93.

(c) Relative quantity of freight shipped by different persons does not differentiate the service performed by common carrier. Kingsley v. Buffalo, N. Y. & Pa. R. Co., 3 I. C. R. 318.

(d) Defendants established rates on "ex-lake" grain from Buffalo, N. Y. to New York and Philadelphia, and points taking New York and Philadelphia rates, which were lower on so-called cargo lots of 10,000 bushels of oats and 8,000 bushels of other grain than on shipments of oats and such other grain in carload lots, but afterwards modified their tariffs so that, with few exceptions, the lower rates for cargo lots were restricted to export shipments. Such modification of tariffs removed the principal grievance complained of, and no evidence was offered concerning rates on shipments of grain for export. HELD, That the principle involved under lower rates for cargo or trainload quantities than for carload

shipments, whether for export or domestic use, violates the rule of equality and tends to defeat its just and wholesome purpose; and such purpose is not fully accomplished by making all cargo shippers pay the same rate and charging all carload shippers alike. That defendants should reconsider their grain tariffs with a view to amendment thereof in accordance with the opinion herein expressed, and that the case be held open for such further actions as may be deemed appropriate. Paine Brothers & Co. v. Lehigh Valley R. Co., 7 I. C. C. 218.

(e) In the carriage of great staples, which supply enormous business, and which in market value and actual cost of transportation are among the cheapest articles of commerce, rates yielding only moderate profit to the carriers are both necessary and justifiable; and although the defendant carriers may be at some greater expense to handle and transport hay than some other articles in the same freight classification, the character, value, volume, and use of that commodity are such as to require relatively low charges for its carriage. National Hay Asso. v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 264.

(ea) If carriers are allowed to make differences in rates to equalize differences in the cost of transportation, and see fit to do so regardless of the effect upon shippers and localities, the ultimate result must be that the bulk of the traffic will be handled by comparatively few shippers and from and to large centers. The Commission can not believe such a result was either intended or desired by the framers of the Act. Glade Coal Co. v. B. & O. R. Co., 10 I. C. C. 226, 252.

(f) No rule is more firmly grounded in reason or more universally recognized by carriers than that the greater the tonnage of the article of traffic the lower should be the rate, and the defendants have made yellow pine lumber an exception to this rule. Central Yellow Pine Asso. v. Illinois C. B. Co., 10 I. C. C. 505.

(g) No rule is more firmly grounded in reason or more universally recognized by carriers than that the greater the tonnage of an article of traffic the lower should be the rate. Central Yellow Pine Asso. v. I. C. R. R., 10 I. C. C. 505, 546.

(h) Lumber rates should be relatively low, in view of the fact that it is inexpensive freight and but few other commodities furnish to carriers so large a tonnage; the lumber business is constant, yielding carriers revenue all the year; no special equipment is constructed or furnished for its carriage; it is loaded by shippers and unloaded by consignees; and where open cars are furnished the shipper is required, at considerable expense, to equip them so as to protect the lumber and the train; and there is small risk, and in case of accident the damage is insignificant. Central Yellow Pine Asso. v. Illinois C. B. Co., 10 I. C. C. 505.

(i) No rule is more firmly grounded than that the greater the tonnage of an article transported, the lower should be the rate. Tift v. Southern Ry., 10 I. C. C. 548, 583.

(j) A lower rate for a train load than for a carload is regarded unlawful; because it is in effect allowing lower rates upon a condition which only a few shippers can comply with, and consequently is an injustice to those unable to ship the required quantity. Planters Compress Co. v. C. C. C. & St. L. R. Co., 11 I. C. C. 382, 403.

IMPORTANT CASES SINCE 1908

(k) Volume of traffic is considered in fixing passenger fares. Merchants & Mfrs. Ass'n. of Baltimore v. A. C. R. R. Co., 23 I. C. C. 129.

(l) Ackworth's formula that "the heavier the traffic, the lower (profits remaining equal) must be the rate," as an abstract principle in transportation economics may be sound. But it by no means follows that because the tonnage of a particular commodity, like wheat, is doubled, or even tripled, a corresponding increase in profit accrues upon the handling of that particular article. Railroad Corms. of Montana v. B. A. & P. Ry Co., 31 I. C. C. 641, 650.

(m) The Commission has declined in notable instances to allow economics of carriage to control in the matter of setting preferential rates. It has without exception refused not only to establish, but even to permit the establishment of rates available only for the shipment of a trainload. Though such shipment could be transported at a minimum of expense per unit of weight and carriers could well afford to make lower rates upon it, yet those rates would so discriminate in favor of the large shippers and tend to concentrate the business in their hands that proper

considerations have compelled disapproval. Logically extended, these considerations would lead to condemnation of the carload rates, but there are two distinctions that have resulted in a different disposition. The first is that the Commission, upon its constitution, found carload rates already an intregal part of the American rate structure; the second is that the shipment unit of these rates is of a size which a great part of the country's shippers is prepared to make, so that their discriminatory effect and tendency to concentrate business is comparatively slight. Consequently the Commission has in a multitude of cases permitted the establishment of such rates. American Round Bales Press Co. v. A. T. & S. F. Ry. Co., 32 I. C. C. 458, 463.

(n) It cannot be said that one who invents a machine which results in giving a greater density to a commodity is ipso facto entitled to a lower freight rate on the commodity, especially when the granting of the advantage would tend to disrupt a long-established system of production. Am. Round Bale Press Co. v. A. T. & S. F Ry. Co., 32 I. C. C. 458, 468.

(o) The mere fact that certain traffic is hauled in trainload lots does not authorize the application of a basis of rates different from that applied to trafic of the same kind in single carloads. 1915 Western Rate Advance Case, 37 I. C. C. 114, 155.

(p) The so-called wholesale theory has no proper place in the rates of common carriers; and in so far as charges for private-wire service are based upon this theory, the Commission finds that the classification is not just and reasonable. Private Wire Contracts, 50 I. C. C. 731, 757.

(q) Consideration must be given to the value of the service. If some commodities and the industries that use them can well stand rates that yield liberal profit to the carrier it can afford to transport at low rates other commodities that could not have moved except under low rates, and so the commerce and welfare of the country is promoted, as it must be, by the widest possible general diffusion and exchange of the products of the mine, the forest, the farm, the mill, the furnace, and the factory. Allegheny Ore & Iron Co. v. C. & O., 53 I. C. C. 415, 418.

(r) Volume of traffic is an important element in the determination of reasonable rates, but that element is only one of the many that must be considered. Southport Mill (Ltd.) v. Director General, 55 I. C. C. 154, 162.

(s) Differences in tonnage may in part be the product of the rate structure itself. Klamath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 214.

(t) The live-stock industry is not only an important but an essential industry in western territory and one which furnishes, both directly and indirectly, an immense volume of traffic to the carriers. South Dakota R. R. Commissioners v. C. & N. W. Ry. Co., 77 I. C. C. 451, 459.

(u) The commission has consistently disapproved maintenance of rates on traffic hauled in trainload lots different from that applied to traffic of same kind when shipped in single carloads. 1915 Western Rate Advance Case. Part II, 37 I. C. C., 114, 155, and cases there cited. Express Rates 1922, 83 I. C. C., 606, 671.

(v) It frequently occurs, when entering territory of sparse traffic density, that ton mile earnings diminish less rapidly than would be the case through territory of more uniform density. Circumstances may even justify no decrease whatever in ton mile earnings with increase of haul. Lake Dock Coal Case, 89 I. C. C. 170, 195.

§64. Voluntary or Subsequent Reduction of Rate.

See Absorption of Charges §2; Advanced Rates §8 (2); Commodity Rates §4; Reasonableness of Rates §32½; Reparation §12, §16; Voluntary Rates.

CASES 1887-1908

(a) A reduction in rates by a carrier is not per se evidence that the former rates were unreasonable, as such reduction may be accounted for because of a decrease in cost of transportation and an increase in the volume of traffic to which such rates apply. Loud v. South Carolina R. Co., 4 I. C. C. 205, 212.

IMPORTANT CASES SINCE 1908

(b) It would be a manifestly harsh rule that would assume a rate now condemned as unreasonable to have been so for a period of two years, or that of the statute of limitations in the past as a basis for the payment of money by the carriers on past shipments, especially when no complaint had been made against them in that period. The law establishes that no such presumption nor is it a necessary sequence that the rate has been unreasonable for any period in the past. Neither does it seem that the bonafide action of the carriers in the necessary exercise of their judgment within reasonable limits should always be at their peril of liability for reparation for the difference between rates initiated upon their judgment and later changed upon the judgment of the Commission. The awarding of reparation by no means necessarily follows the reduction of a rate whether by the voluntary action of the carriers or by order of the Commission. Whatever may be the nature of the facts circumstances and conditions appearing in a particular case where reparation is involved, whether on account of excessive rates or unjust discrimination, there must be that degree of certainty and satisfactory conviction in the mind and judgment of the Commission as would be deemed necessary under the well established principles of law as a basis for a judgment in court. Anadarko Cotton Oil Co. v. A. T. & S. F. R. R. Co., 20 I. C. C. 43, 50, 51.

(c) The voluntary reduction of a rate is not of itself evidence of the unreasonableness of the rate so changed. When, however, a shipment for which no specific rate is in force moves under the so-called analogous article rule of the classification and as soon as practicable, after the defect is brought to the attention of the carrier, it establishes a lower rate than charged on such shipment, it is fair to assume that the rate so established and maintained affords just compensation to the carrier. Maxwell v. W. F. & N. W. Ry. Co., 20 I. C. C. 197, 198.

(d) A voluntary reduction in rates not satisfactory proof of the unreasonableness of the prior rate. National Refining Co. v. M. K. & T. Ry. Co., 23 I. C. C. 527, 530; Pierce v. P. & L. E. R. R., 23 I. C. C. 89, 91.

(e) Rates on logs from Facht, Calif., to Susanville, Calif., during Federal control, found not unreasonable or otherwise unlawful, except to extent they exceeded lower rate established subsequent to movement, upon which basis refund has already been made by the director general. Lassen Lumber & Box Co. v. Director General, as Agent, 73 I. C. C. 212.

(f) The existence of a lower rate to

nearby points and the subsequent establishment of that rate to the point under consideration do not, of themselves, warrant a condemnation of the rate charged. Hercules Powder Company v. A. T. & S. F. R. C., 81 I. C. C. 431, 432.

(g) The subsequent establishment of a lower rate is not equivalent to an admission by the carrier that the former rate was unreasonable. Midland Coal Co. v. C. R. I. & P. Ry., 87 I. C. C. 533, 534.

§64½. Wages.

See Labor Board; Newlands Act; Reasonableness of Rates §40½; Wages.

IMPORTANT CASES SINCE 1908

(a) In fixing coal rates it would seem that wages of miners and their standard of living should be kept in view and that great issues affecting them should not be decided without at least bringing their interests into the horizon of consciousness. Boileou v. P. & L. E. R. R. Co., 22 I. C. C. 640, 647.

(b) From the point of view of public policy and humanity, considerations such as the profits of the operators and the carriers, the wages and standard of living of the miners and the railway employees should not be ignored in the fixing of rates on coal. Boileau v. P. & L. E. R. R. Co., 22 I. C. C. 640, 647.

(c) Statements of increased cost of transportation by reason of greater wages paid employees can have little weight when presented in the abstract with no attempt to consider corresponding reductions resulting from greater efficiency. Hormel & Co. v. C. M. & St. P. Ry. Co., 26 I. C. C. 112, 114.

(d) Wages of employes, element to be considered in determining cost of handling traffic. Youngstown Sheet & Tube Co. v. P. & L. E. R. R. Co., 29 I. C. C. 428, 435.

(e) Charges assailed can not be found unreasonable merely because defendant's operating costs were in excess of what they would have been if it had paid wages lower than those found reasonable

by the Railroad Labor Board. Sugarland Industries v. Galveston Wharf Co., 80 I. C. C. 665, 657.

C. 676, 689.

§61¾. **Wagon Roads.**

IMPORTANT CASES SINCE 1908

(a) The maintenance of good wagon roads is of material interest to the railroads. Rates on Crushed Stone, 30 I. C. C. 22, 28.

§64⅞. **War Conditions.**

See War Legislation; Demurrage §11½.

IMPORTANT CASES SINCE 1908

(a) During the war it was held that Commission must recognize the fact that war in Europe exsits and the fact that by it the world's commerce has been thrown into confusion. Five Per Cent Case, 32 I. C. C. 325, 330.

(b) There is no justification for requiring carriers to bear a burden caused by the European war merely to afford relief to shippers. New Jersey Zinc Co. v. C. R. R. Co. of N. J., 36 I. C. C. 289, 290.

(c) The war and an unparalleled rise in prices for ocean transportation have so changed the transcontinental rate situation as to transform a relation of rates which was justified when established to one that is now unjustly discriminatory against intermediate points. Reopening Fourth Section Applications, 40 I. C. C. 35, 39.

(d) The Commission should not set up its judgment as to the possible and proper thing to do as against the judgment of other public officers, presumed to be performing their duty lawfully, who met a situation of extreme difficulty as best they could under the limitations imposed by war, and with existing or procurable facilities overtaxed. Clearly it should not do so when the preponderance of evidence supports the action as having been taken in good faith, in a timely manner, to the extent reasonably necessary, and so as to apply with substantial uniformity upon all similarly circumstanced persons and traffic. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 52, 57.

§65. **Weight or Bulk of Shipment.**

See Classification §4, §11½; Reasonableness of Rates §41; Weights and Weighing.

CASES 1887-1908

(a) A carrier should receive a greater compensation in the aggregate for hauling a carload of large tonnage than one of less tonnage, but, other things being equal, as a general rule, the rate per hundred weight should be less in the former than in the latter case. Murray v. Wabash R. Co. (Com.), 3 I. C. C. 725.

(b) A carrier should receive a great-

er compensation in the aggregate for hauling a carload of large tonnage than one of less tonnage but, other things being equal, as a general rule, the rate per hundred pounds should be less in the former than in the latter case. Murphy Wasey & Co. v. Wabash R. Co., 3 I. C. C. 725, 728.

(c) While the circumstances and conditions in respect to the work done by the carrier and the revenue earned are dissimilar in the transportation of freights in carloads and less than carloads, and a lower rate on carloads than on less than carloads is, therefore, not in contravention of the statute, yet the difference between the two rates must be reasonable. Duncan v. Atchison T. & S. F. R. Co., 4 I. C. R. 385.

(d) "New ton" of coal apparently means "short ton." Hope Lumber Co. v. M. K. & T. Ry. Co., 12 I. C. C. 191.

IMPORTANT CASES SINCE 1908

(e) The cost of the movement to the carrier depends upon the weight loaded into the car. The weight of the car must be hauled whether the contents weigh much or little. The expense of transporting a car containing 20,000 lbs. is not much greater than the expense of carrying the same car if it contains but 10,000 lbs. Montague & Co. v. A. T. & S. F. Ry. Co., 17 I. C. C. 72, 74.

(f) The minimum carload weight is a factor in the carload rate, and in connection with the rate per 100 lbs. determines the carload earnings. Any reduction in the minimum weight without an increase in the rate per 100 lbs. would therefore reduce the carload earnings of the carrier, and would be equivalent to a reduction in the rate itself. Georgia Fruit Exchange v. S. Ry. Co., 20 I. C. C. 623, 630.

(g) The heavy loading of a commodity results in saving of equipment in times of car shortage. Rates on Tomatoes from Jacksonville, 29 I. C. C. 522, 523.

(h) The car loading of a commodity is of importance in determining the rate, absolutely and relatively. Rates on Grain, Grain Products and Hay, 64 I. C. C. 85, 92.

(i) Under requirements of ocean carriers both export and coastwise cotton must be compressed at least to standard density before it will be loaded on board ships. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 391.

(j) Cotton, except in round bales, is ordinarily regarded as weighing 500 pounds per bale, but the actual average is slightly in excess of that weight. Compression to a density of 22.5 pounds per cubic foot is known as standard density; to 32 pounds per cubic foot, high density; while bales of density of about 12 pounds per cubic foot are commonly called flat or uncompressed bales, to distinguish them from bales of standard or high density. Round or cylindrical bales have a density of approximately 34 pounds per cubic foot and weigh approximately 250 pounds per bale. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 388, 390, 391.

(k) Theoretically, under an intensive method of loading and utilizing practically every inch of car space, as much as 48 or 50 bales of uncompressed cotton can be put into a 36-foot car; actually, over 40 bales of such cotton have been loaded into cars of that capacity. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 388, 391.

(l) Uncompressed cotton requires approximately double the car space used for the movement of compressed cotton. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 392.

(m) While an uncompressed bale is not in fit condition for ocean cargo, it is not unsuitable for rail transportation. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 409.

§66. Widespread Rate Adjustment.

See Advanced Rates §5 (2), §5

(7¼); Blanket Rates VIII, §20; Differentials; Discrimination §13; Equalization of Rates §8; Reasonableness of Rates §16, §28; Relative Rates; Reparation §12.

CASES 1887-1908

(a) Where a system of rates is made by a number of carriers, covering a widely extended territory, which seem to be reasonable in themselves and relatively fair, so far as the evidence in this case shows, the Commission will not order them to be changed at one important point, thereby rendering other changes unavoidable at a large number of other points, and throwing the rates of the entire system into confusion and unsettling values, unless a case arises in which it is necessary that this should be done in order to enforce compliance with the law and to reach the ends of substantial justice. Detroit Board of Trade v. Grand Trunk Railway of Canada, 2 I. C. R. 199.

(b) Where a change of rates, for example those on the defendant's line in this instance, would involve a reduction of rates on the Dunkirk, Allegheny Valley, Pittsburgh, and other competing lines not parties to this proceeding, and unsettle relative rates in a large extent of territory, such a change ought not to be made unless based upon adequate grounds. Rice, Robinson & Witherop v. Western New York & Pa. R. Co., 2 I. C. R. 298.

(c) Where a change of rates would involve a reduction of rates on other competing lines not parties to the proceeding, and unsettle relative rates in a large extent of territory, such a change ought not to be made unless based upon adequate grounds. Rice v. Western N. Y. & P. R. Co. (Com.), 2 I. C. R. 298.

(d) The question of relative injustice must be viewed upon broader grounds than a mere balancing of one rate against another. A reduction which will throw into confusion an adjustment of rates over a large section of country which are not claimed to be unreasonable of themselves, should not be required without a clear right thereto exists under some direct provision of the law. Rend v. C. & N. W. R. R., 2 I. C. C. 313, 317.

(e) The question of relative injustice must be viewed upon broader grounds than a mere balancing of one rate against another. A reduction of rates which will throw into confusion an adjustment of rates over a large section of country, which are not claimed to be unreasonable of themselves, should not be required unless a clear right thereto exists under some direct provision of the law. Rend v. Chicago & N. W. R. Co. (Com.), 2 I. C. R. 313.

(f) A reduction of the rates on local shipments from Chicago to the proportion received by the northwestern lines upon the division of the through rates aforesaid, would involve either a general reduction from the entire group under the short haul clause of the Law, or an abandonment by defendant of the through rates in question, neither of which would benefit complainant, while both would do great injury to all other interests involved. Under such circumstances the preference is not undue, nor is the advantage complained of unreasonable. Rend v. Cg. & Northwestern R. Co., 2 I. C. R. 313.

(g) The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial. Newland v. Northern Pacific R. Co., 4 I. C. R. 474.

(h) The same rate over a district so extensive denies to the producer nearer the market the advantages of his location, for which he receives no compensation in the fact that such rate was established to enable a railroad company to sell its lands more distant from markets at better prices. Newland v. Northern Pacific R. Co., 4 I. C. R. 474.

(i) It can not be held to be a valid objection to the correction of unlawful rates to one locality that it involves a like correction to other localities. Freight Bureau v. C. N. O. & T. P. R. Co., 4 I. C. C. 592, 617.

(j) The Interstate Commerce Commission will not reduce, as unreasonable, a rate between Dallas, Tex., and New Orleans, La., where it would involve a reduction from nearly all the points in Texas, and the Texas Railroad Commission has, since the hearing of the case, readjusted the rate between Dallas and Galveston, which of itself accomplishes a corresponding reduction between Dallas

and New Orleans. Dallas Freight Bureau v. Texas & P. R. Co., 8 I. C. C. 33.

(k) The Interstate Commerce Commission will not, without a reasonably satisfactory showing, determine the question whether or not there should be a reduction in freight rates from a large extent of territory upon a staple commodity like grain, since its decision may result in a large diminution of the revenues of the carrier, and may determine whether or not grain can be raised at a profit, and, ultimately, whether it can be raised at all. Grain Shippers' Asso. v. Illinois C. R. Co., 8 I. C. C. 158.

(l) A rate can seldom be considered "in and of itself." It must be taken almost invariably in relation to and in connection with other rates, for the freight rates of this country, both upon different commodities and between different localities, are largely interdependent, and it is because they do not bear a proper relation to one another, rather than that they are absolutely either too low or too high, which most often gives occasion for complaint. Geo. Tileston Mill Co. v. Northern P. R. Co., 8 I. C. C. 346.

(m) The evidence submitted is not sufficient to constitute the basis of a decision requiring defendant carriers to modify their long-standing system of rate-making, on the ground that the rates from New York, Chicago, St. Louis and other eastern points to Phoenix, Ariz., are unjust and unreasonable in themselves, and relatively as compared with rates on like traffic between eastern points and Los Angeles. Shippers' Union of Phoenix v. Atchison, T. & S. F. R. Co., 9 I. C. C. 250.

(n) It may often happen that a single rate out of an entire system of rates may, when examined by itself, appear to be unreasonable, even though, when considered as a part of the whole system, it is justifiable. To reduce this single rate would perhaps disarrange the entire system of rates in effect and the Commission does not feel that it should interfere until strong reasons for such interference are presented. Hastings Malting Co. v. C. M. & St. P. Ry., 11 I. C. C. 675, 682.

(o) Complainant attacked as unreasonable the rate on coal, carloads, from mines at Jewett, Kans., to Kansas City, Mo. The record shows that the rate is the same as from other mines in the same field; the same as that on competing railroads in the same field and that it is fixed in accordance with an established relation of rates on coal from other producing points to the same market. It also appears that the rate attacked could not be changed without disturbing rates on coal, not only from other neighboring mines, but from all the coal producing centers the product of which is sent to Kansas City. HELD, rate attacked not unreasonable, complaint dismissed. A. M. Fellows Coal & Material Co. v. M. P. Ry., 12 I. C. C. 481.

(p) While complaint alleges that rate on coal from mine at Jewett, Kans., to Kansas City, Mo., is unjust and unreasonable, the record shows that the rate is the same as from other mines in the same field; the same as that on competing railroad in the same field and that it is fixed in accordance with an established relation of rates on coal from other producing points to the same market. It also appears that the rate complained of could not be changed without disturbing rates on coal, not only from other neighboring mines, but from all the coal-producing centers the product of which is sent to Kansas City. HELD, That under the circumstances and conditions Commission is not justified upon the record made in ordering rate changed or declaring it unreasonable. Complaint dismissed. Fellows Coal & Material Co. v. Mo. Pac. Ry. Co., 12 I. C. C. 481.

IMPORTANT CASES SINCE 1908

(q) Generally satisfactory rates of wide application and long standing should not be disturbed without convincing proof that they are unreasonable or unduly prejudicial to the complaining point or traffic therefrom. Wichita Business Assn. v. A. T. & S. F. Ry. Co., 30 I. C. C. 45, 52.

(r) Possibility that some readjustment will have to be made in other rates is no reason why just and reasonable rates should not be prescribed between points and on commodities involved. Oklahoma Cottonseed Crushers' Asso. v. M. K. & T. Ry. Co., 39 I. C. C. 497, 509.

(s) Long established rate adjustments that accord competing producing districts located at different distances from common markets equal rates will not be disrupted unless substantial justice requires it. The interests of consumers

must be considered as well as the interests of producers and dissatisfied producers deprived of the natural advantage of location must establish actual injury as a result of the discrimination. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C. 311.

(t) When an important and long-standing relation is sought to be changed by carriers, justification therefor must be clear and convincing. Proctor & Gamble Distributing Co. v. A. & V. Ry. Co., 40 I. C. C. 367, 372.

(u) Reparation has frequently been denied when rates reduced have been in effect for long periods and when orders requiring reductions involved readjustments of rates throughout a large territory and affected shippers at many points who were not parties to the proceedings. Inland Seed Co. v. O. W. R. R. & N. Co., 40 I. C. C. 517, 521.

(v) A rate structure, being characterized by lack of uniformity, can not be said to present any basis so prevalent as to amount to a practice. Jacob E. Decker & Sons v. Director General, 55 I. C. C. 433.

(w) The fact that other cities and towns would seek similar relief, and application of the formula would involve serious reductions in rates, while proper elements for consideration in determining the reasonableness of rates, constitutes no bar to the granting of relief if rates are shown to be relatively unreasonable or unduly prejudicial. South Bend Chamber of Commerce v. Director General, 57 I. C. C. 215, 220.

(x) The effect of a rate upon commercial conditions, whether an industry can exist under particular rates or a particular adjustment of rates, are matters of consequence, and facts tending to show these circumstances and conditions are always pertinent. But they are only a single factor in determining the fundamental question. A narrowing market, increased cost of production, overproduction, and many other considerations may render an industry unprofitable without showing the freight rate to be unreasonable. National Livestock Shippers League v. A. T. & S. F., 63 I. C. C. 107, 116.

(y) It is one thing to give consideration to the condition of all competing carriers in fixing rates between competitive points on a reasonable basis, but quite a different matter to lift the entire rate structure of an important territory solely for the purpose of enabling carriers operating through a different and higher-rated territory to compete at border points with the carriers operating within that territory on a rate equality without reducing the rates at intermediate points in such higher-rated territory. Rates to, from and between Points South of Ohio River, 64 I. C. C. 306, 329.

(z) Even if it be a fact that other and extensive rate adjustments will necessarily follow any action taken this is not of itself a sufficient reason for depriving complainant of the relief to which it is entitled. West Virginia Rail Co. v. B. & O. R. R., 73 I. C. C. 149, 151.

(aa) Complainant cited a number of cases in which the commission has condemned the disruption of long-established rate relationships. While the potency of this argument is recognized, carriers can not be estopped from changing a relationship if the resulting rates are not unreasonable or otherwise in violation of the act. Boston Chamber of Commerce v. O. S. S. Co. of S., 73 I. C. C. 233, 239.

(bb) A rate can seldom be considered in and of itself. It must be taken almost invariably in relation to and in connection with other rates. Tileston Mill Co., 8 I. C. C., 346, 361. Atchison Board of Trade v. A., T. & S. F. Ry. Co., 80 I. C. C. 350, 360.

(cc) It is not an adequate defense to interpose that correction of unlawful rates will or may require revisions of rates from or to other points. Iola Cement Mill Traffic Asso. v. A. W. Ry., 87 I. C. C. 451, 462.

(dd) The fact that additional readjustments may be necessary is no ground for denying relief shown by the record as proper. Indiana Public Service Commission v. A. T. & S. F. Ry., 88 I. C. C. 709, 720.

C. 98, 101; Asphalt from New Orleans, 83 I. C. C. 424.

III. JUDICIAL NOTICE.

§67. In general.

See Courts §9 (a); Loss and Damage §16; Procedure Before Commission §16.

CASES 1887-1908

(a) Judicial notice may be taken by the court, of the fact that two railroads touching the same points are parallel and competing lines. Gulf, Colorado & Santa Fe R. Co. v. State of Texas, 2 I. C. R. 335.

(b) Judicial cognizance may be taken of the fact that a very large interstate trade exists in fresh dressed meats. Re Rebman (C. C. E. D. Va.), 3 I. C. R. 126.

(c) Judicial cognizance may be taken of geographical distances, and of the fact that a Virginia statute imposing a charge of 1 cent per pound on all fresh meats offered for sale at 100 miles or more from the place of slaughter applies to meats brought from all other states of the union, and, as to cities of Virginia having 15,000, imposes the charge upon meats from nearly all that portion lying west of the Blue Ridge Mountains. Re Rebman (C. C. E. D. Va.), 3 I. C. R. 126.

(d) Judicial notice will be taken of the course of business of railroad companies to transfer cars over more than one railroad without breaking bulk. Burlington, C. R. & N. R. Co. v. Dey (Iowa), 3 I. C. R. 584.

(e) Judicial notice will be taken of the relative distance from a certain place to another part of the same state and to neighboring states. Jamieson v. Ind. Natural Gas & Oil Co., 3 I. C. R. 613.

(f) Courts take judicial notice of the fact that natural gas is a dangerous agency. Jamieson v. Indiana Natural Gas Co. (Ind.), 3 I. C. R. 613.

(g) The court will take judicial notice of the geographical location of Kansas City and Wichita, and that transportation by railroad from these places is over lines outside the state of New York. Parks v. Jacob Dold Packing Co. (Buff. Super. Ct.), 4 I. C. R. 486.

(h) The court will take judicial notice that for the first $36,000,000 of stock issued by the Union Pacific Railroad Company it received less than 2 cents on the dollar, and that the profit on construction represented by outstanding bonds was nearly $44,000,000. Ames v. Union P. R. Co. (C. C. D. Neb.), 4 I. C. R. 619.

(i) It is a matter of common knowledge and of history that Montgomery, Alabama, was a distributing point before the railroad system was known, and when there were no trunk lines of railroad competing for a share of her business. Interstate Commerce Commission v. Alabama M. R. Co. (C. C. M. D. Ala.), 5 I. C. R. 308.

IMPORTANT CASES SINCE 1908

(j) When considering a complaint involving the rates or practices of a carrier, the Commission, being an admin-

istrative body performing its functions in the interest of the general public rather than in the interest of the particular litigants, is entitled to bring to its aid all the information that can be drawn either from the records in other complaints before it or from its general experience and knowledge of transportation matters. The right which courts have to these judicial notices of certain classes of facts is extended in the case of the Commission to the range of its experience with transportation problems and embraces all the knowledge that it has gathered from any source. The Commission is assumed to know what needs to be known in correctly solving any question relating to the rates or to the rules, regulations and practices of carriers affecting rates; and where it does not in fact know, it is its duty to ascertain what is essential to a proper conclusion. Joynes v. Penn. R. R. Co., 17 I. C. C. 361, 366.

(k) The statute gives parties a right to a full hearing and imposes upon the Commission the duty of deciding in accordance with the facts proved. Information gathered by the Commission under section 12 of the Act is not available where the party is entitled to a hearing. Wickwire Steel Co. v. N. Y. C. & H. R. R. R. Co., 30 I. C. C. 415, 424.

(l) Commission is not confined in its consideration to facts and figures specifically stated pertaining to matters referred to in the record, but may consider and, in support of its conclusions, may rely upon actual facts and figures pertaining to matters referred to in the record, as verified by tariffs and other official documents and records which the law requires carriers to file with it. Oklahoma Cottonseed Crushers' Asso. v. M. K. & T. Ry. Co., 39 I. C. C. 497, 500, 501.

(m) Judicial notice taken of the "importance to the public of the transportation services" of complainants, common carriers in New England seeking establishment of just, reasonable, and equitable divisions, as well as that of the principal defendants. New England Divisions, 62 I. C. C. 513, 516.

(n) As indicating improvement in situation of respondent carrier since period covered by statistics offered in justification of proposed reduced rates to meet carrier competition, judicial notice taken of fact that revenues have increased subsequent to such period, based on reports to the commission. Reduced Rates from New York Piers, 81 I. C. C. 312, 319.

ALL OTHER CITATIONS

National Petroleum Ass'n. v. Ann Arbor R. R. Co., 14 I. C. C. 272, 281; Sanford v. Western Express Co., 16 I. C. C. 32, 36; Stonega Coke & Coal Co. v. L. & N. R. R. Co., 39 I. C. C. 523, 539; Montana Rates and Fares, 77 I. C. C. 141, 143; Morgan v. Hines, (Mont. 1922), 211 Pac. 778; United States v. Chicago, B. & Q. R. Co., (1923), 293 Fed. 185.

IV. PRESUMPTIONS

§68. In general.

See Advanced Rates §8; Loss and Damage §11½; Presumptions; Through Routes and Joint Rates §15.

CASES 1887-1908

(a) The filing of schedules of rates with the Commission, as required by statute, raises no presumption as to the legality of such rates. San Bernardino Bd. of Trade v. Atchinson, T. & S. F. R. Co. (Com.), 3 I. C. R. 138.

(b) Fraud and illegality in contracts are not to be presumed. United States v. Trans-Missouri Freight Asso. (C. C. App. 8th C.), 4 I. C. R. 443.

IMPORTANT CASES SINCE 1908

(c) No conclusive presumption that a rate reasonable today was reasonable a year before or a day before, since reasonable rates vary from time to time, and some point of division must be found. Penrod Walnut & Veneer Co. v. C. B. & Q. R. R. Co., 15 I. C. C. 326.

(d) The law presumes that the measure of reasonableness of rates will be based upon all the many elements of the particular traffic involved. Ponchatoula Farmers' Ass'n. v. I. C. R. R. Co., 19 I. C. C. 513, 516.

(e) The presumption of the law is that rates in effect on January 1, 1910, were just and reasonable and may not be increased without satisfactory defense being made before the Commission. In Re Advances on Coal to Lake Ports, 22 I. C. C. 604, 624.

(f) The fact that rates have been long maintained and that the volume of traffic has increased in recent years raises a strong presumption that they are reasonable and profitable to the carriers. Rates on Bananas from Gulf Ports, 30 I. C. C. 510, 515.

(g) The presumption will be indulged that any unjust discriminations that may result from proposed rates in connection with matters not regularly before the Commission will be removed by the carriers. Freight Rates from Minnesota Points, 32 I. C. C. 361, 367.

(h) Congress may, consistently with the due process clause, create rebuttable presumptions, and shift the burden of proof. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

C. 560, 569; Chicago Switching Charges, 28 I. C. C. 677, 679; Grain Rates to Pittsburgh, Pa., 30 I. C. C. 382, 384; Rock Spring Distilling Co. v. I. C. R. R. Co., 29 I. C. C. 18, 24; Youngstown Sheet & Tube Co. v. P. & L. E. R. R. Co., 29 I. C. C. 428, 437; Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 594; Stuarts Draft Milling Co. v. S. Ry. Co., 31 I. C. C. 623, 625; Portland Chamber of Commerce v. C. M. & St. P. Ry. Co., 32 I. C. C. 188, 190.

V. STARE DECISIS

§69. In general.

See Cars and Car Supply §35; Previous Decisions of Commission; Prior Adjudication; Procedure Before Commission §17; Reasonableness of Rates §26½; Reparation §13.

CASES 1887-1908

(a) Stare decisis not applicable to decisions of Interstate Commerce Commission. Board of R. Comrs. v. Atchison, T. & S. F. R. Co., 8 I. C. C. 304.

(b) Proceedings before the Commission can not be made the subject of judicial estoppel. The decisions of a court once made is final, because, for one reason, the facts upon which the decision rests are always the same; but the facts upon which the controversies before this body are determined vary from day to day. A rate, regulation, or practice may be unreasonable now, although a year ago it was entirely reasonable. Cattle Raisers Asso. v. C. B. & Q. Ry., 12 I. C. C. 507, 514.

IMPORTANT CASES SINCE 1908

(c) Rates reasonable at the present time may within the period of two years become very unreasonable by reason of changes in circumstances and conditions, economic transportation, or the like. It should be just as apparent that a rate which was unreasonable two years or more ago may become reasonable by reason of such changes in conditions. A plea of estoppel by reason of former adjudication is not good in so far as an investigation of present rates is concerned, although in a former proceeding a decree of a court was a general finding for the defendants on all the issues of fact. National Hay Ass'n. v. M. C. R. R. Co., 19 I. C. C. 34, 37.

(d) While the Commission is not bound by any rule of stare decisis and while its conclusions are not res judicata, still when a matter has been once fully considered and decided, it must be regarded as settled, unless it appears from new facts presented that the Commission was wrong. It can at any time recall and amend its order, and it ought to do so whenever it appears that an order is erroneous, but it must also be assumed that the judgment of the Commission was correct upon the facts as presented. Schmidt & Sons v. M. C. R. R. Co., 23 I. C. C. 684, 685.

(e) The technical plea of res adjudicata has no application to an order of the Commission. Federal Sugar Refining Co. v. C. R. R. of N. J., 35 I. C. C. 488, 490.

(f) The technical doctrine of res adjudicata as enforced in courts of law is not applied by the Commission. Goss v. Director General, 73 I. C. C. 649, 653.

EXCESS FARES

See Passenger Fares and Facilities §5½.

EXCLUSIVE CONTRACTS

Auction Company; Baggage Transfer II; Eating Houses; Stock Yard Companies; Traffic Contracts; Special Contracts.

CASES 1887-1908

(a) The right of railroad companies to make an exclusive contract with a selected express company for the handling of all the express business upon its line has recently been established by the Supreme Court. Re Express Companies, 1 I. C. C. 677, 678.

(b) A railroad company is not liable for discrimination in refusing to a transfer company engaged in carrying freight between the city in which the railroad terminates and a city in another state, facilities equal to those given another transfer company with which the railroad company has made an arrangement for through billing and rating, whether such transfer company and the railroad be regarded as a connecting line between independent interstate carriers, or the transfer company be regarded as an agency for the delivery of the freight of the railroad company. St. Louis Drayage Co. v. Louisville & N. R. Co. (C. C. E. D. Mo.), 5 I. C. R. 137.

(ba) An article brought from another State under a contract of purchase ceases to be an article of interstate commerce so far as the contract makes an unlawful trust by giving the purchaser exclusive control of its sale in the vicinity and binding him not to deal in any other article of the kind. So beer brought from another State under an invalid trust agreement becomes upon its arrival in the State immediately subject to an anti-trust law of the State by reason of the act of Congress of August 8, 1890. Fuqua v. Pabst Brewing Co. 7 I. C. C. (Appendix) XCIII.

(bc) The respondent railroad companies entered into contracts with the respondent, the Armour Car Lines, to furnish them with refrigerator cars for use in the transportation of fruit from points in Michigan and to refrigerate the cars when used for such transportation. Under the contracts the use of other cars in that business is prohibited and the service of refrigeration is performed exclusively by the Car Lines Company. The railroad companies formerly furnished refrigeration without any charge in addition to the freight rate, and they subsequently made a charge for refrigeration substantially equal to the cost of the icing. Acting under the contracts the Car Lines Company exacts charges for the refrigeration service which greatly exceed those formerly made to cover the cost of icing by the railroad companies and range from 50 to 150% above those made prior to the contracts by the Car Lines Company itself. The total cost to the shipper therefore largely increased. HELD, Such exclusive contracts imposed exorbitant charges upon shippers in violation of section I. Re Transportation, Etc., of Fruit v. 10 I. C. C. 360.

(c) Railroad companies violate section 1 of the Act to Regulate Commerce in making exclusive contracts with a car line company to furnish refrigerator cars, under which the car line company exacts charges for refrigeration service which greatly exceed those formerly made to cover the cost of icing by the railroad companies, and range from 50 to 150 per cent above those made prior to the contracts, by the car line company itself, as they thereby, in effect, impose upon shippers exorbitant charges for the transportation of fruits to markets in other states. Re Transportation of Fruit, 10 I. C. C. 360.

IMPORTANT CASES SINCE 1908

(d) Carriers made an exclusive contract to deliver live stock to the Union Stock Yards of Baltimore, although complainant had its own side track, and had shipped to it weekly carloads of live stock, but refused to deliver to other than the Union Stock Yards, on account of the exclusive contracts HELD, railroads may not make contracts which abrogate the Act; they may not refuse, because of their own contracts, to furnish a delivery that is reasonable upon tracks which they use, as a terminal for complainant; they may not discriminate as between commodities in the delivery which they give where no reason exists for such discrimination excepting the presence of a contract made with a private corporation, as in this case, The amended Act provides that it is the "duty of all common carriers to establish, observe and enforce just and reasonable regulations and practices affecting all matters relating to or connected with the receiving, handling, transporting, storing and delivery of property." Baltimore Butchers' Live Stock Co. v. P. B. & W. R. R. Co., 20 I. C. C. 124, 128.

(e) A carrier granted the exclusive right to a company to conduct its business as an auctioneer of fruit and vegetables on its terminal premises at St. Louis. Complainant, a rival company, asked for the same facilities. HELD, that the granting of the exclusive right to maintain a fruit auction company was somewhat analogous to the station restaurant, news-stand, barber shop, and other conveniences which travelers arriving at the station may make use of if they so desire. They are enterprises that outsiders are frequently permitted to engage in at railroad terminals, not as a part of the service that the carrier renders to the public, but as something that adds to the general convenience of the public. The telegraph, telephone, transfer and cab offices ordinarily found in passenger stations rest upon the same basis. They add to the convenience of the passenger before the transportation by the carrier has commenced or after it has been completed without adding to the service undertaken by the carrier for the traveler under its published rates. It is a matter that is wholly outside and apart from the service of transportation, and is a reasonable use for the defendant to make of its property. Complaint dismissed. Southwestern Produce Distributors v. Wabash R. R. Co., 20 I. C. C. 458, 460, 462.

(f) The Commission has no jurisdiction to order a railroad to give a local baggage transfer company an opportunity to bid against another one for the privilege of soliciting on trains, any more than it would have power to compel a railroad to place its fruit vendors' privilege up at auction, for neither one is transportation under the Act, and over neither one has the Commission jurisdiction. Cosby v. Richmond Transfer Co., 23 I. C. C. 72, 77.

(g) A union depot or terminal company may properly grant to a taxicab company the exclusive right to maintain a taxicab stand inside the station, and it may grant to such company the right to carry passengers from the station to some destination, as for instance another depot, if the route is entirely over its own land; but it cannot create a monopoly in one taxicab company by excluding, under the guise or pretense of regulating and controlling the use of its private property, all other taxicabs from its plaza or approach, even though it owns the same and has never dedicated the ground to the public. (Per White, Ragland, and James T. Blair, JJ) Kansas City Terminal Ry. Co. v. James, (Mo. 1923), 251 S. W. 53.

(h) Under Const. art. 12 § 23, prohibiting discrimination in charges or facilities between transportation companies and individuals, a union depot or terminal company cannot discriminate in favor of one taxicab owner or company by excluding others from its premises for the purpose of receiving or discharging passengers. (Per Woodson, C. J., and Walker, J.) Kansas City Terminal Ry. Co. v. James, (Mo. 1923), 251 S. W. 53.

(i) Though public patronage of busses as means of reaching ferry causes overcongestion of ferry terminal grounds, ferry company cannot, consistently with its public duty, exclude all busses from such grounds while admitting all other conveyances, public or private, though not protected by any contractual rights. Philadelphia & Camden Ferry Co. v. Johnson et al. (N. J., 1923), 121 A. 900.

(Tex. 1921), 230 S. W. 235.

EXCURSION RATES

See Advertising I; Passenger Fares and Facilities §6.

EXPEDITED SERVICE

See Live Stock Shipments; Special Rates and Service.

CASES 1887-1908

(a) For a special service by a carrier, such as the transportation of perishable freight, requiring quick movement, prompt delivery at destination, special fitting up of cars, their withdrawal from other service and their return empty on fast time, all involving greater expense to the carrier, a higher rate than for the carriage of ordinary freight is warranted by the conditions of the service and is reasonable and just. Delaware State Grange v. N. Y. P. & N. R. Co., 3 I. C. R. 554.

(b) In conference between officials of the carrier and representatives of certain of its patrons it was agreed that higher rates would be charged and paid for the transportation of strawberries in consideration of special expedited train upon which they would be hauled and by which they would be delivered for the early morning market; on account of reconstruction and improvement work upon and along the line of the carrier it was unable to furnish the expedited service agreed upon and which it had furnished for several years; the shippers contended that if the expedited service was not provided the higher rate should not obtain; HELD: That where an unusually high rate is charged because and in consideration of a special expedited service it is the duty of the carrier to provide and furnish such service or to cease and desist from charging the higher rate. Amer. Fruit Union v. Cin. N. Orleans & Tex. Pac. Ry. Co., 12 I. C. C. 411.

(c) Where an unusual and high rate is charged because and in consideration of a special and expedited service, it is the duty of the carrier to provide and furnish such service, or to cease and desist from charging the higher rate. American Fruit Union of Cincinnati v. C. N. O. & T. P. Ry. Co., 12 I. C. C. 411.

(d) Unusually high rate charged for special and expedited service not reasonable where such service not furnished. American Fruit Union of Cincinnati v. C. N. O. & T. P. Ry. Co., 12 I. C. C. 411.

(e) Complainant attacked as unreasonable commodity rates on strawberries, carloads, under refrigeration from Chattanooga and points on defendants line between Chattanooga and Oakdale, Tex., to Cincinnati, O., as unreasonable. In conference between officials of the carrier and representatives of certain of its patrons it was agreed that higher rates would be charged and paid for the transportation of strawberries in consideration of special expedited trains upon which they would be hauled and by which they would be delivered for the early morning market; on account of reconstruction and improvement work upon and along the line of the carrier it was unable to furnish the expedited service agreed upon and which it had furnished for several years. The shippers contended that if the expedited service was not provided the higher rate should not obtain. HELD, that where an unusually high rate is charged because and in consideration of a special and expedited service it is the duty of the carrier to provide and furnish such service or to cease and desist from charging the higher rate. HELD, rates attacked found unreasonable, reparation awarded. American Fruit Union v. C. N. O. & T. P. Ry., 12 I. C. C. 411.

(f) If a carrier charges and a shipper agrees to pay a higher charge in consideration of special or expedited service and the carrier fails to furnish the service agreed upon, it can not lawfully and properly demand the higher compensation. American Fruit Union v. N. O. & T. P. R. Co., 12 I. C. C. 411, 417.

IMPORTANT CASES SINCE 1908

(g) Expedited movement of freight is a part of transportation service while a transit privilege is something offered to the shipper in addition to transportation service. The Five Per Cent Case, 31 I. C. C. 351, 408.

(h) And naturally expedition increases the cost of a given service and is also a thing of value to the shipper. Cleveland Prov. Co. v. B. & O. R. R., 50 I. C. C. 612, 618.

(i) Refusal to accord baggage-car service to shipments of condensed skimmed milk from Richmond, Petersburg, and Suffolk, Virginia, to Wilson and Rocky Mount, N. C., or to receive at such originating points mixed shipments of milk, cream, and condensed skimmed milk from connecting lines for further transportation to above destinations in baggage cars, found not unreasonable or unduly prejudicial. Present means of transportation accorded by express are not shown inadequate, and carrier should not be compelled to extend milk baggage-car service to other commodities simply because they are somewhat similar in character where same compelling reasons do not exist. Chapin-Sacks Corp. v. A. C. L. R. R. Co., 80 I. C. C. 255.

(j) Milk traffic in baggage cars is not an incident to passenger transportation. Chapin-Sacks Corp. v. A. C. L. R. R. Co., 80 I. C. C. 256.

(k) Milk, cream, and buttermilk are daily necessities, and this fact in connection with their perishable nature has compelled an extraordinary expedited service to be accorded these commodities. Carriers should not be compelled to extend this service to other commodities simply because they are somewhat similar in character where same compelling reasons do not exist. Chapin-Sacks Corp. v. A. C. L. R. R. Co., 80 I. C. C. 257.

(l) Maintenance of baggage-car service on milk, cream, and buttermilk is justified on grounds that they are used in practically every home as daily items of food, and from their perishable nature require prompt transportation. This service was not intended to serve private concerns at commercial centers, but in interest of public to provide small communities which are without adequate service by express with expeditious service necessary to movement of cream and milk to the cities. Chapin-Sacks Corp. v. A. C. L. R. R. Co., 80 I. C. C. 256, 257.

(m) Fast running time necessitates lighter trains and proportionately greater fuel consumption and wear and tear on rolling stock and roadway. Other ordinary freight trains running in same and opposite directions must be held up for fast fruit trains at passing points. Wenatchee Valley Fruit Exchange v. N. P. Ry. Co., 83 I. C. C. 71, 73, 74.

(n) Failure of defendant to establish c. l. rates and refrigerator-car service for strawberries from points on L. & N. R. R., while maintaining such rates and service from certain points in Louisiana and other States on other roads, found not unduly prejudicial to complainants at such L. & N. points. Unlike carrier in Louisiana, the L. & N. has at no time authorized the express company to furnish c. l. refrigerator service on strawberries, having handled such traffic by freight on December 27, 1917, and since. Hence, there is substantial difference in circumstances surrounding traffic from Louisiana as compared with traffic from points on L. & N. Furthermore, the railroads are not parties to this proceeding. Oyler & Son v. Amer. Ry. Exp. Co., 83 I. C. C. 160.

(o) Railroads are primarily responsible for proper transportation of all commodities offered to them and for furnishing of adequate service. If requirements of traffic demand more expeditious service it is duty of railroad either to furnish such reasonable service itself or to delegate that duty to an express company. Oyler & Son v. Amer. Ry. Exp. Co., 83 I. C. C. 160, 163.

C. 34, 47; Grossman Mfg. Co. v. New York Cent. R. R., 169 N. Y. S. 213; Ernest B. Timmons v. B. C. & A. Ry., 55 I. C. C. 495; Rates on Illustrated Newspaper Supplements, 74 I. C. C. 336; Transportation of Strawberries by Express, 81 I. C. C. 634.

EXPERIMENTAL RATES

IMPORTANT CASES SINCE 1908

(a) Rates established for experimental purposes at the solicitation of shippers, as for instance to enable shippers to engage in certain business, and not shown to be reasonable in themselves, cannot be set up as standards by which to test the reasonableness of a proposed rate. N. Y. Produce Exchange v. N. Y. C. & H. R. R. Co., 32 I. C. C. 212, 216.

(b) An assertion that rates were established as an experiment and proved to be a mistake comes too late at the end of 14 years. Nebraska Bridge Supply and Lumber Co. v. N. C. & St. L. Ry., 35 I. C. C. 86, 89.

(ba) "Missionary Rates" were established for the purpose of developing business. Fruits and Vegetables, 43 I. C. C. 291, 293, 319.

(c) The Commission can not compel a carrier to reduce its fares solely on the ground that to do so would induce settlement of sparsely populated communities. Arizona Corp. Comm. v. A. T. & S. F. Ry., 45 I. C. C. 436, 442.

ALL OTHER CITATIONS

Anson, Gilkey & Hurd Co. v. S. P. Co., 33 I. C. C. 332, 340; Rates on Lumber from Southern Points, 34 I. C. C. 652, 659; Arlington Heights Fruit Exchange v. S. P. Co., 39 I. C. C. 88, 93; Felder v. S. Ry., 51 I. C. C. 124.

EXPERT TESTIMONY

See Evidence §22½, §40; Undercharges §6; Procedure Before Commission §15½.

EXPLOSIVE AND DANGEROUS ARTICLES

See Demurrage §2½.

CASES 1887-1908

(a) Common carriers have no right, by issuing a prohibitory tariff or otherwise to withdraw from the transportation of any articles not dangerous to handle and which are ordinarily the subject of transportation by them; less desirable traffic must be accepted upon reasonable terms, as well as that which is more desirable. Riddle, Dean & Co. v. N. Y., L. E. & W. R. R. Co., 1 I. C. R. 787.

(b) Common carriers in the transportation or handling of articles that are dangerous to health or property of others, where they have a knowledge of such dangerous character, or, by the use of due care, should have knowledge thereof, will not be relieved of the liability for damage done in consequence, or injury to others, by the transportation or handling of such dangerous articles. Rause v. Yauard, 5 I. C. C. 315.

(c) Carrier may direct handling of explosives on private sidings. Barden & Swartout v. Lehigh Valley R. R. Co., 12 I. C. C. 193.

IMPORTANT CASES SINCE 1908

(d) The regulations and precautionary measures prescribed by the Commission for handling inflammable and corrosive commodities in transit are said to have reduced the risk to such an extent as not to justify a rating on such commodities higher than the rating on other liquids moving in tank cars. Tanners Supply Co. v. A. A. R. R. Co., 42 I. C. C. 280, 284.

(e) The law confers the right and imposes the duty upon the carriers and the Commission to establish and enforce regulations, specifications and practices which are just and reasonable and which also afford adequate protection to the carrier, its employees and the general public against the hazards incident to the transportation of explosives and other dangerous articles. Transportation of Explosives, 53 I. C. C. 533, 542.

(f) Complainant in 12448 attacked charge of 7.5c per 100 pounds assessed by the P. & R., on over 500 carloads of smokeless powder, trinitritoluol, and other explosives for their movement by car float from Delaware River Pier at Wilmington, Del., to vessels in midstream or alongside piers at Wilmington and Carneys Point, N. J., as unreasonable. Complainant in 12450 attacked certain car demurrage and storage charges assessed by the P. & R., at

Wilmington on various carloads of wet nitrocelloulose and wet picric acid as unreasonable and not authorized by tariffs. No. 12448. Shipments originated at Emporium, New Castle, and Mount Union, Pa., Aetna, Ind., Hercules, Calif., and Fairmount and Syracuse, N. Y., between April 1918, and October 1918, for transhipment overseas. Car floats were employed to effect delivery to the vessels. The tariff on which complainant relies was not by its terms applicable on shipments floated to vessels in midstream or at piers on the New Jersey shore opposite Wilmington, whereas the tariff covering explosives specifically so applied. As to such shipments the allegation of a violation of section 6 is not sustained. The former tariff applied, however, on shipments floated to vessels tied up at piers on the Delaware side within the described limits of Wilmington Harbor territory. The locations of the vessels to which deliveries were made are not shown on the record, and in the absence of proof that the charge attacked or collected in any instance for the floatage of shipments to vessels at piers on the Delaware side of the Delaware River within Wilmington Harbor, the complaint will be dismissed without prejudice. No. 12450. Large quantities of wet nitrocellulose and wet picric acid were received at Wilmington over the P. & R., for transshipment; that the shipments were held for varying periods before exportation; and that for their detention defendant assessed and collected demurrage charges as provided in its tariff of rules governing car demurrage, together with storage in accordance with its local storage tariff applicable at Wilmington. While it may have been the intention of defendant to limit the free time on export shipments of explosives to either 48 or 24 hours and to provide for storage thereafter at the rate of $2 or $5, depending upon the character of the commodities, and to charge demurrage in accordance with its general demurrage tariffs, the tariffs failed to carry that intention into effect. HELD, demurrage charges assessed illegal, repartion awarded. Republic of France v. Director General, 68 I. C. C. 419.

(g) Contention that, since carriers may lawfully refuse shipments of explosives and other dangerous articles in containers not conforming to specifications of the commission, they may also refuse all articles in containers which do not meet the requirements which they prescribe, not sustained. Congress directed the commission to formulate regulations governing transportation of dangerous articles for protection of life and property, and fact that shipments of that character may not be transported in containers not complying in every particular with specifications prescribed does not prove that there should be no latitude in that respect in transportation of articles which are not dangerous. Fiber-Box Containers, 77 I. C. C. 713, 715.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission; Through Routes and Joint Rates §3.

CASES 1887-1908

(a) Upon petitions by railroad companies praying the Commission to "authorize the trunk lines to bill export freight to Boston at New York rates" etc., HELD, that as any legal ground for affirmative action on the part of the Commission was precluded by the fact that the parties bringing the practice to the attention of the Commission did so with explanations of its propriety and insisting upon its lawfulness,—no order should be made on the petitions, but leave should be given to withdraw them. Re Export Trade of Boston v. I. C. R. 25.

(b) Petition made by railroad companies praying the Commission to authorize the trunk lines to bill export freight to Boston at New York rates. HELD, that as any ground for affirmative action on the part of the Commission was precluded by the fact that the parties bringing the practice to the attention of the Commission did so with explanations of its propriety and insisting upon its lawfulness,—no order should be made on the petitions, but leave should be given to withdraw them. Re Export Trade of Boston, 1 I. C. C. 25, 27.

(c) Import and export tariff is not removed from the jurisdiction of the Commission by the decision of the United States Supreme Court in Texas & Pacific Railway Co. v. Interstate Commerce Commission, 162 U. S. 197, 40 L. ed. 940, 5 Inters. Com. Rep. 405, but, on the contrary, the effect of that decision is to extend such jurisdiction; and the Commission has full authority to pass upon the grievance of any individual or locality which is alleged to arise from rates upon export or import goods as compared with rates on domestic merchandise. Kemble v. Boston & Albany R. R. Co., 8 I. C. C. 110.

(d) If any individual or locality feels itself aggrieved by the rates made upon export or import business as compared with domestic business, the Commission has full authority to consider and pass upon that grievance. Kemble v. B. &. A. R. Co., 8 I. C. C. 110, 119.

(e) The Interstate Commerce Commission has jurisdiction over export traffic. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(f) The Act to Regulate Commerce applies to the transportation of export and import traffic, and the jurisdiction of the Commission over such traffic is not denied, but is distinctly affirmed and rather enlarged by the decision of the U. S. Supreme Court in Texas & Pacific R. Co. v. Interstate Commerce Commission, 162 U. S. 197, 40 L. ed. 940, 5 Inters. Com. Rep. 405, Export & Domestic Rates v. 8 I. C. C. 214.

IMPORTANT CASES SINCE 1908

(g) Cummins Amendment does not apply to export and import shipments. The Cummins Amendment, 33 I. C. C. 682, 693.

(h) It is beyond the Commission's jurisdiction to pass upon the negligence of governmental agencies in failing to

efficiently co-operate in bringing forward shipments for export early enough for loading into vessels on which space engaged, and thereby obviate demurrage. The various steps taken by the government during the war were for the benefit of the public in general and were intended to and did facilitate commerce. American Smelting & Refining Co. v. Director General, as Agent, 62 I. C. C. 583, 587.

(i) The jurisdiction of the Commission to prescribe a uniform export bill of lading for shipments to nonadjacent foreign countries in connection with ocean carriers whose vessels are registered under the laws of the United States is one of law, but pending judicial interpretation of the pertinent provisions of the act the Commission must construe them in endeavoring to perform the administrative duties which they impose upon it. Export Bill of Lading, 64 I. C. C. 347, 351.

(j) The Commission's power to prescribe rules and regulations, not inconsistent with the act, which shall constitute and determine the form of the bill of lading, covers the terms or tenor of that instrument, and is, as to the transportation until delivery to the ocean carrier, adequate and complete. And the intent of the Congress to require a uniform through export bill of lading and to have the terms thereof prescribed by the Commission seems clear. Export Bill of Lading, 64 I. C. C. 347, 352.

(k) Carriers challenge the Commission's power to do more than prescribe the "form" as distinguished from the substance of a bill of lading, but such interpretation would imply that each carrier could insert its own peculiar phraseology in its bill of lading, while the intention of Congress to have a uniform bill of lading prescribed by the Commission is clearly indicated in section 25, under which the Commission is also required to "preserve for carriers by water the protection of limited liability provided by law," and this can not be done by specifying color of paper or size of type. Export Bill of Lading, 64 I. C. C. 347, 352.

(l) The Commission has no jurisdiction or control over ocean rates to foreign port, and the equalization of port rates on basis of the water rates from the ports would place upon the rail lines the burden of the disabilities of the several ports, arising from such causes as distance from foreign markets, difference in harbor facilities, and other conditions affecting ocean rates. No stabilization of rail rates would be possible under such an adjustment. Tobacco from Ohio River Crossings, 73 I. C. C. 384, 387.

(m) Freight moving under a through export bill of lading is "designated as 'for export'" as definitely and certainly as when it moves under billing to the port with the words "for export" written theron. U. S. Steel Products Co. v. Director General, as Agent, 73 I. C. C. 505, 508.

(n) The Commission has no jurisdiction over shipments originally intended for export but which are subsequently reshipped to another point in the same State and not exported, the entire movement being intrastate. Phillips & Sons Co. v. B. & O. R. R. Co., 74 I. C. C. 381.

§1½. Construction of Act.

See Act to Regulate Commerce.

CASES 1887-1908

(a) It is not, as matter of law, a violation of the Act to Regulate Commerce to make a lower rate to the port of export upon traffic which is exported than upon that which is locally consumed, for the export rate is in essence the division

of a through rate. Kemble v. Boston & Albany R. R. Co., 8 I. C. C. 110, 117.

(b) Carriers are not prohibited, as a matter of law, from making rates from points in the United States to points in foreign countries, or from points in foreign countries to points in the United States, of which the inland division or share accruing to carriers within the United States is less than the tariff rate of such carriers on domestic shipments of similar commodities. Kemble v. B. & A. R. Co., 8 I. C. C. 110, 118.

(c) In 1898 defendants' rates to New York on export corn were 19 cents per hundred pounds from Peoria and 17½ cents from Chicago; and from the Mississippi River the 17½ cent Chicago rate applied as a proportional rate on export corn coming from the west of that river. In January and February, 1899, the proportional rate from the river was made 13½ cents, a reduction of 4 cents, the Chicago rate was made 16 cents, and the Peoria rate 17½ cents, a reduction of 1½ cents. This rate from the river had always been higher, or at least no lower, than the rate from Chicago. Higher rates are in effect on export corn originating at the river crossings, and local and proportional rates considerably above the proportional export rate are also in force from river points on domestic shipments. Under former rates Illinois corn went forward freely for export through Atlantic ports, but under present rates it is stored in elevators or cribbed upon the farms, while Iowa corn moves in large quantities across Illinois farms and through Illinois markets on its way to the seaboard and foreign points. Large quantities of corn are held in store at Chicago and Peoria. Through rates to the Atlantic seaboard apply from a large number of points in Illinois, but from numerous other localities in that State the corn must be shipped under local rates to and from points like Chicago and Peoria. Some of these through rates and many of the combination rates are higher than through or combination rates on export corn from points in Iowa. Facts relating to competition of routes leading to Gulf ports and to application of "transit rates" on export corn are stated. HELD (1) That through or total combination tariff rates on export corn from points in Illinois, which are higher than the through or combination rate on corn from any point in Iowa, are unlawful under section 3 of the Act to Regulate Commerce. (2) That the evidence is not sufficient to enable the Commission to determine what, if any, other correction should be made in the present rate relations, and that the Boards of Trade of Chicago and Peoria, complainants herein, have leave to apply for further hearing in regard to the effect of the changes made by defendants in the general rate adjustment. Export Rates from Points E. & W. of Mississippi River, 8 I. C. C. 185.

(d) The act does not, as a matter of law, prohibit a carrier by railroad from making a through rate from a point within the United States to a foreign destination of which its division shall be less than the amount charged by it for the corresponding transportation of domestic merchandise to the port of export. Nor is it, as a matter of law, in violation of the act for such carrier to make a lower rate to the port of export on traffic which is exported than upon that which is locally consumed, for the export rate is in essence the division of a through rate. In the matter of relative rates upon export and domestic rates on traffic in grain and grain products and of the publication of tariffs relating to such traffic., Export and Domestic Rates, 8 I. C. C. 214, 255.

(e) It is a question of fact whether rates upon export or import traffic, as well as those upon domestic traffic, are in contravention of the provisions of the act. Export and Domestic Rates, 8 I. C. C. 214, 256.

(f) The Act to Regulate Commerce applies to the transportation of export traffic. Re Export & Domestic Rates on Grain, 8 I. C. C. 214.

(g) Whether rates upon export traffic contravene provisions of the Act to Regulate Commerce is a question of fact. Re Export & Domestic Rates on Grain, 8 I. C. C. 214.

(h) It is a question of fact whether rates upon export or import traffic, as well as those upon domestic traffic, are in contravention of the provisions of the Act to Regulate Commerce. Export & Domestic Rates v. 8. I. C. C. 214.

(i) In the application of export grain rates the carriers should in no case make the rate from any point to the seaboard less than that from any intermediate points on the same line. Export and Domestic Rates, 8 I. C. C. 214, 265.

IMPORTANT CASES SINCE 1908

(j) It seems evident that it was not

the intention of Congress to make the Cummins amendment applicable to traffic to a nonadjacent foreign country. There is a clear distinction between "interstate" and "foreign" commerce in the wording of the Act throughout, and in the definitions of the courts in construing these terms, whether or not the cases arise under the Act to Regulate Commerce. Transportation in interstate commerce, as used in the Act, means the transportation of commodities between or among, the states, territories, etc. Transportation in foreign commerce, as used in the Act, means the transportation of commodities between a point in the United States and a point in a foreign country. The deduction seems clear and inevitable that transportation from a point in the United States to a point in a nonadjacent foreign country cannot be brought within the specification of the Cummins amendment of commerce "from a point in one state or territory or the District of Columbia to a point in another state, territory, District of Columbia, or from any point in the United States to a point in an adjacent foreign country." For obvious reasons, not necessary to enlarge upon, it seems equally clear that commerce from a point in the United States to a point in a nonadjacent foreign country moving wholly intrastate from the point of shipment to a port of export is not within the purview of the amendment. This interpretation is supported by the holdings of the courts in St. Louis, I. Mt. & So. Ry. Co. v. Starbird, 243 U. S. 592, and Aldrich v. Atlantic coast Line R. Co., 104 S. C. 364; Bills of Lading, 52 I. C. C. 671, 729.

(k) While the carrier may not make a limitation exempting itself from liability for loss, damage or injury not occurring on its own road, or its own water line, nor after the property has been delivered to the next carrier, in respect of interstate traffic within this country. nor in respect of traffic to an adjacent foreign country, it may, in respect of export traffic to nonadjacent foreign countries, still enjoy its common law right to contract for such a limitation of its liability. Congress has not sought to take its right from it. While the carrier is bound to issue to the shipper a bill of lading on a shipment destined "from a point in the United States to a point in an adjacent foreign country," the law does not say that, in form, such a bill of lading shall be an "export" bill. Bills of Lading, 52 I. C. C. 671, 732.

(l) The provisions of the Cummins amendment apply only to such export shipments as are destined to "a point in an adjacent foreign country." To shipments destined to a nonadjacent foreign country the provisions of this amendment do not apply, and the jurisdiction of the Commission over the issuance, form, and substance of bills of lading covering such shipment is limited to the provisions which govern the inland or coastwise transportation to the port. Bills of Lading, 52 I. C. C. 671, 733.

(m) The provisions of the Carmack and Cummins amendments are inapplicable to export shipments destined to points in nonadjacent foreign countries, and it is only by the provisions of these amendments that carriers are prohibited from restricting their liability for loss, damage, or injury not occurring on their respective separate lines. In the absence, therefore, of any statutory provision, a carrier is within its legal rights in contracting against liability for a delay not occuring on its own line not the result of its negligence, and, where proper tender of a shipment has been made to a connecting line, to reduce its liability thereafter to that of a warehouseman for the period such shipment is awaiting further transportation. Bills of Lading, 52 I. C. C. 671, 737.

ALL OTHER CITATIONS

Bills of Lading, 52 I. C. C. 671, 727, 728, 736; Amer. Smelting & Refining Co. v. Director General, as Agent, 69 I. C. C. 231.

§2. Establishment and Construction.

See Construction of Rates.

CASES 1887-1908

(a) The Act to Regulate Commerce does not, as a matter of law, prohibit a carrier by railroad from making a through rate from a point within the United States to a foreign destination, of which its division shall be less than the amount charged by it for the corresponding transportation of domestic merchandise to the point of export; nor is it, as a matter of law, a violation of the act for such carrier to make a lower rate to the port of export upon traffic which is exported than upon that which is locally consumed, for the export rate is, in essence, the division of a through rate. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(aa) Market conditions, sometimes in

case of wheat, but seldom in case of corn, may justify an export rate through the port of New York somewhat lower than the domestic rate. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

IMPORTANT CASES SINCE 1908

(ab) Until 1903 export iron and steel traffic moved to Atlantic seaboard at domestic rates when manufacturers asked for lower rates to compete with producers in England, France, Germany, and Belgium, who were then in control of the foreign markets. Eastern Export Iron and Steel, 43 I. C. C. 5, 6.

(b) The maintenance of different export rates to the same port dependent upon the foreign destination of the traffic is not unlawful. Western Export Iron & Steel Case, 43 I. C. C. 129, 131.

(c) There is nothing inherent in export traffic that entitles it as such to take lower rates than domestic traffic. D. Nagase & Co., Ltd. v. Director General, 68 I. C. C. 539, 540.

(d) In paragraph (5), section 25, of the Act Congress stated that "issuance of a through (export) bill of lading shall not be held to constitute an arrangement for continuous carriage or shipment." In view of this specific limitation as to meaning of that term in connection with export traffic, it is evident that issuance of through bills of lading by Pacific Ocean carriers in a nonadjacent foreign country likewise does not constitute such an "arrangement" as to bring those Pacific Ocean carriers within commission's jurisdiction. Boston Wool Trade Asso. v. A., T. & S. F. Ry. Co. 83 I. C. C. 445. 448, 449.

(e) There is nothing inherent in export traffic that entitles it as such to take lower rates than domestic traffic. Lincoln Oil Refining Co. v. C. C. C. & St. L. Ry., 88 I. C. C. 269, 271.

(f) There is an important distinction between the voluntary act of a carrier in granting export rates lower than the corresponding domestic rates and an order from the Commission requiring such a difference to be observed. The formerly may freely be done so long as no violation of the act results, but the Commission may not require a difference in rates on the two classes of traffic unless there is a substantial variation in the service performed. Lincoln Oil Refining Co. v. C. C. C. & St. L. Ry., 88 I. C. C. 269, 271.

R., 74 I. C. C. 721; Boston Wool Trade Asso. v. A., T. & S. F. Ry. Co., 83 I. C. C. 445, 448, 449.

II. BILLS OF LADING.

See Bills of Lading; Routing and Misrouting §3; Through Routes and Joint Rates III; §12.

§3. Provisions in General.

IMPORTANT CASES SINCE 1908

(a) A through export bill of lading is not a joint undertaking for the through carriage of property from an interior point in this country to a foreign port. It is merely an instrument combining for the convenience of the shipper the separate and several contracts of the rail carrier to the American port and of the ocean carrier beyond. As a matter of law, neither the rail nor the ocean carrier is liable for the storage charges at the port. New York Produce Exchange v. B. & O. R. R., 46 I. C. C. 666, 670.

(aa) Carriers' practice of construing "delivery" in export bill of lading, which fixes date from which time limit begins to run for filing of claims for loss and damage, as delivery at port of export, not found unreasonable. Price & Co. v. A. T. & S. F. Ry., 56 I. C. C. 437, 438.

(b) So-called through export bills of lading are in fact two distinct contracts, one on the part of the railroads for the carriage to the port and the other on the part of the ocean line for the carriage

from the port. The Director General, through his agents, performed the contract of rail transportation, and he was not responsible for the detention of cars at the port awaiting vessel space. The complainant retained and exercised the right to direct reconsignment and disposition at the port of exit. Dodge Brothers v. Director General, 62 I. C. C. 689, 691.

(c) Commission reopened 52 I. C. C. 671, in the matter of bills of lading with respect to the form and substance of through export bills of lading. HELD, the power of the Commission to prescribe rules and regulations, not inconsistent with the act, which shall constitute and determine the form of the bill of lading, covers the terms or tenor of that instrument and is, as to the transportation until delivery to the ocean carrier, adequate and complete. And the intent of the Congress to require a uniform through export bill of lading and to have the terms thereof prescribed by the Commission seems clear. HELD, further, present through export bills of lading unreasonable to nonadjacent foreign countries in so far as they differ from those shown in connection with this report. Carriers to publish in accordance with section 6 of the Act. As to bills, of loading for domestic use and to adjacent foreign countries, see 64 I. C. C. 357. In the matter of bills of lading, 64 I. C. C. 347.

(d) Rules and regulations made prescribing form of through export bill of lading to be issued by carriers subject to the act of application to the transportation of property, in connection with ocean carriers, whose vessels are registered under the laws of the United States from points in the United States designated under the provisions of section 25 of the act to points in nonadjacent foreign countries. Export Bill of Lading 64 I. C. C. 347.

(e) The question of the jurisdiction of the Commission to prescribe a unifrom export bill of lading for shipments to nonadjacent foreign countries in connection with ocean carriers whose vessels are registered under laws of the United States is one of law, but pending judicial interpretation of the pertinent provisions of the act the Commission must construe them in endeavoring to perform the administrative duties which they impose upon it. Export Bill of Lading, 64 I. C. C. 347, 351.

(f) Shipments moved to San Francisco, Calif., under "order notify" bills of lading for export, and were unloaded into private warehouse at consignee's request. Shipments subsequently exported. Tariff provided export rate where domestic bills of lading exchanged for export bills at port of exit. HELD: Delivery to warehouse at consignee's order tantamount to delivery to consignees, and carrier justified in demanding surrender of negotiable bills of lading for its protection. Domestic rates assessed found applicable. Rolph, Mills & Co. v. Director General, as Agent, 74 I. C. C. 751, 752, 753.

(g) The Commission in 64 I. C. C. 347 prescribed a form of through export bill of lading. The United States Shipping Board suggested that some changes be embodied in the prescribed form. 1: The following to be printed or stamped in the heading of through export bills: Bill of lading signature No..... Through bill of lading issued in conformity with understanding with the Liverpool Cotton Bills of Lading Conference (1907) Committee and the American Bankers Association. Also "If charges are to be prepaid, write or stamp here, "to be prepaid." Received $..... to apply in prepayment of the charges on the property described herein. The signature here only acknowledges the amount prepaid." HELD, previous order modified as follows: To include in the heading of the form of through export bill heretofore prescribed by the Commission either the provision with respect to signature certificate number suggested by petitioners, hereinbefore quoted, or that provision with the word "agreement" substituted for the word "understanding." To include in that form the second or receipt portion of the prepayment provision suggested, and to print the said form on both sides of the paper, consecutively, in part on one side of the paper and the remainder on the other side, without change in the order of arrangement heretofore prescribed. Export Bill of Lading, 80 I. C. C. 305.

(h) No specific reference whatever in the act relating to through import bills of lading. Although specific jurisdiction over through export bills of lading is conferred by section 25, and some jurisdiction is acquired because traffic originates on rail carriers within United States, the commission has refused to de-

termine and prescribe terms and provisions of export bills respecting service after delivery to steamship company at port of export, in view of limitations on commission's jurisdiction over traffic, or an ocean carrier of that traffic, from nonadjacent foreign country prior to delivery at port by ocean carrier to American rail carrier. Boston Wool Trade Asso. v. A., T. & S. F. Ry. Co., 83 I. C. C. 445, 450.

ALL OTHER CITATIONS

Cosmopolitan Shipping Co. v. Hamburg-American Packet Co., 13 I. C. C. 266, 281; Mobile Chamber of Commerce v. M. & O. R. R. Co., 23 I. C. C. 671, 726, 730, 734, 735; Transcontinental Freight Co. v. Director General, 62 I. C. C. 127.

III. DISCRIMINATION.

See Discrimination.

§4. In General.

CASES 1887-1908

(a) Complainant attacked rates for export to Boston as compared with the rates to New York, from Chicago as discriminatory. The relative reasonableness of rates on shipments from western points to cities on the Atlantic seaboard is to be determined by all the circumstances and conditions that effect the traffic to the respective points between which the rates are questioned, and not solely by one standard of comparison. The length and character of the haul, the cost of service, the volume of business, the conditions of competition, the storage capacity of the different terminal points are all elements of importance bearing upon the relative reasonableness of the respective charges for transportation. The fact that the export rates through Boston and the rates on merchandise intended for coast wise points east of Portland, and the westbound rates from Boston have been made by the carriers the same as corresponding New York rates in order to put Boston on an equality with New York and other seaboard cities wherever Boston is a competitor with those cities is not controlling in determining the reasonableness of eastbound local rates in a traffic in which there is no competition by other cities. In view of the longer haul to Boston than to New York, the greater cost of transportation to Boston, the very much greater volume of business to and from New York, the competition by water transportation by the lakes, Erie Canal and Hudson River, and also by several rival railroad lines, and the geographical and commercial advantages of New York, the differentials on Boston local rates of 10c per 100 pounds on the first and second classes of merchandise and of 5c per 100 pounds on the four other classes between New York and Boston on traffic originating west of Buffalo have not been shown to be unjust and unreasonable or to constitute unjust discrimination against Boston. Complaint dismissed. Boston Chamber of Commerce v. L. S. & M. S. R. R., 1 I. C. C. 754.

(b) It is essential that any method for making rates should be practicable, and not afford a cover for discrimination and injustice. The only practicable mode yet devised for making through export rates, is to add to the established inland rate from the interior to the seaboard, the current ocean rates. New York Produce Exchange v. N. Y. C. & H. R. Co., 2 I. C. C. 553, 563.

(c) From Nov. 4, 1887, to February 20, 1888, the Trunk Lines made through export rates of which the inland proportion accepted by them was, at the Port of New York, often ten cents or more per hundred pounds less on like traffic than the published tariff rates charged at the same time to the same ports. HELD, that the discrepancy between the proportion of the through rate accepted and the established tariffs for seaboard consignments for the same inland carriage, is not shown to have been justified by any circumstances tending to show that it was just or proper, and that it must therefore be deemed an unjust and unlawful discrimination as against the transportation terminating at the port. New York Produce Exchange v. N. Y. C. & H. R., 2 I. C. C. 553.

(d) Through or total combination tariff rates on export corn from points in Illinois, which are higher than the through or combination rate on corn

from any point in Iowa, are unlawful under §3 of the Act to Regulate Commerce. Re Export Rates from Points East and West of Miss. River, 8 I. C. C. 185.

(e) Public policy and good railway policy alike seem to require the same rate on export wheat and export flour, but, in view of the conditions shown, a greater rate of 2 cents per 100 lbs. on export flour than on export wheat is not in violation of the Act to Regulate Commerce. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(f) Carriers engaged in the transportation of export flour from Minneapolis at a rate which is 1½ cents less than the domestic rate to the port of export refuse to make any corresponding concessions to intermediate millers. HELD, That this is unjust and unlawful discrimination against such intermediate traffic, and that whatever line participates in such lower export rate on flour from Minneapolis must make a corresponding rate upon similar traffic from intermediate points. Export & Domestic Rates, v. 8 I. C. C. 214.

(g) Much higher domestic rates on wheat and corn from intermediate points than the export rate from more distant points subject the former localities to undue prejudice, where the circumstances and conditions governing the transportation of corn from the longer and shorter distance points are not substantially dissimilar. Board of R. Comrs. v. Atchison, T. & S. F. R. Co., 8 I. C. C. 304.

(h) Several defendant carriers in transporting wheat and corn from points in Kansas and Missouri and intermediate points to Galveston and New Orleans make lower export rates on those commodities from Kansas City, Mo., or points in that vicinity, than from some of the intermediate stations on their lines. These export rates are much lower than the corresponding domestic rates, in case of which the fourth section is invariably followed. The circumstances and conditions governing transportation of grain from the longer and shorter distance points are not substantially dissimilar. HELD, that the higher rates from such intermediate points subject those localities to undue prejudice, and that if the carriers are allowed to make these low export rates they should in making them treat all intermediate territory alike, and desist henceforth from charging higher rates from the nearer stations than those in effect from the more distant points. Board of Railroad Commissioners of Kansas v. A. T. & S. F. R. Co., 8 I. C. C. 304.

IMPORTANT CASES SINCE 1908

(i) So if A and B are both shippers of grain located at a given point in the west, and A has trade relations with a Baltimore exporter, to whom he usually ships his grain, while B has similar relations with an intermediate dealer at Baltimore, to whom he usually ships his grain, the permit system operates to the advantage of A and to the disadvantage of B. Baltimore Chamber of Commerce v. B. & O. R. R., 45 I. C. C. 40, 49.

(j) Proposal to prohibit recompression or high-density compression at Texas ports, and limit export rates on cotton moving under through bills of lading to traffic delivered direct to ship side, found not justified. Apprehension that carriers might be required to establish similar arrangements at interior points is not well founded, risk or loss while traffic is in possession of the compress is no reason for withdrawing the privilege, it is not shown that the privilege results in failure to meet connections with sailings, exercise thereof does not constitute conversion as there is no difficulty in identifying shipments in and out of the compress, and it seems improper of line-haul carriers attempting to dictate what privileges should be given the traffic after they have completed their part of the transportation service by unloading the traffic on the wharf. Elimination of Transit Privileges on Export Cotton, 73 I. C. C. 299.

A. & V. Ry., 88 I. C. C. 152.

IV. TARIFFS AND CONSTRUCTION.

See Tariffs.

§5. In General.

CASES 1887-1908

(a) In the publication of export rates carriers in the United States shall file in tariffs with the Commission their rate to the port for export, or in case of through rates from point of origin to the foreign nonadjacent port carriers shall file tariffs naming their proportion of the through rate including terminal charges with the Commission. Re Publication of Export tariffs, 2 I. C. C. 9.

(b) It is essential that any method for making rates should be practicable and not afford a cover for discrimination and injustice. The only practicable mode yet devised for making through export rates, as appears by past experience, is to add to the established inland rates from the interior to the seaboard, the current ocean rates. New York Produce Exchange v. New York Central & H. R. R. Co., 2 I. C. R. 553.

(c) Whenever a tariff is established for merchandise billed or intended for export by sea, and ocean rates are not specified, either because of fluctuations or for any other reason, so that only the charge for inland transportation is definitely fixed, the tariff as filed and made public should show the rate charged by the inland carrier or carriers to the point of export, including all terminal charges and expenses, and should also show in what manner the through rate to the point of ultimate destination is to be determined, whether by the addition of the ocean rate from time to time prevailing or how otherwise. New York Produce Exchange v. N. Y. C. & H. R. Co., 2 I. C. C. 553, 554.

(d) The work of the inland carrier is completed when he discharges his freight

at the seaboard, whether in warehouses, elevators or on board vessels. His service is identically the same whether the destination is the seaboard or a foreign port, and there is no reason founded on the character of the service for a difference in compensation, or why a fixed charge applicable to both should not exist. The fixed inland rate would seem the fair and just rate. New York Produce Exchange v. N. Y. C. & H. R. Co., 2 I. C. C. 553, 565.

(e) Through tariffs showing total charges on export from interior points in the United States to destinations in foreign countries cannot, owing to the fluctuation in ocean rates, usually be determined and published in accordance with section six of the Act to Regulate Commerce; and if the inland carrier publishes and maintains its division of the through export rate it apparently does all that it can do, and all that it is required to do under that section; but if the inland carrier, instead of receiving a fixed inland division, makes through rates in fact of which its division fluctuates, a question arises as to the publication of such rates, which is not passed upon in this proceeding. New York, New Haven & Hartford R. Co. v. Platt, 7 Inters. Com. Rep. 323, cited and distinguished. Kemble v. Boston & Albany R. R. Co., 8 I. C. C. 110.

(f) Through tariffs showing total charges on export traffic from interior points in the United States to destinations in foreign countries, cannot, owing to the fluctuation of ocean rates, usually be determined and published in accordance with section 6 of the act; and if the inland carrier publishes and maintains its division of the through export rate it apparently does all that it can do, and all that it is required to do under that section. Kemble v. B. & A. R. Co., 8 I. C. C. 110, 119.

(g) Through tariffs showing total charges on export traffic from interior points in the United States to destinations in foreign countries, cannot, owing to the fluctuations in ocean rates, usually be determined and published in accordance with § 6 of the Act to Regulate Commerce; and if the inland carrier publishes and maintains its division of the through export rate, it apparently does all that it is required to do under that section; but if the inland carrier, instead of receiving a fixed inland division, makes through rates in fact of which its division fluctuates, a question arises which is not passed upon in this proceeding. Kemble v. Boston & A. R. Co., 8 I. C. C. 110.

(h) The Commission, having under consideration the subject of tariffs on export freight, promulgated a general order, directing, among other things, that carriers engaged in the transporting of merchandise for export should, in case such merchandise was taken upon a through rate to the foreign port indicate not only the entire rate, but the inland division which the carrier received, and that where the through rate, by reason of fluctuation of the ocean rate, could not be known, the carrier should specify by its tariff the inland rate which it received. Kemble v. B. & A. R. Co., 8 I. C. C. 110, 114.

(i) Rates on export traffic must be published and filed in accordance with the provisions of section 6 of the Act to Regulate Commerce. Carriers published a rate which is 2½ cents less than the domestic rate to the port of export refuse to make any corresponding concession to intermediate millers. HELD, That this is unjust and unlawful discrimination against such intermediate traffic, and that whatever line participates in such lower export rate on flour from Minneapolis must make a corresponding rate upon similar traffic from intermediate points. Export & Domestic Rates, v. 8 I. C. C. 214.

(j) In the application of export grain rates the carriers should in no case make the rate from any point to the seaboard less than that from any intermediate point on the same line. Export & Domestic Rates v. 8 I. C. C. 214.

(k) Rates on export traffic must be published and filed in accordance with the provisions of section 6 of the act. Export and Domestic Rates, 8 I. C. C. 214, 276.

(l) The Act to Regulate Commerce now requires the publication of import and export tariffs in the same manner as domestic tariffs. Re Publication & Filing of Tariffs, 10 I. C. C. 55.

(m) The carriers will be afforded an opportunity to adjust their tariffs and arrangements, and, if so advised, present the subject to Congress, provided, however, that in the meantime all carriers which do not publish and maintain import and export tariffs shall file with the Commission, as promptly as possible,

a statement of the rates actually charged. If the Act is not amended within a reasonable time, it will be the duty of the Commission to enforce the publication of import and export rates in the manner now provided by law. Re Publication & Filing of Tariffs, 10 I. C. C. 55.

IMPORTANT CASES SINCE 1908

(n) Carriers applied the percentage increases under Increased Rates, 1920, 58 I. C. C. 220, to the through charges, including charges for wharfage, on cotton moving to Galveston, Tex., for export. It had been the practice in the past to base export rates to that point upon the domestic rate, adding thereto the wharfage charges which carriers absorbed. This was the adjustment made in applying the increases under General Order No. 28 of the director general, and rate subsequently established reflected this method of adjusting the rates. Reparation awarded. Weatherford, Crump & Co. v. A. & S. Ry. Co., 73 I. C. C. 315.

V. REASONABLENESS.

See Reasonableness of Rates.

§6. In General.

CASES 1887-1908

(a) The fact that the export rates through Boston, and the rates on merchandise intended for coast wise points east of Portland, and the west bound rates from Boston have been made by the carriers the same as corresponding New York rates in order to put Boston on an equality with New York and other seaboard cities wherever Boston is a competitor with those cities is not controlling in determining the reasonableness of east bound local rates in a traffic in which there is no competition by other cities. Boston Cham. of Com. v. Lake Shore & M. S. R. R. Co., 1 I. C .R. 754.

(b) When freight, for example, grain is hauled to the seaboard for export, or to New England points, from the Northwestern States and Territories of the American Union; or when freight is hauled from the seaboard, or New England points, to the Northwestern States or Territories, through the Cities of Detroit and Chicago, the rule invoked by the petitioners in this case as a basis of relief, namely: that an estimated portion of this through rate as between the points of origin of the freight and Detroit must not be lower in proportion to distance than the rate upon the freight from such points of origin destined to Detroit, is one that cannot be sustained. Detroit Board of Trade v. Grand Trunk Railway of Canada, 2 I. C. R. 199.

(c) When freight is hauled to the

seaboard for export, or to New England points, from the Northwestern States or Territories, or vice versa, through Detroit, the rule that the estimated portion of the through rate from the starting point to Detroit may be lower in proportion to distance than the rate upon freight from such point destined to Detroit cannot be sustained. Detroit Board of Trade v. Grand Trunk R. Co. (Com.), 2 I. C. R. 199.

(d) Complainant attacked as unjust and unreasonable rates on cotton from Meridian, Miss., to New Orleans for export. A rate in effect via one of the roads from Meridian was $1.50 per bale distance 409 miles. HELD, for a distance of 196 miles rate attacked unreasonable to extent it exceeded $1.50 per bale on compressed cotton. New Orleans Cotton Exchange v. C. N. O. & T. P. R. R., 2 I. C. C. 289.

(e) Complainant attacked as unjust and unreasonable rates on oil, carloads, from Titusville, Pa., to Buffalo, N. Y., in that they are higher than the same carrier accepts on oil moving through Buffalo to Perth Amboy for export. Where unreasonableness of freight rates on oil in carload lots is charged for short local hauls and the charge is attempted to be sustained on a comparison of these rates with rates on what is usually an inferior grade of oil transported from Titusville through Buffalo to Perth Amboy, N. J., for export, chiefly in the cars of another company, and it appears that upon such shipments destined to Buffalo there are expensive terminal charges, while upon such shipments to Perth Amboy these terminal charges are far less considerable, the circumstances and conditions which control the making of the rates in each instance are substantially dissimilar. HELD, complaint dismissed. Rice Robinson & Witherop v. W. N. Y. & P. R. R., 2 I. C. C. 298.

(f) The only practicable mode yet devised for making through export rates, as appears by past experience, is to add to the established inland rates from the interior to the seaboard the current ocean rates. New York Produce Exch. v. New York C. & H. R. R. Co. (Com.), 2 I. C. R. 553.

(g) Whenever a tariff is established for merchandise billed or intended for export by sea, and ocean rates are not specified, either because of fluctuations or for any other reason, so that only the charge for inland transportation is definitely fixed, the tariff as filed and made public should show the rate charged by the inland carrier or carriers to the point of export, including all terminal charges and expenses, and should also show in what manner the through rate to the point of ultimate destination is to be determined, whether by the addition of the ocean rate from time to time prevailing, or how otherwise. New York Produce Exchange v. New York C. & H. R. R. Co. (Com.), 2 I. C. R. 553.

(h) From November 4th, 1887, to February 20th, 1888, the Trunk Lines, so called, under resolutions of their Association, made through export rates of which the inland proportion accepted by them was, at the Port of New York, of ten cents or more per hundred pounds less on like traffic than the published tariff rates charged at the same time to the same port. (2) HELD, That the discrepancy between the proportion of the through rate accepted and the established tariffs for seaboard consignments for the same inland carriage, is not shown to have been justified by any circumstances tending to show that it was just or proper, and that it must therefore be deemed an unjust and unlawful discrimination as against the transportation terminating at that port. New York Produce Exchange v. New York Central & H. R. R. Co., 2 I. C. R. 553.

(i) The division of the through rate accepted by the inland carrier is for all practical purposes its rate to the seaboard, and is as fully subject to the provisions of the act and the jurisdiction of the Commission as a rate terminating at the seaboard. New York Produce Exchange v. N. Y. C. & H. R. Co., 2 I. C. C. 553, 568.

(j) Defendants established rates on "exlake" grain from Buffalo, N. Y., to New York and Philadelphia points taking same rates, which were lower on so-called cargo lots of 10,000 bushels of oats and 8,000 bushels of other grain than on shipments of oats and such other grain in carload lots, but afterwards modified their tariffs so that, with few exceptions, the lower rates on cargo lots were restricted to export shipments. Such modifications removed the principal grievance complained of, and no evidence was offered concerning rates on shipments of grain for export. HELD, that the

principle involved under lower rates for cargo or trainload quantities than for carload shipments, whether for export or domestic use, violates the rule of equality and tends to defeat its just and wholesome purpose; and such purpose is not fully accomplished by making all cargo shippers pay the same rate and charging all carload shippers alike. Paine Brothers & Company v. L. V. R. Co., 7 I. C. C. 218.

(k) Conceding that lower rates on export than on domestic grain may be properly allowed, the Commission perceives no sufficient reason for different rates on carload than on cargo or trainload shipments, whether grain is carried for export or for domestic use. The principle involved in such a distinction violates the rule of equality and tends to defeat its just and wholesome purpose. That purpose is not fully accomplished if one scale of charges is applied to cargo shipments and a higher rate is imposed on single carloads, even though all cargo shippers pay the same and all carload shippers are charged alike. Paine Bros. Co. v. L. V. R. R. Co., 7 I. C. C. 218, 223.

(ka) Section 4 of the Act to Regulate Commerce is not violated by fixing a lower rate for export traffic between Chicago and East Boston than the rate upon traffic for domestic consumption between Chicago and Boston, the distance in the latter case being a few miles less than in the former. Kemble v. Boston & A. R. Co., 8 I. C. C. 110.

(l) Defendants make two rates on grain and sixth class merchandise from Chicago, Ill., to Boston, Mass. If the commodity is for local consumption the rate is 2 cents above the rate to New York; but if the commodity is to be exported the Boston rate is the same as the New York rate. The export traffic is delivered to the ocean carrier at East Boston, which is a few miles more distant than Boston from Chicago, and the export rate, which is essentially the inland carriers division of a through export rate, applies in fact only to East Boston. Whether, as a matter of fact, the domestic rate to Boston is unreasonably high, or whether the export rate through Boston unduly discriminates against Boston, are questions which were involved in cases heretofore decided by the Commission; and their consideration in this case is not warranted by any facts developed at the hearing. HELD, the fourth section is not violated by the lower export rate to East Boston than the domestic rate for the shorter distance to Boston, complaint dismissed. Kemble v. B. & A. R. Co., 8 I. C. C. 110.

(m) It is not, as a matter of law, a violation of the Act to Regulate Commerce to make a lower rate to the port of export upon traffic which is exported than upon that which is locally consumed, for the export rate is, in essence, the division of a through rate. Kemble v. Boston & A. R. Co., 8 I. C. C. 110.

(n) In 1898 defendants rates to New York on export corn were 19 cents from Peoria, Ill., and 17½ cents from Chicago; and from the Mississippi River the 17½ cents Chicago rate applied as a proportional rate on export corn coming from west of that river. In January and February, 1899, the proportional rate from the river was made 13½ cents, a reduction of 4 cents, the Chicago rate was made 16 cents and the Peoria rate 17½ cents, a reduction of 1½ cents. This rate from the river had always been higher, or at least no lower than the rate from Chicago. Higher rates are in effect on export grain originating at the river crossings, and local and proportional rates considerably above the proportional export rate are also in force from river points on domestic shipments. Under former rates Illinois corn went forward freely for export through Atlantic ports, but under present rates it is stored in elevators or cribbed upon the farms, while Iowa corn moves in large quantities across Illinois farms and through Illinois markets on its way to the seaboard and foreign points. Large quantities of corn are held in store at Chicago and Peoria. Through rates to the Atlantic seaboard apply from a large number of points in Illinois, but from numerous other localities in that state the corn must be shipped under local rates to and from points like Chicago and Peoria. Some of these through rates and many of the combination rates are higher than through or combination rates on export corn from points in Iowa. HELD, that through or total combination tariff rates on export corn from points in Illinois, which are higher than the through or combination rate on corn from any points in Iowa are unlawful under section 3 of the act. That the evidence is not sufficient to enable the Commission to determine what, if any, other correction

should be made in the present rate relations, but complainants have leave to apply for further hearing in regard to the effect of the changes made by defendants in the general rate adjustment. In the matter of export rates from points west and east of the Mississippi River, 8 I. C. C. 185.

(o) The propriety of present rates in force on Iowa export corn is not considered; and no opinion is expressed concerning the legality of the "transit system" as allowed at Mississippi River crossings, Peoria and Chicago, nor as to whether the statute sanctions a system of local and proportional rates on domestic and export shipments from the Mississippi River, which results in four different rates on corn from the east bank of that river to the Atlantic seaboard. Export Rates from Pts. E. & W. of Mississippi R. 8 I. C. C. 185.

(p) Market conditions, sometimes in case of wheat, but seldom in case of corn, may justify an export rate through the port of New York somewhat lower than the domestic rate, and Philadelphia, Baltimore, Norfolk, and Newport News usually take rates which are certain differentials below the New York rate on both domestic and export traffic. During the period of closed lake navigation the export and domestic grain rates to New York and other ports mentioned should ordinarily be the same. Rates to other ports, including Boston and ports on the Atlantic north of Boston, and Galveston, New Orleans and other Gulf ports may perhaps be properly made lower on export than on domestic traffic to enable them to compete for the export business. Such an adjustment of rates would be to the advantage of the carrier, and just alike to the American consumer and the American producer. But as the problem is primarily one for the carriers rather than this Commission, and some rate changes have been made by them during the progress of this proceeding, and the testimony indicates that the present disparities between domestic and export rates will not become permanent, no order is made in relation to this branch of the case. Export & Domestic Rates 8 I. C. C. 214.

(q) The profit to American millers in manufacturing flour for export is from 1 to 3 cents per 100 pounds, but the freight rates on wheat and flour for export show a difference in favor of the English miller of from 4 to 11 cents per 100 pounds, and, other things being equal, such discrimination is clearly prohibitive upon the American manufacturer. The published railroad rates on both wheat and flour for export have been the same up to a recent period, and the carriers have exacted such rates except where lower rates on wheat were induced by competition. Water competition on the Great Lakes limits rail rates to the various ports on both wheat and flour during the navigation season, and to a degree before the opening and after the close of navigation, and the published and actual water rates on wheat have been from 2 to 4 cents lower than those on flour. To a limited extent the cost of service may be greater in the transportation of export flour than in that of export wheat. The export rate on flour includes delivery on board ship, while the rate on wheat ordinarily does not, and at New York an additional charge of about 1 1-8 cents per bushel for loading wheat is made. Exportation of flour has steadily increased, but for the last six years the increase has not been marked, and a decrease is shown by comparing exports in 1894 and 1898. HELD, (1) That public policy and good railway policy alike seem to require the same rate on export wheat and export flour, but that the duties of the Commission are confined to administering the Act to Regulate Commerce, and in view of all the conditions shown in the investigation a somewhat higher rate on export flour than on export wheat is not in violation of that statute. (2) That the published difference in rates is too wide, and that the rate on flour for export should not exceed that upon export wheat by more than 2 cents per 100 pounds. (3) That the relation of rates on domestic shipments of flour and wheat is not involved in this decision, as the export and domestic freights are handled under different conditions. Export & Domestic Rates 8 I. C. C. 214.

(r) Carriers largely engaged in transporting export flour have for many years made the same rate on wheat and flour, and such long-continued practice is evidence against any difference in rate on those commodities; but the presumption is not irrebuttable, for if it were the carriers could never change their tariffs or classifications. Export & Domestic Rates 8 I. C. C. 214.

(st) Refusal of carriers engaged in

transportation of export flour from Minneapolis at a rate 1½ cents less than the domestic rate to the port of export, to make any corresponding concession to intermediate millers, is an unjust and unlawful discrimination against such intermediate traffic, within the Act to Regulate Commerce; and whatever line participates in such lower export rates on flour from Mnneapolis must make a corresponding rate on similar traffic from intermediate points. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(u) In the application of export grain rates the carriers should in no case make the rate from any point to the seaboard less than that from any intermediate point on the same line. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(v) So-called through export rates, made by adding the ocean rate to the inland rail rates, are not analogous to railroad rates made by joint arrangement by railway carriers subject to the statute, in the sense that the total rate must be published and filed, and it is enough if the railroad carrier publishes and maintains its own rate to the seaboard; but if there is in fact such a joint arrangement that the rate is a joint rate under the 6th section of the Act to Regulate Commerce, then the entire through rate should be published, and not the inland division, which in that case might vary while the entire rate remained the same. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(w) Carriers largely engaged in transporting export flour have for many years made the same rate on wheat and flour, and such long continued practice is evidence against any difference in rate on those commodities; but the presumption is not irrebuttable, for if it were the carriers could never change their tariffs or classifications. Export and Domestic Rates, 8 I. C. C. 214, 269.

(x) So-called through export rates made by adding the ocean rate, whatever it may be, to the inland rail rate, whatever it may be, are not analogous to joint rates made by joint arrangement between railway carriers subject to the statute in the sense that the total rate must be published and filed, and it is enough if the railway carrier publishes and maintains its own rate to the seaboard. But if there is in fact such a joint arrangement that the rate is a joint rate under the sixth section, then the entire through rate should be published, and not the inland division, which in that case might vary while the entire rate remains the same. Export and Domestic Rates, 8 I. C. C. 214, 276.

(y) If carriers are allowed to make export rates, which are certainly very disproportionate to the corresponding domestic rates, in case of which the fourth section is invariably observed, they should in the making of them treat all intermediate territory alike. Board of Railroad Commissioners of Kansas v. A. T. & S. F. R. Co., 8 I. C. C. 304, 315.

(ya) Complainant attacked rates on cotton piece goods, carloads from New England mills through Pacific coast ports to the Orient as compared with rates from southern mills. Rates from the former points were about 85c per 100 pounds and from southern mills $1.25 per 100 pounds. The greater proximity of the New England mill to New York is a natural advantage which diminishes the freight paid for the distribution of the finished product in exactly the same way that the location of the southern mill near the cotton field is an advantage which decreases the freight rate upon the raw material. The lower rate overland which these defendants make from New England is forced by water competition, and the Supreme Court has held that railways do not violate the terms of the act by meeting such competition without reference to the rates from other points where the competition does not exist. HELD, rates attacked not unreasonable or unjustly discriminatory, complaint dismissed. China & Japan Trading Co. v. Georgia R. R. 12 I. C. C. 236.

(yb) The rates to Galveston for export, and to the various destinations in Texas for domestic consumption, found unreasonable per se, and reductions ranging from 3 to 5 cents per 100 pounds ordered. Farmers, Etc. Club v. A. T. & S. F. Ry. et al. 12 I. C. C. 351.

(z) Complainant attacked rates charged on wheat and corn from all stations in Oklahoma to Galveston for export as unreasonable and discriminatory. The rates attacked in this proceeding and the circumstances surrounding the movement are similar to those shown in 12 I. C. C. 352. HELD, rates attacked unreasonable to extent they exceeded 25½ cents and 24½ cents. Territory of Oklahoma v. C. R. I. & P. Ry., 12 I. C. C. 368.

(aa) The advance in the rate on packing-house products which was made by withdrawing a lower export rate is not properly an advance. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

(bb) Complainant attacked as unreasonable rate of $1.25 charged on cotton goods, baled, from southern mills via Pacific ports to Asiatic ports and discriminatory as compared with rates from eastern cotton mills. Previous decision in 12 I. C. C. 130 and 12 I. C. C. 236. HELD, the Commission has approved rate of $1.25 per 100 pounds in previous cases mentioned, complaint dismissed. Enterprise Mfg. Co. v. Georgia R. R. 12 I. C. C. 451.

(cc) On complaint of the City of Wichita, Kansas, alleging that the rates charged by defendants for the transportation of grain in carloads from Wichita to Galveston, Texas, for export are unlawfully higher than the export rates on like traffic in force for longer distances over defendants' lines from Kansas City to Galveston, on some of which lines Wichita is an intermediate point, it appeared that competition, which does not exist at Wichita, actually controls and forces the rates from Kansas City, which are, nevertheless, remunerative to the carrier; but that the present wheat rate at 30½ cents from Wichita to Galveston is excessive as applied to wheat and other kinds of grain to the extent of two cents per 100 pounds. HELD, That the export rates on grain from Wichita to Galveston are unreasonable and unlawful and should be reduced in accordance with the finding, but that order can be directed only against the unreasonableness of such rates and not against the adjustment of export rates as between Kansas City and Wichita to Galveston. Mayor, Etc. of Wichita v. A. T. & S. F. Ry. Co., et al, 9 I. C. C. 534.

(dd) Complainant attacked rates charged on grain carloads from Wichita, Kans., to Galveston, Tex., for export as unlawfully higher than the export rates on like traffic for longer distances over defendants lines from Kansas City, Mo., to Galveston, on some of which lines Wichita is an intermediate point, it appeared that competition, which does not exist at Wichita, actually controls and forces the rates from Kansas City, which are remunerative to the carrier; but that the present wheat rate of 30½ cents from Wichita to Galveston is excessive as applied to wheat and other kinds of grain to the extent of 2 cents. HELD, the export rates on grain from Wichita to Galveston are unreasonable and should be reduced 2 cents per 100 pounds, but the order is directed only against the unreasonableness of such rate and not against the adjustment of export rates as between Kansas City and Wichita. Mayor and City Council of Wichita, Kans. v. A. T. & S. F. Ry., 9 I. C. C. 534.

IMPORTANT CASES SINCE 1908

(ee) But the application of different charges to export and domestic traffic is justifiable. New Jersey Zinc Co. v. C. R. R. Co. of N. J., 36 I. C. C. 289, 290.

(ff) While a carrier for commercial reasons may make effective comparatively low export rates it can not for such reasons be compelled to maintain rates which are less than reasonable. Increased rates from C. F. A. and trunk line territories to Atlantic ports found justified. National Implement & Vehicle Asso. v. B. & O. R. R., 42 I. C. C. 461, 467.

(gg) No fixed relationship has ever existed between the export rates on unmanufactured tobacco to Atlantic and Gulf ports, and the commission does not feel that the equalization of port rates or the restoration of the parity formerly existing between domestic and export rates are sufficient to justify proposed increases in the export rates. Tobacco from Ohio River Crossings, 73 I. C. C. 384, 387.

(hh) Carriers placed embargo on export traffic except when moving under special permits. Routes inserted in permits were invariably inserted by shipper in bills of lading. Contention that under General Order No. 1 of the director general, and the commission's order of April 26, 1918, rates over the cheapest and customary routes should have been protected. HELD, Commission's order provided that where routing specified in bill of lading was disregarded charges should be adjusted according to the rates applicable over the route specified. Shipper exercised option of voluntarily accepting the cheapest routes available when permits were issued, in lieu of withholding shipments until the desired routes became available. North Packing & Provision Co. v. Director General, as Agent, 73 I. C. C. 749.

(ii) Although export rates are generally lower than domestic rates, the

fact that an export rate exceeds the domestic rate between th same points does not establish the unreasonableness of the export rate. American Maize Products Co. v. Director General, 88 I. C. C. 354, 356.

VI. STORAGE AND DEMURRAGE

See Demurrage; Storage.

§7. In General.

ment of new charges for storage of ex-

IMPORTANT CASES SINCE 1908

(a) Carriers believe that establish- port grain held in cars on tracks would relieve congested conditions at the ports. While abnormal conditions require drastic remedies, the cure must be one which is lawfully permissible. Export Grain Storage Charges, 42 I. C. C. 530, 542.

(b) If the assessment of storage charges at the port is proper on shipments moving under through export bills of lading, the requirement that a shipper guarantee the payment thereof must also be proper, for a carrier, as a matter of law, has the right to go even so far as to require the prepayment of all charges before accepting a shipment for transportation. New York Produce Exchange v. B. & O. R. R., 46 I. C. C. 666, 671.

(c) A shipment consigned to a port for export must be regarded as moving in foreign commerce as soon as the transportation begins; the essential nature of a shipment, not its mere accidents, should determine whether it is state or interstate, domestic or foreign; and inasmuch as transshipment at the seaboard is but incidental to the through movement, an export shipment can not be given a local character merely by the device of separate bills of lading. These principles of law are well settled, but they do not lead necessarily to the conclusion that storage charges imposed on export shipments at the seaboard are essentially unlawful. It is true that it is ordinarily incumbent upon a common carrier of domestic freight to allow consignees a reasonable time in which to remove their shipments from the carrier's property, and by analogy it would seem that a reasonable time should be accorded on export freight at the seaboard to permit its transfer from cars to vessels. The Commission knows of no principle of law, however, which denies to a carrier the right to impose storage charges after the expiration of a reasonable period of free time; on the contrary, that right has been frequently recognized. New York Harbor Storage, 47 I. C. C. 141, 153; 154.

(d) Any rule or practice that continues storage charges on export traffic after the tender to the rail carrier by the shipper of an order to move his shipments to ship side, or after receipt by the rail carrier of the vessel's permit to load, is unreasonable. Export Freight Free Time, 47 I. C. C. 162, 177.

(e) And any rule which did not make allowance for the reasonable necessities of the situation with respect to export traffic would in practically every instance result in improper and unjust assessment of storage charges against the shipper. Export traffic must be forwarded from the inland point in ample time to reach the port not only previous to the sailing of a vessel, but a sufficient time in advance of such sailing to enable to effect vessel delivery. No such condition exists with respect to domestic freight, because, ordinarily, it is a matter of indifference to a consignee on what particular day the domestic freight may reach its destination. Delay in transportation of domestic shipments does not necessarily result in imposing demurrage charges upon the consignee, for, in general, there is no reason why he can not remove his traffic from the carrier's property as well at one time as another. Another essential difference between the domestic and export traffic is that domestic traffic is not transported beyond the terminal by a separate water carrier. Export Freight Free Time, 47 I. C. C. 162, 179.

(f) Due to a strike lightermen carriers refused to accept order for delivery of export shipment to steamship. On day steamer arrived second order was tendered for delivery to another steamship and was accepted subject to delay. HELD, storage charges accruing not found unreasonable or unlawful, as complainant gave orders for different delivery and carriers would have been without authority to act upon first order even if accepted. Cade (Inc.) v. P. R. R. Co., 60 I. C. C. 151.

(g) A vessel on which space was engaged was commandeered by government while shipments in transit. While an effort was being made to secure space on other vessels, the shipments were unloaded and stored in order to release equipment. Demurrage and storage charges assessed found not illegal, unreasonable, or unduly prejudicial, as the governing tariff did not limit the causes which might contribute to failure of a vessel to make its scheduled sailing. Dodge Bros. v. Director General, as Agent, 62 I. C. C. 689.

(h) The fact that demurrage and storage charges on export shipments are imposed at one port, and not at others, does not of itself constitute undue prejudice. Dodge Bros. v. Director General, as Agent, 62 I. C. C. 689, 692.

(i) In 62 I. C. C. 583, the Commission found not unjust or unreasonable the demurrage charge and average free time applicable at Baltimore, Md.,

between Feb. 10 and Dec. 31, 1918, on carload shipments of coke consigned to complainants at Baltimore for export to South America through that port. Upon complainant's petition the case was reopened. The issue rests chiefly upon disputes growing out of the operation of an arrangement for substituting cars of coke billed to one consignee for those billed to another. Complainants' acquiesced in that arrangement and participated in its benefit. Before August 1, 1918, complainants exercised control in varying degree over the purchase and shipment of their coke, and concede that they are chargeable for some of the car detention during that period. But they insist that when the fuel administration took over, on August 1, 1918, the placing of orders for coke and the directing shipment, they were deprived of all control over this traffic, could do nothing to expedite the release of equipment, were in nowise responsible thereafter for detention of cars, and therefore should not be charged with any demurrage. Complainants have not shown that defendant is accountable for the irregular movement of traffic which occurred under the abnormal conditions produced by the war. This complaint is apparently founded upon the theory that complainants can not be charged demurrage for car detention which was not directly authorized by them and which was not due to their fault or negligence. Defendant had no authority over the other government agencies, and can not be held answerable for detention, if any, which may have been caused by them. It is not within the province of the Commission to review the acts or omissions of these other governmental agencies. HELD, under the demurrage tariffs shippers are chargeable with demurrage for any detention of equipment which is not due to the fault of the carrier, except as otherwise expressly provided. This is true even if the detention is beyond the shippers control. Original findings confirmed. American Smelting & Refining Co. v. Director General, 69 I. C. C. 229.

(j) Tariff rule governing reconsignment for export shipments consigned locally to New Orleans, La., provided that notice of desire to export be given carrier within 48 hours after arrival at the port, otherwise, local rates and demurrage rules apply. Complainant gave such notice within free time but not within 48 hours as provided by the rule. HELD, demurrage charges collected and rule assailed found not unreasonable or discriminatory. A similar rule is in effect on lines of various carriers serving other ports and it can not be condemned as unreasonable merely because it is not published by all carriers serving New Orleans. Foxley Stave & Lumber Co. v. L. & N. R. R. Co., 74 I. C. C. 43.

ALL CITATIONS

California Sugar & White Pine Co. v. Director General, 73 I. C. C. 338.

VIII. REPARATION.

See Reparation.

§9. In General.

IMPORTANT CASES SINCE 1908

(a) Tariff provided for free lighterage at New York, N. Y., on staves for export when tied in bundles. Complainant's shipments arrived at New York with bands on bundles loose, and carrier refused to lighter, claiming that shipments were not in bundles. Complainant had lighterage performed by outside agency. HELD, since tariff did not specify any particular method of tying staves in bundles to entitle them to free lighterage, reparation awarded in amount of cost of lighterage. Gledhill Co. v. Director General, as Agent, 80 I. C. C. 701.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of commission.

See Interstate Commerce Commission I; Jurisdiction of the Commission.

CASES 1887-1908

(a) Inquiry made as to whether Express Companies are subject to the operation of the act. HELD, Express companies are subject to the act. Re Express Companies, 1 I. C. C. 22.

(aa) Express business conducted by a railroad company is within the Interstate Commerce Act; a liter as to independent express companies. Re Express Companies, 1 I. C. R. 22, 317, 363, 448, 451, 456, 677.

(bc) Express business, when conducted by a railroad company, is within the provisions of the Act; but independent express companies are not subject to the Act, not being included among the common carriers declared to be subject to the provisions of the Act as they now stand. Re Express Companies, 1 I. C. C. 677, 683.

(d) Express companies consisting of independent organizations which carry on the express and parcel business in the usual manner and do not operate railway lines are not subject to the provisions of the Interstate Commerce Act; such business only becomes subject to the provisions of that Act when it is carried on by a railway company or a combination of railway companies as a branch or department of their general freight traffic. United States v. Morsman, 3 I. C. R. 112.

(e) A statute making it unlawful for any common carrier to give undue or unreasonable preference to any person, company or firm, corporation, or locality does not require equal facilities to be given to express companies for carrying on business over a railroad, unless it holds itself out as a common carrier of such companies. Atlantic Exp. Co. v. Wilmington & W. R. Co., (N. C.), 4 I. C. R. 294.

(f) The doing of business—such as that of the express company—which constitutes interstate commerce, by a person who is also at the same time engaged in business of the same kind which constitutes state or local commerce, cannot be made a bar or exemption of the local or state commerce business from taxation or regulation by state authority. Osborne v. State (Fla.), 4 I. C. R. 731.

(g) Express companies not within the Interstate Commerce Act. The Interstate Commerce Act does not apply to express companies properly so called. The court says: "There is no principle of the common law requiring a common carrier receiving articles of trade and commerce from a connecting line to advance or assume the payment of the charges accrued thereon for the transportation of such articles from the point of origin to the connecting line. If it does thus pay or assume such accrued charges, it can retain a lien upon the property transported for their payment as well as for the payment of the charges due to itself for such transportation. An express company, like any other common carrier, has a right to demand that its charges for the transportation shall be paid in advance, and is under no obligation to receive goods for transportation unless such charges are paid if demanded. ..... An express company in the absence of contract, is under no obligation to receive and transport for the original consignor, or to continue the transportation for a connecting carrier, without the prepayment of its charges if demanded. The furnishing of equal facilities without discrimination does not require a common carrier to advance money to all other carriers on the same terms, nor to give credit for the carriage of articles of trade and commerce to all carriers because it extends credit for such services to others." Southern Indiana Express Co. v. United States Express Co., 8 I. C. C., App. LXII.

(h) The defendant express company is a common carrier engaged in the transportation of packages like those carried by the parcels express between the same points, and it is the duty of that defendant to establish for the benefit of the public an adequate service at a reasonable compensation. Whether the amount of these stamps would afford such compensation is not now considered. J. E. Walker v. Baltimore & Ohio R. R. Co., et al., 12 I. C. C. 196.

IMPORTANT CASES SINCE 1908

(ha) The phrase in paragraph (3) of section 15 of the Act, relative to jurisdiction of commission to establish through routes and joint rates, "applicable to transportation of passengers and property," includes express traffic. Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C. 126, 129.

(hb) The Supreme Court of the United States early recognized the binding force of contracts between express and railroad companies under which the former operate, and observed that regulation of matters of this kind is legislative in its character and not judicial. For the commission to decline to permit the establishment of schedules in conformity with such contracts would amount to a revision of the contracts. The commission is aware of no legislative authority for doing this. Express Rates on Milk and Cream, 74 I. C. C. 427, 431.

(i) Under section 15 (3) the Commission has not only the power to require through routes and joint rates between express companies but also to prescribe the terms and conditions under which such through rontes shall be operated; and under this power the Commission may provide for the right of the shipper to route. Certainly the establishment of alternative through routes would be of no advantage if the shipper has no right to direct that traffic. Southeastern Express Co. v. American Railway Express Co., 78 I. C. C. 126, 141.

(ia) In Southeastern Express Co., 78 I. C. C., 126, 129, in construing a section of the act the commission held that express companies are not carriers by railroad. The same conclusion is reached here. Oyler & Son v. Amer. Ry. Exp. Co., 83 I. C. C. 160, 162.

(ib) The commission may not require a rail carrier to relinquish to an express company traffic which it has, by contract with that company, reserved to itself. Question whether combination of baggage and express rates on a particular movement results in unreasonable charges could be determined only upon a record devoted to that subject and properly bringing baggage rates before the commission. Express Rates, 1922, 83 I. C. C. 606, 669.

(j) By the amendment of June 29, 1906, express companies stand with refference to the Act and the several amendments thereto as though they had been named in the original Act of 1887 and stand in the same attitude as that of a railroad except in so far as the language of the Act necessarily excludes them. United States v. Wells-Fargo Co., 161 Fed. 606, 609.

(k) An order establishing additional through routes for express matter is not arbitrary or unreasonable, because made avowedly to foster competition, under Interstate Commerce Act, §15, par. 3 (Comp. St. §8583 (3). American Ry. Exp. Co. v. U. S. (Ga. 1923) 293 Fed. 31.

C. 130.

§1½. State Regulation.
See Interstate Commerce §4; State Rate and Regulation.

IMPORTANT CASES SINCE 1908

(a) It is evident that in case of controversies between express companies and railroads (parties to contracts) their respective rights and duties are matters within the jurisdiction of the courts. Express Rates on Milk and Cream Between I. C. R. R. Points, 74 I. C. C. 427, 431.

ALL OTHER CITATIONS

State v. Adams Express Co., 171 Ind. 138, 144, 153, 154, 85 N. E. 337, and 966; In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 432; Atlantic Packing Co. v. American Ex. Co., 28 I. C. C. 244; Parlin & Orendorff Plow Co. of St. Louis v. U. S. Express Co., 26 I. C. C. 561; State v. Am. Ex. Co. (S. D. 1917), 161 N. W. 132.

§1⅝. Consolidation of Companies.

IMPORTANT CASES SINCE 1908

(a) The intent of Congress that the power of the Commission and authority to approve and authorize the consolidation of two or more carriers shall extend and apply to the consolidation of the express companies into the American Railway Express Company is definitely expressed by the language of paragrph 7, section 5, of the Interstate Commerce Act. The statute further directs that pending the decision of the Commission such consolidation shall not be dissolved. Express Contract, 1920, 59 I. C. C. 518, 520.

§1⅝a. Jurisdiction of Courts.

IMPORTANT CASES SINCE 1908

(a) In case of controversies between express companies and railroad companies over contracts, their respective rights and duties are matters within the jurisdiction of the courts. Express Rates on Milk and Cream, 74 I. C. C. 427, 431.

II. FACILITIES.

See Facilities and Privileges.

§1¾. In general.

CASES 1887-1908

(a) The railroad company performs its whole duty to the public at large and to each individual when it affords the public all reasonable express accommodations. If this is done the railroad company owes no duty to the public as to the particular agencies it shall select for that purpose. The public requires the carriage, but the company may choose its own appropriate means of carriage, always provided they are such as to insure reasonable promptness and security. Re Express Companies, 1 I. C. C. 677, 678.

(b) A railroad company is not under obligation to furnish an express company with facilities for doing an express business upon its road, such as it provides for itself or some other express company unless it holds itself out as a common carrier of express companies. Atlantic Exp. Co. v. Wilmington & W. R. Co., (N. C.), 4 I. C. R. 294.

(c) Unlawful device cannot be imposed upon shipper by reason of contracts which an express company has made with its agents and the railroad. Society of American Florists v. United States Express Co., 12 I. C. C. 120.

(d) Parcels express. The denial to an occasional but not regular patron of the road, apparently upon the ground that he was not a patron, of the privilege accorded to the public generally and without question at most places, of sending baggage by a parcels express operated by the railroad and an express company for the convenience of suburbanites from Philadephia, Pa., to certain points upon the Baltimore & Ohio Railroad by affixing stamp,—is clearly unjust discrimination. Walker v. B. & O. R. Co., 12 I. C. C. 196.

(e) Duty of express company to establish for the benefit of public an adequate service at reasonable compensation from Philadelphia, Pa., to suburban points upon Baltimore & Ohio Railroad. Walker v. B. & O. R. Co., 12 I. C. C. 196.

(ea) Defendants operate, for the convenience of suburbanites, a "parcels express" from Philadelphia, Pa., to certain points upon the Baltimore & Ohio Railroad, whereby packages of not more than 50 pounds can be sent to such points by affixing a stamp, the charge for which varies according to weight. Complainant, an occasional but not a regular patron of the road, complained in September last that he was denied, prior to August 28, 1906, such privilege, upon the ground that he was not a patron of the road. Persons to whom complainant sent packages were also occasional passengers on this road. Since August 28 the privilege has been extended to complainant and the public generally, but defendants insist

that it is their right to restrict the privilege to patrons of the road, for whose benefit it is intended. Upon the facts existing previous to amended act, that the complaint was well founded, because to apply to complainant a particular rule not applied to the general public is clearly an unjust discrimination; but that defendants were not in violation of law when complaint was filed and hearing had. J. E. Walker v. Baltimore & Ohio R. R. Co. Et. Al. 12 I. C. C. 196.

IMPORTANT CASES SINCE 1908

(f) With the very substantial increases in express rates, shippers have a right to demand an improved and steadily improving service; and the obligation on the respondent's part will not be discharged by mere compensation for loss or damage, but primarily by prompt and otherwise satisfactory deliveries. While at all times ready to accord to a common carrier that relief to which it may be justly entitled, the Commission shall not view with complacency anything other than a painstaking and unremitting effort to reduce the item of loss and damage to the lowest possible figure. Express Rates, 1920, 58 I. C. C. 707, 711.

(g) Express should be handled over reasonably direct routes. Southeastern Express Co. v. American Railway Express Co., 78 I. C. C. 126, 132.

ALL OTHER CITATIONS

R. R. Com'rs. of Fla. v. S. Exp. Co., 28 I. C. C. 634, 635; Ozark Fruit Growers' Asso. v. U. S. Exp. Co., Unrep. Op. A-736; Lindsay & Co., Ltd., v. Wells, Fargo Co., Unrep. Op. A-755; Northwestern Trading Co. (Inc.) v. Adams Express Co., 51 I. C. C. 211; Charles L. Campbell v. Southern Express Co., 55 I. C. C. 633; New Albany Box & Basket Co. v. American Railway Express Co., 56 I. C. C. 720; Express Rates, 1920, 58 I. C. C. 281, 295. 707; Southeastern Express Co. v. American Railway Express Co., 78 I. C. C. 126, 132; Express Co. v. American Railway Express Co., 78 I. C. C. 126, 142; Transportation of Strawberries by Express, 81 I. C. C. 634.

§2. Delivery and Receipt.

See Transportation §5, §8.

IMPORTANT CASES SINCE 1908

(a) The right of an express company to maintain a free package pick-up and delivery service at one point, while not maintaining such a service at another point, must necessarily be controlled by the conditions existing at each place, and because such a service is maintained at one place, where the volume of the traffic is large and a wagon service can be conducted economicaly, it by no means follows that a like service must be maintained at another point, where the traffic is small and the cost of keeping up a wagon service might more than absorb the revenue. Phillips v. N. Y. & B. D. Express Co., 15 I. C. C. 631, 635.

(b) In order to remove abuses arising from vague and indefinite free delivery limits it is ordered that express carriers publish a joint general directory, alphabetically arranged by cities; of all express offices in the United States, the name of each office to be followed by a statement as to whether a free-delivery service is maintained at such office or not; that where a free-delivery service is maintained, unless the publication shall circumscribe the delivery limits, it shall be understood that the delivery service comprehends the corporate limits of the place named; that at each such office where restricted free-delivery limits have been established, the boundaries of the free-delivery zones shall be shown in a condensed and abbreviated form sufficient to give notice to the shipper and consignee of the outline of the limits thereof, by streets; that at each point where delivery is made by local express, companies beyond the established delivery limits a footnote shall indicate this fact, the amount of the usual charges by such local companies, and an offer to permit the consignor at point of origin to prepay such charges subject to collection from the consignee of any deficiency; that the directory shall be filed with the Commission and conform to the express tariff regulations; that copies shall be posted at all express offices and furnished to shippers at cost of printing. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 394.

(c) Copies of the general express directory should be posted in all express offices and copies of this and similar publications should be furnished to shippers at a reasonable charge. In Re Express Rates, 24 I. C. C. 380, 395.

(d) There should be definite rules concerning delivery at express traffic, and when free delivery is made the free delivery limits must be plainly indicated. This information should be

contained in the express tariffs and in the express directory. In Re Express Rates, 24 I. C. C. 380, 394, 406.

(e) Free collection and delivery can not always be demanded as a matter of right, and express companies may be justified in refusing to offer it where the points to be served are not readily accessible or are too far removed from the depots, or where the traffic is insufficient to meet the expense incurred or is of such a nature as to preclude its movement by express. Butterworth-Judson Corp. v. Adams Exp. Co., 51 I. C. C. 386, 388.

(f) Due to strike, complainants obliged to cart express from freight station to place of business. Contention that shipments overcharged to extent of cartage charges, not sustained. Carrier's tariffs did not authorize allowance or deductions from legally applicable rate for service performed; and since question whether or not complainants may recover for such services can not be determined from tariff, amounts paid for cartage are not overcharges. Tariff rate itself and rules and regulations connected therewith are standards to determine an overcharge. Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 4.

(g) In the absence of a showing to the contrary, an express company must make personal delivery to consignee. American Ry. Express Co. v. Stanley (Ala. 1922), 92 Sou. 642.

C. 737; American Fruit & Vegetable Shippers Asso. v. American Ry. Express, 81 I. C. C. 87.

§3. C. O. D. Shipments.

IMPORTANT CASES SINCE 1908

(a) There is no common law duty resting on an express company to act as the collection agent of a shipper, but if such an obligation is assumed it arises on some independent contract, which the company may refuse to make. Royal Brewing Co. v. Adams Express Co., 15 I. C. C. 255, 258.

(b) Express companies are entitled to some compensation for acting as collection agent. Returns from collections should be made within 24 hours. In Re Express Rates, 24 I. C. C. 380, 409.

(c) Claims for C. O. D. collections should be promptly paid on presentation of proper proof of delivery and failure to make return. In Re Express Rates, 24 I. C. C. 380, 412.

ALL OTHER CITATIONS

Burke v. Platt, 172 Fed. 777; Davis Hotel Co. v. Platt, 172 Fed. 775, 776; In Re Express Rates, Practices, Accounts and Revenues, 28 I. C. C. 131, 138; In Re Express Rates, 28 I. C. C. 132, 138.

§4. Export Service.

IMPORTANT CASES SINCE 1908

(a) Defendant express companies in receiving shipments destined to foreign parts where the base rate to New York exceeded $1 per 100 lbs. and the shipments exceeded 300 lbs. deducted by their published inland rate 33 1-3 per cent for the inland portion of the through rate, but made such reduction only where the shipments were consigned to themselves at New York to be shipped abroad over their own foreign branch service. Complainant shipper of raw furs from St. Paul to New York and foreign points claimed that this practice resulted in giving a lower rate to New York to certain shippers, and asked that defendants be compelled to extend to all shippers the reduced proportional rate with the privilege reserved to all shippers to select the steamship, route, etc., to the foreign point. HELD, following Cosmopolitan Shipping Co. v. Hamburg-American Packet Co., 13 I. C. C. 266, complainant's demand should be granted to make certain that the traffic which enjoyed the lower rate was actually exported. Joseph Ullman v. Adams Express Co., 14 I. C. C. 340, 344, 345.

§5. Free Transportation.

See Crimes III; Free Transportation.

IMPORTANT CASES SINCE 1908

(a) The Commission entered into an investigation to determine whether the interstate commerce law prohibited express companies from giving free transportation of personal packages to their officers and employees, and to the officers and employees of other transportation companies in exchange for passes issued by the latter to the officers and employees of the express companies. Annual franks were issued to the officers of the issuing and other express companies and the principal officers of railroad companies; paster franks, good for a single shipment, to employees of the express and railway companies. The so-called anti-press proviso of section 1 of the act seemed to justify this practice, but the Commission had held otherwise in Conference Ruling 513. HELD, (1), that the proviso did not have the force and effect contended for the express companies and they were instructed to desist therefrom. Legality of Express Franks, 50 I. C. C. 599.

(b) In 50 I. C. C. 599, the Commission held that the Act to Regulate Commerce prohibited express companies from issuing franks for the free transportation of packages for their officers and employees, and for the officers and employees of other common carriers in exchange for passes or franks of such other carriers. In 212 U. S. 522, the Supreme Court held that the act at that time prohibited express companies from transporting free the property of their officers and employees or of officers and employees of other common carriers. The issue before the Commission is the interpretation of the amended statute. HELD, express companies are prohibited from transporting free the property of their officers or employees or the officers and employees of other common carriers subject to the act. Legality of express franks, 69 I. C. C. 627.

(c) The term frank has long been applied to the free transportation of express matter as well as to the transmission of intelligence by telegraph, telephone and cable companies. Legality of express franks, 69 I. C. C. 627, 628.

(d) Under the Act as amended by the Elkins Act of February 19, 1903, and the Hepburn Act of June 29, 1906, an express company was prohibited from issuing franks to any officer, agent, attorney or employee of itself or other express companies, and of any railroad company, and to the respective families of such persons, and from transporting, without demanding the payment of the full published rates, any property of such persons in an interstate shipment, the granting of such privileges not being within the exceptions enumerated in section 1 of the original Act, which provides that no common carrier shall directly or indirectly issue any interstate free tickets, free pass, or free transportation for passengers except its employees and their families, its officers, agents, etc. United States v. Wells, Fargo Express Co., 161 Fed. 606, 616.

ALL OTHER CITATIONS

In Re Express Rates, Practices Accounts and Revenues, 28 I. C. C. 150; Adams Express Co. v. Mellichamp (Ga. 1912), 75 S. E. 596; Legality of Express Franks, 50 I. C. C. 599, 604.

§6. Money Orders.

IMPORTANT CASES SINCE 1908

(a) If an express company's charges for the transportation of money covered only the actual cost of that service it would be no discrimination for it to ship its own money. American Bankers' Ass'n v. American Express Co., 15 I. C. C. 15, 22.

(b) Complainant bankers requested the Commission to order defendant express companies to discontinue the business of issuing money orders, letters of credit, travelers' checks and drafts, purchase of foreign exchange and purchase and sale of foreign money, etc., on the ground that said business peculiarly belonged to complainants and that defendants in transporting money for themselves in connection with said lines of business carried the same at lower rates than they accorded to complainants. HELD, on motion of defendants to dismiss the complaint defendants had a right to engage in said lines of business, but evidence should be submitted on the question whether in the transportation of money defendants were unduly discriminating against complainants and in favor of themselves. America Bankers' Association v. American Express Co., 15 I. C. C. 15, 24.

ALL OTHER CITATIONS

American Bankers' Ass'n v. American

Express Co., 15 I. C. C. 15, 20; In re Express Rates, Practices, Accounts, and Revenues, 24 I. C. C. 380, 409.

§6a. Speed in Transporting.

IMPORTANT CASES SINCE 1908

(a) The Commission instituted an investigation into and concerning the question of the transportation of strawberries by express in carloads in passenger trains from Florida to northern markets, and of requiring the express companies or the railroads to provide themselves with and furnish refrigerator cars for use in that transportation. Rates charged from Florida second class. Express companies furnish refrigerator cars to strawberry shippers from Alabama, Louisiana and Mississippi. There are two strawberry producing sections in Florida. The principal shipping points in the Northern section are Starke and Lawtey on the S. A. L. The southern section is about 145 miles farther south. The North Carolina shippers use ordinary express and freight refrigerator cars in shipping their product. Shipments by ordinary express are limited. Neither the A. C. L., nor the Seaboard owns any express refrigerator cars, but are dependent upon the Fruit Growers Express Company. Florida growers are in direct competition with Louisiana growers. Louisiana shipments ordinarily move in refrigerator cars either by express or frieght. About 90 per cent of the movement is by express in special trains on passenger schedule. The Louisiana shippers have lower rates per quart available. Because of the expedition with which their shipments are handled, they also have an advantage over the Florida shippers with respect to time in transit. HELD, the record justifies the conclusion that the present service from Florida is inadequate. Time required is four days. Schedule should be shortened thereby accomplishing earlier deliveries. Carriers and shippers will work out a better schedule within 60 days. Transportation of strawberriers by express, in carload lots, in passenger trains, from Florida to northern markets, 81 I. C. C. 634.

§7. Prepaid and Collect Shipments.

IMPORTANT CASES SINCE 1908

(a) A carrier has the right to demand prepayment on all shipments, but it can within reasonable and nondiscriminatory limits waive its right to prepayment and extend credit. It cannot, however, distinguish in rates between those who prepay and those who do not. In Re Express Rates, 24 I. C. C. 380, 399.

ALL OTHER CITATIONS

Boise Commercial Club v. Adams Express Co., 17 I. C. C. 115, 121; In re Express Rates, 24 I. C. C. 380, 404, 405.

§7½. Free Collection and Delivery.

IMPORTANT CASES SINCE 1908

(a) Free collection and delivery can not always be demanded as a matter of right, and express companies may be justified in refusing to offer it where the points to be served are not readily accessible or are too far removed from the depots, or where the traffic is insufficient to meet the expense incurred or is of such a nature as to preclude its movement by express. Butterworth-Judson Corporation v. Adams Express, 51 I. C. C. 386, 388.

(b) Pick up and delivery comprises one distinguishing feature of express service and should be consistently expanded to keep pace with growing needs, rather than curtailed or permitted to become static. Express Rates, 1922, 83 I. C. C. 606, 654.

ALL OTHER CITATIONS

Non Absorption of Switching Charges on Fish, 81 I. C. C. 113.

§7½a. Refrigerator Cars.

IMPORTANT CASES SINCE 1908

(a) In 44 I. C. C., 645, 649, the commission found that it was without authority to require carriers to acquire refrigerator cars for use in express service. Although the law has been changed since that decision, provision of the act under which the commission may require common carriers to equip themselves with adequate facilities for performing their car service applies only to common carriers by railroad. Express companies are not carriers by railroad. Southeastern Express Co., 78 I. C. C., 126, 129. Oyler & Son v. Amer. Ry. Exp. Co., 83 I. C. C. 160, 162.

§8. Special Contracts.

See Special Contracts.

IMPORTANT CASES SINCE 1908

(a) A contract between an express company and railroad companies over whose lines it operates providing that the former shall not charge less than a certain percentage over the railroad rate applying on the same commodity between the same points, cannot be considered as

a controlling factor in passing upon the reasonableness of the express rates. The Commission will, of course, notice the railroad rate as affording a basis of comparison, but the law requires the fixing of just and reasonable charges, and the authority of the Commission to prescribe a reasonable rate is not restricted by the terms of any agreement between the express company and the railroad company. Reynolds v. Southern Express Co., 13 I. C. C. 536, 539.

(b) Where defendant express company publishes an export rate from St. Paul to New York which is less than its domestic rate, it must offer that rate to the entire public and may not confine it to itself nor to a particular express company or forwarder. Joseph Ullman v. Adams Express Co., 14 I. C. C. 585, 587.

(c) A railway company may lawfully transport the men and supplies of an express company without reference to any tariff provision, when employed or used in the business of the express company upon the line of the railway itself, and in the same manner an express company may lawfully transport the packages of a railway company between points upon that line of railway, without reference to its tariff rates; but a railway company may not transport men and supplies for an express company when employed and used in the business of that company at points not on the line of railway, and an express company may not transport for the railway packages between points on its route but not on that particular line of railway. In the Matter of Free Transportation, 16 I. C. C. 246, 250.

(d) Any contract for the free transportation of men and materials of express companies to points off the line of a carrier, though valid when entered into, must become invalid under the operation of the Act. In Re Contracts of Express Companies, 16 I. C. C. 246, 253.

ALL OTHER CITATIONS

Kindel v. Adams Express Co., 13 I. C. C. 475, 480, 495; Phillips v. N. Y. & B. D. Express Co., 15 I. C. C. 631, 632, 633; In Re Express Rates, 28 I. C. C. 132, 137; Pacific Express Co. v. Krower (Tex. 1914), 163 S. W. 9, 10; United States Express Co. v. Cohn (Ark. 1913), 157 S. W. 144; Glonlyon Dye Works v. Interstate Exp. Co. (R. I. 1914), 91 Alt. 5, 7.

§8. (1) Limitation of Liability.

See Loss and Damage §9; Limitation of Liability.

IMPORTANT CASES SINCE 1908

(a) Apparently an express company has a right to contract for limitation of its liability beyond its own line and after it has delivered the property to another carrier in respect of shipments to nonadjacent foreign territories, but a receipt or bill of lading which provides for that limitation of liability should clearly and appropriately disclose the class of traffic in connection with which it is to apply, and should recite that it is not to be used on shipments from a point in the United States destined to a point in an adjacent foreign country. Express Classification, 1920, 59 I. C. C. 265, 269.

(b) Where the published schedules and the shipping receipt of an express company show that the interstate rate is based upon an agreed value, the right of the carrier to have its liability so restricted remains, despite the fact that no inquiry was made of the shipper as to the value of the package. Adams Express Co. v. Croninger, 33 Sup. Ct. 148, 153; 226 U. S. 491.

ALL OTHER CITATIONS

Adams Express Co. v. Croninger, 226 U. S. 491, 33 Sup. Ct. 148, 57 L. Ed. 314, 44 L. R. A. (N. S.), 257; Lynch v. Southern Express Co. (Ga. 1916), 90 S. E. 655; In re Express Rates, 24 I. C. C. 380, 395, 396, 404; In re Express Rates, Practices, Accounts and Revenues, 28 I. C. C. 131, 132, 137, 138; Wells Fargo & Co. v. Nieman-Marcus Co., 33 Sup. Ct. 267, 269, 227 U. S. 469; Apple Suit & Cloak Co. v. Platt (Colo., 1913) 132 P. 71, 72; Adams Express Co. v. Mellichamp (Ga. 1912) 75 S. E. 596; Pacific Express Co. v. Krower (Tex., 1914), 163 S. W. 9, 10; United States Express Co. v. Cohn (Ark., 1913), 157 S. W. 144; Glonlyon Dye Works v. Interstate Exp. Co. (R. I. 1914), 91 Atl. 5, 7.

§8a. Switching and Trucking.

IMPORTANT CASES SINCE 1908

(a) Respondents proposed to discontinue the absorption of charges for switching or trucking at Chicago, Ill., on fish, carloads, shipped by express or on passenger trains from British Columbia, and other western points. Carload rates

covering shipments by express or on passenger trains generally do not include a drayage or delivery service or movement beyond the tracks of the delivering road. When any further movement is necessary an additional terminal switching charge is assessed. The tariff items here sought to be canceled are exceptions to this general rule. Protestants warehouse at Chicago is on the C. & N. W., and shipments to Chicago over that road are delivered direct to the warehouse under the line haul rate. On shipments arriving over roads other than the C & N. W., at the instance of the express carrier, the latter will continue to absorb the terminal transfer charge. Protestant admits that it never has taken advantage of the free drayage provision. Since its inbound shipments are always routed over the Northwestern it does not appear that its interests will be prejudiced by cancellation of the items in question. HELD, suspended schedules justified. Non-absorption of Switching Charges on Fish at Chicago, Ill., via Express or Passenger Service, 81 I. C. C. 113.

III. DISCRIMINATION.

See Discrimination.

§9. In General.

IMPORTANT CASES SINCE 1908

(a) Even where unjust and undue discrimination, free from criminal act, is shown to exist in the practices of express companies, the Commission will go no further in destruction or disturbance of the business of the carrier, or in depriving the public of conveniences and facilities of value to it, than is necessary in order to remove the discrimination to the extent that is unjust or undue. American Bankers' Ass'n. v. American Express Co., 15 I. C. C. 15, 21.

(b) The traffic which express companies move should flow with the greatest possible celerity between all portions of the country and whatever artificial barriers have been raised by the existence of separate express companies should be broken down, and the rates made or practices followed should neither rest upon the foundation of a railroad's preference nor of an express company's opportunity. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 387.

(c) The large differences between intrastate and interstate express rates for equal distances place a burden upon interstate shippers and give a corresponding advantage to intrastate shippers, thus accomplishing an inevitable restriction of shipment in interstate commerce or shrinkage of profits. Traffic Bureau, Sioux City Commercial Club v. Am. Ex. Co., 39 I. C. C. 703, 719.

(d) Complainant attacked the express rates of $3.50 per 100 lbs. charged on certain less-than-carload shipments of fresh fish shipped from Selkirk, Man., to Buffalo, N. Y., as unreasonable and discriminatory to the extent that it exceeds the subsequently established rate of $2.60. HELD, (1) that the Commission's jurisdiction extended over that part of the transportation performed within the United States, but (2) that the facts did not justify a finding of unreasonableness or discrimination in the charges with respect to such portion of the transportation. Complaint dismissed. Booth Fisheries Co. v. American Express Co., 45 I. C. C. 363.

ALL OTHER CITATIONS

Saunders and Welles v. Southern Express Co., 18 I. C. C. 415, 422; Atlantic Packing Co. v. American Express Co., 28 I. C. C. 244; Express Rates, 1922, 83 I. C. C. 606, 671, 676, 680.

IV. RATES.

§10. Reasonableness in General.

See Reasonableness of Rates.

CASES 1887-1908

(a) Express company is entitled to charge a reasonable amount for the service which it gives, but cannot justify a rate by the mere production of its contracts with its agents and the railroad. Society of American Florists v. United States Express Co., 12 I. C. C. 120.

(aa) Unusual expense arising out of special delivery of a certain class of express traffic does not justify any greater increase in the rate than will cover such expense. Society of American Florists v. United States Express Co. 12 I. C. C. 120.

(ab) Complainant attacked express rates on cut flowers from Chatham, N. J., to New York, N. Y., as excessive and unreasonable. Defendants rates on cut flowers from certain points in New Jersey and Pennsylvania to New York City, prior to May 1, 1906, were graduated from 50 to 75c per 100 pounds and on empty boxes returned from 5 to 25c each; on that date the cut flower rates

were increased to $1.00 per 100 pounds, and empty boxes folded flat returned 50 to 75c each, per 100 pounds and on empty boxes not folded flat $1.00 per 100 pounds. HELD, rates attacked unreasonable to extent they exceeded 60c on cut flowers, merchandise rates to apply on the empty boxes returned. Reparation withheld pending further action. Society of American Florists and Ornamental Horticulturists v. United States Express Company, 12 I. C. C. 121.

(ac) An added and unusual terminal expense arising out of the special delivery of a certain class of express traffic does not justify any greater increase in the rate than will cover such terminal expense. Society of American Florists and Ornamental Horticulturists v. United State Express Company, 12 I. C. C. 121.

(b) An express company is entitled to charge a reasonable amount for the service it gives, and this servicce being partly rendered by its own employees and partly rendered by the railroad, it can not justify a rate by the mere production of its contracts with the agents and the railroad, as an unreasonable rate can not be imposed upon the shipper by reason of contracts which an express company had made with its agents and the railroad. Society of American Florists and Ornamental Horticulturists v. United States Express Co., 12 I. C. C. 121, 127.

(c) An express company can not justify a rate which, in comparison with other rates, is excessive and unreasonable, by showing that it gives a service that is exceptionally expensive, where the burden of the rate charged therefor, falling upon the shipper, increases an already sufficient return to the railroad. An express company is entitled to a reasonable amount for the service which it gives; and this service, being partly rendered by its own agents and employees and partly rendered by the railroad, it cannot justify a rate by the production of its own contracts made with the agents and the railroad. Society American Florists v. U. S. Express Co., 12 I. C. C. 121, 127.

(d) Express rate of $350 per car for horses from Columbus, Ohio, to Kansas City and to St. Paul, unjust and unreasonable and reduced to $250.00. McLaughlin Bros. v. Adams Express Co., 12 I. C. C. 489.

(e) Express rates on horses from Columbus, Ohio, to Kansas City and St. Paul should not exceed $250 per car. McLaughlin Bros. v. Adams Express Co., 12 I. C. C. 489.

(f) Complainant attacked express rates on horses from New York to western points. Defendants rate per car from New York to Columbus, O., is $200; from Columbus to Kansas City, Mo., $350; from Columbus to St. Paul, Minn., $350. The rate per car from New York to St. Louis, Mo., is $300; from St. Louis to Kansas City, $150; from New York to Chicago, $250; from Chicago to St. Paul, $200. Thus the total charge from New York to Kansas City when the shipment is stopped at St. Louis is $450; when stopped at Columbus the total charge is $550. Similarly the charge from New York to St. Paul is $450 when the shipment is stopped at Chicago and $550 when stopped at Columbus. HELD, rate of $350 per car from Columbus to Kansas City and to St. Paul is unjust and unreasonable and should not exceed $250 per car. McLaughlin Bros. v. Adams Express Co., 12 I. C. C. 489.

IMPORTANT CASES SINCE 1908

(g) Express rates ought not to be so low with reference to freight rates as to attract to the express service business which can be properly and more cheaply handled by freight. When a reasonable freight rate has once been established the express rate in many instances ought to be fixed with reference to it. Nevertheless there is a wide field in which express charges may vary without unduly diverting traffic from freight to express. Kindel v. Adams Express Co., 13 I. C. C. 475, 484.

(h) The first consideration in an express service is the quality of the service itself, and the compensation allowed should be adequate to a service of high quality. Maricopa County Commercial Club v. Wells, Fargo & Co., 16 I. C. C. 182, 185.

(i) A system must be developed by which express rates shall conform to standards to which railroads have in a great measure conformed and which the law enjoins. Boise Commercial Club v. Adams Express Co., 17 I. C. C. 115, 122.

(j) The question of what is a reasonable rate for a transportation service upon a certain commodity must be determined individually, and the ques-

tion of what other traffic may or may not move has no bearing upon the determination of this particular issue. Ohio Face Brick Mfrs. Ass'n. v. Adams Express Co., 20 I. C. C. 582, 585.

(k) A reasonable express rate may not be fixed on the basis of the value of the property owned and used by the express company. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C., 380, 418.

(l) An express company has no right to impose unreasonable rates by reason of the exclusive contract it enjoys with the railroad. It must be treated as the railroad itself would be treated. It is an arm of the railroad; it is the railroad itself reaching out of the door and taking the package and delivering it again personally to the consignee. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 419.

(m) A reasonable express rate is one which gives reasonable compensation to the rail carrier for carrying a small package upon a passenger train, or a train going at passenger speed, plus reasonable compensation for the service of gathering, care and delivering which the express company as such renders. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 424.

(n) The Commission, recognizing the variation in the density of traffic and of population and in the expense of operating railroads in the different sections of the country, has divided the country for the purpose of making express rates into 5 grand sub-divisions or zones, which conform generally to those recognized by rail carriers in the matter of freight rates. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 430.

(o) While the construction of express tariff rates upon the blanket theory after the fashion of the postage stamp might be one of far-sighted policy on the part of the companies, the Commission is not free to substitute its own judgment as to policy for that of the carriers themselves. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 430.

(p) The Commission reached the following conclusions as to the standard of reasonableness of express rates: 1, Express rates should be made primarily to meet the need of the great body of the people and should, therefore, be stated in the terms that represent the small package which the express company is intending to carry rather than by the 100 lbs., as freight rates are stated. 2. In the fixing of its rates the company should not be allowed to charge more than the railroad company if the latter undertook to, and did, give the same service. 3. It is proper for the government to treat the express company as a freight forwarder by passenger train, giving supplemental service at each terminus and intermediate care. 4. An express rate may not be based upon the monopoly right of the express company to be the exclusive freight forwarder over one or more lines of railroad. 5. The rate should not include more than a reasonable compensation for the service given, even though such compensation falls below that which the railroad exacts as a minimum for the carriage of 100 lbs. of freight. 6. It is unreasonable to fix as rapid a decline in the express rates for long distances as is made by the railroads in their freight rates, express service in this respect being more analogous to passenger than to freight service. 7. In compounding the express rate the railroad should be allowed a compensation for bulked freight moved upon a passenger train as to which it is relieved by contract from all liability for loss or damage and is without the expense of furnishing a receipt, the billing, the bookkeeping and a great number of other general expenses. 8. The rate should include a return to the express company which will compensate it with profit of the expense of the serice which it gives, there being added thereto in the formation of the total rate a proper charge which it may reasonably make for the service which the railroad gives, as stated in 7., above. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 431.

(q) Express rates should include a return to the express company which will compensate it with profit for the expense of the service, there being added thereto the proper charges which it may reasonably make for the service the railroad gives. In Re Express Rates, 24 I. C. C. 380, 431.

(r) In the case of shipments of extraordinary value, not only is the carrier entitled to notice of each value in order that its care may be increased, but it is also entitled to extra compensation for

the increased liability and care. In Re Express Rates, Practices, Accounts and Revenues, 28 I. C, C. 131, 138.

(s) The element of time is the controlling factor that makes express service valuable, and it is of especial importance in connection with the transportation of such perishable commodities as fresh fruits and vegetables. Davies Spur, Wash., Express Rates, 43 I. C. C. 143, 146.

(t) An element of potential competition of no slight importance was and must always be a factor in the plan under which the express business is conducted in this country. Express Contracts, 1920, 59 I. C. C. 518, 522.

(u) Complainants attacked second class rates on strawberriers, carloads, by express, from Kentucky, Tennessee, Alabama, and Mississippi served by the Southern and L. & N., to destinations in central and trunk line territorries. as unjust and unreasonable and the maintenance of lower rates from Louisiana, Alabama, Kentucky, Tennessee and Mississippi served by the I. C., subjects them to unjust discrimination and undue prejudice. Commodity rates, about 65 per cent of the first class rates applicable in any quantity, have been in force for some years. The second class rates are based on 75 per cent of the first class rates Refrigerator car service, however, is not available in connection with express rates. Berries from this territory cannot be successfully marketed because the feight movement is so slow that they deteriorate before reaching their destinations. Hammond, La., on the I. C., is the center of an important berry producing region, which for about 18 years has had the benefit of regular express refrigerator service and carload rates to all northern and eastern consuming points. Shipments from Alabama and Louisiana are made contemporaneously. Generally speaking, the carload commodity rates from Louisiana points are a lower percentage of the first class rates than are the carload rates from points farther north. What complainants really desire is the establishment of a carload express refrigerator service. There is a substantial difference in the circumstances surrounding the traffic from Louisiana as compared with the traffic from points on the L. & N. HELD, rates attacked not unreasonable and failure of defendants to establish express carload refrigerator rates not unduly prejudicial, complaint dismissed. C. C. Oyler & Son v. American Railway Express Co., 83 I. C. C. 160.

(v) First-class express rates on live poultry when movement is in excess of 400 miles, and second-class for distances of 400 miles and under, found not unlawful. Present adjustment was approved by commission in Express Classification, 1920, 59 I. C. C., 265, 279, following compromise agreement between shippers and express officials in recognition of hazardous character of traffic and high rate of mortality in case of long hauls, and present record is not convincing that any charge should be required. Express Rates, 1922, 83 I. C. C., 606, 666.

(w) No grounds appear in justification of express company's not accepting racing pigeons for transportation at same rates and conditions as to declared or released values, under which live poultry and pigeons for market are transported. No peculiar transportation conditions affect movement of racing pigeons to distinguish them from other live pigeons or poultry for assessment of higher rates; and as value and consequent liability constitute only other element for basing distinction, it follows that, whether shipped for food or other purposes, pigeons of same actual declared or released value should take same charges. Express Rates, 1922, 83 I. C. C., 606, 666.

(x) Increased interstate express rates and charges prayed in petition filed by American Railway Express Co., found not justified. Cost of operating express service or amount of property investment devoted thereto not properly determined, data in Mail Pay Case, 56 I. C. C., 1, are not applicable for purpose of arriving at expenses of express service, and method used in determining amount of investment is not such as to produce correct result. Express Rates 1922, 83 I. C. C. 606, 621, 635, 677.

(y) An express rating may not be based upon any one single consideration, and without regard to proper relationship that it should bear to ratings of other articles of similar transportation characteristics in express classification. Express Rates, 1922, 83 I. C. C. 606, 675.

Ry., 88 I. C. C. 696.

§11. Specific rates.

See Comparative Rates.

(1). General special rates.

IMPORTANT CASES SINCE 1908

(a) There must be a new classification of express rates, in which the

standard of first-class rate shall be that on merchandise, and to which there shall be but one great class of exceptions, or second class, consisting of articles of food and drink, now carried under the term of 'general specials.' The rate on the latter class should be a certain percentage of the merchandise rate, and 75 per cent of the merchandise rate would yield a fair rate. Other rates may be made to meet traffic needs and develop industries, but all such rates should be based on conditions of service, and should likewise be stated in percentages of the merchandise rate. In Re Express Rates, 24 I. C. C. 380, 433.

ALL OTHER CITATIONS

Adams Express Co., 14 I. C. C. 340, 342; rehearing denied, 14 I. C. C. 585; Davis v. West Jersey Express Co., 16 I. C. C. 214, 216; U. S. v. Adams Express Co., 16 I. C. C. 394, 395; Oak Grove Farm Creamery v. Adams Express Co. 19 I. C. C. 454, 455; Ohio Face Brick Mfrs. Ass'n v. Adams Express Co., 20 I. C. C. 582; Franklin, Stiles & Franklin v. Southern Express Co., 21 I. C. C. 88; Bridgeman-Russell Co. v. Great Northern Express Co., 22 I. C. C. 573, 577; Providence Fruit & Produce Exchange v. A. E. R. R., 51 I. C. C. 167; In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 403, 433.

§11 (2). Rates based on value.

See Released Rates.

IMPORTANT CASES SINCE 1908

(a) The charges of express carriers based upon valuation in excess of $50, shall not exceed 10c for each $100 or fraction thereof in excess of $50, and this irrespective of the rate of carriage. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 397.

ALL OTHER CITATIONS

Hartville Celery Growers' Ass'n v. Pacific Express Co., 14 I. C. C. 590, 592; Fairmont Creamery Co. v. Pacific Express Co., 15 I. C. C. 134, 135; Acme Portland Cement Co. v. American Express Co., 28 I. C. C. 316.

§11 (3). Rates based on weight.

See Weights and Weighing.

IMPORTANT CASES SINCE 1908

(a) Rule 7 of express companies, providing for assessment of charges on actual weight requires no change. In Re Express Rates, 24 I. C. C. 380, 407.

(b) The weight basis of assessing charges on returned shipment should be the same as on shipments forwarded. In re Express Rates, 24 I. C. C. 380, 408.

(c) Complainant attacked practice of defendant in assessing charges on ice cream in 5 gallon wet containers based on an estimated or billing weight of 115 pounds, while contemporaneously assessing charges on ice cream shipped in 5 gallon dry containers based on actual weight as unduly prejudicial. Original report in 63 I. C. C. 153, wherein the Commission found this prejudice would be removed by billing the dry container and contents at 75% of the gross actual weight thereof. As a general rule, express charges are based on the gross weights of the articles transported or on estimated weights which closely approximate the gross weights. An exception is made in the case of food articles rated second class, among which is ice cream, when shipped in ice. HELD, original report affirmed. Glacifer Company v. American Railway Express Company, 81 I. C. C. 223.

(d) As a general rule, express charges are based on the gross weights of articles transported or on estimated weights which closely approximate gross weights. An exception is made, however, in case of food articles rated second class, among which is ice cream, when shipped in ice. Glacifer Co. v. Amer. Ry. Exp. Co., 81 I. C. C. 223, 225.

C. 153; Weights on Berries in Pony Refrigerators, 64 I. C. C. 610; Estimated weights on berries in pony refrigerators, 64 I. C. C. 610; Express Rates on Cake, 74 I. C. C. 234; Payne v. American Ry. Exp. Co., 74 I. C. C. 757.

§11 (4). Block system.

IMPORTANT CASES SINCE 1908

(a) Block-system rates not to be disturbed because of showing that their use will increase cost of transporting bread, other bakery products, and yeast.

In the Matter of Express Classification of Bread, etc., Unrep. Op. A-671.

(b) The geographical block system prescribed in 24 I. C. C., 380, serves merely to locate and group express stations from and to which compounded rates apply; and only for cogent reasons should those long standing and well-known groups be broken up and rearranged. Express Rates, 1922, 83 I. C. C. 606, 653.

(c) For construction and application of revised express rates and charges, and to bring about closer coincidence between rate zones and accounting groups under uniform contract between American Railway Express Co. and rail lines over which it operates, the United States to be divided into three rate zones, delimited by parallels of latitude and meridians of longitude as described in report. Express Rates, 1922, 83 I. C. C. 606, 677, 679.

ALL OTHER CITATIONS

Sanford v. Western Express Co. 16 I. C. C. 32, 34, 36; Express Rates, 1922, 89 I. C. C. 297; Kindel v. Adams Express Co., Unrep. Op. A-620.

V. ROUTE

§12. In general.

IMPORTANT CASES SINCE 1908

(a) With respect to circuitous routing of shipments by express companies, it appeared that the companies, on shipments for delivery at points on the lines of railroad over which they operated, were accustomed to retain possession of the shipment, so as to receive the longest possible haul via their own lines. As a result, many shipments were carried by roundabout routes before being delivered to the final carrier, and excessive charges were assessed, based upon the long routing, instead of on the route over which the shipments should have traveled. HELD, the companies should establish and jointly publish through routes between the principal points in the United States, which routes should follow the main lines of travel, the most direct in point of time, measured by the schedule of those passenger trains by which normal schedules are observed. These joint through routes should be designated by number and filed with the Commission. The tariffs naming them should, merely as a matter of information, state the usual time occupied in carrying traffic between the termini. The tariffs publishing these through routes should contain the names of the termini and the number of the route, the gateways between points of origin and destination, the names, in alphabetical order, of all the principal stations on the through routes so established and an alphabetical index of stations, showing the route number or numbers by which each may be reached. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 393.

(b) The consignor has the right to indicate, in writing, by what joint through route his express shipment shall move. In re Express Rates, 24 I. C. C. 380, 393.

(c) And express companies are not liable for misrouting where instructions of shipper are followed. Brackett Co. v. G. N. Express Co., 29 I. C. C. 667, 668.

(d) Contention that under paragraph (4) of section 1 of the Act, if an express company provides through routes and reasonable facilities for their operation, it has fulfilled its common-carrier duty to the public and commission can not require it to establish additional joint through routes which would short-haul it, not sustained. Limitation in act prior to 1910 restraining commission from establishing through routes where reasonable or satisfactory through routes existed has been removed, and commission is now required to establish such through routes whenever deemed necessary or desirable in public interest. Southeastern Express Co. v. American Ry. Express Co. 78 I, C. C. 126, 130.

(e) Contention that if a strict construction be given to "carrier by railroad" in section 15 (4) the phrase "any railroad corporation being a common carrier" in section 15 (8) also should be construed strictly, and that under such construction shipper would not have right to route express, not sustained. Right of shipper to route was part of system of express rates and practices prescribed in 24 I. C. C., 380, 28 I. C. C., 131, and is provided for in classification of express companies. Under section 15 (3) the commission has power to require through routes and joint rates, to prescribe terms and conditions under which they shall be operated, and under this power may provide for right of shipper to route. Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C., 126, 141.

(f) Fact that in vast majority of cases shippers do not route their express should not prevent shipper who is capable and who desires to, from routing express over reasonably direct routes. Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C. 126, 141, 142.

(g) Right of shipper to route shipments should not include right to direct movement via any and every transfer or connecting point between two express companies, but should include choice of alternative reasonable direct routes via designated transfer points. Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C., 126, 142.

(h) It became necessary, in 24 I. C. C., 380, and 28 I. C. C., 131, to forbid an express company from serving unduly its own interests by circuitous routing, and there is no more reason for a shipper to be allowed to route circuitously than there is for an express company. Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C., 126, 142.

(i) American Ry. Express Co. and Southeastern Express Co. required to recognize as "established routes" the reasonable direct routes to be established in accordance with findings herein, and to provide in its tariffs for right of shipper to designate routing of shipments over such routes; each company to have right, when traffic is unrouted, to use reasonable route giving it longest haul, but to obey routing instructions when given. Southeastern Express Co. v. Amer. Exp. Co., 78 I. C. C., 126, 143.

(j) Routes are not specified in express tariffs. They were required to be shown by In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, but by supplemental order therein the express companies were relieved from so doing. Kellerman v. Director General, as Agent, 83 I. C. C. 347, 348.

(k) Express company's practice of using direct routes eliminated and closed all indirect or circuitous routes just as effectively as if by tariff publication. Southeastern Express Co., 78 I. C. C., 126, 140. Kellerman v. Director General, as Agent, 83 I. C. C. 347, 349.

ALL OTHER CITATIONS

C. 561; In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 392, 423, 429, 431, 432, 424, 426, 427, 436; Atlantic Packing Co. v. Am. Exp. Co., 28 I. C. C. 244, 246; Yakima County Hort. Un. v. Northern Express Co., Unrep. Op. A-916; Providence Fruit and Produce Exchange v. Exp. Co., Unrep. Op. 1831; Actual Mileage to Determine Rates on Milk, 69 I. C. C. 90; Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C. 126, 143.

VI. TARIFFS.

See Tariffs; Released Rates.

§13. Construction.

CASES 1887-1908

(a) Complainant attacked action of defendants in operating a parcel express from Philadelphia, Pa., to certain points on the B. & O., whereby packages of not more than 50 pounds can be sent to such points by affixing a stamp, the charge for which varies according to weight, the privilege to be exercised by patrons of the road only. Subsequently the privilege was extended to apply to the complainant and the public generally. The practice was not covered by tariff, and until this is done the Commission will vouchsafe no opinion as to its lawfulness. HELD, complaint dismissed. J. E. Walker v. B. & O. R. R., 12 I. C. C. 196.

IMPORTANT CASES SINCE 1908

(b) Simplicity is the ultimate essential in express matters. Instead of becoming more and more involved in classification, rules and rates, as has been the tendency, there must be a complete reversal of policy. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 413.

(c) The duly established and filed rates and contracts, such as a uniform express receipt, are binding on the shippers unless and until held unreasonable by the Interstate Commerce Commission or by the federal courts. Mozier v. Barrett, 193, N. Y. S. 579.

ALL OTHER CITATIONS

Express Co., (Mo. 1923), 247 S. W. 1031; Wilson v. American Ry. Express Co., 197 N. Y. S. 600; W. N. Payne v. American Railway Express Co., 74 I. C. C. 757.

§13½. Aggregate shipments.

IMPORTANT CASES SINCE 1908

(a) The rule of an express company that shipments made in one day from one consignor to one consignee shall be aggregated if thereby lower charges are imposed is construed to mean that not all such shipments need be aggregated but that the shipments must be combined in such a manner that the lowest possible amount of total charges shall be assessed. United States v. Skinner, 218 Fed. 870, 880.

(b) An express company's rule, that two or more packages forwarded by one shipper at the same time to one consignee at one address must be charged for on the aggregate weight, provided that any of the packages weighing less than 20 pounds each shall be charged for as weighing 20 pounds each, restricts aggregation to instances where one shipper forwards several packages at the same time, and permits agrregation in such cases without regard to the amount of the merchandise rate, established by the company as the basis for rates on all classes of articles transported. Barrett v. Gimbel Bros., 226 Fed. 623, 628.

(c) The Provision, in an express company's rule for aggregating weights and the charge on the aggregated weight that, where the merchandise rate per 100 pounds is $1.50 or more, two or more packages forwarded by the same company from the same city or town on the same date to one consignee at one address must be charged for on the aggregate weight, if a lower charge is thereby made, extends the practice of basing charges on aggregate weights to cases where several shippers forward two or more packages on the same date, resulting in a lower charge, but restricts the rule of aggregating weights to cases where the merchandise rate per 100 pounds is $1.50 or more. Barrett v. Gimbel Bros., 226 Fed. 623, 628.

(d) An express company's rule, that, where the basic merchandise rate per 100 pounds is $1.50 or more, two or more packages forwarded by the same company from the same city on the same date to one consignee at one address, whether from one or more than one shipper, must be charged for on the aggregate weight, if a lower charge is made thereby, and that, where the basic rate is less than $1.50, the aggregate charge on shipments from more than one shipper to one consignee forwarded from the same point on the same date must not be more than where the rate is $1.50, deals with two distinct situations, the first part of the rule dealing with aggregate weights, and the last with charges, and several packages shipped by several consignors between points at which the basic rate is $1.50 or more must be aggregated, if the charge thereby made is lower than the total of the graduated charges for the packages under the general merchandise rates, and where the basic rate is less than $1.50 the aggregate charges on nonagregated shipments must not be more than where the rate is $1.50, and the last provision of the rule fixes a maximum aggregated charge on nonaggregated weights of packages where the basic rate is less than $1.50, and the maximum charge is so fixed that the aggregate charges on nonaggregated packages shall not exceed the charge on aggregated packages shipped under the rate of $1.50 or more, thereby preventing a higher charge for a short haul than is demanded for the same gross weight on a long haul. Barrett v. Gimbel Bros., 226 Fed. 623, 624, 628.

§14. Double Graduate Charges.

ALL CITATIONS

Boise Commercial Club v. Adams Exp. Co., 17 I. C. C. 115, 119, 122; Browne v. American Express Co., Unrep. Op. 237.

§15. Graduate Scale System.

ALL CITATIONS

Kendel v. Adams Express Co., 13 I. C. C. 475, 478, 496; In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 428.

§16. Mixed Shipments.

See Classification §7; Mixed Carloads.

IMPORTANT CASES SINCE 1908

(a) The law gives to every shipper the right to bulk his shipment when but one delivery is to be made, and although the larger package may contain 100 or more smaller ones, the rate to be applied will be that fixed for the large package—the aggregation of packages. In re Express Rates,

Practices, Accounts and Revenues, 24 I. C. C. 380, 407.

(b) A rule that express packages containing articles of more than one class shall be charged at rate applicable to highest-rated article, unless otherwise provided, not found unreasonable. In re Express Rates, 24 I. C. C. C. 380, 412.

(c) Proposal of the American Railway Express Co., to modify its classification so as to eliminate from the item covering cake the provisions according net-weight and pound-weight bases on that commodity, and to restrict the quantity of cake which may be shipped at bread rates in mixed shipments with bread to 25 per cent of the combined weight, which would result in increased charges on cake, found not justified. While both commodities under the mixing rule would move at second-class rates, such rule would be discriminatory in favor of bakers of both bread and cake as against bakers of cake only. Express Rates on Cake, 74 I. C. C. 234.

ALL OTHER CITATIONS

Oak Grove Farm Creamery v. Adams Express Co., 19 I. C. C. 454, 455.

§16½. Released Rates.

See Released Rates.

IMPORTANT CASES SINCE 1908

(a) The Commission has authorized the express companies to file rates for the transportation by express of property ,except ordinary live stock, dependant upon the value declared in writing by the shipper or agreed upon in writing as the relased value. Released Rates, 43 I. C. C. 510.

§16¾. Reconsignment.

See Reconsignment.

ALL CITATIONS

Willson v. American Ry. Express Co., 197 N. Y. S. 600.

VII. EVIDENCE.

See Evidence.

§17. In General.

IMPORTANT CASES SINCE 1908

(a) In determining the reasonableness of express rates, inquiry must be had into the capital required, hazard involved, and especially the profits made under the rates attacked. Sanford v. Western Express Co., 16 I. C. C. 32, 35.

(b) A reasonable express rate is one which gives reasonable compensation to the rail carrier for carrying a small package upon a passenger train, or train going at passenger speed, plus a reasonable compensation for the service of gathering, care and delivering, which the express company as such renders. In re Express Rates, 24 I. C. C. 380, 424.

(c) Freight, when moved on a passenger train, should not pay the same charge as imposed on a passenger. There is no relationship between the carriage of dead freight and the carriage of a passenger. Value of service, risk, care given and costs of terminals and stations, widely differ In re Express Rates, 24 I. C. C. 380, 426.

(d) The Commission has given thought to the question of the relation between earnings by passenger train for passengers and for express matter; and while such a basis may not be accepted as in anywise conclusive or determinative of the express rate, the relation between the return for the carriage of a passenger and express matter has been borne in mind, especially with relation to the fact that the same speed is given to both passengers and express, and the rates for passenger service do not decline with distance in the same proportion as do freight rates. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 427.

(e) Express companies are also investment companies, bankers, carriers on the high seas and in foreign lands, and agents, performing for pay a wide variety of services other than transportation, both at home and abroad. In re Express Rates, 28 I. C. C. 132, 149.

(f) Expense of franks not legitimately to be charged to paying patrons. In re Express Rates, 28 I. C. C. 132, 150.

(g) It is unreasonable to fix as rapid a decline in express rates for long distances as is made in freight rates; in this respect, express service is more analogous to passenger than freight service. In re Express Rates, 24 I. C. C. 380, 421.

(h) In compounding the express rate, the railroad should be allowed a compensation for bulk freight moved upon a passenger train, as to which it is relieved by contract from all liability for loss or damage, and is without ex-

pense for the furnishing of a receipt, the billing, the bookkeeping, and a great number of expenses. In re Express Rates, 24 I. C. C. 380, 421.

(i) Express rates are kept high enough to prevent the movement of so great a volume of tonnage as would impair the efficiency of passenger service. Railroad Commissioners of Fla. v. Southern Express Co., 28 I. C. C. 634, 636.

(j) Fact that the divisions of express rates accruing to the rail carrier are inequitable affords no justification for increasing those rates. Express Rates on Bangor & Aroostook R. R., 63 I. C. C. 452, 454.

ALL OTHER CITATIONS

Kindel v. Adams Express Co., 13 I. C. C. 475, 491; Sanford v. Western Express Co., 16 I. C. C. 32, 36; Traffic Bureau, Sioux City Commercial Club v. Am. Exp. Co., 39 I. C. C. 703, 720, 723; R. R. Commissioners of Florida v. Southern Exp. Co., 41 I. C. C. 645, 647; Rio Grande Valley Creamery Co. v. Wells, Fargo & Co., 55 I. C. C. 425; Haley & Lang Co. v. American Express Co., 55 I. C. C. 747; New Albany Box & Basket Co. v. American Ry. Exp. Co., 56 I. C. C. 720; San Francisco Produce Exchange v. Am. Ry. Exp. Co., 78 I. C. C. 737, 740.

§18. Bulk.

See Bulk.

IMPORTANT CASES SINCE 1908

(a) Bulk as an element is to be considered in determining the reasonableness of an express rate. Ohio Face Brick Mfrs. Ass'n v. Adams Express Co., 20 I. C. C. 582, 584.

ALL OTHER CITATIONS

In re Express Rates, 24 I. C. C. 380, 428.

§19. Commercial Conditions.

See Equalization of Rates §3.

IMPORTANT CASES SINCE 1908

(a) A community entitled to a certain express rate cannot have this rate denied it upon the ground that certain other communities have been benefited through a readjustment of rates. Douglas Shoe Co. v. Adams Express Co., 19 I. C. C. 539, 541.

ALL OTHER CITATIONS

In re Express Rates, etc., Unrep. Op. 2141.

§20. Comparisons.

See Comparative Rates.

IMPORTANT CASES SINCE 1908

(a) A comparison of the rates at which express companies do business at other localities is more important in the determination of the reasonableness of these rates than it would be in the determination of the reasonableness of freight charges, because of the manner in which express business is conducted. Sanford v. Western Express Co., 16 I. C. C. 32, 35.

ALL OTHER CITATIONS

Kindel v. Adams Express Co., 13 I. C. C. 475, 497.

§21. Competition in General.

See Competition.

IMPORTANT CASES SINCE 1908

(a) The establishment of the parcel post is not a justification for a higher scale of rates to be charged by the express companies. In re Express Rates, Practices, Accounts and Revenues, 28 I. C. C. 131, 152.

(b) In considering competition, time is not the only important element. Competition tends to make each express company improve its general treatment of the public, its practices, rules and regulations in regard to its methods of doing business. Southeastern Express Co. v. American Railway Express Co., 78 I. C. C. 126, 139.

ALL OTHER CITATIONS

Sanford v. Western Express Co., 16 I. C. C. 32; In re Express Rates, 24 I. C. C. 380, 463; Lindsay & Co. v. Northern Exp. Co., 33 I. C. C. 394, 398.

§21. (1) Parcel Post Competition.

See Parcel Post.

IMPORTANT CASES SINCE 1908

(a) The establishment of the parcel post is not a justification for a higher scale of rates to be charged by the express companies. In re Express Rates, Practices, Accounts and Revenues, 28 I. C. C. 131, 152.

ALL OTHER CITATIONS

In re Express Rates, 28 I. C. C. 132, 152.

§22. Long Maintenance of Rate.

IMPORTANT CASES SINCE 1908

(a) Where an express rate has been in effect for a long time it is presumed to be reasonable. Reynolds v. Southern Express Co., 13 I. C. C. 536, 540.

(b) It cannot be conceded that an alleged erroneous publication of a rate which remains in effect for a period of more than eight years is a sufficient reason for the increase of such rate. Franklin, Stiles & Franklin v. Southern Express Co., 21 I. C. C. 88.

§22½. Operating Expenses.

CASES 1887-1908

(a) Cost of service on a particular article is not conclusive as to the reasonableness of an express rate thereon. Society of American Florists and Ornamental Horticulturists v. United States Express Company, 12 I. C. C. 121, 126.

IMPORTANT CASES SINCE 1908

(b) A claim by express companies that expenses are increasing faster than gross revenues is not supported by statistics to that effect, where such statistics make no distinction in expense between the transportation and non-transportation activities of the companies. In re Express Rates, Practices, Accounts and Revenues, 28 I. C. C. 131, 148.

§23. Percentage of Freight Rates.

See Percentage.

IMPORTANT CASES SINCE 1908

(a) Where the only jusification of an increased express rate is a statement that it ought to be a certain percentage of the freight rate, it cannot be held that the express company has sustained the burden of proof imposed upon it by the Act. Franklin, Stiles & Franklin v. Southern Express Co., 21 I. C. C. 88.

(b) An express rate should not be lower than a normal freight rate, and in the construction of express rates the railroad which furnishes the larger portion of the service which the express company undertakes to give should receive a compensation that will have a relation to the charge which it makes for the carriage of freight. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 424.

(c) Express rates have no fixed relation to freight rates; nor is there any relation between the carriage of a passenger and the carriage of dead freight. In re Express Rates, 24 I. C. C. 380, 426.

(d) Express rates cannot have any fixed relation to freight rates on account of the great diversity of this relation obtaining in the various parts of the country, and with a scale of rates so made for the United States would be a patchwork of incongruities and unjustifiable discriminations. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 426.

(e) It does not appear that express rates were ever based upon a definite relationship to the freight rates between given points, and a scale of rates so made for the United States would be a patchwork of incongruities and unjustifiable discriminations. Express Rates on Bangor & Aroostook Railroad in Maine, 63 I. C. C. 452, 453.

ALL OTHER CITATIONS

In re Express Rates, Practices, Accounts and Revenues, 28 I. C. C. 131, 141; In re Express Rates, 28 I. C. C. 132, 140, 141, 150; Tyler Grocery Co., Unrep. Op. A-474; Express Charges on Empty Fish Cars, 50 I. C. C. 24, 26; Public Utilities Commission of the State of Colorado v. A. T. & S. F. Ry., 52 I. C. C. 439, 446; Missouri, K. & T. Ry. Co. of Texas et al., v. Empire Express Co. (Tex. 1920), 221 S. W. 590.

§24. Profit and Capitalization.

See Evidence §7; Interstate Commerce Commission §7; Reasonableness of Rates §5.

IMPORTANT CASES SINCE 1908

(a) A profit of 10 per cent of the gross earnings of express companies is, in view of the comparatively small value of the property invested, an extremely liberal rate. Kindel v. Adams Express Co., 13 I. C. C. 475, 493.

(b) Since the connection between the value of the express service rendered and the cost of the property employed in rendering it is so slight little reference can be had to such cost in determining the reasonableness of express rates. The same is true of capitalization, and to decide the question of reasonableness of rates, inquiry must be had into the character of the business, the amount of capital required for its conduct, the hazard involved, and, especially, the profits the companies are making under the rates attacked. Sanford v. Western Express Co., 16 I. C. C. 32, 35.

(c) There can properly be no relationship between the capitalization of an express company and its rates. To allow a return upon this basis would put a premium upon mere bookkeeping methods which have no foundation other than the capricious policy of its

owners. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 421.

(d) There is no sacredness in the stated amount of the capital stock of any company. When the courts speak of a return upon capital of a public utility, they mean a return upon investment. The investor in a railroad, an express company, or a telegraph company should be compensated for the sacrifice that he has made and not paid a premium because of the manner in which he chooses to state his financial condition or his expectations. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 421.

(e) An examination of the amount of cash supposedly invested in the express companies does not demonstrate the unreasonableness of existing rates, or give foundation for a sound argument in favor of the abolition of this utility. Where the express company has been enabled to secure especially favorable contracts from the railroads by the internal pressure of the railroad's own directors or the external pressure of financial interests allied to the express companies, it manifestly was impossible for the express company to make large profits without the imposition of exorbitant rates. In re Express rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 387.

ALL OTHER CITATIONS

Maricopa County Commercial Club, v. Wells, Fargo & Co., 16 I. C. C. 182, 184; Ohio Face Brick Mfrs. Ass'n v. Adams Express Co., 20 I. C. C. 582, 584; In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 384, 385, 386, 391; Express Rates, 35 I. C. C. 3, 9, 10.

§25. Surplus.

IMPORTANT CASES SINCE 1908

(a) Even were it true that express companies have accumulated a surplus by the imposition of charges in the past which were, when made, unjust and unreasonable, the Commission cannot undertake to distribute that surplus to the public by putting into effect rates which are not fairly compensatory for the present service. Kindel v. Adams Express Co., 13 I. C. C. 475, 490.

§26. Value of Express Property.

IMPORTANT CASES SINCE 1908

(a) In determining the reasonableness of freight rates, the value of the property which a railroad company devotes to the use of the public is an important element, but in passing upon express company rates this element is of little importance, since the property devoted to such use is comparatively insignificant. Kindel v. Adams Express Co., 13 I. C. C. 475, 481.

(b) If the Commission is to base the express rates upon the value of property used, it must consider not alone the express company's property, but that of the railroad which is used in giving the express service. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 419.

ALL OTHER CITATIONS

Former Report 78 I. C. C. 126; Southern Express Co. v. Amer. Ry. Exp. Co., 81 I. C. C. 247.

VIII. COLLECTION OF CHARGES.

§27. Overcharges and Revision of Bills.

See Overcharges.

IMPORTANT CASES SINCE 1908

(a) The practice of double collections must cease, and to avoid prosecutions therefor, a system of labels is herein prescribed by the Commission. In re Express Rates, 24 I. C. C. 380.

(b) With respect to the duplicate collection of lawful charges, it appeared that it had been the practice of the express company to receive a prepaid package and stamp it as prepaid. Upon delivery, however, the carrier's wagon was given a book which showed upon what packages collection should be made, and by this book, he was to be guided rather than by any marking upon the package. In many cases, the package when prepaid was not marked as prepaid, and in other cases, by an oversight of the agent at the point of delivery, the wagon driver's delivery record did not state the fact of prepayment; and at many intermediate stages between the point of origin and the door of the consignee there was an opportunity through slipshod methods of bookkeeping and checking, for the record to mistake the fact. HELD, that to every package should be attached at the point of origin by the driver or receiving clerk a prepaid (yellow) or collect (white) label of the form prescribed in the opinion (see p. 390); that the express agent at the forwarding office should

in turn attach to the package a copy of the way bill prescribed in the opinion (see p. 390), printed on the same colored paper as the label attachd to the package; and that the way bills should be made out in triplicate, one being attached to the package, one being reserved by the office of the carrier at point of origin, and one being forwarded to the point of destination. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 390.

(c) Where a delivered express package has not been prepaid, the carrier must look in the first instance to the consignee for payment. In re Express Rates, 24 I. C. C. 380, 391.

(d) With respect to overcharges and undercharges by express companies, it appeared that the failure to collect the full legal charge resulted chiefly from the system of rates which were obscure and open to misconstruction. Some of the express companies were accustomed to offset the overcharges against the undercharges when discovered. Under the system attacked the seeker for a through rate between points widely removed must find first the local rates applying between the point of origin and the many transfer points by which the shipment might possibly move before he could determine which combination would produce the lowest through rate. In many instances from 5 to 15 different combinations might be found. HELD, that a new and simplified system of rates must be devised; and that a system of through and joint rates must be substituted whereby it would be possible for the agent at the point of origin to obtain the proper through charges by reference to a simple schedule which would give the same rate from the point of origin to destination, no matter by what route shipment might travel and without reference to the number of carriers participating in the haul. In re Express Rates; Practices, Accounts and Revenues, 24 I C. C. 380, 391.

(e) The express agent at the receiving station should, in every instance, revise the charges upon the receipt of the way bill before making collections on collect shipments, and the agent at point of origin should cause all prepaid way bills to be revised as to weights and charges, and refund of overcharges should be made within 24 hours. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 391.

(f) For the purpose of the revision of way bills, the Commission recommends to the express companies that they shall organize a clearing house organization, or association of accounting officers. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 392.

(g) Refund of charges should be made within 24 hours in the event of an overcollection on an express package through mistake. In re Express Rates, 380, 392.

(h) In the event of failure or neglect of forwarding agent to assess proper charges in first instances, the express company should first look to the consignor. In re Express Rates, 24 I. C. C. 380, 406.

(i) After delivery of an express shipment and collection of charges thereon, there should be no refund of charges. In re Express Rates, 24 I. C. C. 380, 408.

IX. CRIMINAL LIABILITY.

See Crimes.

§28. In General.

IMPORTANT CASES SINCE 1908

(a) To avoid prosecutions for illegal overcharges, double collections must cease. In re Express Rates, 24 I. C. C. 380, 433.

(b) The practice of giving rebates, which are concealed by indirection in the express tariffs, must cease. In re Express Rates, 24 I. C. C. 380, 433.

(c) Under section 10 of the Act, as amended June 18, 1920, making a common carrier criminally liable for will fully exacting more than its published charges, an express company, organized as a joint stock association, is so liable since section 1 of the Act, as amended June 29, 1906, makes the term "common carrier' include express companies. U. S. v. Adams Express Co., 33 Sup. Ct. 878, 879; 279 U. S. 381.

(d) Express companies are subject to the criminal provisions of the Hepburn Act. U. S. v. Am. Exp. Co., 199 Fed. 321, 323.

(e) Defendant express companies, calling themselves joint stock association, managed their business by directors and officers, and issued certificates of stock to their shareholders and themselves. They had the statutory right to sue and

be sued as legal entities under the names of their president and treasurer, and the shareholders could hold them liable for damages. They enjoyed perpetuity and succession of membership, and used the company name in the ownership of real and personal property. HELD, they resemble corporations rather than partnerships, and were indictable under the criminal provision of the Hepburn Act. U. S. v. Am. Ex. Co., 199 Fed. 321, 325.

X. RULES AND REGULATIONS

See Rules and Regulations; Thru Routes and Joint Rates.

§29. In General.

IMPORTANT CASES SINCE 1908

(a) Rule 15 of the express companies, governing carload and bulky shipments, should be amended to read as follows: "Property, which by reason of its great bulk, length, or weight, cannot be loaded or carried in the ordinary express car, and for which a special car must be provided, must not be accepted for shipment until the dimensions, the weight, and a complete description of the property has been reported to the superintendent, and arrangements have been made by him for handling and forwarding the shipment through to destination, if such arrangement can be made. The minimum charge on such shipments must be the charge on 10,000 lbs. at the merchandise rate; if the shipment consists of articles or commodities that, under the classification, are subject to higher than single merchandise rate, and the gross weight is less than 10,000 lbs., the charge must not be more than the charge for 10,000 lbs. at the merchandise rate; if weighing 10,000 lbs. or more, the charge shall be for the actual gross weight at merchandise rate. The charge on less-than-a-carload shipment, carried in regular express car, must not be greater than the charge on a carload shipment in a special car." In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 411.

(b) A directory of Express Stations fixing location of each such station by block number and sub-block letter should be published. Pick-up and delivery limits should be specifically defined. Block system of stating rates should be adopted. A new and uniform classification should be adopted. Rules and regulations proposed in former report should be adopted. Express receipt herein prescribed should be adopted. Joint rates proposed in former report should be published. Joint tariff as proposed in former report conforming to those contained herein should be published. Order of June 8, 1912, amended so as to require the attachment of the way bill and label therein prescribed to only one package in a shipment of two or more packages of perishable property. In re Express Rates, 28 I. C. C. 132.

(c) Directory of express stations shall be issued not later than October 15, 1913, when the block system of stating rates and new rates become effective. In re Express Rates, 28 I. C. C. 132, 136.

(d) Complainant attacked rules and practices of defendant whereunder it refuses to accept shipments unless the declared value thereof is marked on the package by complainant as unreasonable and unduly prejudicial. Basic rates applicable are conditioned upon a declared or released value not exceeding $50 for shipment of 100 pounds or less, and not exceeding 50c per pound in excess of 100 pounds. Rules of defendant requiring the value to be marked on packages are not on file with the Commission but are published in a book of general instructions to agents. The value of the shipments and the prices made its customers by complainant vary according to the season of the year, the quantity and quality shipped, and other circumstances. It has been complainants practice to furnish defendant a duplicate receipt showing the total value of each shipment and other pertinent information. The value is also shown on the waybill attached to the shipment where it is subject to observation. Since July 1, 1920 defendant has adopted the practice generally of retaining duplicate express receipts. Although it is possible to waybill shipments from the information shown in the receipts, it has been and is defendant's practice to waybill them from the marks on the package after weighing. Practically all of complainants shipments are made without prepayment of charges. Clearly defendant's rules and practice herein attacked limit, and in fact completely nullify the application of rates which otherwise would be available to complainant under defendant's published tariffs. The facts of record seem to show that it would be in the interest of operating efficiency and not unreasonable to require shippers to mark the value on packages, when shipments are subject to

rates based on valuation. But if defendant desires to enforce such a regulation, it should be plainly stated in its schedules and uniformly observed. HELD, defendants action in requiring shippers to mark value on package, is unlawful in absence of proper provisions in defendants schedules authorizing such action. Vicose Co. v. Amer. Ry. Express Co., 62 I. C. C. 32.

(e) Proposed restriction of express scale rates on milk and cream, in cans, destined to points on Great Northern and originating on other lines, to apply on basis of the separate mileages from and to the transfor points rather than on basis of continuous mileage, and thus considerably increasing the rates, found not justifiable. Express Rates on Milk and Cream, 74 I. C. C. 431.

ALL OTHER CITATIONS

In re Express Rates, 24 I. C. C. 380, 411, 433; Express Rates, Unrep. Op. 2139, 2141.

§30. Claims.

See Claims; Bills of Lading IV, VI; Loss and Damage.

IMPORTANT CASES SINCE 1908

(a) In the event of a claim made in writing, the company should immediately acknowledge its receipt and should, within six months from the date of filing such claim, notify the claimant in writing of the disposition to be made thereof. This rule applies to claims for either whole or partial loss or destruction of a shipment. In re Express Rates, 24 I. C. C. 380, 396.

(b) Proposal to amend the uniform express receipt relating to claims for loss and damage by limiting the time for filing of claims with the carrier to a definite period of four months and 15 days, in the case of undelivered shipments, approved. Express Classification, 1920, 59 I. C. C. 265, 268.

(c) The clause of the uniform express receipt limiting the period for filing suit to two years and one day after delivery or after a reasonable time for delivery was unreasonable in that it did not provide a reasonable time within which to file suit after claims which had been under consideration by the express companies had been declined. Consolidation of express companies, 59 I. C. C. 459, 469.

(d) The clause of the uniform express receipt limiting the period for filing suit to two years and one day after dlivery or after a reasonable time for delivery was unreasonable in that it did not provide a reasonable time within which to file suit after claims which had been under consideration by the express companies had been declined. Consolidation of express companies, 59 I. C. C. 459, 469.

ALL OTHER CITATIONS

Express Classification, 1920, 59 I. C. C. 265, 269.

§31. Inspection.

IMPORTANT CASES SINCE 1908

(a) Rule under which examination and partial delivery is permitted only when consignor has executed a contract releasing the express company from all loss, not found to be reasonable. In re Express Rates, 24 I. C. C. 380, 410.

§32. Marking and Packing.

See Marking and Addressing; Classification §14, §16.

IMPORTANT CASES SINCE 1908

(a) Prosposed rule under which fruit in packages weighing less than 10 pounds each, shipped in lots of ten or more, from one shipper to one consignee, must be crated or securely fastened together in bundles, each bundle to consist of not less than four or more than ten packages, to facilitate handling, found justified. Express Classification, 1920, 59 I. C. C. 265, 275.

(b) Rules and practices of American Ry. Express Co., whereunder shipments are refused unless the declared value thereof is marked on the package by the shipper found unlawful in the absence of proper provisions in schedules authorizing such action. Vicose Co. v. American Ry. Express Co., 62 I. C. C. 32.

(c) Carriers reasonably may require shippers to properly mark their shipments and if shippers object to showing the value of their shipments they may use the code which defendant has adopted for that purpose. Viscose Co. v. American Ry. Express Co., 62 I. C. C. 32, 33, 34.

(d) To require shippers to mark the value on packages, when shipments are subject to rates based on value, would seem to be in the interest of operating efficiency and not unreasonable, but if carriers desire to enforce such a regulation it should be plainly stated in its schedules and uniformly observed. Vis-

coe Co. v. American Ry. Express Co., 62 I. C. C. 32, 34, 35.

ALL OTHER CITATIONS

In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 405, 410, 412; Brackett Co. v. G. N. Exp. Co., 29 I. C. C. 667; In re Express Rates, 28 I. C. C. 132, 136; Express Classication, 1920, 59 I. C. C. 265, 276.

§33. Reconsignment.

See Reconsignment.

IMPORTANT CASES SINCE 1908

(a) Express rules 26 and 27, covering change of destination in transit and reconsignments, not found unreasonable. In Re Express Rates, 24 I. C. C. 380, 412.

(b) Proposed rule to compensate carrier in cases in which tender of delivery is made at a specified address, and driver is asked to deliver at an address on a route other than that including the address marked on the shipment, approved. Express Classification, 1920, 59 I. C. C. 271, 272.

§34. Returned shipments.

See Returned Shipments.

IMPORTANT CASES SINCE 1908

(a) Prepayment should be required, by proper rules, of shippers who decline to furnish a return address. In re Express Rates, 24 I. C. C. 380, 404.

(b) Rule 1 of the express companies should be amended so that the shipper may be induced to inscribe a return address on all packages, and it should be provided that a shipper who refuses to supply a return address should be required to prepay the charges. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 404.

(c) Paragraph C of rule 10 of the express companies, relating to the return of undelivered packages, should be so amended as to provide that when the value of a shipment does not exceed $25, it may be returned by mail, when the order to so return is accompanied by the necessary postage stamps and postal registration fees. A reasonable charge by the express company for its service in this connection would be 10c. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 408.

(d) Subdivision d of rule 10, relating to the return of undelivered packages, should provide: "Undelivered packages, originally forwarded by express, may, by shippers' order, be returned or forwarded by freight, under the following conditions: 1. When the shipper desires to instruct the agent at destination to return or reship undelivered packages, the charges on the outward shipment (if not prepaid), together with the reshipping charge provided in following section, must be forwarded to the agent at destination, with instructions covering the return or reshipment by freight. Any instruction to reship to a consignee other than the shipper must be accompanied by the approval of the agent at shipping point, or, in the absence of such approval, by the original shipping receipt, which must also be endorsed by the shipper, showing disposition. 2. If it is desired to have the outgoing charges and reshipping charge billed back to the shipper through the agent at shipping point, the instructions to reship must be filed with the originating agent. 3. The charge for return or forwarding by freight will be 10c per 100 lbs., with a minimum charge of 25c, in addition to all unpaid outgoing express charges. No charge shall be made for the return of bill of lading. 4. When shipments consist of two or more packages, or two or more shipments, the reshipping charge in section 3 shall be computed on the basis of the actual gross and established minimum charge, the same as if consisting of one package only." In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 408.

(e) Where a consignor orders the return of a shipment after delivery, the charges paid by the consignee must not be refunded. In re Express Rates, 24 I. C. C. 380, 408.

(f) The weight basis of assessing charges on returned shipments should be the same as on shipments forwarded. In re Express Rates, 24 I. C. C. 380, 408.

ALL OTHER CITATIONS

In re Express Rates, 24 I. C. C. 380, 410.

§34½. Stoppage in transit.

See Stoppage in Transit.

IMPORTANT CASES SINCE 1908

(a) Respondent proposed to incorporate in its classification a rule providing for stoppage of goods in transit, applicable on express shipments. Under the proposed rule respondents agent may, if he has doubts as to the financial ability of a consignor, require that one or more

well known and responsible sureties sign the agreement of indemnity. This clause should be condemned for its indefiniteness as to the number of sureties required, if for no other reason. It also reposes too much arbitrary power in respondent's agent to decide who is or is not responsible. Furthermore, compliance with this provision might require considerable time and result in loss of the right to stop because of delivery at destination. HELD, proposed schedules not justified. Stoppage of goods in transit. 66 I. C. C. 423.

(b) The right of stoppage in transit exists independent of statute and can not be added to or curtailed by anything in the carrier's tariffs. Stoppage in transit, 66 I. C. C. 423, 424.

§35. Storage

See Storage.

IMPORTANT CASES SINCE 1908

(a) Moderate storage charges should accrue against express consignment which is held because of consignee's refusal to accept. In re Express Rates, 24 I. C. C. 380, 407.

XI. THROUGH ROUTES AND JOINT RATES.

See Through Routes and Joint Rates.

§36. In general.

IMPORTANT CASES SINCE 1908

(a) The express companies must unite in direct through routes, reaching all cities and towns accessible to each other by the shortest route, measured in time. The Commission will leave this matter in the hands of the carriers for the present, but will undertake to see that this principle is recognized in routing express traffic. In re Express Rates, 24 I. C. C. 380.

(b) The Interstate Commerce Act now imposes upon all of the railroad carriers the obligation to make through routes and to furnish proper facilities for the transportation of freight. This rule applies to parcels as well as to carloads. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 387.

(c) The joint through rates of express companies should be filed with the Commission. In re Express Rates, 24 I. C. C. 380, 393.

(d) Under the system of through routes and joint rates prescribed for the express companies by the Commission in the opinion, the consignor shall have a right to designate in writing the joint through route by which a specific shipment shall move; provided, that in an emergency, the originating, or any intermediate express company, shall have the right, in the interest of expedition, to send the shipment by some other route than the one designated by the shipper, if delivery is not delayed by such action, or the rate increased. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 393.

(e) The Commission is required to establish through routes whenever deemed by it necessary or desirable in the public interest, and it is for the Commission to determine on the basis of a proper record what express routes are reasonable and in the public interest. Southeastern Express Co. v. American Railway Express Co., 78 I. C. C. 126, 130.

(f) Complainant attacked American Railway Express Company for its failure to establish specific through routes and joint rates between points on the lines of complainant and points on the American Express Co., as unreasonable and discriminatory. Original report found in 78 I. C. C. 126. The express companies were unable to agree as to the routes to be used, and the additional express routes have not been provided. HELD, upon rehearing it is necessary and desirable in the public interest that through routes and joint rates applicable thereto be established between all points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticutt, and New York and all points on the direct routes of the American Railway Express between New York and Washington, D. C., on the one hand, and all points on the main line of the Southern Ry. from Washington to and including Birmingham, Ala., on the other, with transfer at Washingon, D. C. Rates contemporaneously applicable are reasonable, tariffs to provide for the right of the shipper to designate in writing the routing of shipments of express over the routes herein prescribed. Southeastern Express Company v. American Railway Express Co., 81 I. C. C. 247.

press Rates on Milk and Cream, 74 I. C. C. 427; Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C. 126, 130; American Ry. Exp. Co. v. U. S. (Ga. 1923), 293 Fed. 31.

§37. Divisions.

See Divisions.

IMPORTANT CASES SINCE 1908

(a) In the divisions of earnings between express carriers establishing through routes and rates, due consideration should be given by the connecting carrier to the surrender by the originating carrier of its right to retain possession of the shipment for the longest haul possible via its own lines, and divisions should be agreed upon which shall compensate the originating carrier for its sacrifice. In re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 3. 411.

§37½. Minimums.

See Minimums.

IMPORTANT CASES SINCE 1908

(a) Petitioners, are the Association of Railway Executives and the American Railway Express Company who ask the Commission to approve and authorize a propsed standard contract, to be entered into by the express company and the several rail carriers and which is to continue in force for a period of five years, with provisions for termination at the end of a period of two and one half years and for extension beyond the term of five years, to which the express company and a large majority of carriers represented by the petitioning association have given their assent. Under the terms of the transportation act, 1920, the express company was guaranteed against a deficit in operating income during the period of six months beginning on March 1, 1920. The form of standard contract here proposed is intended to define the relations of the parties after summation is dependent upon a continued expiration of that period, and its conconsolidation of the express companies referred to, which was approved by the Commission, 59 I. C. C. 459, as well as upon the authorization under section 5, paragraph 1, of the interstate commerce act, of the grouping or pooling arrangements detailed in Article 5 of the proposed agreement. The purpose of article 5 of the proposed contract is to divide into groups the carriers whose property the express business is to be conducted, and to deal with express transportation revenues and expenses by groups of carriers rather than by individual settlement ab initio. Article 5 of the proposed contract provides that for each year in which it is in force during which the amounts set aside for the express company at 2½ per cent of the income for division in the several groups shall exceed 6 per cent of the average value of the entire real property and equipment and other capital of the express company employed in the express business, with specified exceptions, such excess or profit shall be divided, one half to the express company and one half to the other carriers, and that the one half proportion of the profit thus accruing to the express company shall be accummulated by it until a sum equal to 10 per cent of the value of the entire real property and equipment and other capital of the express company then employed in the express transportation business and increases thereof, with specified exceptions shall have been reached, after which any such profit shall be divided in the ratio of one fourth to the express company and three fourths to the other carriers. The question at the threshold is, whether the proposed contract embodies a pooling arrangement within the purview of section 5 of the act, to the lawful consummation of which the approval of this Commission is an essential requisite. The Commission concurs in the view that the plan proposed is a pooling arrrangement, prescribing the division of the proceeds of the earnings of such railroads otherwise than according to individual performance. While theoretical considerations support the view that the consolidation will eventually remove the element of competition, those considerations are of but slight value in the instant proceedings. An element of potential competition of no slight importance was and must always be a factor in the plan under which the express business is conducted in this county. Held the proposed grouping and the division of the earnings in the manner outlined will faciliate the conduct of the express business of the country, will be in the interest of better service to the public, will promote economy in operation, and will not unduly restrain competition. Under the provisions of Section 5, paragraph 1 of the interstate commerce act approval and authorization of such division of earnings are conditioned upon assent by the carriers in-

only to contracts with rail carriers that have assented or may hereafter assent to the proposed arrangement, and it is limited to the general plan embraced in article 5 of the proposed contract in so far as it comes within the provisions of section 5 of the act. With regard to the requested approval of provisions of the proposed contract it does not rest with the Commission to give or withhold approval further than as above under section 5 of the act. If the contract is entered into and controversies should arise between the parties thereto the courts constitute the forum in which they could and should be adjudicated, and the Commission therefore, declined to express any opinion with regard to the particular provision of article 5 or any other part of the contract. Express Contracts, 1920, 59 I. C. C. 518.

ALL OTHER CITATIONS

Increased Weights on Kale, Lettuce, and Spinach, 61 I. C. C. 586.

XII. LIABILITY FOR DAMAGES.

See Loss and Damage; Reparation.

§38. In General.

IMPORTANT CASES SINCE 1908

(a) In the event of the non-delivery or loss or destruction of a shipment by an express company, a notice should immediately be mailed by the agent of the carrier at destination to both the consignor and consignee, if known; and in the event of claim made in writing, the company should immediately acknowledge its receipt and should, within 6 months from date of filing of such claim, notify the claimant in writing of the disposition made thereof. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 396.

(b) The services of an express company, in allowing the consignee to examine and select such articles from a shipment as he may wish to buy and return the remainder are not such as the company is required to perform. If the carrier, as a matter of accommodation to the shipper, performs this service for him, it has the right to prescribe conditions designed to protect it from possible fraud, and may perform such service only upon condition that the consignor execute a contract releasing the carrier from all liability from loss. In Re Express Rates, Practices, Accounts and Revenues, 24 I. C. C. 380, 410.

(c) Proposal to amend the uniform express receipt relating to claims for loss and damage by limiting the time for filing of claims with the carrier to a definite perod of four months and 15 days, in the case of undelivered shipments, approved. Express Classification, 1920, 59 I. C. C. 265, 268.

XIII. PROCEDURE AND EVIDENCE.

See Procedure Before Commission.

§39. In General.

IMPORTANT CASES SINCE 1908

(a) Defendant express companies have been merged into one operating company since record in this proceeding was closed, and as defendant company herein is not a party to the proceeding an order directing the removal of the undue prejudice to which certain of the complainants have been found to be subjected, can not be entered upon the present pleadings. Butterworth-Judson Corp. v. Adams Exp. Co., 51 I. C. C. 386, 389.

(b) Complaint seeking order for the future requiring establishment of refrigerator-express rates on strawberries c. l., such shipments to be carried in passenger trains or trains making passenger-train time, dismissed as Director General not made a party defendant, although opportunity for such action afforded. Campbell v. Southern Exp. Co., 55 I. C. C. 633.

XIV. RELATION TO RAILROADS.

§40. In General.

CASES 1887-1908

(a) Express business conducted by a railroad company is within the Interstate Commerce Act; aliter as to independent express companies. Re Express Companies, 2 I. C. R. 677.

(b) A railroad company is not under obligation to furnish an express company with facilities for doing an express

business upon its road such as it provides for itself or some other express company, unless it holds itself out as a common carrier of express companies. Atlantic Express Co. v. Wilmington & W. R. Co., 4 I. C. R. 294.

IMPORTANT CASES SINCE 1908

(c) The supreme court of the United States early recognized the binding force of contracts between express and railroad companies under which the former operate and observed that regulation of matters of this kind is legislative in its character and not judicial. For the commssion to decline to permit the establishment of schedules in conformity with such contracts would amount to a revision of the contracts. The commission is aware of no legislative authority for doing this. Express Rates on Milk and Cream, 74 I. C. C. 427, 431.

(d) In case of controversies between express companies and railroad companies over contracts, their respective rights and duties are matters within the jurisdiction of the courts. Express Rates on Milk and Cream, 74 I. C. C. 427, 431.

(e) Express companies operate over the lines of railroads under contracts in which the rights and duties of the respective parties are fixed and defined. C. C. Oyler & Son v. Amercan Railway Express Co., 83 I. C. C. 160, 163.

(f) Railroads are primarily responsible for the proper transportation of all commodities offered to them and for the furnishing and adequate service. If the requirements of the traffic demand more exepditious service it is the duty of the railroad either to furnsh such reasonable service itself or to delegate that duty to an express company. C. C. Oyler & Son v. American Railway Express Company, 83 I. C. C. 160, 163.

I. JURISDICTION OF COMMISSION.

§1. In general.

See Interstate Commerce Commission I; Jurisdiction of Commission I.

CASES 1887-1908

(a) While a complete system of interstate railway regulations would probably give the regulating body authority to determine when the privilege of milling in transit, and privileges of that nature, should be accorded, and upon what terms, no such authority is conferred upon the Commission by the present Act. Diamond Mills v. Boston & Maine R. Co., 9 I. C. C. 311.

(b) The Commission is authorized by the Act to Regulate Commerce, after investigation, to order carriers to cease and desist from subjecting any particular person, locality, or description of traffic to undue or unreasonable prejudice or disadvantage in any respect whatsoever; and its jurisdiction extends to a case of alleged unlawful prejudice and disadvantage to shippers of outbound package freight through enforcement by carriers of a regulation providing for the earlier closing of depots used for the reception of such freight. Cincinnati Chamber of Commerce and Merchants' Exchange v. Baltimore & O. S. W. R. Co., 10 I. C. C. 378.

IMPORTANT CASES SINCE 1908

(c) The Commission has power to forbid discrimination in making allowances at one point while denying them at another similarly situated. Suffern Grain Co. v. I. C. R. R. Co., 22 I. C. C. 178, 183.

(d) But there is nothing in the law which confers upon the Commission power to compel a carrier to acquire facilities which it does not possess or to acquire better facilities than those it possesses, not with the object of preventing discrimination and preferences, but in order that the shipper may have larger, better, and perhaps more economical facilities. R. R. Commissioners of Fla. v. Southern Express Co., 44 I. C. C. 645, 648.

(e) So there is no question as to its power to establish privileges such as transit arrangements in appropriate cases by virtue of its jurisdiction over the practices and the regulations of carriers. Southern Hardwood Traffic Asso. v. Director General, 61 I. C. C. 132, 139.

(ea) Prior to February 28, 1920, the commission had no power to require a carrier to provide itself with reasonable facilities such as equipment, no question of discrimination being involved. United States v. Pennsylvania R. R. Co., 242 U. S., 208. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 562.

(f) Under the Interstate Commerce Act requiring carriers to establish in connection with their rates reasonable rules and regulations, the Commission could require carriers establishing joint rates either to grant to, or to withdraw from, shippers the privilege of creosoting in transit. Central R. Co. of New Jersey v. United States, 42 Sup. Ct. 80.

Great Northern Ry. Co., (N. Dak. 1918), 169 N. W. 494; Mount Pleasant Fertilizer Co. v. L. & N. R. R., 50 I. C. C. 253, 258; Guyton & Harrison Mule Co. v. L. & N. R. R., 50 I. C. C. 546, 552; Southern Rice Growers Asso. v. T. & N. O. Ry., 53 I. C. C. 197, 203, 204; Swift & Co. v. Director General, 55 I. C. C. 42. 49; Peoria Board Trade v. A. T. & S. F. Ry., 55 I. C. C. 42, 49; Swift & Co. v. Director General, 56 I. C. C. 309; Frank Samuel v. Director General, 59 I. C. C. 190, 192; Lake Charles Rice Milling Co. v. A. & N. Ry. Co., 63 I. C. C. 18, 23.

II. CARRIER'S DUTY TO FURNISH OR PERMIT.

§2. In general.

See Allowances §10; Bills of Lading II; Branch Lines IV; Cars and Car Supply IV, V; Express Companies §1¾; Lighterage V; Reconsignment §3½; Refrigeration II; Terminal Facilities II; §3; Through Routes and Joint Rates VII; Transportation II.

CASES 1887-1908

(a) There is nothing in the law or in railroad practice that authorizes a shipper who has hired a car for a movement between two points to load it with a commodity or with human beings, according to his pleasure, or to carry the two together under a car rate, whether that rate be established as a commodity rate or as a passenger rate. Transportation of newspaper employees, 12 I. C. C. 16, 19.

(b) A carrier may not reasonably be required to accept and deliver free of charge traffic which is moved by its competitor. Laning Harris Coal & Grain Co. vo. A. T. & S. F. Ry., 12 I. C. C. 479, 480.

IMPORTANT CASES SINCE 1908

(c) The carrier upon whose line shippers are located must assume the responsibility of furnishing transportation facilities. Coal Rates on the Stony Fork Branch, 26 I. C. C. 168, 174.

(d) It is the duty of the carriers, under the law, to furnish suitable facilities for the transportation of perishable products. Protection of Potato Shipments in Winter, 26 I. C. C. 681, 684.

(e) In general, custom has largely determined what is reasonable service. it has determined that it is the duty of a railway company to afford the shipper desiring its service a reasonable opportunity to deliver his freight with reasonable dispatch and safety, and to place it in a reasonably accessible place for the consignee to receive. The service also includes the care of the freight, after the actual movement, for a time sufficient to afford the consignee a reasonable opportunity to remove it. For all of this service, the carrier is entitled to reasonable compensation. It is the practice of American railroads to fix their charge for the entire service thus described, in a single item, which is termed the freight rate. Lighterage and Storage Regulations at New York, 35 I. C. C. 47, 52.

(f) Whatever transportation service or facility the law requires carriers to supply they have the right to furnish. Sun Co. v. Director General, 68 I. C. C. 11, 16.

(g) It is the duty of shipper properly to prepare his goods for shipment, and if special protection be needed, this also he must furnish. When suitable car is furnished, it is proper that shipper secure his shipment within it, by staking or otherwise, and so protect it from damage. Slatting Cars for Watermelons, 78 I. C. C. 732, 735.

Co., 61 I. C. C. 120; Omaha Packing Co. v. A. T. & S. F. Ry. Co., 66 I. C. C. 44, 49; Handling Charges at Certain Ports, 78 I. C. C. 4.

§2½. Bulkheads.

IMPORTANT CASES SINCE 1908

(a) Back hauling should be reduced to the minimum compatible with commercial necessities. But if transit involving a back haul is voluntarily granted by carriers to certain communities or individuals and withheld from others, the practice, though itself wasteful, becomes nevertheless an agency for violating section 3 of the act. Thomas Cotton Co. v. I. C. R. R. Co., 63 I. C. C. 89, 91.

ALL OTHER CITATIONS

New York Shippers' Protective Association v. N. Y. C. & H. R. R. Co., 30 I. C. C. 437, 438.

§3. Compression.

See Compress Companies and Charges.

ALL CITATIONS

Merchants' Cotton Press & Storage Co. v. I. C. R. R. Co., 17 I. C. C. 98, 104, 106; Elimination of Transit Privileges on Export Cotton, 80 I. C. C. 235.

§4. Concentration.

See Concentrating Rates and Privileges.

ALL OTHER CITATIONS

Central Lumber Co. v. C. M. & St. P. Ry. Co., 18 I. C. C. 495; St. Paul Board of Trade v. M. St. P. & S. Ste. M. Ry. Co., 19 I. C. C. 285, 288, 289; Red River Oil Co. v. T. & P. Ry. Co., 23 I. C. C. 438, 447; Meredith v. St. L. S. W. Ry. Co., 23 I. C. C. 31, 48; Memphis Freight Bureau v. M. P. R. R. Co., 80 I. C. C. 88, 90, 91.

§5. Cooperage and bailing.

IMPORTANT CASES SINCE 1908

(a) Cooperage and bailing do not affect the rate as such; they are simply special services performed by the carrier in transit when it is necessary to protect the shipment from damage or loss, and such services neither increase nor diminish the rate, but are charges entirely apart from it. Rail and River Coal Co. v. B. & O. R. R. Co., 14 I. C. C. 86, 90.

(b) The proposition that loose boards and other cooperage accessories shall be furnished by the carriers is in harmony with the practice now uniformly required by General Order 57-A of the Director General, with the practice voluntarily observed by many carriers in the past, with the general requirement of law that it is the duty of carriers to provide suitable cars. The amount and character of the material furnished shippers for grain doors and for incidental coopering and repairing should be uniform and adequate for the purpose. Claims for loss and damage of grain, 56 I. C. C. 347-350.

(c) Rule 45, providing that shippers must properly prepare goods for shipment, including such matters as packing, stowing, and bracing; and also install false floors when necessary for safe transportation, approved with modification. Perishable Freight Investigation, 56 I. C. C. 449, 557.

ALL OTHER CITATIONS

Farmers Cooperative Asso. v. C. B. & Q. R. R. Co., 34 I. C. C., 60, 64.

§5½. Disinfecting and cleaning.

IMPORTANT CASES SINCE 1908

(a) It is not unreasonable to expect shipper to do a reasonable amount of cleaning cars. Farmers Cooperative Asso. v. C. B. & Q. R. R. Co., 34 I. C. C. 60, 64.

(b) Where a special charge for cleaning and disinfecting cars in compliance with government quarantine regulations

is in issue, the fact that a similar service had for a time been performed without charge is not of particular value as tending to prove that the cost of the service required is already provided for in the transportation rate. Hammond, Standish & Co. v. M. C. R. R., 42 I. C. C. 102, 104.

(c) Cars can not be disinfected properly unless they are thoroughly cleaned; that is to say, disinfecting a car includes cleaning it in a manner satisfactory to a government inspector. A car cleaned for shipments of live stock is simply one from which the refuse has been removed from the floor space. Natl. Live Stock Exchange v. A. & S. Ry., 50 I. C. C. 578, 582.

ALL OTHER CITATIONS

Fruits and Vegetables, 43 I. C. C. 291, 299; Dunlevy Packing Co. v. Penn. Co., 43 I. C. C. 429; South Omaha Live Stock Exchange v. C. G. W. R. R., 43 I. C. C. 755; Hammond, Standish & Co. v. M. C. R. R. Co., 42 I. C. C. 102, 105.

§6. Dumping and trimming.

IMPORTANT CASES SINCE 1908

(a) The regulation of charges for "trimming" or leveling coal on vessels, loaded from the piers of coal-carrying railroads, is within the jurisdiction of the Commission, when the railroads do perform this service irrespective of whether or not they may be compelled to perform it. New England Coal and Coke Co. v. N. & W. Ry. Co., 22 I. C. C. 398, 401.

(b) So publication of a separate charge for dumping coal from piers into vessels at Norfolk and Newport News, Va., when for beyond the capes, not found unlawful. New England Coal and Coke Co. v. N. & W. Ry. Co., 33 I. C. C. 276, 280.

ALL OTHER CITATIONS

New England Coal and Coke Co. v. N. & W. Ry. Co., 22 I. C. C. 398, 404; Dilkes & Co. v. B. & O. R. R. Co., Unrep. Op. A-430; New England Coal and Coke Co. v. N. & W. Ry. Co., 33 I. C. C. 276, 280; Dougherty Co. v. B. & O. R. R., 48 I. C.

§6½. Dressing in Transit.

See Transit.

ALL CITATIONS

Illinois Central Railroad Co. v. N. O. G. N. R. R. Co., 68 I. C. C. 505.

§7. Back haul.

See Back Haul.

IMPORTANT CASES SINCE 1908

(a) An additional charge may properly be made for a back haul. Spiegle v. S. Ry. Co., 25 I. C. C. 71, 72.

(b) Back hauling should be reduced to the minimum compatible with commercial necessities. But if transit involving a back haul is voluntarily granted by carriers to certain communities or individuals and withheld from others, the practice, though itself wasteful, becomes nevertheless an agency for violating section 3 of the act. Thomas Cotton Co. v. I. C. R. R. Co., 63 I. C. C. 89, 91.

(c) A back haul is contrary to the purpose of transit and generally should be permitted only to meet unusual situations. Lake Charles Rice Milling Co. v. L. W. R. R., 69 I. C. C. 508, 513.

(d) Although carriers may under certain conditions voluntarily establish a free back haul in connection with transit, the Commission will not under ordinary circumstances require them to do so, unless to remove undue prejudice. Lake Charles Rice Milling Co. v. L. W. R. R. Co., 69 I. C. C. 508, 509, 513, 514.

(e) While movement of flat cotton should be restricted to a minimum and wasteful back hauls to transit points should not be encouraged, these considerations may not be ignored in some instances and enforced in others if undue prejudice would result. Memphis Freight Bureau v. M. P. R. R. Co., 80 I. C. C. 88, 97.

(f) In absence of undue prejudice back-haul charges if reasonable in amount receive approval of the commission. Back Haul Charges on Grain, 83 I. C. C., 693.

ALL OTHER CITATIONS

C. C. 579; Randolph Fruit Co. v. S. P. Co., 49 I. C. C. 707; United Shoe Machinery Co.

v. B. & M. R. R., 55 I. C. C. 206; Reconsignment and Diversion Rules, 58 I. C. C. 568, 573; Thomas Cotton Co. v. I. C. R. R. Co., 63 I. C. C. 89, 91; Amendt Milling Co. v. N. Y. C. R. R. Co., 230, 232, 233; Groton Iron Works v. N. Y., N. H. & H. R. R. Co., 57 I. C. C. 704; Northern Brokerage Co. v. Director General, as Agent, 60 I. C. C. 182; Amendt Milling Co. v. N. Y. C. R. R. Co., 63 I. C. C. 230, 232, 233; Boston Wool Trade Asso. v. A. & S. Ry., 64 I. C. C. 365, 387; Indianapolis Board of Trade v. B. & O. R. R., 64 I. C. C. 416, 419; St. Louis Independent Packing Co. v. C. & A. R. R. Co., 73 I. C. C. 459, 465; Transit Rules on Grain Products, 81 I. C. C. 25.

§7½. False floors and insulation.

IMPORTANT CASES SINCE 1908

(a) Climatic and transportation conditions may vary kind and quantity of bedding essential to safe transportation of live stock, but whatever is reasonably necessary the carrier is by law required to furnish, and injuries to stock resulting from failure properly to bed cars will render carrier liable in damages for its negligence. East Tennessee, etc., R. Co. v. Johnson, 75 Ala., 596; Allen v. C. B. & Q. R. R. Co., 82 Nebr., 726; 10 Corpus Juris, pp. 88 and 89; Michie on Carriers, sections 1742 and 1743; National Live Stock Exchange v. A. T. & S. F. Ry. Co., 80 I. C. C. 748.

(b) Duty resting upon carriers to bed cars for transportation of live stock carries with it a correlative right to make a reasonable charge therefor, but it is unnecessary that charge must be included in transportation rate. A railroad may make a reasonable separate charge for bedding cars or include a reasonable amount therefor in transportation rate, but it can not for same service do both. National Live Stock Exchange v. A. T. & S. F. Ry. Co., 80 I. C. C. 747, 749.

(ba) To give shipper right to place additional bedding in cars and charge carrier therefor whenever in his judgment car furnished is not properly bedded, is inconsonant with principles established by Balfour, Guthrie & Co., 21 I. C. C., 539, and Farmers' Cooperative Asso., 34 I. C. C., 60. National Live Stock Exchange v. A., T. & S. F. Ry. Co., 80 I. C. C., 747, 749.

(c) Contention that uniform live-stock contract, approved in 64 I. C. C., 357, places upon shipper obligations to bed cars, not sustained. Section 4 (b) of contract was prescribed by the commission in lieu of one proposed by railroads which would have required shipper to bed cars, and was drafted in light of the law which places upon carrier duty to furnish ordinary bedding and upon shipper burden of supplying extraordinary bedding when special character of his traffic or his caprice demands such bedding. National Live Stock Exchange v. A. T. & S. F. Ry. Co., 80 I. C. C. 747, 749, 750.

ALL OTHER CITATIONS

Balfour, Guthrie & Co., 21 I. C. C. 539; Farmers' Cooperative Asso., 34 I. C. C. 60; Perishable Freight Investigation, 56 I. C. C. 449, 555, 556, 557, 596; Rutherford-Brede Co. v. Director General, 61 I. C. C. 515.

§8. Free Storage.

IMPORTANT CASES SINCE 1908

(a) Competition at one point may justify a longer free time for unloading than at another. Brey v. P. R. R. Co., 16 I. C. C. 497.

ALL OTHER CITATIONS

Commercial Club of Duluth v. N. P. Ry. Co., 13 I. C. C. 288, 291; Brey v. P. R. R. R. Co., 16 I. C. C. 497, 500, 501.

§9. Grain Doors.

IMPORTANT CASES SINCE 1908

(a) If the installation of grain doors and cooperage is a shippers' duty, there necessarily exists an obligation to use due care in performing it. Where the carriers furnish adequate grain doors, lumber or other cooperage material, which they do not always do, and specifications for the use thereof, they should not be expected to pay for losses occasioned by the shippers' negligence. Claims for Loss and Damage of Grain, 48 I. C. C. 530, 546.

ALL OTHER CITATIONS

National Wholesale Lumber Dealers' Ass'n v. A. C. L. R. R. Co., 14 I. C. C. 154, 163; Farmers' Cooperative Asso. v. C. B. & Q. R. R. Co., 34 I. C. C. 60, 64, 65; Claims for Loss and Damage of Grain, 56 I. C. C. 347, 350, 351.

§9 (a). Heater Service.

See Heater Service.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked heater transit rates charged on numerous carloads of potatoes shipped in Eastman

heater cars since October 8, 1920, from points in Aroostook County, Maine, to certain group destinations, principally Boston, Mass., New York, N. Y., Philadelphia, Pa., and intermediate points as unjust and unreasonable to extent they exceeded heater transit rates in effect immediately prior to October 8, 1920. Most of the traffic originates on the Bangor & Aroostook R. R. Eastman Heater cars are operated by the Eastman Car Company, and are used only in shipments from Maine producting territory. They're especially designed for protection against cold and contain permanently installed heaters as a part of the car equipment. The Eastman Company furnishes fuel and inspection service in connection with all cars, and furnishes filling and refilling stations and attendants who look after the equipment during the time it is in transit. This service is performed under contracts by which the Eastman Comapny receives 75 percent and the carriers 25 percent of all heater transit and detention charges owned by the carriers. For the use of the cars owned by the Eastman Company the carriers pay mileage and turn over the full 100 per cent of the heater car charges to the Eastman Company. The Eastman Company assumes all liability for damage resulting from improper heating of the car. Heater transit charges for the use of Eastman heater cars are published by the carriers as a separate charge in addition to the line haul rate. In all cars except Eastman cars, the shippers place their own stoves, provide fuel, furnish their own caretaker, and assume all the risk of improper heating of the car. For this reason the Eastman cars are more satisfactory to small shippers, as the providing of a caretaker for one or two cars makes the charges per car higher. There is a substantial disparity between the heater transit rates here attacked and the heater transit rates maintained by carriers in western trunk line and northwestern territory. Traffic and transportation conditions are shown to be dissimilar. The competitive conditions in the two territories are not the same. It can not be said upon this record that the rates attacked are unreasonable for the service performed. HELD, rates attacked not unreasonable, complaint dismissed. American Fruit & Vegetable Shippers Asso. v. B. & A. R. R., 68 I. C. C. 446.

§9¼. Inspection.

See Inspection.

IMPORTANT CASES SINCE 1908

(a) Inspection is a necessary and valuable commercial adjunct of the marketing of commodities, and the stoppage and necessary detention of shipments for the purpose is a reasonable and proper service, but the Commission does not hold that carriers must perform this service without adequate compensation. Reconsignment Case, 47 I. C. C. 590, 641.

ALL OTHER CITATIONS

Boston Wool Trade Asso. v. A. & S. Ry. Co., 64 I. C. C. 365, 388.

§9½. Milling, Mixing and Elevation.

CASES 1887-1908

(a) The New York law of 1888, regulating the fees for elevating and discharging grain by elevators is not contrary to the 14th Amendment to the Constitution of the United States, and does not deprive the citizen of his property without due process of law; and is not unconstitutional in fixing the maximum charges which it specifies, nor in limiting the charge for shoveling to the actual cost thereof, and it is a proper exercise of the police power of the state. Budd v. State of New York, 4 I. C. R. 45.

(b) The business of elevating grain is a business charged with a public interest, and those who carry it on occupy a relation to the community analogous to that of the common carriers, and may be controlled by public legislation for the common good. Budd v. State of New York, 4 I. C. R. 45.

(c) One who enters upon the business of elevating and storing the grain of other persons for profit in North Dakota becomes subject to the statutory regulations, although he also elevates and stores his own grain in the same warehouse. Brass v. North Dakota, Stoeser (U. S. Sup. Ct.), 4 I. C. R. 670.

(d) Owners of a grain elevator are not deprived of the equal protection of the laws by a statute regulating fees and establishing maximum charges. Brass v. North Dakota, Stoeser (U. S. Sup. Ct.), 4 I. C. R. 670.

(e) The U. P. R. Co. entered into contracts with Peavey & Co. under which the latter erected grain elevators

at Council Bluffs and Kansas City for the transfer of grain at those terminals of the U. P. System, and for the service of transferring grain by elevator at said points the U. P. agreed to pay Peavey & Co. 1¼ cents per 100 lbs. Corporations controlled by Peavey & Co. were formed to conduct the elevators at each point. Peavey & Co. are large buyers and shippers of grain in the northern and western grain producing states and control a large number of country elevators. In making this arrangement the U. P. acted in good faith, and the facts indicate that 1¼ cents per 100 lbs. is not an excessive charge for the service as conducted by the elevator companies. The real complainants in the proceeding are carriers competing with the U. P. who claim that if this arrangement is not declared illegal they will be compelled to make similar allowances at transfer points on their lines, and no shipper nor any dealer in competition with Peavey & Co. has appeared to complain or protest in any manner against this arrangement. HELD:—

1. That the compensation paid for the elevator or transfer service is not unreasonable.

2. That the U. P. is entitled to perform the work itself or hire it done by others and is not legally at fault or guilty of wrong doing because incidentally those employed by the carrier to transfer the grain are aided more or less in another line of business in which they are engaged.

3. That any injury or detriment resulting to rival carriers under the arrangement is something which the law does not seek to prevent. Matter of Allowances to Elevators 10 I. C. C. 309.

(f) A railroad company may perform elevator or transfer service for itself, or, if it sees fit, hire it done by others, and in so doing it is not legally at fault or guilty of wrongdoing because those employed by the carrier to transfer the grain are also shippers of grain, and are thereby incidentally aided in their business of buying and shipping grain. Matter of Allowances to Elevators, 10 I. C. C. 309.

(g) Carriers may grant elevation to grain in transit. Re Allowances to Elevotars by Union P. R. R. Co., 12 I. C. C. 85.

(h) A carrier subject to the act to regulate commerce may either construct and operate the elevator itself or furnish elevation by arrangement with the owner of an elevator; and the amount of compensation paid by the carrier to such owner is of no concern to shippers or to other carriers, unless it operates to affect the rates on grain or by some device a portion of the allowance is returned to shippers and thus becomes a rebate. Re Allowances to Eelevators by Y. P. R. Co., 12 I. C. C. 85.

(ij) The law clearly recognizes elevation as a facility which the carrier may provide, and this authorizes the carrier to grant grain elevation at destination or while the traffic is in transit, subject only to the restriction imposed by the fact that elevation, like any other service offered by the carrier to shippers, must be open to all on equal and reasonable terms In the matter of allowances to elevators by the U. P. R. R., 12 I. C. C. 86, 88.

(kl) Elevation is defined as unloading grain from cars or grain-carrying vessels into a grain elevator and loading it out again after a period of not to exceed ten days; it does not include treatment or grading, cleaning, and clipping of grain; and retention in an elevator beyond ten days becomes storage and is not a part of the service of elevation as that word is used in the statute. In the matter of allowances to elevators by the U. P. R. R., 12 I. C. C. 86, 88.

(m) The only restriction imposed by the act is that the elevation offered like any other service a carrier may hold out to perform for shippers as an inducement to send their traffic over its lines, must be open to all on equal and reasonable terms. Allowances to elevators by U. P. R. R., 12 I. C. C. 85, 86, 88.

IMPORTANT CASES SINCE 1908

(n) The meaning generally conveyed by "milling" is that of grinding, as from grain, while mixing is generally understood to mean the working together of various ingredients. Nashville Flour Transit Rules, 41 I. C. C. 483, 497.

(o) Elevation and transfer in transit have frequently been found by the Commission and the courts to constitute necessary steps in the transportation of various kinds of property. Guaranty Claim of Central Elevators & Warehouse Co., 72 I. C. C. 169, 176.

See Classification §13; Evidence §65; Express Companies §2; Loading and Loading; Transportation §10.

CASES 1887-1908

(a) Any relaxation of established and commonly enforced rules of carriers for the prompt removal of goods from freight depots or sheds, or for the loading or unloading of cars on railway tracks or private sidings, constitutes an obvious advantage to the shipper or consignee so favored, and according to the extension of time permitted such exceptional use of railway facilities is of often of no little value. American Warehouse Asso. v. I. C. R. Co., 7 I. C. 556, 562.

(b) There is no violation of section 2 of the Commerce law shown in this case in the application of the rule allowing 96 hours for unloading cars at Philadelphia; neither is there any violation of that section in the facts, that on all other commodities besides those to which the 96-hour rule is applied, only 48 hours are allowed at Philadelphia, and on coal, coke, pig iron and iron ore 72 hours are allowed at interior points, while only 48 hours are allowed on other trafic at interior points. Section 2 prohibits unjust discrimination in "the transportation of a like kind of traffic," and does not apply where the traffic is of different kinds or classes not competitive with each other. Pa. Millers' State Asso. v. Phila. & R. Ry. Co., 8 I. C. C. 531.

(c) A common carrier may,if it sees fit, divide the total rate charged for the shipment of live stock, and make the cost of delivery a separate charge by itself. Cattle Raisers' Asso. v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(d) That different periods of time are allowed for loading and unloading different commodities, without charge for use of cars, does not violate §2 of the act, which prohibits unjust discrimination "in the transportation of a like kind of traffic," and does not apply where the traffic is of different kinds or classes not competitive with each other. Pennsylvania Millers' State Asso. v. Philadelphia & R. R. Co., 8 I. C. C. 531.

(da) If the time allowed at terminals for loading or unloading is reasonable, and that allowed at interior points is unreasonably small, then an undue prejudice to the interior points, in violation of §3 of the law, may result. Pennsylvania Millers' State Asso. v. Philadelphia & R. R. Co. 8 I. C. C. 531.

(e) Transportation between defendant's terminal in Brooklyn and its rail terminus in Jersey City is effected by water carriage across New York Harbor. The action of defendant in discontinuing "track delivery" for hay in carloads at its station in Brooklyn. though it continued to make such delivery for other carload traffic, was taken to relieve a state of chronic congestion at that station resulting largely from consignments of hay thereto. It still continues delivering carload hay alongside wharves in Brooklyn as it does other points within the lighterage district of New York. HELD. that the resulting discrimination against hay in carloads was not "unjust" within the meaning of the Act to regulate commerce, and as no violation of the regulating statute is shown the complaint should be dismissed. Palmers Dock H. & P. Bd. of Trade v. Penn. R. R. Co., 9 I. C. C. 61.

(f) Defendant's tracks in Providence. R. I., are so located that competitors of complainant occupying places of business abutting on its Canal Street Yard are able to unload carloads of fresh meat directly into their warhouses; and the privilege of unloading meat in that yard was formerly accorded to complainant, whose storehouse is across the canal and about 300 feet from the railroad yard; but such privileges to complainant was recently withdrawn. Denial of such privilege entails the hauling of complainant's meat from another yard about half a mile distant, and damages

his business from $20 to $100 per car, HELD, that complainant is thereby subjected to undue prejudice. Miner v. New York, N. H. & H R. Co., 11 I. C. C. 422.

(g) Defendant's tracks in Providence, R. I., are so located that competitors of complainant occupying places of business abutting on its Canal Street Yard are able to unload carloads of fresh meat directly into their warehouses, and the privilege of unloading meat in that yard was formerly accorded to complainant, whose storehouse is across the canal and about 300 feet from railroad yard, but such privilege to complainant was recently withdrawn. Denial of such privilege entails the hauling of complainant's meat from another yard about one-half mile distant and damages his business from $20 to $100 per car. The capacity in and about the Canal Street Yard of the track which may be used for unloading meat is limited, and defendant's refusal to continue the privilege is apparently upon the assumption that its allowance would involve extension of the privilege to the unloading of all perishable commodities at that point. HELD: 1. That there is no such competitive relation between fresh meat and, for example, fresh fruit that it is of necessity undue discrimination to accord a privilege to the one commodity which is refused to the other. That complainant is subjected to undue prejudice under the circumstances of this case. Miner v. N. Y., N. H. & H. R. Co., 11 I. C. C. 422.

(h) It is the usual practice for consignees to do their own unloading at destination. But clearly there is nothing in the law or in public policy that forbids a carrier to unload for them if it does so for all shippers alike. Allowances to Elevators by U. P. R. R. Co., 12 I. C. C. 87, 88.

(i) Delivery. Carrier's regulation discontinuing delivery at its Brooklyn terminal of petroleum oil in tank cars shipped to complainants, practically depriving complainants of opportunity to continue their business in competition with the Standard Oil Company, and subjecting them to unlawful prejudice and disadvantage, required to be rescinded, and such delivery for complainants to be allowed under reasonable rules and condition as to the time and manner of unloading the cars. Preston & Davis v. D. L. & W. R. R. Co., 12 I. C. C. 114.

(j) Defendant's regulation put in effect October 15, 1906, discontinue the delivery at its Brooklyn terminal of petroleum oil in tank cars shipped to complainants, practically deprives complainants of opportunity to continue their business in competition with the Standard Oil Company and subjects complainants to unlawful prejudice and disadvantage. Defendant required to rescind the regulation and henceforth allow such delivery for complainants under reasonable rules and conditions as to the time and manner of unloading the cars. Preston & Davis v. D. & W. R. R. Co., 12 I. C. C. 115.

(k) Complainant attacked rule of defendant whereby it discontinued the delivery of petroleum oil in tank cars to its so-called Brooklyn terminal as unreasonable and discriminatory. The defendant issued a circular that petroleum oil in tank cars would not be accepted for delivery to freight stations and piers in New York Harbor evidently upon some agreement between the lines reaching New York, although the rule was not generally enforced. Complainants are the only receivers of oil from defendant at this terminal in Brooklyn, and they have built up and enlarged their business to substantial proportions. It is unquestionably the defendant's right and duty to take all needful precautions against a conflagration or other liability to accident, but the Commission is not convinced that it was necessary in this case to take such extreme measures as to prohibit further delivery of tank cars at the terminal in question. HELD, discontinuance of this delivery subjected complainant to undue prejudice and defendant should restore its former practice. Preston & Davis v. D. L. & W. R. R., 12 I. C. C. 115.

(l) Trucking firm. Preference given at carrier's pier, the inadequacy of which for the business results in congestion and delay, to the through traffic transferred by a trucking firm employed by the carrier to transport through shipments via its line from New York city railroad depots to such pier, over traffic originating in New York and vicinity and brought to the pier by other trucking firms, it appearing that the pier is not closed at night until all waiting trucks are unload-

ed, and is soon to be considerably enlarged, no instance of injury resulting to shippers or their traffic, and no discrimination amounting to exclusion from the pier, being shown,—held not to operate unduly or unreasonably against other truck owners. New York Team Owners Asso. v. Southern P. Co., 12 I. C. C. 204.

IMPORTANT CASES SINCE 1908

(m) Staking a load of lumber on an open car is in reality a part of the operation of loading. National Wholesale Lumber Dealers' Ass'n. v. A. C. L. R. R. Co., 14 I. C. C. 154, 160.

(n) Lining and padding cars for flour shipments is in nature of private packing. Southwestern Missouri Millers' Club v. St. L. & S. F. R. R. Co., 62 I. C. C. 245, 251.

(o) Reasonable charges may be assessed for the service of loading and unloading. There are good reasons for basing carload rates upon carload minima, but there is no apparent reason for basing loading or unloading charges on the carload minimum weight. The amount of the service performed for the transportation charge does not vary substantially with the variations in the weight of shipments below minimum, while the amount of the service performed in loading and unloading varies directly with the quantity of freight in the car. The reasonableness of such charges depends upon the service performed on the traffic actually handled. If the compensation to carriers is insufficient to cover the cost of service, the method proposed is not the proper course to remedy that condition. L. C. L. Minimum Handling Charges, 43 I. C. C. 266, 267.

(p) In the absence of tariff provisions to the contrary, loading or unloading is a separate and distinct service not included in the transportation rate; and for loading and unloading, and for all other special services apart from conveyance, the carriers may properly make a reasonable charge since they are not accessorial parts of the transportation which section 1 requires to carriers to furnish. Citing Dunnage Allowances, 30 I. C. C. 538, 543; Chicago Live Stock Exchange v. A. T. & S. F. Ry. Co., et al. 52 I. C. C. 209, 223.

(q) To comply with the legal obligation of delivery, a carrier may employ the owner of the property transported and pay an allowance not more than is just and reasonable. Any service performed by a shipper in excess of the carrier's legal obligation as to delivery is a voluntary service for the shipper's own convenience and for which it is entitled to receive no compensation. Hence, a proper switching or spotting allowance represents payment for the difference between the service in delivery which a carrier actually performs and the service which the carrier is legally obligated to render. United States Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 683.

(r) The Commission expresses the opinion that defendant carriers may properly provide in case of mixed shipments of livestock that the shippers shall, at his own expense, install separate partitions. National Livestock Exchange v. Ann Arbor R. R. Co., 69 I. C. C. 125, 134.

(s) The furnishing by an interstate carrier of bulkheads with cars for the transportation of grain does not constitute the granting of the "privileges or facilities" which are required to be published with the Interstate Commerce Commission by section 6 of the Interstate Commerce Act; and a shipper, where the carrier fails to furnish bulkheads, may therefore recover in an action at law in a state court for the expense of supplying them, although the published schedules make no allowance for furnishing the same. Loomis v. Lehigh Valley R. R. Co. (N. Y., 1911), 132 N. Y. Supp. 138, 141.

§10½. Protective Service.

See Protective Service; Heater Service.

IMPORTANT CASES SINCE 1908

(a) Rule 145, governing shipments stored in transit should be revised so as to provide for the application of protective service charges into and out of storage, respectively, applicable under the tariff at the times of the respective movements. Perishable Freight Investigation, 56 I. C. C. 449, 566, 568.

ALL OTHER CITATIONS

Carnation Milk Products Co. v. A. T. & S. F., 63 I. C. C. 60.

§11. Notifying Shipper or Consignee.

See Notice.

IMPORTANT CASES SINCE 1908

(a) It appeared a carrier's practice was, when there was no consignee to receive a shipment, to have its local agent telegraph the freight claim agent, who in turn communicated by telegraph with the connecting carrier delivering the freight to his line, and in this way the original consignor was finally reached. HELD, this practice was a proper one and the Commission would refuse to order the local agent at the point of destination to telegraph directly to the consignor, informing the latter of the rejection of the shipment. Kehoe & Co. v. N. C. & St. L. Ry. Co., 14 I. C. C. 555, 557.

(b) Complainant attacked failure of the M. C., to advise them of the arrival of a shipment at Buffalo, N. Y., in time to comply with the tariff requirements necessary to secure the benefit of transit arrangement on the basis of the through rate to ultimate destination, as unreasonable and unjust the charges assessed on a carload of livestock feed from Chicago, Ill., to Buffalo, N. Y., there stored, and thence shipped to Montrose, Pa. The shipment moved from Chicago on April 13, 1918, over the M. C. It was consigned to S. F. Scattergood & Co., complainant, care of Union Dock & Warehouse Co., Buffalo, N. Y. On arrival at Buffalo, apparently on April 28 or 29,

1918, it was placed in storage in the warehouse of the Union Dock & Warehouse Co. On June 24, 1918, complainants received in the mail at Philadelphia, from the agent of defendant at Black Rock, N. Y., a freight bill dated June 20, 1918 for charges to Buffalo based on a rate of 11.5c accompanied by a "Notice of arrival of freight" which was merely a carbon copy of the freight bill. The freight bill and notice of arrival bore the notation "Transit privileges canceled." Upon receipt of the freight bill, complainants upon the same day sent a check in payment thereof to the agent at Black Rock. The shipment remained in storage until July 17 1918, was then forwarded to Montrose, and charged at local rate of 16.5c Buffalo to Montrose. There was a joint rate of 19c in effect from Chicago to Montrose. Complainants do not maintain that failure of defendant to present freight bills within five days was reported to the inspection and weighing bureau. The tariff containing a provision that all necessary arrangements for storing or otherwise handling grain, grain products, or feed at warehouses, including loading in and loading out, must be made with such warehouses by shippers or owners. Such arrangements had been made by complainants with the Union Dock and Warehouse Co., and included an agreement that the warehouse company would advise complainants of the arrival of the freight. Delivery to the warehouse was delivery to complainants. HELD, the transportation charges collected and the transit rule attacked were not unreasonable, complaint dismissed. Scattergood & Co. v. Director General, 60 I. C. C. 155.

ALL OTHER CITATIONS

Rates on Hay from the Northwest, 25 I. C. C. 680, 682.

§11½. Reshipping Rates.

See Infra §15 Reshipping Rates.

IMPORTANT CASES SINCE 1908

(a) The Commission considered the reasonableness of regulations requiring shippers of grain at St. Louis, Mo., to surrender expense bills covering inbound shipments to obtain benefit of reshipping rates to central freight association and trunk line territories. There were no joint through rates from local Missouri points to destinations indicated, and the through rate, made up of the interstate rate to St. Louis, plus the rate beyond, was higher than the intrastate rate to St. Louis plus the rate beyond. In order to insure application of the interstate rate where grain was subsequently shipped out on the reshipping rate, carriers required unloading at St. Louis and the surrender of expense bills complained of, defendants maintaining that the reshipping rate was part of a through rate to which the shipper was entitled only where he had paid the part thereof applicable to the shipment into St. Louis. There was no commodity rate on the traffic in question, but while there was no class rate on grain to central freight association territory, there was to trunk line territory. HELD, that the regulation was reasonable on shipments to trunk line territory, as it is necessary to know the point of origin of the shipment to determine whether the reshipping commodity rate applying to shipments "from beyond" should be applied, or the local or flat class rate, but shipments to central freight association territory were entitled to move out on the reshipping rate regardless of point of origin or of rate on inbound shipment, as there was no other rate on which such shipments could move to that territory. Directed that case be re-opened and heard with Southwestern Missouri Millers Club and C. & A. R. R. Co., Docket No. 6662, on notice. Merchants Exchange of St. Louis v. B. & O. R. R. Co., 30 I. C. C. 700.

(b) Impossible under the present system of rate making in this country to so adjust rates that the in-and-out charges will be the same in the aggregate for all jobbing points which buy and sell in the common markets. Ft. Dodge Commercial Club v. Director General, 57 I. C. C. 343, 345.

ALL OTHER CITATIONS

Harrisburg Milling Co., et al v. Ann Arbor R. R. Co., et al., 52 I. C. C. 63; Three States Tie Co. v. C. & E. I. R. R. Co., 57 I. C. C. 24.

§11¾. Sacking.

CASES 1887-1908

(a) A published tariff regulation permitting grain to be shipped through from a point of origin to final destination with a stop-over privilege in East St. Louis for cleaning, sacking or other legitimate purpose, the shipment covering a proportional or balance of a

through rate from East St. Louis, is not shown to be objectional in this case, but that part of defendant's tariff regulation which provides that grain may be shipped to East St. Louis on a local rate and forwarded as a new shipment from that point on a 12c proportional rate to Vicksburg, Miss., and common points desregards the higher 15-cent local rate from East St. Louis to those destinations and is not in accord with the doctrine announced by the Commission in Re Alleged Unlawful Rates and Practices in the Transportation of Grain and Grain Products by the A. T. & S. F. Ry. Co. et al., 7 I. C. C. Rep. 240; Re Rates and Practices of M. & O. R. Co. 9 I. C. C. 373.

IMPORTANT CASES SINCE 1908

(b) The general practise is that the charge in effect for handling grain from cars into elevator, sacked, owners to furnish sacks and twine, and delivered to vessels, is to include sacking and elevation. Powell Grain Co. v. St. L. I. M. & S. Ry. Co., Unrep. Op. 1876.

§12. Scaleage, Deductions and Shrinkage.

See Weights and Weighing §7.

IMPORTANT CASES SINCE 1908

(a) Complainant, grain dealers at Baltimore, attacked the "scaleage deductions" made by defendant carriers upon grain passing through elevators owned by defendants at that port. In process of elevation grain loses in weight through loss of dust, chaff and dirt, which remains behind in the elevator rooms and spouts. Defendants issued receipts for actual weight of the grain received at their elevators, with a statement thereon as to estimated deductions which would be made from the weights in redelivering to complainants the grain. These deductions approximately represented such losses. Defendants at New York, however, did not make such deductions and actually went into the market and purchased grain to supply the shrinkage. These practices had existed for many years at both cities and the discrimination in favor of New York was apparently taken care of in the difference of rates to New York and Baltimore. HELD, said scaleage deductions at Baltimore did not constitute a matter affecting rates, and defendants were not required to place such deductions in their public tariffs; but that the actual purchasing by defendants at New York of grain to make up the shrinkage was a matter affecting rates, and complainants were entitled to a remedy of that situation on the ground of unjust discrimination, upon further proof that such practice at New York actually resulted in unjust discrimination. Baltimore Chamber of Commerce v. Penn. R. R. Co., 15 I. C. C. 341, 346, 347.

(b) Complainants attacked the rules in the tariffs of southwestern lines, providing for deductions, in the adjustment of claims for loss of grain in transit, of certain percentages of the loading weights as representing a natural shrinkage, as unreasonable and in violation of sections 1, 3 and 20 of the Act. A representative rule provided for deductions of 1-8 of 1 per cent on wheat, flaxseed, rye, oats, and barley; and ¼ of 1 per cent on corn. The average shrinkage on all grain was probably 0.208 per cent. HELD, that the deductions in question were fairly conservative, and the rule assailed not unreasonable. Complaint dismissed. Crouch Grain Co. v. A. T. & S. F. Ry., 36 I. C. C. 265.

ALL OTHER CITATIONS

Hull Co. v. S. Ry. Co., 24 I. C. C. 302; Kalmbach-Ford Co. v. K. C. S. Ry. Co., Ltd., 26 I. C. C. 289, 290.

§12½. Spotting and Special Services.

See Allowances §8 (5); Demurrage §12 (1); Special Rates and Services; Spotting; Storage.

IMPORTANT CASES SINCE 1908

(a) Transit service is a special service. Spiegle v. S. Ry. Co., 25 I. C. C. 71, 75.

(b) The service of loading, furnishing material and placing dunnage in cars is a special service. Western Classification Case, 25 I. C. C. 442, 496.

(c) The Commission investigated the changes in tariff rules governing the movement of potatoes in carloads from producing points in the states of Minnesota and Wisconsin to Chicago and other points and consuming markets west of the Mississippi River. It appeared that for over 20 years it had been the practice in this territory for shippers to bear the expense of protecting their potatoes by lining box cars with

boards and paper. They also furnished stoves and fuel for warming the cars and care-takers to accompany the shipments. The rates were fixed with the theory that this would be done by the shipper. The carriers under the rates did not undertake to furnish protection against the inclemency of the weather. They included, however, the free carriage in both directions of the care-takers, also the stoves and car linings. The tariffs have been lacking in definiteness in respect to these matters and new tariffs were published. These rules in general provide as follows: 1. That carriers will not accept shipments of potatoes during the period from November 1 to April 15, unless the shipper at his own expense lines the car, puts in a false floor, and furnishes a stove and fuel for heating, with an attendant to accompany the shipment. The right is reserved to the carrier, however, of accepting such shipments "when in its judgment the weather conditions permit." 2. That the attendant in the employ of the shipper will have full supervision of the heating and ventilation of the shipment, and shall be responsible for the care and protection of the potatoes from cold while in transit. 3. That the stoves and material for linings and false floors will be returned free of charge over the route of the original movement only when the material is delivered by the consignee or by a representative of the shipper at the depot of the delivering carrier at destination and a regular bill of lading is issued for the free return movement. Elsewhere in the country where the potato movement is large special heater cars are made available to shippers, and box cars also are lined and equipped by carrier at the beginning of winter and kept in the service until spring. Experience has demonstrated that potatoes may safely be carried, even in very harsh weather, in ordinary box cars so prepared and equipped with stoves and accompanied by attendants. HELD, that the traffic involved is large enough, not only to warrant the carriers in preparing for it in some such manner, but large enough and permanent enough to require them under the law to offer such service to the shippers; that it is unreasonable and arbitrary for the carriers to impose a rule permitting them to refuse a shipment altogether. On account of the fact that the previous rates have been imposed upon the theory of the shippers furnishing a certain service and facilities, the tariffs are not permanently suspended, but the shippers and carriers are requested to confer together and modify rules to be filed. If this is not done the Commission will take further action. A method should be devised stopping the waste involved in the loss to shippers in the lining and stoves when destined to points east and south of Chicago, and to points to which there is no joint through rate. Protection of Potato Shipments in Winter, 26 I. C. C. 681.

(d) Wherever a particular service-spotting at some place of unloading within a plant-property may be construed as the equivalent of either service, and the rendition of such service practical, the Commission may compel a carrier to perform such service with its own equipment as part of its legal obligation as to delivery of carload traffic. As the magnitude of the service becomes greater than the equivalent of team track delivery, or simple switching delivery, the demand on the carrier for its performance tends to exceed what may be regarded as a proper delivery service under transportation rates. To comply with this legal obligation, the carrier may employ the owner of the property transported and pay a compensation or allowance not more than is just and reasonable. Any service performed by a shipper in excess of a carrier's legal obligation as to delivery is a voluntary service for the shippers own convenience and for which it is entitled to receive no compensation. Hence, a proper switching or spotting allowance represents payment for the difference between the service in delivery which a carrier actually performs and the service which the carrier is legally obligated to render. U. S. Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 682.

(e) Just as there are criteria by which the reasonableness of a rate may be measured, so there are tests whereby it may be determined whether a particular service is within the scope of a carrier's legal obligation. That a service such as spotting has been rendered for a long time under a transportation rate is important evidence that the service was considered in arriving at the rate and also of the carrier's obligation as to delivery. However, duration of time is not conclusive. United States Cast Iron

Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 682, 683.

(f) It is not satisfactorily established that the legal obligation of a carrier goes to the extent of requiring it to spot cars at places of loading or to take cars from places of unloading within a plant. Obligation as to delivery may have been complied with when the cars are placed on interchange track or on the spur within the plant connecting with the interchange track. United States Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 683.

(g) Wherever a delivery service properly may be construed as the equivalent of team-track or simple switching delivery, and the rendition of such service is practical, the Commission may compel a carrier to perform such service with its own equipment as part of its legal obligation as to delivery. As the magniture of the service becomes greater than the equivalent of team-track or simple switching delivery, the demand on the carrier for its performance tends to exceed what may be regarded as a proper delivery service under transportation rates. United States Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 683.

(h) Where an industry is accorded the equivalent of the delivery service rendered to the majority of shippers in the same district which receive either team-track or simple switching delivery, there is no basis for a finding that the line-haul rates contemplate an additional spotting service at such an industry, or that the line-haul rates have been rendered unreasonable or otherwise unlawful by the withdrawal of the spotting service by the line-haul carrier or its failure to reimburse the industry for the entire cost of the spotting service which the latter performs. United States Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 684.

(i) It has not been satisfactorily established that the legal obligation of a carrier goes to the extent of requiring it to spot cars at places of unloading or to take cars from places of loading within a plant. Obligation as to delivery may have been complied with when the cars are placed on interchange track or on the spur within the plant connecting with the interchange track. United States Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 683, 684.

(j) A shipper can not be heard to complain of unjust discrimination or undue prejudice because of free spotting at competitor's plants unless there is a substantial similarity of conditions at the respective plants. Sharon Steel Hoop Co. v. P. Co., 59 I. C. C. 378, 381.

(k) Circumstances entitled to primary consideration as to whether spotting is a duty required of carriers under their line-haul rates are the extent of the service involved in a typical team-track delivery, and the extent of the service rendered in the typical switching of a car upon a siding of a shipper clear of the main track—the substitute for team-track delivery. Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 643.

(l) The legal obligation of defendant under the line haul rates does not go to the extent of requiring it to spot complainants' cars at the various places of loading and unloading within the plant. Its obligation would not appear to extend beyond delivering or receiving the cars upon the scale track or other tracks near the entrance of its plant. Philip Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 645.

§13. Staking and Binding.

IMPORTANT CASES SINCE 1908

(a) Taking into consideration the fact that the cost of staking and binding lumber on open cars varies with different parts of the same region, making it impossible to arrive at the average cost of such service; that no practical equipment of permanent stakes has been devised; that it has been a long established custom for the shipper to load and unload; that rates have been arrived at on this basis; that the shipper is best adapted to perform this service; that the lumber business has been conducted for many years with reference to this custom of loading and staking, and that rates for lumber shipments are the same for box and open cars, it is HELD, that regulations of carriers requiring shippers of lumber and forest products on open cars to furnish at their own expense stakes, racks, binders and other appliances, are not unreasonable or unjust. National Wholesale Lumber Dealers' Ass'n. v. A. C. L. R. R. Co., 14 I. C. C. 154, 160, 162.

(b) If a carrier furnishes nothing but loose boards at one point and at another furnishes sectional doors, lath, paper, or burlap, unlawful discrimination results. Farmers' Cooperative Asso.v. C. B. & Q. R. R. Co., 34 I. C. C. 60, 65.

(c) Regulations of defendants which required shippers of lumber on open cars to stake and secure the loads for safe carriage were not unjust or unreasonable. Norton Lumber Co. v. C. M. & St. P. R. Co., 81 I. C. C. 749, 757.

(d) The carriers are entitled to charge for weight of lumber used for blocking and holding automobiles immovable during transit. Lusby v. S. P. Co., Unrep. Op. 1922.

ALL OTHER CITATIONS

Keystone Wood Co. v. P. R. R. Co., 37 I. C. C. 622, 624; Frankfeld & Co. v. N. Y. C. R. R. Co., 40 I. C. C. 555; Fruit Dispatch Co. v. P. & R. Ry., 48 I. C. C. 634; Diamond Lumber Co. v. C. M. & St. P. Ry., 51 I. C. C. 78, 88.

§14. Storing, Grading and Resacking.

See Storage.

CASES 1887-1908

(a) Upon investigation of alleged unlawful practices of carriers in granting free storage of freights and other specified privileges to shippers. HELD, that charges made by carriers for transportation and terminal services, and all rules and regulations which in any wise change, affect or determine the aggregate compensation paid therefor are required by statute to be shown upon their published rate schedules; and under such requirement it is the duty of all carriers subject to the Act to so publish and thereupon enforce each and every of their charges, rules and regulations concerning the storage of freights, diversion of cars to shippers' use, distribution of freight in part-lots, reconsignment of freight, and all kindred concessions or privileges to shippers, and to refrain from affording a
privilege without due publication thereof in such schedules. That in view of the very general allowance in various forms of some or all of the privileges involved a general order directed to all carriers subject to the Act to regulate commerce should be issued. American Warehousemen's Asso. v. Illinois Ant. R. Co., 7 I. C. C. 556.

(b) The storage of freight, diversion of cars to shippers use, part lot distribution and reconsigning privileges involved are of considerable importance and value to shippers, and especially so to the class of manufacturers or dealers largely engaged in supplying those staple commodities which are in common demand throughout the country. To the extent of its value, each privilege les-

sens the aggregate compensation paid by shippers to carriers for transportation and terminal services. The charges made for such services, and all rules and regulations which in any wise change, affect or determine such aggregate compensation, are plainly required by the statute to be shown by the carriers upon their published rate schedules. American Warehousemen's Asso. v. I. C. R. Co. 7 I. C. C. 556, 589.

IMPORTANT CASES SINCE 1908

(c) Storage in transit and other transit arrangements rest upon the fiction that the incoming and outgoing transportation services, while distinct, are applied to a continuous shipment from point of origin to point of destination. Kansas City Board of Trade v. A. T. & S. F. R. R., 69 I. C. C. 185, 189.

ALL OTHER CITATIONS

C. & St. L. Ry. Co., 50 I. C. C. 371; DeLaval Separator Co. v. A. & R. R. R. Co., 57 I. C. C. 668, 676; Northern Potato Traffic Asso. v. G. N. Ry. Co., 58 I. C. C. 360, 364; Transit Privileges on Lumber at Nashville, 58 I. C. C. 444; Interstate Packing Co. v. C. & N. W. Ry., 58 I. C. C. 510; Storage Charges on Apples and Pears, 64 I. C. C. 627; Storage in Transit Rules at Minnesota Transfer, 68 I. C. C. 572.

§14½. Store-Door Delivery.

See Store Door Delivery.

IMPORTANT CASES SINCE 1908

(a) To the extent of the reasonable cost of store door delivery, the burden is upon the carriers to justify withdrawal of the service and the consequent increase of cost to the shipper. Merchants & Manufacturers' Assn. v. B. & O. R. R. Co., 30 I. C. C. 388, 389.

(b) Store-door delivery was first inaugurated to relieve congested condition of a station. Chamber of Commerce of Washington v. B. & O. R. R. Co., 30 I. C. C. 446, 448; Judd & Deweiler, Inc., v. B. & O. R. R. Co. 30 I. C. C. 455, 456.

ALL OTHER CITATIONS

Acosta v. Merchants & M. Transp. Co., 41 I. C. C. 376; Tulsa Traffic Asso. v. St. L. S. F. Ry., 49 I. C. C. 644, 646, 648.

§14¾. Tailboard delivery.

IMPORTANT CASES SINCE 1908

(a) Because a carrier at one point, because of peculiar conditions, performs a form of tailboard delivery (whereby less than carload shipments for certain consignees are placed at certain locations on station platforms, etc.), it does not follow that the Commission may impose this duty upon carriers at other points. Phila. Team Owners' Pro. Asso. v. Ry. Co., 32 I. C. C. 387, 392.

ALL OTHER CITATIONS

Acosta v. M. & M. Transp. Co., 41 I. C. C. 376, 377.

§15. Transit.

See Infra §18, §19, §20; Bills of Lading §4; Cars and Car Supply §11; Compress Companies and Charges; Concentrating Rates and Privileges; Creosoting-in-Transit; Dressing-in-Transit; Panama Canal Act; Penalty Rates; Refining in Transit; Routing and Misrouting §8½; Stoppage in Transit; Storage in Transit; Substitution of Tonnage; Through Routes and Joint Rates §18, §19, §20; Transfer; Transit; Yardage.

CASES 1887-1908

(a) The Chicago, Milwaukee & St. Paul Railroad, by charging milling in transit rates on grain originating on its Southern Minnesota division and forwarded as product from La Crosse, Wis., to Milwaukee, Wis., or Chicago, Ill., does not discriminate in favor of Minneapolis millers, where such rates bear the same relation to its through rates via La Crosse as the in and out rates at Minneapolis, Minn., on grain milled there, bear to the through rates via that city. Listman Mill Co. v. Chicago, M. & St. P. R. Co., 8 I. C. C. 47.

(aa) Shippers are not entitled as matter of right to mill grain in transit and forward the milled product under the through rate in force on the grain from the point of origin to the place of ultimate destination; on the contrary, milling in transit is a special privilege for which extra compensation is usually exacted by carriers and which is only permitted by them under prescribed terms and conditions. Diamond Mills v. B. & M. R. R., 9 I. C. C. 311, 315.

(b) Considering the defendants as a single line, the granting of transit mill-

ing west of Pittsburg and denying it to millers at Harrisburg is not necessarily unlawful, because conditions on that line in Ohio and Indiana may be very different from conditions in eastern Pennsylvania; but such differences have not been shown, nor their bearing explained, and upon the meager and incomplete facts now appearing, the Commission is not warranted in making a decision which in principle, if complainant's contention is well founded, would involve a general extension of transit privileges into a large territory where heretofore such privileges have not been allowed. Koch v. Pennsylvania R. Co., 10 I. C. C. 675.

(c) Considering the defendants as a single line, the granting of transit milling west of Pittsburg and denying it to millers at Harrisburg is not necessarily unlawful, because conditions on that line in Ohio and Indiana may be very different from conditions in eastern Pennsylvania, and it does not follow that the allowance of transit privileges in the former territory requires as a matter of law the like allowance in the latter territory; but such differences have not been shown, nor their bearing explained, by the testimony in this proceeding, and upon the meager and incomplete facts now appearing, the Commission is not warranted in making a decision which in pinciple, if complainants' contention is well founded, would involve a general extension of transit privileges into a large territory where heretofore such privileges have not been allowed. Case continued for further hearing. Koch v. Pennsylvania R. Co., et al, 10 I. C. C. 675.

(d) Shippers are not entitled as a matter of right to mill grain in transit and forward the milled product under the through rate in force on the grain from the point of origin to the place of ultimate destination; but allowances of the privilege by a carrier to shippers in one section must be without wrongful prejudice to the rights of shippers in another section served by its line. Koch v. Pennsylvania R. R., 10 I. C. C. 675, 681.

(e) Complainants alleged discrimination in that the defendant refused to allow complainants to bring grain from points west of Pittsburgh to their mill at Harrisburg, Pa., under terms and conditions similar to the milling in transit arrangements in force on the defendant at points west of Pittsburgh. Considering the defendants as a single line, the granting of transit milling west of Pittsburgh and denying it to millers at Harrisburg is not necessarily unlawful, because conditions on that line in Ohio and Indiana may be very different from conditions in eastern Pennsylvania, and it does not follow that the allowance of transit privileges in the former territory requires as a matter of law the like allowance in the latter territory; but such differences have not been shown, nor their bearing explained, by the testimony in this proceeding and upon the meager and incomplete facts now appearing, the Commission is not warranted in making a decision which in principle, if complainants contention is well founded, would involve a general extension of transit privileges into a large territory where heretofore such privileges have not been allowed. Case continued for further hearing. Koch v. Pennsylvania R. R., 10 I. C. C. 675.

(ea) Stopping a commodity in transit for treatment or reconsignment is in the nature of a special privilege which the carrier may concede, but which the shipper, under the present state of the law, can not demand as a matter of lawful right; but carriers may not unjustly discriminate between markets or individuals in the granting of such privileges. St. Louis Hay & Grain Co. v. M. & O. R. R., 11 I. C. C. 90, 101.

IMPORTANT CASES SINCE 1908

(fg) Elevators are essential to the proper handling of grain. Traffic Bureau of St. Louis v. M. P. Ry. Co., 14 I. C. C. 317, 318.

(h) A transit privilege in many cases is beneficial in its application. When it can be applied without discrimination it results in the diffusion of business, in giving to rival communities the relative advantages to which they are entitled, and which can be accorded them in no other way, and, generally speaking, in the application of lower transportation charges. The commercial operations of this country have in many instances grown up upon the exercise of transit privileges and could have been developed in no other way. The Commission has never held that transit was to be condemned in so far as it was beneficial and could properly be applied. In so far as transit lends itself to the defeating of the published rate or to the preference of one individual or locality over

another, this Commission has condemned it. In Re Transportation of Wool, Hides, and Pelts, 23 I. C. C. 151, 171.

(i) For the granting of a transit privilege carriers should charge reasonable compensation. In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 174.

(j) Once let it be conceded that the inbound and outbound movements of a commodity which is milled in transit are separate and distinct the impropriety of applying any rates other than the regularly established local rates is obvious. Red River Oil Co. v. T. & P. Ry. Co., 23 I. C. C. 438, 446.

(k) Section 1 imposes upon carriers the duty to furnish elevation at reasonable charges. Transit Case, 24 I. C. C. 340, 343.

(l) The Act, as amended, gives to the Commission adequate power to regulate transit privileges, and it may, upon full hearing, prescribe such rules and regulations therefor as will, in its opinion, free the operation of transit privileges from illegal practices. Transit Case, 24 I. C. C. 340, 343.

(m) That money has been invested in an industry in reliance upon the continuance of transit privileges argues for a maintenance of such privilege. Fabrication-in-Transit Charges, 29 I. C. C. 70, 77.

(n) Transit is less desirable than the breaking of rates. At rate-breaking points the dealer or miller may ship by any line to any market regardless of the route of the inbound movement, while at transit points the commodity must go to the markets reached by the extension of the route of the inbound movement. In the endeavor to prevent substitution of local grain for transit grain, the carriers also require accounts of stock in hand and points from which procured, all of which is costly and annoying to shippers. At rate-breaking points this burden of policing is avoided, because no substitution at such points can operate to defeat tariff rates. Wichita Board of Trade v. A. & S. Ry. Co., 29 I. C. C. 376, 278.

(o) The Supreme Court has held that elevation is a part of transportation which the railroad is required to furnish under the first section of the act. Elevation Allowances at St. Louis and East St. Louis, 30 I. C. C. 696, 697.

(p) The theory of transit is service at some point between points of origin and destination of traffic, and in the direction of the movement to the point of final destination. A back haul is contrary to the purpose of transit, and should generally be permitted only to meet unusual situations, and when to do so does not result in unjust discrimination or other violations of law. Stock & Sons v. L. S. & M. S. Ry. Co., 31 I. C. C. 150, 153.

(q) The cost of service is of controlling importance in considering the reasonableness of a transit charge. Nat. Casket Co. v. S. Ry. Co., 31 I. C. C. 678, 690.

(r) Per diem charges are an item of expense which may properly be taken into consideration in computing cost of transit service to carrier. National Casket Co. v. S. Ry. Co., 31 I. C. C. 678, 693.

(s) The Commission has required the establishment of transit in few instances. When practicable, rates through important grain markets should break into definitely known inbound and outbound components. Such an adjustment is preferable to transit under a through rate, where the opportunities for complications in the application of rates, and for undue preferences resulting from the selected use of inbound expense bills in securing a desired out bound transit rate, are multiplied in proportion to the greater volume of tonnage handled through important markets, and the greater number of carriers that ordinarily serve such markets. Rates on grain and grain products, 56 I. C. C. 133, 137.

(t) The matter of according transit at a certain point should not be regarded from the standpoint alone of one carrier in the through route, but from the standpoint of all the carriers comprising the through route. Southern Hardwood Traffic Asso. v. Director General, 61 I. C. C. 132, 142.

(u) Transit is sometimes beneficial in its results, but it is open to grave abuses. To police it adequately is difficult and expensive. Unless adequately policed, it is an avenue to illegal rebates, and seriously depletes the carriers revenues. Kansas City Board of Trade v. A. T. & S. F. R. R., 69 I. C. C. 185, 189.

(v) The principle that transit or other

privileges to be given at any point are to be determined by the line-haul carriers serving that point goes to the reasonableness of the schedules establishing the arrangement rather than to their legality under section 6 of the act. Elimination of Transit Privileges on Export Cotton, 73 I. C. C. 299, 303.

(w) The mere fact that a carrier participates as an originating carrier in joint rates in connection with a transit arrangement is allowed at points off its line does not make it guilty of undue prejudice by failing to accord transit to a point on its line. C. R. R. Co. of N. J. v. United States, 257 U. S., 247. Compression of Cotton, 77 I. C. C. 148, 188.

(x) It is the sense of the Commission that no transit privilege should extend beyond one year. Storage in transit rules at Minnesota Transfer, 78 I. C. C. 265, 269.

(y) A rate may include transit and other privileges and still be water compelled. United States Nickel Company v. Director General, 81 I. C. C. 162, 165.

(z) Privileges like concentration of cotton are purely local to railroad on which concentration or transit point is located, and their continuance is not dependent upon concurrence or consent of connecting lines in such transit arrangements. Concentration of Cotton at New Orleans, 83 I. C. C. 18, 20.

(aa) A transit arrangement must be determined by tariff in force on date of origin of shipment. Carolina Portland Cement Co. v. Director General, as Agent, 83 I. C. C. 388, 391.

(bb) It has long been the announced policy of the Commission not to require the establishment of transit arrangements unless to remove unjust discrimination or undue prejudice. It follows, of course, that where such discrimination is found to exist that carriers should be required to go no further than may be necessary in order to remove that discrimination. Anderson Lumber Co. v. N. P. R. Co., 87 I. C. C. 425, 435.

(cc) Transit is sometimes beneficial in its results; but it is open to grave abuses. To police it adequately is difficult and expensive. Unless adequately policed, it is an avenue to illegal rebates and seriously depletes the carriers revenues. The Commisison clearly has power under paragraph 1 of the act as amended to determine whether in a particular case a transit privilege should be granted or should be withdrawn. Rules for Storing and Sacking Cement, 88 I. C. C. 662, 668.

§15a. Fabrication in transit.

IMPORTANT CASES SINCE 1908

(a) That a transit privilege tends to equalize rates of the interior fabicator with those of plants located at rate-breaking points argues for a continuation of such privileges. Fabrication-in-transit Charges, 29 I. C. C. 70, 77.

(b) Structural iron and steel used for bridges and buildings are of necessity fabricated at mills far removed from the location of the bridge or building, and it is essentially inexpedient to set up the necessary machinery for such fabrication at the location of the bridge or building. It is this circumstance and condition of things which have warranted the extension of the fabrication-in-transit privilege to this industry. Middletown Car Co. v. P. R. R. Co., 32 I. C. C. 185, 186.

(c) The fact, standing alone, that the fabricated parts of iron used in a certain industry are similar to certain parts used in an industry of a different nature, to which the fabrication-in-transit privilege is granted, does not warrant the extension of the privilege to the industry first referred to, where it appears that the similar articles are in no wise competitive. It is rather the particular necessity arising from the peculiar situation with reference to an industry that gives rise to the application of this privilege. Middletown Car Co. v. P. R. R. Co., 32 I. C. C. 185, 187.

ALL OTHER CITATIONS

Fabrication in Transit at Greenville, Pa., 37 I. C. C. 370; Maloney Tank Mfg. Co. v. St. L. & S. F. R. R., 42 I. C. C. 605; Chicago Br. & Iron Co. v. E. R. R., 46 I. C. C. 641, 642, 644; Iron and Steel Fabrication, 49 I. C. C. 248; Morava Construction Co. v. A. T. & S. F. Ry., 49 I. C. C. 534, 537.

§15b. Milling and mixing in transit.

IMPORTANT CASES SINCE 1908

(a) Milling-in-transit is a practice that is almost universal throughout the country. Its substantial effect is to permit grain to be shipped to, and the products from, the milling point under a total charge which equals the through

charge on grain from the origin of the grain to the destination of the product. In some instances a slight additional charge is made for the transit privilege. Commercial Club of Superior v. G. N. Ry. Co., 24 I. C. C. 96, 119.

(b) Ordinarily where milling in transit is permitted, the full local rate is collected when the shipment moves into the milling point. When product moves to final destination, to which through rate is in effect, charges are so adjusted plus milling in transit penalty. Clinton Sugar Refining Co. v. C. & N. W. Ry. Co., 28 I. C. C. 364, 368.

(c) Under "transit" grain may be stopped and pass into the possession of the owner for cleaning, grading, mixing, milling or other commercial process, and then go forward to a new destination at the balance of the through rate from the point from which it was first shipped, with, at some points, a small charge for the services incidental to the delivery at the transit point. Wichita Board of Trade v. A. S. Ry. Co., 29 I. C. C. 376, 378.

(d) By a milling-in-transit arrangement a miller at an intermediate point is enabled to ship out the manufactured product of the grain practically on basis of the through rate from point of origin to final destination. It is a thing of value to the shipper, involving additional service on the part of the carrier for which a reasonable charge may properly be made. Stock & Sons v. L. S. & M. S. Ry. Co., 31 I. C. C. 150, 151.

(e) Milling in transit is a privilege which may be granted or withheld by carrier in its discretion so long as unlawful discrimination does not result therefrom. Empire Coke Co. v. B. & S. R. R. Co., 31 I. C. C. 573, 577.

(f) The fact that a miller at a rate breaking point may ship out by any carrier from such point does not constitute undue discrimination within the meaning of the Act as against the miller at an intermediate point who does not enjoy this privilege. Mixed Car Dealers' Ass'n. v. D. L. & W. R. R. Co., 33 I. C. C. 133, 142.

(g) The essential object of the usual milling-in-transit privilege is to enable shippers to employ a method of transit which, but for the privilege, would subject the material to local rates instead of entitling it to an ultimate through rate. The through rate is applied later upon the theory and the condition that stoppage at the transit point was for some legitimate treatment of the material, and that the continuation of the transit desired is of the same material, its product or equivalent at a through rate to destination. Thus the object at last is to escape local rates and secure a through rate; indeed, apart from this object a milling-in-transit privilege would have no reason to exist. The privilege, of course, enters into the cost of transportation, and so in effect is part of the contract for through shipment; this is ordinarily covered by the rate; and such is the theory upon which the privilege is required to be specified in the published tariff. Lewis, Leonhardt & Co. v. Southern Ry. Co., 217 Fed. 321, 324.

§15c. Stoppage in transit.

IMPORTANT CASES SINCE 1908

(a) Stoppage-in-transit and milling-in-transit practices are outgrowth of entirely dissimilar circumstances and conditions, and practice in respect to one is not controlling in respect to the other. Stock & Sons v. L. S. & M. S. Ry. Co., 31 I. C. C. 150, 151.

(b) A stoppage-in-transit privilege which permits of lean cattle shipped from one point being replaced by fatted cattle at another may result in manipulation of rates and consequent discriminations. Hoyt & Bergen v. C. & N. W. Ry. Co., 32 I. C. C. 319, 324.

§15d. Storage in transit.

IMPORTANT CASES SINCE 1908

(a) In a typical case the privilege of storage in transit for grain was denied where it appeared that like privileges were not granted by the defendants elsewhere in that territory and the necessity for storage at the point in question primarily grew out of domestic disturbances in the neighboring country of origin. Newark Grain Co. v. S. P. Co., 30 I. C. C. 431, 433.

(b) Where timber is of many kinds, and several kinds of lumber take the same rates, there is no impropriety in a tariff which permits the shipping of those several kinds of lumber at carload rates in straight or mixed carloads to and from the transit point. Under such a tariff the shipper would, of course, be obligated to confine his outbound shipments under

transit to lumber coming from points from which, and of the kinds to which, the transit rates apply. Nat. Casket Co. v. S. Ry. Co., 31 I. C. C. 678, 686.

§15e. Transfer in Transit.

IMPORTANT CASES SINCE 1908

(a) Elevation and transfer in transit have frequently been found by the commission and the courts to constitute necessary steps in the transportation of various kinds of property. Guaranty Claim of Central Elevator & Warehouse Co., 72 I. C. C. 169, 175, 176.

§15½. Transshipment and Transfer.

See Transfer; Transshipment.

CASES 1887-1908

(a) A railroad company is not liable for discrimination in refusing to a transfer company engaged in carrying freight between the city in which the railroad terminates and a city across a river in another state, facilities equal to those given another transfer company with which the railroad company has made an arrangement for through billing and rating, whether such transfer company and the railroad be regarded as a connecting line between independent interstate carriers, or the transfer company be regarded as an agency for the delivery of the freight of the railroad company. St. Louis Drayage Co. v. Louisville & Nashville Railroad, 5 I. C. R. 137.

(b) Grain, Council Bluffs to Omaha. A rate of 1 cent per 100 pounds, minimum charge $5 per car, for transferring grain in carloads from Council Bluffs, Iowa, to Omaha and South Omaha, Neb., defendant's rate for service in reverse direction for delivery upon its own tracks, being $2 per car; made to induce construction and maintenance of a modern and capacious elevator on its line in Council Bluffs; a higher rate being

charged on grain transferred to Council Bluffs for delivery to elevators or industries on other lines; the delivery of grain by defendant in Omaha or South Omaha being for industries or elevators on other lines for which, under car-service rules, it must allow such other lines $2 per diem rental; the grain rates from the west to Omaha, South Omaha and Council Bluffs being the same, and the rates from the east to Council Bluffs being less,—under all the circumstances and conditions is not unjust and unreasonable. Omaha Grain Exchange v. Union P. R. R. Co., 12 I. C. C. 65.

(c) Defendant has in force a rate of 1 cent per 100 pounds, minimum charge $5 per car, for transferring grain in carloads from Council Bluffs, Iowa, to Omaha and South Omaha, Nebr. Its rate for transferring grain from Omaha and South Omaha to Council Bluffs for delivery upon its own tracks is $2 per car, which was put in to induce construction and maintenaince of a modern and capacious elevator on its line in Council Bluffs, and a higher rate is charged by it on grain transferred to Council Bluffs for delivery to elevators or industries on other lines. The delivery of grain by defendant in Omaha or South Omaha is for industries or elevators on other lines, for which, under car-service rules, it must allow such other lines $2 per car per diem rental. The grain rates from the west to Omaha, South Omaha, and Council Bluffs are the same, while from the east the rates to Council Bluffs are less than to Omaha or South Omaha. The charge from Council Bluffs to Omaha and South Omaha is complained of as unjust and unreasonable. Upon all the circumstances and conditions, HELD, that the complaint should be dismissed. Omaha Grain Exchange v. Union P. R. Co., 12 I. C. C. 65.

(d) The act does not bar a carrier from providing for costs of transfer in making delivery to a certain carrier, but if it so provides, it must publish and file a tariff showing where the transfer will be made, the kind of transfer service required and the charges to be exacted therefor. Schwager & Nettleton v. Great Northern Ry. Co., 12 I. C. C. 521.

(e) A shipper is entitled to notice of a transfer charge other than one coming to him through the collection of the charge from his consignee, and as he is not obliged to follow his shipment and make the transfer himself, he is entitled to the protection afforded by a published definite rate. Schwager & Nettleton v. Great Northern Ry. Co., 12 I. C. C. 521.

(f) The act does not bar a carrier from providing for costs of transfer in making delivery to a certain carrier, but if it so provides, it must publish and file a tariff showing where transfer will be made, the kind of transfer service required and the charges to be exacted therefor. Schwager & Nettleton, Inc., v. Great Northen Ry. Co., 12 I. C. C. 521.

IMPORTANT CASES SINCE 1908

(g) There must be a transshipment at seaboard, and if that may be made the point of ultimate destination by the device of separate bills of lading the commerce will be given local character, though it be essentially foreign. T. & N. O. R. R. Co. v. Sabine Tram. Co., 227 U. S. 111; Arkansas Pass Channel & Dock Co. v. G. H. & S. A. Ry. Co., 27 I. C. C. 403, 410.

(h) The practice of terminal carriers requiring shippers, at their own expense, to transfer to other equipment, shipments delivered to team tracks in bad-order cars, as a precedent to permitting rebilling to points beyond, found an unjust practice. Merchants Exchange of St. Louis v. T. R. R. Asso. of St. Louis, 50 I. C. C. 474.

ALL OTHER CITATIONS

T. & N. O. R. R. Co. v. Sabine Tram. Co., 227 U. S. 111; Berthold & Jennings Lumber Co. v. M. & O. R. R. Co., Unrep. Op. A-140; Plymouth Coal Co. v. Penn. R. R., 37 I. C. C 457; Lake Cargo Coal Rates, 46 I. C. C. 159, 185; Columbia Transfer Co. v. C. B. & Q. R. R., 46 I. C. C. 371, 372; Merchants Exchange of St. Louis v. T. R. R. Asso. of St. Louis, 50 I. C. C. 474; Hixon Lumber Co. v. C. B. & Q. R. R., 80 I. C. C. 295.

§16. Wharfage.

See Dockage; Panama Canal Act; Wharfage.

IMPORTANT CASES SINCE 1908

(a) One Young obtained the lease of a warf at Galveston from S. P. Terminal Co., which company was controlled through stock ownership by the Southern Pacific Railroad and Steamship Systems. The cake and meal purchased by Young were bought by him in various states,

but chiefly in Texas and shipped to him on bills of lading and waybills, showing the point of origin in those states and the destination at Galveston. The purchases were made for export. His sales to foreign countries were sometimes for immediate and sometimes for future delivery, irrespective of whether he had the product on hand at Galveston. At times therefore orders must be filled on cake to be purchased in the interior or shipped in transit to him. When the cake reached Galveston it was ground into meal and sacked by Young, and new shippers' bills of lading were made out to his order for foreign parts. HELD, the manufacture or concentration on the wharves of the terminal company were but incidents in the shipment of the product in export trade, and the regulations of the terminal company in the handling of its wharves was within the power of the Interstate Commerce Commission, S. P. Terminal Co. v. I. C. C. 219, U. S. 498, 526, 31 Sup. Ct. Rep. 279, 55 L. ed. 310, sustaining 14 I. C. C. 250.

(b) Where carriers publish ship-side rates on export traffic to certain wharves owned by them, they make such wharves public terminals, and the necessary implication arising from the publication of such rates is that access must be given to such wharves by whatever ship the shipper chooses to have his freight carried from the wharf by, so long as such access may be safely and properly given. A railroad may not have a preferred line of steamships to the exclusion of other ships. It may prefer one line and have more intimate relationship with such line than with others, but its duty as a common carrier by rail cannot be neglected because of such arrangement. It may set aside one or more docks for the use of such allied lines so long as such practice does not conflict with its duty to give delivery at its docks to whomsoever may apply for the freight properly deliverable at that point. It it chooses to give up its entire dock facilities to some particular line it may do so, but it must make delivery upon equal terms to other ships at that port, for it has undertaken to deliver the freight it transports at the ship's side. Mobile Chamber of Commerce v. M. & O. R. R. Co., 23 I. C. C. 417, 423.

(c) A wharf company is not a common carrier subject to the Act. Humboldt S. S. Co. v. White Pass & Yukon Route, 25 I. C. C. 136, 140.

(d) Where a railroad has a wharf to which certain of its tariffs offer ship-side delivery at which part of the shipping public is served, such terminal facilities become affected with a public interest and are subject to all the requirements of the Act. In Re Wharfage Facilities at Pensacola, Fla., 27 I. C. C. 252, 256.

(e) Where no wharfage charge is imposed at a port a carrier may not rightfully name a rate to that port to include such a charge. Cottonseed Products to Port Arthur, Tex., 38 I. C. C. 378, 388.

(f) Docks and depot carriers are not to be used except as incident to the business of transportation. Baltimore & Carolina S. S. v. A. C. L. R. R., 49 I. C. C. 176, 182.

Co., (Fla., 1919), 81 So. 498; Warfage, Handling and Storage Charges at Norfolk, Va., 59 I. C. C. 488; Absorption of Terminal Charges at Galveston, 59 I. C. C. 490; Sugarland Industries v. Galveston Wharf Co., 80 I. C. C. 655; The Rathlin Head, The Burgondier, The Frankinner, The Lord Downshire, 292 Fed. 867.

§16½. Warehousing, Storage and Station Facilities.

See Storage; Warehouseman; Warehousing.

CASES 1887-1908

(a) That a railway company for some time paid cost of hauling coal from com-

plainant's wharf to station is not ground for compelling such payment by the company. Providence Coal Co. v. Providence & W. R. Co., 1 I. C. R. 363.

(b) The duty of the railroad company operating its own road or a road that it controls, to serve the local stations on its line, does not apply to a company that has only a running privilege for through trains to reach points on its own line over a part of the road of another company which it does not control. Alford v. Chicago, R. I. & P. R. R. Co. (Com.), 2 I. C. R. 771.

(c) Where the existing disadvantage to Cincinnati, arising from the early closing hour of the freight depot situated there, is not under present circumstances unreasonable or undue, but may become so if continued indefinitely. Cincinnati Chamber of Commerce and Merchants' Exchange v. Baltimore & O. S. W. R. Co., 10 I. C. C. 378.

(d) The regulation providing for an earlier closing hour of the freight depot at Cincinnati than that which has previously been in force, and which is earlier than that in force at other points, does not, under the existing conditions and circumstances, impose upon the shippers disadvantage in competing with shippers at other points, but it may do so if continued indefinitely; and the dismisasl of the complaint is, therefore, without prejudice to further proceedings. Cincinnati Chamber of Commerce and Merchants Exchange v. Baltimore & O. S. W. R. R. Co., 10 I. C. C. 378.

(e) The defendants more largely engaged in carrying outbound package freight from Cincinnati are unable, with their present depot facilities and times for the departure of evening trains, to clear their platforms daily of that class of traffic without closing the receiving depots for such freight at 4:30 p. m. A closing rule which prevents congestion of freight in depots is as much to the advantage of the shipper as a later hour would be in enabling the shipper to place his freight in the depot, and the carriers are doing the best they can in their present circumstances. The large and growing volume of outbound package freight from Cincinnati indicates the necessity of strenuous efforts by the carriers to remove any existing hardship to shippers through inability to compete under the early closing rule on even terms with shippers in other distributing cities. HELD, that the existing disadvantage to Cincinnati, under present circumstances, is not unreasonable or undue, but it may become so if continued indefinitely, and that dismissal of the complaint is without prejudice to any further necessary proceeding. Cincinnati Chamber of Commerce v. B. & O. S. W. R. Co., et al, 10 I. C. C. 378.

(f) Complainant attacked as unduly prejudicial and disadvantageous to shippers at Cincinnati, O., a regulation of defendants which changed the hour of closing their freight depots in that city on each week day for the reception of outgoing package freight from 5 to 4:30 o'clock daily, except Saturday, and also changed the closing hour on Saturday from 1 to 12:30 p. m. The Commission is authorized by the Act, after investigation, to order carriers to cease and desist from subjecting any particular person, locality or description of traffic to undue or unreasonable prejudice or disadvantage in any respect whatsoever, and its jurisdiction extends to a case of alleged unlawful prejudice and disadvantage to shippers of outbound freight through enforcement by carriers of a regulation providing for the earlier closing of depots used for the reception of such freight. The defendants more largely engaged in carrying outbound package freight from Cincinnati are unable, with their present depot facilities and times for the departure of evening trains, to clear their platforms daily of that class of freight without closing the receiving depots for such freight at 4:30 p. m. A closing rule which prevents congestion of freight in depots is as much to the advantage of the shipper as a later hour would be in enabling the shipper to place his freight in the depot, and the carriers are doing the best they can under their present circumstances. The large and growing volume of outbound package freight from Cincinnati indicates the necessity of strenuous efforts by carriers to remove an existing hardship to shippers through inability to compete under the early closing rule on even terms with shippers in other distributing cities. HELD, that the existing disadvantage to Cincinnati, under present circumstances, is not unreasonable or undue, but it may become so if continued indefinitely, complaint dismissed. Cincinnati Chamber of Commerce v. B. & O. S. W. R. R., 10 I. C. C. 378.

IMPORTANT CASES SINCE 1908

(g) It is incumbent upon carriers to

provide adequate station and warehouse facilities for the expeditious handling and delivery of freight transported by them. Merchants' and Manufacturers' Asso. v. B. & O. R. R. Co., 30 I. C. C. 388, 393.

(h) A warehouse owner is not entitled to recover damages for depreciation in the rental value of his property as a result of leases by a railroad company of similar properties at nominal rentals to shippers. Pittwood & N.P. Ry., 51 I. C. C. 535.

(i) A warehouse owner, a landlord seeking to rent his property, as such, has no relation with a common carrier which could result in a discrimination against him in violation of the Act to regulate commerce. Pittwood v. N. P. Ry., 51 I. C. C. 535.

ALL OTHER CITATIONS

Markle Co. v. L. V. R. R., 37 I. C. C. 441; St. Louis, Mo., (Cupples Sta.), Terminal Regulations, 40 I. C. C. 425, 430; Philadelphia Hay & Straw Deliveries, 51 I. C. C. 324; Grasselli Chemical Co. v. Director General, as Agent, 81 I. C. C. 562; Dockage, Handling, and Storage Charges, 88 I. C. C. 24.

III. TARIFFS AND PUBLICATION.

See Tariffs.

§16¾. In General.

IMPORTANT CASES SINCE 1908

(a) Tariff provisions relating to the determination of applicable rates on transit shipments and the rules permitting transit, as well as their interpretation, should be uniform. Kansas City Board of Trade v. A. T. & S. F. R. R., 69 I. C. C. 185, 192

ALL OTHER CITATIONS

Interstate Packing Co. v. C. & N. W. Ry. Co., 58 I. C. C. 510, 513; Trexler Lumber Co. v. Director General, 58 I. C. C. 754.

§17. Obligation to Publish.

See Terminal Facilities.

CASES 1887-1908

(a) A carrier may, as part of a contract for through shipment, allow cotton to be stopped off for the purpose of grading and compression; but the privilege enters into and becomes part of the service covered by the rate, and should be specified in the established tariffs. Re Alleged Unlawful Rates, etc., 8 I. C. C. 121.

(b) If stop-over privileges are granted for any purpose, all the facts and circumstances connected therewith should be clearly stated in the published tariffs, so that the public generally may enjoy their benefits. Mobile & O. R. Co., In Re Rates and Practices of, 9 I. C. C. 373.

(c) Treating the transportation first of the log and then of the lumber as a through shipment involves the right to mill in transit, and when that privilege is granted the tariff should show upon its face that the transportation covers carriage of the log to and the lumber from the mill, and the division allowed to the tap line, or carrier of the log should be named in all cases. Central Yellow Pine Asso. v. V. S. & P. R. R., 10 I. C. C. 194, 216.

(d) All privileges accorded on shipments in transit and which affect the value of the service performed must be published in the tariffs, and reparation based on breach of contract for a privilege not mentioned in the tariffs must be denied because its allowance witout publication was in violation of law. Shiel & Co. v. Ill. Cent. R. R. Co., 12 I. C. C. 210.

IMPORTANT CASES SINCE 1908

(e) The privilege embodied in a separate storage and reconsignment tariff of one carrier cannot be availed of under a joint tariff to which that carrier is a party, unless the tariff by express reference to the former so provides. Washington Broom & Woodenware Co. v. C. R. I. & P. Ry. Co., 15 I. C. C. 218, 219.

(f) Under section 6 of the Act requiring the filing of tariffs with the Commission showing all charges and facilities granted, it is not enough to state the amount of the charge unless the services and privileges covered by it are also stated. Whenever any service is rendered beyond the ordinary receiving, transporting and delivering of freight, the precise character of that service should appear in the printed schedule, and this applies to charges made for loading and unloading carload freight. Schultz-Hansen Company v. S. P. R. R. Co., 18 I. C. C. 234, 237.

(g) Facilities or privileges granted or allowed in connection with a rate should be stated in tariffs. In Re Mileage, Excursion and Commutation Tickets, 23 I. C. C. 95.

(h) Transit is a privilege that may be accorded by carriers to shippers only when properly provided for in their tariffs. Liberty Mills v. L. & N. R. R. Co., 23 I. C. C. 182, 185.

(i) A rate when published by a carrier in the form provided by law is as binding upon it as if that rate had been established by legislative enactment, and it can not be departed from either by the carrier or the shipper except and until in due course and in the manner prescribed by law, it has been found by the Commission to be unreasonable or discriminatory or otherwise unlawful under the act to regulate commerce. The same principle would seem to govern transit and other special services provided in the tariffs of carriers; they must be enforced in accordance with their terms, and when the provisions are clear and free from ambiguity no agreement between the shipper and the carrier assigning another meaning to them may lawfully be submitted. Nor, may the Commission sanction a departure from their plain meaning until, in a proper proceeding and upon a proper record, such rules have been found to be unlawful under the Act. Peters Mill Co. v. C. B. & Q. R. R., 38 I. C. C. 245, 248.

(j) Under the provisions of section 6 all terminal privileges and facilities extended to shippers must be specifically authorized by tariff and can not be inferred. Moore Stave Co. v. M. L. & T. R. R. & S. S. Co., 41 I. C. C. 472, 473.

(k) In order that these specifications and rules may be available to all and uniformly applied without discrimination they should be properly published in the carriers' tariffs. Claims for loss and damage of grain, 56 I. C. C. 347, 353.

(l) Reparation will not be awarded on the basis of a reconsignment privilege customarily extended by the carrier, but not duly published in its tariff. Sunderland Bros. Co. v. B. & O. S. W. R. R. Co., Unrep. Op. 267.

ALL OTHER CITATIONS

C. C. 331; Detroit Board of Trade v. W. Ry. Co., 80 I. C. C. 717, 723.

§17½. Construction of Tariffs.

IMPORTANT CASES SINCE 1908

(a) The collection on the outbound shipments of grain stopped in transit at Cincinnati, Ohio, and Louisville, Ky., of amounts equal to the division of the through charges accruing to the outbound carriers with subsequent refund when the total charges so collected is greater than the through charge from point of origin to destination, found not unreasonable or unduly prejudicial. Cincinnati Grain & Hay Exchange Co. v. B. & O. R. R. Co., 73 I. C. C. 104, 108.

(b) Under the provisions of section 6 of the Act requiring the observance of rates and charges lawfully published and filed, the rate in effect at the beginning of the transit movement must be applied on the shipment to final destination. Nonsurrender of inbound billing, 73 I. C. C 455, 457.

ALL OTHER CITATIONS

Brenner Lumber Co. v. Drector General, as Agent 66 I. C. C. 595; Nonsurrender of Inbound Billing 73 I. C. C. 455, 457.

§18. Reshipping Under Through Rate.

See Proportional Rates; Reshipping Rates; Through Routes and Joint Rates §18, §19, §20.

CASES 1887-1908

(a) Cotton which starts and proceeds upon a contract for through shipment may be considered as a through shipment, and be given the benefit of a through rate, although it is stopped off for the purpose of grading and compression. Re Alleged Unlawful Rates, etc., 8 I. C. C. 121.

(b) That part of defendants' tariff regulation, which provides that grain may be shipped to East St. Louis on a local, and forwarded as a new shipment from that point on a 12-cent proportional rate to Vicksburg and common points, seems somewhat in conflict with the doctrine announced by the Commission. In Re Alleged Unlawful Rates and Practices in Transportation of Grain, etc., by the Atchison, T. & S. F. R. R. C., 7 I. C. C. Rep., 9 I. C. C. 240.

(c) Shippers are not entitled as matter of right to mill grain in transit and forward the milled product under the through rate in force on the grain from the point of origin to the place of ultimate destination; on the contrary, milling in transit is a special privilege for which extra compensation is usually exacted by carriers and which is only permitted by them under prescribed terms and conditions. Diamond Mills v. Boston & Maine R. Co., 9 I. C. C. 311.

(d) At common law, and under the act, joint through routes and through rates are matters of contract between the connecting carriers, and the defendant, as party to a joint tariff which does not give shippers the privilege of milling in transit, acted within its legal right in notifying its immediate connections and the complainant that it would not permit that practice. Diamond Mills v. B. & M. R. R., 9 I. C. C. 311, 315.

(e) Complainant brings grain from western points to Buffalo, N. Y., where it is milled, and ships the product to points on defendant's line in New England. The through tariff rates on grain and grain products from the points of origin to the New England points of destination are the same, but no right of milling in transit is granted in the joint tariff. Under a regulation of the Lake Shore Company, one of the parties to the tariff, and on whose line complainant's mill is located, milling in transit is permitted under a penalty of 1½ cents per 100 pounds above the rate on grain, but defendant does not join in granting that privilege to shippers from western points to points on its line in New England, and when grain so milled in transit is received by defendant it imposes an arbitrary charge of 6 cents per 100 pounds. The sum of the rate on separate shipments of grain from the west to Buffalo and the established joint rate of 12 cents per 100 pounds on grain products from Buffalo to points on defendant's line is less than the through grain rate added to the defendant's 6 cent arbitrary: HELD, (1) that defendant has acted unlawfully in imposing the arbitrary charge of 6 cents per 100 pounds in addition to the through grain rate on complainant's milled products forwarded to Buffalo, and that it was and is bound to apply on such transportation from Buffalo its established joint rate on grain products from that point to New England destinations. (2) That complainant is entitled to reparation in the sum of $358.81, the difference between charges exacted from it on the basis of the 6-cent arbitrary added to the through grain rate and the sum of established rates on grain to and on milled products from Buffalo. Diamond Mills v. Boston & Maine R. Co., 9 I. C. C. 311.

(f) It may be the right of a party to a joint tariff to refuse to shipper milling in transit privileges under joint through rates. Diamond Mills v. Boston & Maine R. Co., 9 I. C. C. 311.

(g) The published tariff regulation, permitting grain to be shipped through from point of origin to final destination, with a stop-over privilege in East St. Louis for cleaning, sacking, or other legitimate purposes, the shipment being given a proportional or balance of a through rate from East St. Louis, is not objectional. In Re Rates and Practices of, M. & O. R. Co., 9 I. C. C. 373.

(h) The Commission instituted an investigation of the rates and practices of the Mobile & Ohio R. R., in the transportation of grain to Vicksburg, Miss., shipped from or through St. Louis, Mo., and East St. Louis, Ill. The established rate on grain from East St. Louis to Vicksburg was 15c. There was no through rate from points of origin from which the grain was shipped but there was a method of shipment on a reconsignment or stoppage in transit rate, by which grain shipped from Kansas, Mis-

souri and Illinois might be consigned to Vicksburg on a through rate. On arrival at St. Louis this grain might be sold, or it might be stored in elevators and at a future date shipped on to Vicksburg on payment of the balance of the through rate. This balance was in most cases 11c, but the agents of the railroad company were not notified by any published schedule, nor was any such schedule filed with the Commission. HELD, the practices disclosed by this record are discriminating and should be condemned. If stop-over privileges are granted for any purpose, all the facts and circumstances connected therewith should be clearly stated in the published tariff, so that the public generally may enjoy their benefits. Re Rates and Practices of M. & O. R. Co., 9 I. C. C. 373.

(i) Shippers are not entitled, as a matter of fact, to mill grain in transit and forward the milled product under the through rate in force on the grain from the point of origin to the place of ultimate destination; but allowances of the privilege by a carrier to shippers in one section must be without wrongful prejudice to the rights of shippers in another section served by its line. Koch v. Pennsylvania R. Co., 10 I. C. C. 675.

(j) The rate on pine lumber from southern Georgia points to Chattanooga, Tenn., is 2 cents per 100 pounds higher than to Dalton, Ga., but on shipments to Cincinnati, Ohio, Chattanooga takes a 2-cent lower rate than Dalton. There is also a dressing-in-transit privilege at Dalton, for which 2 cents per 100 pounds additional are charged. The lumber shipped out of Chattanooga is mostly hard wood, the southern pine lumber brought to that point being practically consumed there. HELD, upon complaint against the rate from Dalton, that under all the circumstances the lumber rate from Dalton to Cincinnati is not so discriminative nor exorbitant as to justify disturbance at this time. HELD, further, that the reasons existing for lower lumber rates from the southern pineries do not apply to the reshipment of dressed lumber from Dalton. Farrar v. Southern R. Co., et al., 11 I. C. C. 632.

(k) Joint through rate becoming effective during transit cannot operate to reduce rate upon shipment under combination rate. Matter of Through Routes & Through Rates, 12 I. C. C. 163.

IMPORTANT CASES SINCE 1908

(l) Reshipment is the right of a shipper to reship goods received by him, without removal from the car, upon payment of the freight charges to that point, the goods going forward under a new transportation contract. It is an incident to the transportation facilities offered. Any consignee has the right to reship. Detroit Traffic Ass'n. v. L. S. & M. S. Ry. Co., 21 I. C. C. 257, 258.

(m) Where the carrier that moves the traffic into the transit point reaches also the point of destination the effect of requiring it to apply the through rate to destination, irrespective of whether the product moves from the transit point over its line or over the line of some other carrier, would be to require it to establish a through route and joint rate with such other carrier, although its own line may not be unreasonably long. Under the limitation in the fifteenth section of the act, the Commission has not the power to require such a route and rate. Mixed Car Dealers' Asso. v. D. L. & W. R. R., 33 I. C. C. 138, 142.

(n) Where there is an advance in rates which carry a transit privilege, that part of the tonnage which originated prior to the increase would take the lower rate, while that which originated after the increase would take the increased rate. Board of Trade of Chicago v. A. A. R. R. Co., 39 I. C. C. 643, 649.

(o) The proportional or reshipping rate applicable on a reshipment from the transit point is that in effect when the inbound shipment moved from the point of origin. Bell Lumber Co. v. Director General, as Agent, 63 I. C. C. 225, 228.

(p) Shipments which move from a point of origin to final destination with an arrangement for storage in transit are regarded as moving under a single continuous contract of carriage. Capital Warehouse Co. v. Director General, 66 I. C. C. 683, 685.

(q) The Commission has required the establishment of transit in few instances. When practicable, rates through important grain markets should break into definitely known inbound and outbound components. Such an adjustment is preferable to transit under a through rate where the opportunities for complications in the application of rates and for undue preference resulting from

the selected use of inbound expense bills in securing a desired outbound transit rate are multiplied in proportion to the greater volume of tonnage handled through important markets, and the greater number of carriers that ordinarily serve such markets. Grain Rates from Minnesota and Wisconsin, 68 I. C. C. 665, 672.

(r) Where practicable, rates through important grain markets should break into definitely known inbound and outbound components. Grain Rates from Minnesota and Wisconsin, 68 I. C. C. 665, 674, 675.

(s) Respondents proposed to publish the following rule governing the transiting of grain at Chicago, Ill., and stop over points in the Chicago district: "Deficiencies in weight of inbound and (or) outbound shipments on account of tariff minima are not entitled to transit privileges, and will be subject to local rates to and (or) from transit points." Joint rates are published on grain from Illinois to trunk line points, and are based on reshipping rates from Chicago to destinations, plus unpublished so-called specifics from points of origin to Chicago, which are accepted by the carriers operating to or beyond Chicago, as their divisions of the joint rates. The grain handled by operators of elevators at Chicago is stored and subsequently reshipped beyond, either by rail or by lake, its identity not being preserved. It is with respect to this grain only that any question arises herein. The reshipping rates are also lower than the local rates. In all instances where the local rates inbound exceed the unpublished specifics, refunds are made to the inbound shippers. The transit rules authorize the application of the joint rates on grain moved through to final destination, as distinguished from the minimum weights upon the basis of which the freight charges at the joint rates are to be collected. The deficiency in weight is not entitled to the unpublished specific on the inbound movement as the unpublished specific is not a rate. The question here presented can be and should be obviated by loading grain to the full capacity of the car and in no instance less than the minimum weight, and such is admitted to be the practice except at the beginning and closing of the shipping seasons. HELD, respondents have justified the schedules under suspension. Nonapplication of transit privileges on deficiencies in weight of grain, 69 I. C. C. 19.

(t) Why should there be a milling in transit point if there is not through transportation? And if there is through transportation, the through rate from point of origin must apply. Transit implies a through movement. Kansas City Board of Trade v. A. T. & S. F. R. R., 69 I. C. C. 185, 189.

(u) The practice of permitting the application of proportional rates and stop over privileges without the surrender of inbound freight bills is condemned. Nonsurrender of inbound freight bills, 73 I. C. C. 455, 458.

(v) Transshipment rates may lawfully be made lower than local rates between same points. Lumber from San Francisco Bay Points, 78 I. C. C. 760, 767.

§19. Retroactive Application.

See Reconsignment.

IMPORTANT CASES SINCE 1908

(a) The Commission has repeatedly refused to sanction the retroactive application of a transit arrangement. Burritt Co. v. C. P. Ry., 45 I. C. C. 195, 196.

(b) The Commission does not ordin-

arily give retroactive effect to a transit service in the absence of unjust discrimination or undue prejudice and damage thereunder. Armand L. Dejean v. Director General, 68 I. C. C. 611, 614.

(c) Retroactive effect to a transit arrangement except to remove unjust discrimination or undue prejudice has been repeatedly refused by the commission. Apperson Brothers Automobile Company v. I. E. & W. R. R. Co., 81 I. C. C. 392, 393, 394.

(d) Retroactive effect is not ordinarily given to a transit service in absence of unjust discrimination or undue prejudice and damage thereunder. Wolfe & Co. v. Director General as Agent, 83 I. C. C. 301, 303.

(e) A newly established transit arrangement should not be given retroactive application, except upon a showing of unreasonableness or of damage arising out of unjust discrimination or undue prejudice. Locke & Company v. Director General, 88 I. C. C. 487, 488.

§20. Substitution of Tonnage.

See Substitution of Tonnage.

IMPORTANT CASES SINCE 1908

(a) In the case, In the Matter of the Substitution of Tonnage, 18 I. C. C. 280, the Commission condemned unlawful products of wheat for barley, or shingles. As regards the handling of grain, little improvement has been shown since that decision. Carriers and shippers in different parts of the country gave different interpretations to this decision and to Conference Rule number 76-A of June 29th, 1909, with the result that the decision and this rule were strictly enforced in some territories and laxly in others, unjust discrimination thereby resulting. The present investigation indicates violation of the law in the following practices: The illegal transfer of billing to a shipper who is not entitled to a transit privilege thereon; illegal transfer of grain not accompanied by the proper billing and the application to such grain of illegal transit; the according of transit to a shipment which, under the tariffs, should be "representative" of the inbound movement, but was not so "representative," according transit to shippers far in excess, of their transit credits; the permitting of retention of billing after grain had been disposed of; the movement of transit and non-transit articles in the same carload without tariff authority therefor; the use of transit after expiration of time limit in the tariffs; the using of expense bills covering grain destroyed by fire or on other grain; the substitution of the products of one kind of grain for the products of another kind of grain; the according of transit privileges on non-transit ingredients of mixed feeds; the illegal use of surplus billing accumulated by reason of the difference between the actual weights and the minimum weights of

the inbound movement; also accumulated by less than carload non-transit movements out, by movements to non-transit points, by local consumption, by a movement out by water, by loss of grain in transit and by shrinkage; the plain substitution of one grain for an entirely different grain; the movement out, pound for pound, of products which could not have been derived from the inbound grain, and with no allowance for offal; and the palpable manipulation of billing and defeating the rates in cents per 100 lbs. HELD, that to obviate these evils, the carriers should be required to establish rules for the policing of transit privileges on grain and grain products which should require: 1. Certificates as to the transportation character of all grain contained in a transit house. 2. That a daily report should be furnished by the receiver of a transit privilege which should state the required information as to the contents of a transit house, if any of said contents is accorded a transit privilege. 3. That there should be recorded with the policing authority of the carriers within a reasonable time after the shipments have been received at transit point all paid expense bills. 4. That all surplus billing should be cancelled absolutely at the close of each business day. 5. That the railroad billing of the inbound and outbound movement should describe with sufficient particularity the commodity upon which the transit privilege is accorded. 6. That the outbound billing should show full reference to the inbound billing. 7. That the transit privileges should be limited absolutely to one year, at the expiration of which time all privileges should cease and full local rate, commodity or class, both into and out of the transit point, should apply. 8. That there should be deducted an arbitrary loss in process of milling wheat of not less than 1 per cent of the weight of the wheat; in the malting of barley of not less than 16 per cent of the weight of the barley; in the drying of corn of not less than 10 per cent of the weight of the corn, in the shelling of the corn of not less than 20 per cent of the weight of the corn, and in the cleaning and clipping of grain of not less than 1½ per cent of the weight of the grain. 9. That in according the transit privilege upon the products of grain milled or treated in transit, the policing authority should be required to balance the outbound movement of the product against the inbound movement of the grain upon the basis of well known average ratios of the products of the grain, the same principle to be applied to mixed feed. (Prouty, Chairman, dissenting.) The Transit Case, 24 I. C. C. 340.

(b) All substitutions of tonnage at transit points, whether they defeat the rates or not, are a violation of the law and must be eradicated or minimized to the last degree. The Transit Case, 24 I. C. C. 340, 349.

(c) The outbound movement of the product from the transit point should be balanced against the inbound movement of the grain upon the basis of well-known average ratios of the products of the grain. This principle should be applied to mixed feed. Transit Case, 24 I. C. C. 340, 354.

(d) Upon hearings and conferences at which the whole transit privilege situation was discussed and a substitute for Rule 76, Tariff Circular 18-A, was proposed by both the carriers and the shippers which contained the same general thought that while shipments could be stopped in transit and the same shipments, or a proper equivalent, (less invisible loss in weight) could be forwarded at the through rate plus the charge of the transit privilege if no substitution of one commodity for a commodity of a different kind was to be permitted, was considered by the Commission, the Commission being satisfied that under the previous practices the tariff published by the carriers often named the privileges in such manner as to conceal the real application, that the transit privileges were operated in a loose and irresponsible manner and that in many instances the rates and practices were not being enforced in accordance with the published tariffs. HELD, that rule 76 should be withdrawn but that the Commission in accordance with the settled policy would not make any order or express any views as to what would be unlawful under certain conditions. The carriers are bound to initiate their rates, rules and practices and these would be subject to the appropriate action of the Commission or the Courts. The following rule recommended by the carriers' conference is therefore not condemned: "When rules and regulations have been established in tariff form clearly defining the purpose or pur-

poses for and the terms under which transit privileges are granted, and providing also for the effective policing of the operations under the arrangement, a shipment may be stopped in transit and the same shipment or a proper equivalent (less invisible loss in weight), as set forth in said rules and regulations, may be forwarded at the through rate provided for by tariff from the original point of shipment to final destination plus the charge for transit privilege, if any. (This rule shall not be construed to authorize the publication of tariffs providing for the substitution of one commodity for a commodity of a different kind. That is to say, oats or the products of oats for corn, corn or the products of corn for wheat, wheat or the products of wheat for barley, or shingles for lumber.) The Transit Case, 26 I. C. C. 204.

(e) There is no provision of the Act, and no rule of the Commission which prescribes what rate shall apply on a combination of commodities made in course of transportation. Mixed Car Dealers' Asso. v. D. L. & W. R. R., 33 I. C. C. 133, 138.

(f) The service rendered by a carrier in transporting the product from a transit point is different from that rendered in transporting the raw material to the transit point. In many cases the product is of greater value, and the minimum loading is usually lower. The service to the transit user is oftentimes of greater value. Where the outbound shipment consists of a mixture of a number of kinds of grain, done up in small packages, the transit shipper is, in effect, given a carload rating on less than carload shipments. The carrier is fairly entitled to a higher charge on the outbound movement. Mixed Car Dealers' Asso. v. D. L. & W. R. R., 33 I. C. C. 133, 139.

(g) The substitution at the transit point of one article for another, when not specifically covered in the tariff, is unlawful and will subject the parties guilty thereof to criminal prosecution. American Creosoting Co. v. Director General, 61 I. C. C. 145, 149.

(h) Paid freight bills are the primary memoranda of inbound tonnage. Surrendered Tonnage Slips at Transit Points, 77 I. C. C. 239.

IV. DISCRIMINATION.

§21. In General.

See Supra §15; Discrimination; Passenger Fares and Facilities III §9.

CASES 1887-1908

(a) A party to an interstate shipment cannot be excluded by the carrier from privileges afforded to other patrons in the same locality because of his refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should accompany the demand. Phelps v. Texas & P. R. Co., (Com.), 4 I. C. R. 363.

(b) Defendants charges on grain originating at points on its Southern Minnesota division, milled in transit at La Crosse, Wis., and forwarded as product

to Milwaukee or Chicago are not more than 2½c per hundred pounds in excess of its wheat rates from the same points of origin to Milwaukee or Chicago, and such milling rates at La Crosse, as related to defendants' wheat rates, or as affecting the competitive relations of complainant with millers at Milwaukee, are not unjust or otherwise unlawful. LaCrosse is on a direct route from points on defendants' Southern Minnesota division to Milwaukee or Chicago, and Minneapolis is not, but the short line distances from points on that division are considerably less to Minneapolis than La Crosse. Defendants' charges on wheat from Southern Minnesota division points to La Crosse and Minneapolis are the same, and its rates on flour from those cities to Milwaukee and Chicago are also the same; but La Crosse has milling or transit rates which are less than the sum of such locals, while at Minneapolis shipments to and from the mills are made under established in and out charges. Transit rates at La Crosse on wheat from points on said division to Milwaukee or Chicago bear the same relation to wheat rates from such points that the rates on wheat in and on flour out of Minneapolis bear to grain rates from points on defendants' more northerly Hastings & Dakota division. Alterations in any of defendants' flour rates from Minneapolis are followed by corresponding changes in transit rates at La Crosse. The legality of milling in transit rates is not involved, and what, if any, prejudice results to complainant under transit milling at La Crosse and regular in and out rates at Minneapolis is not shown. HELD, that no undue prejudice results to La Crosse or the complaining miller in that city from milling rates enforced by defendants at La Crosse or the relations of such rates to those established by defendant from Minneapolis. Complaint dismissed. Listman Mill Co. v. C. M. & St. P. R. Co., 8 I. C. C. 47.

(c) Complainant attacked rates on grain, with milling privileges from western points milled at Buffalo, N. Y., destined to points on B. & M., in New England as unreasonable and unduly prejudicial. The thru tariff rates on grain and grain products from the points of origin to the New England points of destination are the same, but no right of milling in transit is granted in the joint tariff. Under a regulation of the Lake Shore Company, one of the parties to the tariff, and on whose line complainants' mill is located, milling in transit is permitted under a penalty of 1½c per 100 pounds above the rate on grain, but defendant B. & M., does not join in granting that privilege to shippers from western points to points on its line in New England, and when grain so milled in transit is received by defendant it imposes an arbitrary charge of 6c per 100 pounds. The sum of the rate on separate shipments of grain from the west to Buffalo and the established point rate of 12c per 100 pounds on grain products from Buffalo to points on defendants' line is less than the through grain rate added to the defendants' 6c arbitrary. HELD, that defendant has acted unlawfully in imposing the arbitrary charge of 6c in addition to the through grain rate on complainants' milled products forwarded from Buffalo, and that it was and is bound to apply on such transportation from Buffalo its established joint rate on grain products from that point to New England destinations. Complainant entitled to reparation in the difference between charges exacted from it on the basis of the 6c arbitrary added to the through rate on grain and the sum of the established rates on grain to and on milled products from Buffalo. Diamond Mills v. B. & M. R. R., 9 I. C. C. 311.

(d) Complainant alleged unjust discrimination against it in favor of other shippers by reason of unreasonable delay in forwarding and delivering a carload of hay consigned from Condit, O., to Washington, D. C., and prayed for an award of damages. HELD, that no unjust discrimination or undue prejudice to complainant having been shown, the complaint should be dismissed. S. S. Daish & Sons v. C., A. & C. Ry. Co., et al., 9 I. C. C. 513.

(e) Making certain charges for the transportation of coal shipped in car loads when the coal is loaded by tipple, and exacting a higher charge when it is loaded in some other way, is not justified by difference in cost to the carrier between different methods of loading, and renders the higher rates thus made unduly discriminatory, first, as against complainants, and, second, as against all other shippers of coal except who load by tipple. Glade Coal Co. v. Baltimore & O. R. R. Co., 10 I. C. C. 226.

(f) The Commission is authorized by the Act to Regulate Commerce after investigation to order carriers to cease and desist from subjecting any particular person, locality or description of traffic to undue or unreasonable prejudice or disadvantage in any respect whatsoever, and its jurisdiction extends to a case of alleged unlawful prejudice and disadvantage to shippers of outbound package freight through enforcement by carriers of a regulation providing for the earlier closing of depots used for the reception of such freight. Cincinnati Chamber of Commerce v. B. & O S. W. R. Co., et al., 10 I. C. C. 378.

(g) Although shippers cannot compel carriers to stop a commodity in transit for treatment or reconsignment, the carriers in granting such a privilege must not discriminate. St. Louis Hay & Grain Co. v. Mobile & O. R. Co., 11 I. C. C. 90.

(h) Complainant attacked as unduly discriminatory method of defendant in delivering meat at Providence, R. I. Defendants' tracks in Providence, R. I., are so located that competitors of complainant occupying places of business abutting on its Canal Street yard are able to unload carloads of fresh meat directly into their warehouses, and the privilege of unloading meat in that yard was formerly accorded to complainant, whose storehouse is across the canal and about 300 feet from the railroad yard, but such privilege to complainant was recently withdrawn. Denial of such privilege entailed the hauling of complainant's meat from another yard about one half mile distant and damages his business from $20 to $100 per car. The capacity in and about the Canal Street yard of the track which may be used for unloading meat is limited, and defendants' refusal to continue the privilege is apparently upon the assumption that its allowance would involve extension of the privilege of the unloading of all perishable commodities at that point. HELD, there is no such competitive relation between fresh meat, and for example, fresh fruit that it is of necessity undue discrimination to accord a privilege to the one commodity which is refused to the other. Complainant is subjected to undue prejudice. Miner v. N. Y. N. H. & H. R. R., 11 I. C. C. 422.

(i) Defendant's tracks in Providence, R. I., are so located that competitors of complainant occupying places of business abutting on its Canal Street Yard are able to unload carloads of fresh meat directly into their warehouses; and the privileges of unloading meat in that yard was formerly accorded to complainant, whose storehouse is across the canal and about 300 feet from the railroad yard; but such privilege to complainant was recently withdrawn. Denial of such privilege entails the hauling of complainant's meat from another yard about a half mile distant, and damages his business from $20 to $100 per car. HELD, that complainant is thereby subjected to undue prejudice. Miner v. New York, N. H. & H. R. Co., 11 I. C. C. 422.

(j) Carriers must conduct and manage their business under the requirements and prohibitions of the regulating statute, and undue discriminations can not be justified by the fact of long-standing agreements with favored mine operators and other shippers, nor is it a defense to the charge of discrimination that the facilities provided the favored persons may be withdrawn at the will of the one who grants them. Red Rock Fuel Co. v. Baltimore & O. R. Co., 11 I. C. C. 438.

(k) The milling-in-transit rate of 42 cents between Little Rock and Hope on interstate shipments of flour was grossly unreasonable; the rate of 19 cents was, and the rate of 20 cents is, also unreasonable and unjust; a reasonable and just rate therefore would be 11 cents per hundred pounds. J. W. Moran & Son v. Missouri P. R. Co., 11 I. C. C. 598.

(l) Defendant employs a particular trucking firm to transport through shipments via its line from railroad depots in and about New York City to its pier No. 25, in New York, and gives preference at such pier to the through traffic transferred by such trucking firm over traffic originating in New York and vicinity brought to the pier by other trucking firms. The pier is inadequate for the business of defendant, and congestion and delay result. The pier is not closed at night until all waiting trucks are unloaded, and it is soon to be considerably enlarged. No instance of injury resulting to shippers or their traffic and no discrimination amounting to exclusion from the pier were shown. HELD, that such preference does not operate unduly or unreasonably against other truck owners members of the complaining as-

sociation. N. Y. Team Owners' Asso. v. Southern Pacific Co., 12 I. C. C. 204.

(m) Preference given to certain traffic pier, not unduly discriminatory. New York Team Owners' Asso. v. Southern P. Co., 12 I. C. C. 204.

IMPORTANT CASES SINCE 1908

(n) As between shippers, carriers should pursue a policy of uniformity concerning the extension of privileges, and thus avoid the charge of undue discrimination in connection therewith. Scudder v. T. & P. Ry. Co., 21 I. C. C. 60, 61, 62.

(o) The Commission has condemned the discrimination which results from the collection of a charge at one milling point while no charge is made at other milling points on the through route, including rate breaking points where the rates to or from the latter points are essentially parts of through rates. Strasburg Steam Flouring Mills v. S. Ry., 53 I. C. C. 53.

(p) If unjust discrimination or undue prejudice results from the failure or refusal of carriers to perform a service for one shipper or to make that shipper a proper allowance therefore, while rendering a like service for other and competing shippers, the Commission may require by order the removal of the unjust discrimination or undue prejudice. Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 642, 643.

(q) It is not the function of the Commission under the Act to enforce specific compliance of contracts for allowances between shippers and carrier where the tariffs on file do not include allowances claimed. But where carriers under their tariffs hold themselves out as offering for a given rate to render a certain specified service, and after a certain date withhold a part of that service, the shipper not preventing the carrier from rendering the complete service offered under the tariffs, there has been an increase in the rate, no less than if after a certain date a higher charge had been made for the identical service previously performed for the original charge. United Chemical & Organic Co. v. Director General, 73 I. C. C. 100, 103.

(r) While movement of flat cotton should be restricted to a minimum and wasteful back hauls to transit points should not be encouraged, these considerations may not be ignored in some instances and enforced in others if undue prejudice would result. Memphis Freight Bureau v. M. P. R. R. Co., 80 I. C. C. 88, 97.

Director General, as Agent, 69 I. C. C. 761, 763; Memphis Freight Bureau v. M. P. R. R. Co., 80 I. C. C. 88, 96.

V. REPARATION.

See Reparation.

§22. In general.

CASES 1887-1908

(a) All privileges accorded on shipments in transit and which affect the value of the service performed must be published in the tariffs, and reparation based on breach of contract for a privilege which was not mentioned in the tariffs must be denied the shipper because its allowance without publication was in violation of law. R. R. Shiel & Company v. I. C. R. R., 12 I. C. C. 211, 215.

IMPORTANT CASES SINCE 1908

(b) Damages will not be awarded where to do so would be to sanction a privilege conditioned upon the use to which a commodity is put. Memphis Freight Bureau v. St. L. & S. F. R. R. Co., 24 I. C. C. 602, 603.

(c) That a transit privilege was in effect both before and after a shipment moved in and of itself furnishes no basis for an award of reparation on such shipment. Deeves Lumber Co. v. A. & V. Ry. Co., 25 I. C. C. 42, 43.

(d) Reparation denied where transit charges were absorbed out of profits and it was not shown that competitors who were not required to pay such charges fixed the prices complainants had to meet in making their sales. Mercantile Lumber Co. v. I. C. R. R. Co., 59 I. C. C. 128.

(e) Reparation denied on transit shipments as to which complainant failed to comply with the tariff requirement of surrender of inbound freight bills. Rumble & Wensel Co. v. Director General, 62 I. C. C. 110, 111.

ALL OTHER CITATIONS

Seaboard Refining Co. v. A. G. S. R. R. Co., 25 I. C. C. 702; Brenner Lumber Co. v. M. L. & T. R. R. & S. S. Co., 34 I. C.

C. 630, 632, 633; Atlantic Lumber Co. v. T. & O. C. Ry., 46 I. C. C. 368, 370; United Chemical & Organic Co. v. Director General, 73 I. C. C. 100.

VI. REASONABLENESS OF CHARGES

See Reasonableness of Rates.

§23. In general.

IMPORTANT CASES SINCE 1908

(a) A transit charge of not exceeding 0.5c has been frequently held by the Commission to be reasonable for the additional service, but the Commission has condemned the undue prejudice that results from the collection of such a charge at one milling point while no charge is made at other milling points on the same through route, including rate breaking points where the rates to and from are essential parts of through rates. Strasburg Steam Flouring Mills v. Southern Ry., 58 I. C. C. 337, 340.

FERRY CHARGES

See Car Ferry; Floatage; Trap Cars.

CASES 1887-1908

(a) A ferry is a means, and a necessary means of commercial intercourse between States, bordering upon dividing waters, and it must be conducted without imposition by States of taxes upon the commerce between them. Gloucester Ferry Co. v. Pennsylvania (U. S. Sup. Ct.), 1 I. C. R. 382.

(aa) The capital stock of the Gloucester Ferry Company, a New Jersey corporation engaged in the transportation of persons and property between Gloucester in that State, and Philadelphia, in Pennsylvania, is not subject to taxation by the State of Pennsylvania. Gloucester Ferry Co. v. Commonwealth of Pa., 1 I. C. R. 382.

(b) To publish tariffs if interstate line. Enterprise Transportation Co. v. Pa. R. R. Co., 12 I. C. C. 326.

(c) A railroad company may without doubt provide by contract with an independent company for the construction of a bridge or a ferry to be used as a part of its line. It can perhaps extend its contract to the operation of the bridge or ferry by its owner when constructed; but in such case the bridge company or the ferry company is not a common carrier. The railroad is the carrier and answerable to the law as such. The bridge or the ferry is really a part of the railroad itself as much as though owned by it. Enterprise Transportation Company v. Pennsylvania R. R., 12 I. C. C. 327, 336.

IMPORTANT CASES SINCE 1908

(d) Section 1 of the Act includes ferries within the term "railroad." Grain Rates from Milwaukee, 33 I. C. C. 417, 424.

(e) Poorly equipped ferries and their charges render that method of getting grain to railroads unsatisfactory. O. W. R. R. & N. Co., Ownership of Steamboats, 33 I. C. C. C. 658, 663.

(f) The Commission has jurisdiction over vehicular ferries operating between points in two states, though engaged only in local ferry service; and their rates, fares, rules and regulations must be filed as required by section 6 of the act. New York-Jersey City Ferry Rates, 37 I. C. C. 103, 106.

(g) Car ferryboats are possibly within the Panama Canal act technically. Maine Central Boat Lines, 40 I. C. C. 272.

(h) A ferry car is one placed on a private siding at an industry and there loaded by a shipper with less-than-carload shipments, and hauled by a carrier to its local freight station for handling and forwarding of contents. In most sections of the country ferry cars are called trap cars. Merriam Hall & Co. v. B. & M. R. R., 42 I. C. C. 435.

(i) Complainant attacked ferry charges of D. L. & W., between Hoboken, and New York, which became effective Oct. 1, 1921, as unjust and unreasonable. Defendant operates a railroad extending from tidewater at New York Harbor through New Jersey, Pennsylvania and New York to Buffalo with a number of branch lines in each of those states. It has extended its operations to the city of New York by means of ferry boats, car floats, lighters, and barges. The ferries are an essential part of its railroad system in handling passenger and baggage to and from New York. On Oct. 1, 1921, the charges were increased 20 per cent on passenger fares and 40 per cent on all other traffic. On August 26, 1920, they were reduced 10 per cent. The percentage of increase made in the ferry charges was the same as that authorized under the general increases of 1920. Vehicular traffic and livestock are classified as freight traffic in accounts of carriers. For service rendered through passengers to or from New

York, using defendant's rail lines beyond Hoboken, an allocation of 2.5c per passenger was made prior to Oct. 1, 1921, and 3c thereafter. An allowance of 2.5c per passenger was made by defendant to the ferry company prior to taking over the operation of the ferries. 3c is the amount paid for each trip by local passengers who buy 10 trip tickets. The charges on horse drawn vehicles had been in effect since 1888, and motor vehicles without material changes since 1903, when they were increased on Oct. 1, 1921. The charges on vehicles include a driver and operator. HELD, the charges for passengers are reasonable but defendant has not shown the justness and reasonableness of its present ferry charges on vehicular and livestock traffic which are unreasonable to extent they exceed charges ineffect prior to Oct. 1, 1921. Board of Commissioners of the City of Hoboken v. D. L. & W. R. R., 78 I. C. C. 582.

(j) Respondent proposed increases in ferry charges at Boston, the only charge being an increase from $5 to $15 for shipments of less than 8,000 pounds. Only one car for a five months' period of inbound or outbound freight would be affected by the charge in question. The relationship of the ferry car charges in the Boston district to each other should be considered equally with their relationship as a whole to the charges for switching carload freight. The ferry car charge on the B. & M., in that district is 2.5c per 100 pounds, minimum $5.85 per car, and at all other stations it is 2c per 100 pounds, minimum $4.50 per car. Uniformity of ferry car charges is also desirable. The record does not indicate that that purpose would be promoted by the proposed rule. HELD, proposed schedule not justified. Switching Charges on Ferry Cars at Boston, Mass., 83 I. C. C. 68.

(ja) Relationship of ferry-car charges in Boston district to each other should be considered equally with their relationship as a whole to charges for switching c. l. freight. Switching charges on Ferry Cars, 83 I. C. C. 68, 70.

(k) Where a grant of a right of way was made by a railroad company to a public service company to afford access to certain ferries landing at a plaza, upon which numbers of people congregated to take passage, an implied or incidental grant to the public service company to erect a fence around its right of way could not be presumed, since such fence would add to the congestion and be a menace to life, and a public nuisance, since it must be presumed that the conditions were within the contemplation of the contracting parties at the time the grant was made, although not then forseen. Public Service Ry. Co. v. Weehawken Tp., (N. J. 1922), 199 Atl. 90.

(l) Where a public service railway company, having been granted a right of way across the property of a railroad company to ferry, attempted to fence off such right of way, thereby excluding jitney competition, the township could resist erection of a fence as a police measure, the plaza through which the right of way extended, though not dedicated, being nevertheless affected with a public interest. Public Service Ry. Co. v. Weehawken Tp., (N. J. 1922), 119 Atl. 90.

(m) The state has no power to fix ferriage rates over a navigable river from a landing place in a sister state back to its own shore. City of Bellaire v. Bellaire, Benwood & Wheeling Ferry Co. (Ohio 1922), 136 N. E. 899.

I. CONTROL AND REGULATION.

See Control and Regulations.

§1. In General.

IMPORTANT CASES SINCE 1908

(a) The exemption of short-term notes issues from the regulatory power of the Commission under section 20a, paragraph (9) of the act, was a recognition of the necessity of leaving to the carrier, to enable it to quickly and easily meet current financial exigencies, a certain leeway a freedom of action within prescribed limits, in the negotiation of short-term loans. The exemption, however, is confined to the issue of short-term notes and does not extend to securities which the carrier may desire to pledge as securities for such notes. Bonds of Baltimore & Ohio R. R., 67 I. C. C. 10, 11.

(b) Paragraph (2) of section 20a of the act provides that it shall be unlawful for a carrier by railroad to issue securities, even though permitted by the authority creating it, unless and until and then only to the extent that, the Commission authorizes such issue. Any security for the issue of which the Commission's authority is required is void if issued without said authority having been first obtained. Equipment-Trust Certificates of C. & N. W. Ry., 67 I. C. C. 198, 201.

(c) Authority to issue stock can not be claimed as a right. It is within the Commission's discretion, subject to the limitation that it shall grant authority only if it is able to make the necessary finding as provided in section 20a of the act. If a carrier is lawfully entitled to earn a return upon the fair value of property acquiring out of surplus, this right will persist whether or not a stock issue is permitted. Stock of D. L. & W. R. R., 67 I. C. C. 426, 431.

(d) An electric interurban railroad, not operated as a part of a general steam railroad system of transportation, held not within the provisions of paragraph (18), section 1, of the act and the Commission is without jurisdiction to issue a certificate of convenience and necessity permitting it to resume the operation in interstate commerce of its property, heretofore operated under a lease, the lessee having defaulted and surrendered the property to the applicant. Public Convenience of Michigan United Rys., 67 I. C. C. 452.

(e) Panhandle & Santa Fe Ry. Co. proposed operation of a line of railroad in Oklahoma and Texas belonging to the North Texas & Santa Fe Ry. Co., which was in operation in interstate commerce prior to the effective date of paragraph (18) of section 1 of the act, found not within the Commission's jurisdiction and certificate of public convenience and necessity is unnecessary. Public Convenience Application of P. & S. F. Ry., 70 I. C. C. 75.

(f) While it is within the Commission's province to authorize the extension by indorsement of the maturity of receivers' certificates, its not to be understood that by giving such authority the Commission passes upon or in any wise determines or affects the nature of the right of liens to be enjoyed under said certificates or the priority of said certificates in relation to any other liens. Receiver's Certificates of M. K. & T. Ry. 70 I. C. C. 77.

(g) Proposed acquisition of all outstanding stock by the Western Pacific R. R. Corp., held not to be within the scope of paragraph (2) of section 5 of the act, as the Western Pacific is not a carrier engaged in the transportation of passengers or property subject to the act; and such proposed acquisition does not constitute a consolidation of two or more carriers into one corporation, management, and operation of properties

theretofore in separate ownership, management, and operation within the meaning of paragraph (6) of that section. Stock of D. & R. G. W. R. R., 70 I. C. C. 102.

(h) Proposed acquisition and operation of the properties of the Denver & Rio Grande R. R. Co., held not within the scope of paragraph (18) of Section 1 of the act because such property was in existence and was operated in interstate commerce prior to the effective date of that paragraph. Stock of D. & R. G. W. R. R., 70 I. C. C. 102.

(i) The judgment of a court of competent jurisdiction can not be made the subject of collateral attack before the Commission in a proceeding involving a proposed issue of stock. Stocks of Denver & Rio Grande Western R. R., 70 I. C. C. 106.

(j) In the interpretation of statutes the administration of which is committed to such special tribunals as the executive departments, the Supreme Court of the United States has followed the interpretations of the administrative bodies in cases of doubtful meaning, and has deemed a reenactment of any such statute with knowledge of the administrative interpretation, without corrective change, as a congressional sanction or adoption of that interpretation. Maintenance Expenses under Section 209, 70 I. C. C. 125.

(k) Proposed contracts granting trackage rights only held not to be within the scope of paragraph (18) of section 1 of the act, and authority from the Commission to exercise the rights thereunder is unnecessary. Cleveland Passenger Terminal Case, 70 I. C. C. 346.

(l) Agreements whereby one carrier proposed to acquire trackage rights from other carriers found not to fall within the jurisdiction conferred by paragraph (18) of section 1 of the act, and authority from the Commission for such grants are unnecessary. Cleveland Passenger Terminal Case, 70 I. C. C. 346.

(m) The suitable location of a passenger terminal within a great city is a matter which can best be determined locally rather than by a commission sitting in Washington, and a referendum vote is entitled to great weight in this connection. Cleveland Passenger Terminal Case, 70 I. C. C. 350.

(n) The Commission is not persuaded that the reservation of "air rights" of terminals in the hands of private interest is in accordance with sound public policy. Cleveland Passenger Terminal Case, 70 I. C. C. 351.

(o) Authority to procure authentication and delivery to its treasurer of first and refunding mortgage gold bonds and to pledge and repledge from time to time all or any part thereof as collateral security for any note or notes which may be issued under paragraph (9) of section 20a of the act without the Commission's authorization therefor having first been obtained, granted. Bonds of B., C. R. & N. Ry. and C. R. I. & P. Ry., 70 I. C. C. 499.

(p) New York, New Haven & Hartford R. R. Co., application for authority to execute a certain indemnity bond to the present stockholders of the Fruit Growers Express Co., dismissed for want of jurisdiction. Indemnity Bond of N. Y., N. H. & H. R. R., 70 I. C. C. 517.

(q) Proposed execution of a contract for purchase of the Lansing Connecting R. R., by the Grand Trunk Western Ry. Co., held not to be within the provisions of section 20a of the act. Applicant does not propose to issue any notes covering deferred payments and is not to assume obligation or liability as lessor, lessee, guarantor, indorser, or otherwise in respect of securities of the Lansing. The only "security" for the issue of which authority is sought is the final agreement into which the applicant contemplates entering with the Lansing and the Commission has no jurisdiction over such contract or agreement. Control of G. T. W. Ry. with L. C. R. R., 70 I. C. C. 554.

(r) A transfer of stock from one party to another does not fall within the purview of the act, and authorization therefore by the Commission is not required. Stock of the Valley & Siletz R. R., 70 I. C. C. 556.

(s) Principle that consideration must be given to the business of the carrier as a whole is not to be extended so as to include operating losses of a carrier in the operation of its affiliated companies, since that view would disregard rights of the minority. Nor is the question of profit and loss a matter to be passed upon by the courts alone. Such a construction of paragraph (18) of section 1 would condemn the provision on constitutional grounds, since any refusal on the Commissioner's part to consider

operating losses might very well result in a denial of the application, so that the effect of the paragraph would then be to require the carrier to continue to operate at a loss, and amount to confiscation. Abandonment of Hawkinsville & Florida Southern Ry., 70 I. C. C. 566, 568.

(t) Chicago, New York & Boston Refrigerator Co., found not to be subject to the guaranty provisions of section 209 of the transportation act, 1920. It is an equipment-owning company which does not own or operate motive power, roadbed, or tracks; does not collect from shippers charges for its services; and does not control its cars while in trains. It leases its cars to railroads, depending for its revenue upon car hire and commissions. Guaranty Claim of C., N. Y. & B. Refrigerator Co., 70 I. C. C. 575.

(u) It is definitely and unmistakably provided under paragraph (1) of section 5 of the act that an agreement for the pooling of freights or the division of earnings shall be unlawful unless and until the specific approval of the Commission. Securities Application of P. & W. V. Ry., 70 I. C. C. 682, 685.

(v) In the development of the transportation act, 1920, as a constructive measure for the solution of the railroad problem, great importance was attached by Congress to the ultimate consolidation of the carriers into a limited number of great systems. It was the intent of Congress that complete control over the situation should be in the Commission's hands, so that the working out of a constructive policy might be safeguarded in every possible way, and so that consolidations or other union of interest might not be effected without the consent of the Commission. Securities Application of P. & W. V. Ry., 70 I. C. C. 682, 687, 688.

(w) In the case of ambiguity, it is permissable, in interpreting a statute, to refer to the reports of Congress. Securities Application of P. & W. V. Ry., 70 I. C. C. 685.

(x) Susquehanna River & Western R. R. Co., proposed acquisition and operation of a narrow-guage line of railroad extending from Bloomfield Junction to Blain, Perry County, Pa., held not to be within the scope of paragraph (18) of section 1 of the act, as the line was in operation by the applicant prior to the effective date of that paragraph has at no time been abandoned. Public Convenience Application of S. R. & W. R. R., 70 I. C. C. 825.

(y) Delivery of a note by a subsidiary to a proprietary company, without complying with the provisions of section 20a of the act which provides that it shall be unlawful for any carrier to issue any securities, even though permitted by the authority creating it, unless authorized by the Commission, is, by the plain terms of the statute, void, and no means are provided for validating it. It is not an obligation of the carrier, and may not be carried on its books as such. Notes of St. L. S. F. & T. Ry., 70 I. C. C. 828.

(z) Chicago, New York & Boston Refrigerator Co., following Guaranty Claim of C. N. Y. & B. Refrigerator Co., 70 I. C. C. 575, such carrier found not to have been, during any part of the guaranty period, a carrier by railroad within the meaning of section 209 of the tansportation act, 1920. Application for a certificate entitling claimant to a guaranty payment, dismissed. Guaranty of C., N. Y. & B. R. Co., 71 I. C. C. 7.

(aa) Application of The Pullman Co., which is in part a common carrier and in part a manufacturing corporation, for authority to issue capital stock for the purpose of acquiring all the assets of the Haskell & Barker Car Co. (Inc.), another manufacturing corporation, HELD: It was not necessary to apply to the Commission for permission to issue such securities, but since there is room for doubt concerning the matter, the Commission has decided to assume jurisdiction in the premises. Stock of The Pullman Co., 71 I. C. C. 11, 14.

(bb) Allegheny & South Side Ry. Co., held not to be subject to the provisions of section 204 of the transportation act, 1920, relating to reimbursement of deficits. Applicant is not a common carrier subject to the Interstate Commerce Act and was not during any part of the Federal control period a common carrier engaged in general transportation. Deficit Claims of A. & S. S. Ry., 71 I. C. C. 90.

(cc) The Commission is without authority to certify any amount for payment under section 204 of the transportation act, unless the claimant during that part of the period of Federal control in which it operated independently was, in fact and in law, a carrier by railroad engaged as a common carrier in general transportation, and the burden rests upon a claimant to establish its

status under that section. Deficit Claims of Allegheny & S. S. Ry., 71 I. C. C. 90, 91.

(dd) Common carrier held not to be subject to the guaranty provisions of section 209 of the transportation act, 1920. Applicant is not a common carrier subject to the interstate commerce act, and was not during any part of the Federal control period a common carrier engaged in general transportation. Payment of A. & S. S. Ry., 71 I. C. C. 93.

(ee) Short Lines held not to be subject to the guaranty provisions of section 209 of the transportation act, 1920. Applicant is not a common carrier subject to the act, and was not during any part of the Federal control period a common carrier engaged in general transportation. Payment of A. & S. S. Ry., 71 I. C. C. 93.

(ff) The Commission is without authority to certify any amount for payment under section 209 of the transportation act, 1920, unless the claimant during that part of the period of Federal control in which it operated independently was, in fact and in law, a carrier by railroad engaged as a common carrier in general transportation. Payment of A. & S. S. Ry., 71 I. C. C. 93.

(gg) Allocating revenues and expenses of a branch line on a mileage prorate basis is open to objection, if made use of as the sole test, where is appears that the mileage of the branch constitutes a very small proportion of the total system mileage. Abandonment of Part of Branch Line by N. P. Ry., 71 I. C. C. 169.

(hh) While it is within the commission's province under section 20a of the act to authorize the issuance of receivers' certificate it is not to be understood that by giving such authority the commission passes upon or in any wise determines or affects the nature of the rights or liens to be enjoyed under said certificates or the priority of said certificates in their relation to any other liens. Certificate of Receivers of C. P. & St. L. R. R., 71 I. C. C. 283, 284.

(ii) Where the public interest requires the operation of railroad property, the commission can not for the purposes of fixing a loan criterion assign to that property only the salvage value attaching to an abandoned road. Loan to M. & N. A. R. R., 71 I. C. C. 395, 399.

(jj) The commission can not construe the act as imposing the stupendous and seemingly impractical task of analysis of every means of financing equipment for all carriers, or as precluding it from determining the most appropriate method for financing the equipment needs of a single carrier. This seems particularly true if the commission is to consider the purposes of loans under section 210 as limited by the necessities of the period immediately following the termination of Federal control. Loan to Seaboard-Bay Line, 71 I. C. C. 464, 468.

(kk) Chesapeake Steamship Co. found not to be a carrier within the meaning of paragraph (a) of section 209 of the transportation act, 1920, and the guaranty provisions of that section are not applicable. It is a carrier by water and does not operate any railroad line. Its capital stock is owned by the Atlantic Coast Line and Southern railroads, which do not exercise any actual control or direction of applicant's operations. Guaranty Status of Chesapeake S. S. Co., 71 I. C. C. 484.

(ll) The commission has no jurisdiction over a proposed assumption of obligations and liabilities by a carrier which is a common carrier by water and not a "common carrier by railroad," or otherwise a "carrier" within the meaning of section 20a of the act. Securities of Seaboard-Bay Line Co., 71 I. C. C. 501, 502.

(mm) Baltimore Steam Packet Co., found to be a common carrier by water and not a "common carrier by railroad," or otherwise a "carrier" within the meaning of section 20a of the act, and the commission is without jurisdiction over a proposed assumption of obligations and labilities by it. Securities of Seaboard-Bay Line Co., 71 I. C. C. 501, 502, 503.

(nn) Corporate policy, in a case of bond retirements, must be determined by the carrier's directors, and, since the responsibility for that determination rests with them, the commission does not feel that the substitution of its judgment for theirs would be warranted. Bonds of N. P. Ry., 71 I. C. C. 583, 584.

(oo) Great Northern Equipment Co., found not subject to the guaranty provisions of section 209 of the transportation act, 1920. It owns equipment leased to and operated by the Great Northern Ry. Co., its entire capital stock owned

by that company, it is not an operating company, and all expenses in connection with the maintenance of its equipment and all rental collected from carriers other than the Great Northern for the use of such equipment is reflected in the accounts of the railway company. Guaranty Status Great Falls & Teton County Ry., et al, 71 I. C. C. 607, 608.

(pp) A carrier must make application to the commission under section 20a of the act for authority to issue stock and to assume obligations and until such application is made the commission is unable to pass upon a proposed acquisition of control by purchase of capital stock and bonds. The stock proposed to be acquired would have no validity without the commission's authorization. Proposed Control of S. N. by W. P. R. R., 71 I. C. C. 653.

(qq) Sacramento Northern R. R. Co., the commission is by no means convinced that this carrier is an interurban electric railway as that term is used in the statute, although much of the transportation service rendered by it is similar to that rendered by electric interurban railways. Proposed Control of S. N. by W. P. R. R., 71 I. C. C. 653, 656.

(rr) Congress obviously did not intend to exclude all electric railways from the operation of section 20a of the act. If a carrier were to completely electrify its system it would not thereby become a "street, suburban, or interurban electric railway." Some of the operations might partake of the nature of street, suburban, or interurban railway service, but its business as a whole would be of a far broader character. Proposed Control of S. N. by W. P. R. R., 71 I. C. C. 653, 657.

(ss) The fact that a road is operated electrically does not remove it from the commission's jurisdiction under section 20a of the act. Proposed Control of S. N. by W. P. R. R., 71 I. C. C. 653, 657.

(tt) Gulf Ports Terminal Ry. Co., on further hearing, construction of an extension in Baldwin and Mobile Counties, Ala., held not to be within the provisions of paragraph (18) of section 1 of the act, and no certificate of public convenience and necessity is required. Proposed extension was begun prior to enactment of the transportation act, 1920, and there is nothing to indicate that the construction of the extension was ever definitely abandoned. Original report, 70 I. C. C., 358. Construction Application of G. P. T. Ry., 71 I. C. C. 759.

(uu) The term "public convenience and necessity" implies both convenience and necessity, since the words are not synomymous but must be given a separate and distinct meaning. Necessity does not exist unless the inconvenience would be so great as to amount to an unreasonable burden to the community. The words imply an urgent, immediate public need. Public-Convenience Application of A. & S. A. B. Ry., 71 I. C. C. 784, 792.

(vv) Contention that if paragraph (18) to (22) of section 1 of the act apply to a road located wholly within a State, they are unconstitutional and void, because beyond the power of Congress to enact, HELD: The interpretation by the Supreme Court in Texas v. Eastern Texas R. R. Co., 258 U. S., 204, establishes that Congress could and did authorize the commission to sanction the discontinuance of interstate and foreign commerce on a line of railroad located wholly within one state and operated by a corporation of that State which does not operate any line of railroad extending through more than one State. Public-Convenience Application of D. & N. M. Ry., 71 I. C. C. 795, 799.

(ww) Contention that the commission should construe paragraphs (18) to (22) of section 1 of the act as requiring it to consider only the question of whether there is a public need for the service and to hold that question of loss in operation is a matter which it can not take into account at all, and that the question of gain or loss is a matter entirely unrelated to public convenience and necessity, HELD: Such a construction loses sight of the familiar doctrine of the courts that the very fact that a line of railroad does not pay the expense of running its trains is cognent evidence that public convenience and necessity does not require it to be kept in operation. Public-Convenience Application of D. N. M. Ry., 71 I. C. C. 795, 799.

(xx) While the commission may not with propriety decide that an act of Congress is unconstitutional, it must as clearly avoid any suggested construction of a statute which would render it ineffectual, and adopt a construction, when called upon to construe it, which will sustain it, if such a construction is reasonable and consonant with the lang-

uage employed. Public-Convenience Application of D. N. M. Ry., 71 I. C. C. 795, 799.

(yy) "Public convenience and necessity" has been defined as "a strong or urgent public need." A public need can hardly be predicated upon the demand of shippers who may desire to introduce the element of competition in order to improve their position in their own competitive field. Public-Convenience Application of Utah Terminal Ry., 72 I. C. C. 89, 93.

(zz) So long as the available supply of a commodity can promptly reach the consuming public over existing lines, it is difficult to perceive how public convenience and necessity can be served by the establishment of competing facilities. Public-Convenience Application of Utah Terminal Ry., 72 I. C. C. 89, 93.

(3a) While one of the purposes of the transportation act, 1920, was to preserve competition between carriers, the provisions of paragraphs (18) to (20) of section 1 of the interestate commerce act negative any presumption that it was the purpose of Congress to permit the construction of new and competitive lines of railroad where existing facilities are adequate or can be made so by the exercise of available administrative remedies. Public-Convenience Application of Utah Terminal Ry., 72 I. C. C. 89, 93, 94.

(3b) Fact that a line of raliroad has been built and is in operation in intrastate commerce can not enter into the solution of the problem with respect to its operation in interstate commerce, since it was constructed with full knowledge that it could not operate in interstate commerce until it had applied for and received the certificate required by law. Any other treatment of the case would render the administration of paragraphs (18) to (20) of section 1 of the act farcial in the extreme. Public Convenience Application of Utah Terminal Ry., 72 I. C. C. 89, 94.

(3c) Whether or not a corporation organized to engage in interstate commerce may lawfully construct a line of railroad wholly within the limits of one State and undertake its operation in intrastate commerce before obtaining the commission's certificate, it can not properly urge the circumstances that its capital commitment has been made and that therefore the commission's certificate should issue as a matter of course to permit it to engage in interstate commerce. Public-Convenience Application of Utah Terminal Co., 72 I. C. C. 89, 94.

(3d) While one of the purposes of the transportation act, 1920, was to preserve competition between carriers, the provisions of pragraphs (18) to (20) of section 1 of the interstate commerce act negative any presumption that it was the purpose of Congress to permit the construction of new and competitive lines of railroad where existing facilities are adequate or ean be made so by the exercise of available administrative remedies. Public-Convenience Application of Utah Termnal Ry., 72 I. C. C. 89, 94.

(3e) Contention by State commission that State law governing the construction of railways should be complied with before action is taken by the commission HELD, Commission unable to conclude that compliance with a State law on the part of the carrier is prerequisite to the commission's consideration of a construction application, however necessary such compliance may be prior to actual construction. Construction by Los Angeles & Salt Lake R. R., 72 I. C. C. 147.

(3f) Proposed contract with the Lake Erie & Western R. R. Co., for the joint purchase, exchange, and use of materials and supplies, held not to constitute a means of acquiring control within the meaning of paragraph (2) of section 5 of the act. Nickel Plate-Lake Erie & Western Contract, 72 I. C. C. 151.

(3g) The definition of "transportation" in section 1 of the interstate commerce act is of doubtful value as an aid in determining the meaning of "system of transportation" as used in section 209 of the transportaton act, 1920. Guaranty Claim of Central Elevator & Warehouse Co., 72 I. C. C. 169, 175.

(3h) No definition of the term "system of transportation" appears in either the transportation act or interstate commerce act, and the definition "transportation" in section 1 of the interstate commerce act is of doubtful value as an aid in determining the meaning of "system of transportation" as used in section 209 of the transportation act, 1920. Guaranty Claim of Central Elevator and Warehouse Co., 72 I. C. C. 169, 175.

(3i) Following Lease of Panhandle by Pennsylvania R. R., 72 I. C. C. 128, a lessee should not have the power to dispose of securities representing its proprietary interest in lessor companies with-

out the commission's consent. New York Central Leases, 72 I. C. C. 243, 245.

(3j) While it is within the commission's province to give authorizaton and consent under secton 20a of the act for the issuance of receiver's certificates, it is not to be understood that by giving such authority, it passes upon or in any wise determines or affects the nature of the rights or liens to be enjoyed under such certificates or the priority of the certificates in their relation to other liens. St. Louis, El Reno & Western Receiver's Certificates, 72 I. C. C. 257, 258.

(3k) Chicago & Alton R. R. Co., application of the Chicago, Rock Island & Pacific Ry. Co. for an order approving the ownership and holding of preferred and common capital stock, equal to 25.8 per cent of the total outstanding capital stock of the Alton Company, found not to involve an acquisition of control by the Rock Island Company, and not within the jurisdiction conferred by paragraph (2) of section 5 of the act. Purchase of Stock of C. & A. by Rock Island 72 I. C. C. 273.

(3l) Where branch line is located wholly within a state, and constitutes a part of an interstate system of transportation and is being used for the purpose of transporting interstate as well as intrastate traffic, the commission has jurisdiction to pass upon application for its abandonment. Abandonment of Branch Line by Great Northern, 25; Abandonment of Line by C. & S. Ry., 72 I. C. C. 315, 316.

(3l) Where branch line is located wholly within a state, and constitutes a part of an interstate system of transportation and is being used for the purpose of transporting interstate as well as intrastate traffic, the commission has jurisdiction to pass upon application for its abandonment. Abandonment of Branch Line by Great Northern, 25; Abandonment of Line by C. & S. Ry., 72 I. C. C. 315 316.

(3m) When a part of a railway system fails to earn operating expenses, the taxing authorities, in the public interest, may well give consideration to the possibilty of affordng relief to the extent of their authority. Abandonment of Line by Colorado & Southern Ry., 72 I. C. C. 315, 319.

(3n) There is no suggestion in the Federal control act that it was the purpose of Congress or the President to make a relinquishment of carriers taken under Federal control effective retroactively. Deficit Status of Abilene & Southern Ry., 72 I. C. C. 333, 334.

(3o) Aside from the question whether a carrier, in the public interest, should be permitted, in order to secure traffic from a competitor, to buy control of another at a price greatly in excess of the value of the physical property involved, the commission must be convinced that the price to be paid is a reasonable one. Control of Dayton-Goose Creek Ry. by N. O., T. & M. Ry., 72 I. C. C. 377.

(3p) Paragraph (18) of section 15a of the act was designed primarily to encourage enterprises in a territory which is deficient in transportation facilites, and its application should not be extended to lines to be built primarily to benefit the carrier, and indirectly the public, in the handlng of through traffic. Kansas, Oklahoma & Gulf Extension, 72 I. C. C. 392, 395.

(3q) The commission has jurisdiction to pass upon an application for abandonment of a branch line located wholly within a state and which constitutes a part of an interstate system of transportation. Its operating results are reflected in the accounts of the operating company, and the latter would be required to bear or make good any deficits from its operation. Abandonment of Branch Line by Southern Pacific Co., 72 I. C. C. 404, 405.

(3r) An increase in the dividend rate on preferred stock is a matter within the commission's jurisdiction under paragraph (2) of section 20a of the act. Increase in Dividend Rate on Preferred Stock by Virginian Ry., 72 I. C. C. 473.

§1a. Constitutionality or Construction of
IMPORTANT CASES SINCE 1908

(a) Strict interpretation of the word in estimating cost of reproduction new would require substitution of new materials for materials which are known to have been secondhand when road was "new" or first built. The commission does not think that the act requires or contemplates this, but that property to be reproduced is existing property as it was when put into present service. Texas Midland 75 I. C. C. 1, 35.

(b) Valuation act makes clear intent of Congress to provide for investigation and marshaling of every fact bearing upon value of carrier property, basis of which is inventory or list of physical property; valuation to be revised and corrected by commission from time to time. Such inventory prepared so as to put beyond cavil physical property possessed by carrier at date of inventory and kept current to like degree as long as may be necessary, will be of underlying and permanent value; inspection of property by some representative of the commission or his ascertainment of such facts as demonstrate existence of property to a reasonable certainty, for preparation of inventory, being necessary. Texas Midland 75 I. C. C. 109, 110.

(c) Congress was aware of decisions of Supreme Court in 169 U. S., 466, and 174 U. S., 739, when it enacted section 19a of the act, and it is proper to assume that doctrine of these cases led it to provide that property owned or used by common carrier for its purposes as such should be treated separately from property held for purposes other than those of common carrier in respect to ascertaining and reporting value which commission is required to make by the act. San Pedro, Los Angeles & Salt Lake 75 I. C. C. 508.

(d) The so-called "recapture" para-

graph of Transportation Act 1920, §442, adding. §15a pars. 5-17. to the Interstate Commerce Act, although the act makes no special provision for the judicial consideration of its reasonableness on the issue of confiscation, HELD not unconstitutional, as giving no opportunity for a judicial hearing as to whether the return fixed is a fair return, since resort to the courts for such an inquiry exists under Judicial Code, §§208, 221. and it is only where such opportunity is withheld that a provision for legislative fixing of rates violates the federal Constitution. Dayton-Goose Creek Ry. Co. v. United States, 44 Sup. Ct. 169.

Texas Midland, 75 I. C. C. 1, 14, 19, 32, 34, 44,, 53, 54, 62, 69, 70, 109, 110, 114, 121, 123, 125, 126, 127, 130, 141, 159, 160, 162, 163, 175, 176; Kansas City Southern, 75 I. C. C. 223, 229, 257, 258, 259; San Pedro, Los Angeles & Salt Lake, 75 I. C. C. 463, 466, 467, 473, 486, 501, 507, 508; Atlanta, Birmingham & Atlantic, 75 I. C. C. 645, 665, 670; Adriatic Mining Co. v. C. & N. W. Ry. Co., 78 I. C. C. 611, 632; Dayton-Goose Creek Ry. Co. v. United States, 44 Sup Ct. 169; Pittsburg & W. V. Ry. Co. v. Interstate Commerce Commission, 293 Fed. 1001.

II. LOANS AND GUARANTEES.

§2. In General.

IMPORTANT CASES SINCE 1908

(a) The Commission cannot undertake the formation of an equipment corporation or corporations, but upon presentation of a definite, well matured, and workable plan capable of application in the immediate future, it will give preferred consideration to applications for loans to or for the purpose of such corporation. It is both desirable and practicable to devise such a plan in the case of refrigerator equipment, and the Commission particularly commends this matter to the attention of the railroad executives. Principles to be Observed in Recommending Loans, 65 I. C. C. 12.

(b) It will be the policy of the Commission not to recommend loans in cases where applicants have not clearly exhausted every effort to take care of maturities by extension, by refunding, and by every other means; and all applications should set forth as definitely as possible by whom and in what amounts the maturing obligations are held and what steps have been taken to extend, refund, or otherwise provide for them. The Commission will emphasize the necessity for self-help in all cases and will expect applicants to assume their fair share of the burden. Principles to be Observed in Recommending Loans, 65 I. C. C. 12, 14.

(c) No loans for the purpose of making additions and betterments will be recommended without satisfactory assurance that the government funds will be met by such contributions from the carriers as it is within their power to furnish. Principles to be Observed in Recommending Loans, 65 I. C. C. 12, 14.

(d) One of the prerequisites to the making of loans to carriers under section 210 of the transportation act, 1920, is the finding by the Commission that the applicants are unable to provide themselves with the necessary funds from other sources. Southern Pacific Co. Loan, 65 I. C. C. 365, 366.

(e) Under a literal interpretation of the concluding clause of paragraph (b) of section 210 of the transportation act, 1920, the majority of railroads would be unable to qualify for loans. The remainder of the roads, while able to make the showing that they are unable to obtain funds from other sources, generally can not make the further showing required by the statute governing prospective earning power and security to be offered. Under these conditions it would be practically impossible to make any loans, and the section would be reduced to a nullity. Applications for Loans, 65 I. C. C. 407, 408.

(f) It was undoubtedly the legislative intent that the railroads should be enabled, through loans made under section 210 of the transportation act, 1920, expeditiously to move the commerce of the country, to meet maturing capital obligations and otherwise properly to serve the public during the transition period of two years immediately following the termination of federal control. Applications for Loans, 65 I. C. C. 407, 408.

(g) It is obvious that freedom of action in the negotiation of short-time loans would be substantially curtailed if, before each issue of notes, it were necessary to obtain an order authorizing the pledge of bonds to be offered as security therefor. The necessity for such loans can not always be foreseen, and the opportunity to make them upon favorable terms might be lost during the delay incident to securing such author-

ization. Advance authorization of the pledge of bonds as security for short term notes is therefore in harmony with parargaph (9) of section 20a of the act. Bonds of Baltimore & Ohio R. R., 67 I. C. C. 10, 11.

(h) The Commission is required to make investigation of securities before authorizing their issue, and can not with propriety issue general authority to pledge as collateral security bonds, stocks, or other securities of any and every character and description which are or may hereafter be held in the treasury of an applicant. Application of W. & L. E. Ry. to Pledge Securities, 67 I. C. C. 293.

(i) Authority to assume obligation or liability in respect of the payment of unpaid principle and interest of three promissory notes issued in connection with the purchase of certain equipment granted. Securities, etc., of C. & M. R. R., 70 I. C. C. 9.

(j) Cumberland & Manchester R. R. Co., authority to assume obligation or liability in respect of equipment-trust certificates by entering into an equipment-trust agreement under which the certificates will be issued by the Union Trust Co. of Pittsburgh; by indorsing upon each certificate its guaranty of the payment of the principal and dividends thereof; and by entering into a lease of the trust equipment, thereby agreeing to pay rent sufficient to pay the principal and dividends of such certificates, granted. Securities, etc., of C. & M. R. R., 70 I. C. C. 9.

(k) Cumberland & Manchester R. R. Co., authority to issue and sell general mortgage gold bonds, the proceeds thereof to be used for additions and betterments to road and equipment, granted. Securities, etc., or C. & M. R. R., 70 I. C. C. 9.

(l) Cumberland & Manchester R. R. Co., authority to pledge first-mortgage gold bonds with the Secretary of the Treasury as collateral security for a loan from the United States, granted. Securities of C. & M. R. R., 70 I. C. C. 9.

(m) Ann Arbor R. R. Co., authority to issue 6 per cent bonds under its improvement and extension mortgage as amended; part thereof to be pledged in substitution for a like amount of 5 per cent bonds issued under its original improvement and extension mortgage, and part in exchange for a like amount of 5 per cent bonds now held in its treasury, granted. Bonds of A. A. R. R., 70 I. C. C. 36.

(n) Authority to issue rent notes under a contract to be entered into pursuant to National Ry. Service Corp.'s equipment-trust agreement; to assume obligation or liability as indorser and guarantor in respect of obligations of the Service Corporation to the United States; to pledge with the Secretary of the Treasury refunding mortgage bonds, and interests and equities in other bonds to secure the repayment of a loan to the Service Corporation, and any obligation evidencing the same, and the performance of said obligation of indorsement and guaranty; and to transfer, assign, and set over unto the Bankers Trust Co., trustee under the Service Corp.'s equipment-trust agreement, interests and equities in certain securities subject to prior pledges, liens, interests, and equities therein, granted. Notes, etc., of W. & L. E. Ry., 70 I. C. C. 44.

(o) Upon supplemental report, former report 67 I. C. C., 362 authority granted to issue refunding and extension mortgage gold bonds for the purpose of reimbursing its treasury for expenditures made for retirement of equipment obligations and for additions and betterments to roadway structures. Bonds of M. & St. L. R. R., 70 I. C. C. 56.

(p) Authority granted to issue rent notes under the terms of a contract to be entered into pursuant to the National Ry. Service Corp.'s equipment-trust agreement; to assume obligation or liability as indorser and guarantor in respect of obligations of the Service Corporaton to the United States for a loan; to pledge with the Secretary of the Treasury interests and equities in certain bonds to secure the repayment of the loan, and any obligation evidencing the same, and the performance of said obligation of indorsement and guaranty; and to pledge with and for transfer and assign to the Bankers Trust Co., trustee under the Service Corp.'s equipment trust, interests and equities in certain securities subject to prior pledges, liens, interests, and equities therein. Equipment Notes of C., R. I. & P. Ry., 70 I. C. C. 61.

(q) Minneapolis & St. Louis R. R. Co., authority granted to issue rent notes under the terms of a contract to be en-

tered into pursuant to the National Ry. Service Corp.'s equipment-trust agreement; to assume obligation or liability as indorser and guarantor in respect of obligations of the Service Corporation to the United States for a loan; to pledge with the Secretary of the Treasury refunding and extension mortgage gold bonds, and interests and equities in certain other bonds to secure the repayment of the loan, and any obligation evidencing the same, and the performance of said obligation of indorsement and guaranty; and to pledge with and for transfer and assign to the Bankers Trust Co., trustees under the Service Corp.'s equipment-trust agreement, interests and equities in certain securities subject to prior pledges, liens, interests, and equities therein granted. Equipment Notes of M. & St. L. R. R., 70 I. C. C. 67.

(r) Missouri, Kansas & Texas Ry. Co. of Texas, authority to extend by indorsement the maturity of receiver's certificates issued for the purpose of obtaining funds to meet necessary expenses of operation, granted. Receiver's Certificates of M., K. & T. Ry., 70 I. C. C. 76.

(s) While it is within the Commission's province to authorize the extension by indorsement of the maturity of receiver's certificates, it is not to be understood that by giving such authority the Commission passes upon or in anywise determines or affects the nature of the rights of liens to be enjoyed under said certificates or the priority of said certificates in relation to any other liens. Receiver's Certificates of M., K. & T. Ry., 70 I. C. C. 77.

(t) Kansas, Oklahoma & Gulf Ry. Co., upon supplemental report, former report 65 I. C. C. 672, authority granted to issue cumulative income bonds for the purpose of taking up, acquiring or otherwise satisfying or liquidating certain claims against the Missouri, Oklahoma & Gulf Ry. Co. and the Missouri, Oklahoma & Gulf R. R. Co., which claims existed prior to receivership and which have been recommended for allowance by the special master in accordance with the provisions of the plan of adjustment adopted by the court having jurisdiction of the receivership proceedings. Securities of K., O. & G. Ry., 70 I. C. C. 78.

(u) Authority to issue a promissory note to secure funds with which to pay outstanding maturing notes the proceeds of which were used to pay indebtedness incurred for interchange of freight with other carriers; and to issue first mortgage gold bonds, and pledge same as collateral security for said note, granted. Securities of A. & A. R. R. Corp., 70 I. C. C. 82.

(v) Authority to issue refunding and general mortgage bonds, for pledge and repledge from time to time, until otherwise ordered, as collateral security for any note or notes which may be issued under paragraph (9) of section 20a of the act without the commission's authorization having first been obtained, granted. Bonds of B. & O. R. R. and Subsidiaries, 70 I. C. C. 90.

(w) Authority to assume additional liability, for a consideration, by the modification of the tax covenant of its outstanding first and refunding mortgage bonds, granted. Bonds of O.-W. R. R. & Nav. Co., 70 I. C. C. 99.

(x) Authority to assume obligation and liability in respect of equipment-trust certificates to be issued under the Huntingdon & Broad Top rolling-equipment trust in connection with the procurement of locomotives and all-steel passenger train cars, granted. H. & B. T. Rolling-Equipment Trust, 70 I. C. C. 173.

(y) Upon supplemental report, authority to divert a portion of the proceeds of the loan authorized in 65 I. C. C. 486, for additions and betterments to way and structures to additions and betterments to equipments, granted. Loan to C. G. W. R. R., 70 I. C. C. 180. 70 I. C. C. 182.

(z) Authority to issue a one-year promissory note at an increased rate of interest, in renewal for the unpaid amount of a maturing promissory note, granted. Note of N. & P. B. L. R. R.,

(aa) Chicago, Burlington & Quincy R. R. Co., together with other proprietary companies authorized to assume the liability of jointly and severally guaranteeing the payment of the principal and interest of first-mortgage bonds of the Chicago Union Station Co., the proceeds of which are to be used solely in the construction of the union passenger station and facilities at Chicago, Ill. Bonds of Chicago Union Station Co., 70 I. C. C. 191.

(bb) Authority to enter into agreements with the holders of unsecured

notes for the extension of the maturity date thereof for a period of one year, granted. Applicant's financial condition is such as to preclude payment of the notes at maturity, and it must either extend the notes or borrow money to discharge the debt. Notes of U. T. Co., 70 I. C. C. 195.

(cc) Upon supplemental application original finding modified and loan to aid in providing certain additions and betterments to way and structures included in a program of reconstruction of applicant's main line, destroyed by a West Indian hurricane, reduced. Certificate in former report, 65 I. C. C. 20, canceled. Loan to A. H. T. Ry., 70 I. C. C. 203.

(dd) Authority to nominally issue first-lien and improvement bonds in respect of expenditures made for refunding and construction, and as the right thereto shall accrue, for additions and betterments; and to pledge part of said bonds as collateral security for loans from the United States under section 210 of the transportation act, 1920, granted. Bonds of C. & O. Ry., 70 I. C. C. 228.

(ee) Application for a loan to aid in meeting, denied as prospective earning power and security offered are not such as to afford reasonable assurance of ability to repay within the time fixed therefor and reasonable protection to the United States. Loan to J. & E. Ry., 70 I. C. C. 236.

(ff) Delivery of a note by a subsidiary to a proprietary company, without complying with the provisions of section 20a of the act which provides that it shall be unlawful for any carrier to issue any securities even though permitted by the authority creating it, unless authorized by the Commission, is, by the plain terms of the statute, void, and no means are provided for validating it. It is not an obligation of the carrier, and may not be carried on its books as such. Notes of St. L., S. F. & T. Ry., 70 I. C. C. 828.

(gg) As a basis for the issuance of equipment-trust certificates, equipment should not be taken at appraised value, but at depreciated book value. Equipment-trust Certificates of S. D. & Ariz. Ry., etc., 71 I. C. C. 29, 32.

(hh) Authority to assume obligation or liability in respect of equipment-trust certificates by entering into an agreement, under which the certificates will be issued by the Commercial Trust Co., trustee, and thereby guaranteeing payment of the principal and dividends thereon, by indorsing upon each certificate is guaranty of such payment, and by entering into a lease of the trust-equipment, and thereby agreeing to pay rent sufficient to pay such principal and dividends, granted. I. C. Equipment Trust, Series H., 71 I. C. C. 152.

(ii) The advantages which a carrier may derive by the purchase of equipment during a period of low prices and by the repair of its bad-order cars under favorable conditions make it the part of good management to do so, and form a proper basis for a loan under section 210 of the transportation act, 1920. Loan to Seaboard-Bay Line, 71 I. C. C. 464, 468.

(jj) Contributions toward the purchase of equipment acquired, either from the carrier's own funds or from private sources, to meet the contributions of the Government, have customarily amounted to 50 per cent of the whole in respect of locomotives and to 75 per cent in respect of freight-train cars. In loans made through the National Railway Service Corporation a composite percentage of both cars and locomotives contemplating an investment of 60 per cent of private capital to 40 per cent of Government funds has usually been employed. Loan to Seaboard-Bay Line, 71 I. C. C. 464, 469.

(kk) Authority to assume obligation and liability, as guarantor and otherwise, in respect of equipment-trust certificates to be issued under an equipment-trust agreement, said certificates to be sold in connection with the procurement of gondola and refrigerator cars, granted. C. & S. Ry. Equipment-Trust of 1922, 71 I. C. C. 517.

III. EXTENSION ACQUISITION, OR CONSOLIDATION.

See Consolidation of Carrier.

§3. In General.

See Lease.

CASES 1887-1908

(a) The absorption of a competing line of railway by another in alleged violation of the statutes of a State is a matter within the control of the State courts, and can be considered by the Commission only in its ultimate results of inducing unreasonable rates. Warren Manufacturing Co. v. Southern Ry. Co., 12 I. C. C. 381.

IMPORTANT CASES SINCE 1908

(aa) In section 5 of the interstate commerce act Congress provided a complete scheme of regulation of contracts or other arrangements whereby one common carrier subject to the act might secure control of another such carrier,

either by consolidation into one corporation, or in some manner not involving such consolidation, or by entering into any agreement for the pooling of freight or earnings with a competing railroad. Lease of Valley Terminal Ry., 65 I. C. C. 105.

(b) Congress intended to permit unified operation, even if involving the elimination of competition, where this would be in the public interest, and provided for a modification of the antitrust laws to the extent necessary to effect this purpose, stating certain prerequisites, and imposing upon the Commission the duty of determining whether or not the conditions of section 5 of the interstate commerce act have been or will be fulfilled and the proposed arrangement is in the public interest. Lease of Valley Terminal Ry., 65 I. C. C. 105, 109.

(c) While the law does not prohibit a conditional sale, subject to the Commission's authorization, in advance of approval of an issue of securities, carriers should realize that the Commission shall not be controlled in its action by representations that failure to accord approval of issues conditionally sold will result in disturbance or disarrangement of plans based upon anticipated approval. Bonds of New York Central R. R., 65 I. C. C. 172, 173.

(d) The construction of a proposed line could not be justified, either as an independent short line or purely as a branch line, solely on a record showing estimated earnings of 1.3 per cent for the first five years and 3.5 per cent thereafter on an unusually high estimated cost of nearly $4,000,000 for a proposed 43.5 mile construction, the apparent convenience and benefit to the surrounding territory nothwithstanding. Union Pacific R. R. Certificate, 65 I. C. C. 382, 383.

(e) An order requiring a carrier to extend its line in the interest of the public convenience and necessity, and involving as a necessary incident expenses which would impair the ability of the carrier to perform its duty to the public would be a contradiction. On the other hand, even though such proposed extension would not impair the ability of a carrier to perform its duty to the public, no order could be issued against a carrier requiring an extension of its line, unless such extension was reasonably required in the interest of public convenience and necessity. Ezra W. Cooke v. C. B. & Q. R. R. Co., 66 I. C. C. 452.

(f) A project involving purely a relocation of an existing line under which applicant's whole line will still be in service as before and will render exactly the same service in a new location, found not to constitute an abandonment of a line of railroad or the construction of a new line or extension of a line within the meaning of paragraph (18) of section 1 of the act. Public Convenience and Necessity to P., N. & N. Y. R. R., 67 I. C. C. 252.

(g) Application for a loan to aid in the extension of its line of railroad denied as the prospective earning power and security offered are not such as to afford reasonable assurance of ability to repay within the time fixed therefor and reasonable protection to the United States. Loan to J. & E. Ry., 70 I. C. C. 236.

(h) Through control of a carrier by stock ownership a company is in a position to control various matters specified in a proposed mortgage, but should such company part with control through such ownership of a majority of the stock, it would not be proper for them to retain control over such matters. The incorporation of such provisions in a mortgage are unnecessary and improper. Securities of Texas City Terminal Ry., 70 I. C. C. 244, 248.

(i) Cessation of operations under ordinary trackage rights is not prohibited by paragraph (18) of section 1 of the interstate commerce act. Public Convenience Application of G. B. & W. R. R., 70 I. C. C. 251.

(j) Improper to authorize the purchase of one carrier by another at any sum in excess of the actual cost of building the line or to permit the purchasing carrier to write into its investment accounts any sum in excess of such cost. Acquisition of Control of B. & C. M. Ry. by N. P. Ry., 70 I. C. C. 328, 329.

(k) When, as in paragraph (6) of section 5 of the act, it is provided that "it shall be lawful" to consolidate under certain conditions, this is but another way of saying that consolidations in disregard of those conditions shall be unlawful. And in like manner when it is provided, as in paragraph (2) of that section, that the Commission may authorize the acquisition of one carrier of control

of another in any manner falling short of consolidation whenever such acquisition "will be in the public interest," this is equivalent to saying that authority for the acquisitions shall not exist under other conditions. Securities Application of P. & W. V. Ry., 70 I. C. C. 682, 688.

(l) Technically, a consolidation is sometimes defined as a union of companies where a new corporation is created to take over the powers and property of the consolidating corporations. However, the word "consolidate" is not used in paragraph (6) of section 5 in a narrow sense, but the language of the paragraph is broad enough to cover any form of union under which "properties theretofore in separate ownership, management, and operation" pass into the possession of a single corporation for ownership, management, and operation. Securities Application of P. & W. V. Ry., 70 I. C. C. 684.

(m) It is definitely and unmistakably provided under paragraph (1) of section 5 of the act that an agreement for the pooling of freights of the division of the act that an agreement for the pooling of freights or the division of earnings shall be unlawful unless and until it receives the specific approval of the Commission. Securities Application of P. & W. V. Y., 70 I. C. C. 685.

(n) In the development of the transportation act, 1920, as a constructive measure for the solution of the railroad problem, great importance was attached by congress to the ultimate consolidation of the carriers into a limited number of great systems. It was the intent of Congress that complete control over the situation should be in the Commission's hands, so that the working out of a constructive policy might be safe-guarded in every possible way, and so that consolidation or other union of interest might not be effected without the consent of the Commission. Securities Application of P. & W. V. Ry., 70 I. C. C. 687, 688.

(o) If it had been intended that the provisions of section 5 of the act should merely afford a means of escaping from the restraints of the "anti-trust laws" and other State or Federal statutes, much simpler machinery would have been devised for accomplishing this purpose. The "plan of consolidation" is incompatible with such an interpretation of the section and embodies a policy of far greater breadth and vision. Securities Applications of P. W. V. Ry., 70 I. C. C. 688.

(p) Fact that a proposed new line would prove a convenience to a considerable number of people can not be relied upon alone to justify the addition to the transportation resources of the country of an enterprise which gives no promise of being self-sustaining. Public Convenience Application of G. B. R. R., 71 I. C. C. 233, 234.

(q) Where the acquisition of control, or the lease, of one carrier by another would clearly facilitate the movement of traffic through a highly congested district, the circumstances that other carriers would suffer a loss of revenue is not controlling. Chicago Case, 71 I. C. C. 631, 638.

(r) The possibility of future consolidation would be needlessly complicated by granting permission to retain excess earnings in cases where a small extension is proposed to be added to a strong existing system. Virginian & Western Extension, 72 I. C. C. 55, 57.

(s) So long as the available supply of a commodity can promptly reach the consuming public over existing lines, it is difficult to perceive how public convenience and necessity can be served by the establishment of competing facilities. Public-Convenience Application of Utah Terminal Ry., 72 I. C. C. 89, 93.

(t) While one of the purposes of the transportation act, 1920, was to preserve competition between carriers, the provisions of paragraphs (18) to (20) of section 1 of the interstate commerce act negative any presumption that it was the purpose of Congress to permit the construction of new and competitive lines of railroad where existing facilities are adequate or can be made so by the exercise of available administrative remedies. Public-Convenience Application of Utah Terminal Ry., 72 I. C. C. 89, 93, 94.

(u) In passing upon an application by a carrier for authority to acquire control of another carrier by the purchase of its stock, the commission may inquire whether the consideration to be paid by the applicant is fair and reasonable, to the end that the assets of the applicant be not wasted or its credit impaired so as to jeopardize its ability to perform its public functions. Control of Big Four by N. Y., 72 I. C. C. 96, 97.

(v) Paragraph (2) of section 5 of the act authorizes the commission to

approve the acquisition of control in any manner "not involving the consolidation of such carriers into a single system for ownership and operation." It was the undoubted purpose to permit transactions short of actual consolidation to be consummated without reference to the consolidation plan provided for in paragraphs (4), (5), and (6), of that section. So much is clearly indicated by the language above quoted. Control of Big Four by N. Y. C., 72 I. C. C. 96, 98.

(w) It is merely the commission's duty to inquire whether the securities offered by a carrier in acquiring control of another carrier are worth what the applicant proposes to pay, and an affirmative finding can not in any sense be taken as establishing or tending to establish the market value of the stock. Neither does such a finding impose upon a stockholder any obligation, or persuasion, to exchange an interest-bearing security for an equity in the applicant's property, since he is entirely free to do so or not, according to the dictates of his own judgment. If in his view the bargain is an improvident one, he is free to refuse the offer. Control of Big Four by N. Y. C., 72 I. C. C. 96, 98.

(x) While the acquisition by one carrier of the capital stock of another carrier may constitute a step toward consolidation, the commission is not convinced that such a step may not be taken in advance of the adoption of its consolidation plan pursuant to paragraphs (4) and (5) of section 5 of the act. Control of Big Four by N. Y. C., 72 I. C. C., 96, 98.

(y) The control provided for by paragraph (2), section 5, of the act, is control over one or more carriers by another carrier and not mutual control by two carriers over the same subject matter. The "control" that the framers of the act had in mind is the full and complete control which may be exercised by the ownership of the majority of the capital stock of a carrier, or by the lessee of the property, and not the control which might be exercised by one carrier in the purchase of materials and supplies from another carrier. Nickel Plate-Lake Erie & Western Contract, 72 I. C. C., 151, 152, 153.

(z) It is an open question whether the extension of a contract involving trackage rights is one that requires the commission's approval under paragraph (18) of section 1 of the act. However, where applicants have sought that approval and the jurisdictional requirements have been complied with, a certificate will be issued. It must be understood, however, that in thus disposing of the matter the commission does not hold that such certificate is a prerequisite to the lawful renewal of the agreement. Chesapeake & Ohio-Norfolk & Western Trackage Rights, 72 I. C. C. 471, 472.

IV. ABANDONMENT OF LINE.

§4. In general.

IMPORTANT CASES SINCE 1908

(a) As the law now stands, a railroad can not be abandoned without the approval of the Commission. Kansas City, Mexico & Orient R. R. Loan, 65 I. C. C. 36, 40.

(b) Paragraph (18) of section 1 of the act provides that no carrier by railroad shall abandon all or any portion of a line of railroad or the operation thereof "after 90 days after this paragraph takes effect." Where operation of a line was discontinued prior to the effective date of this paragraph, under such circumstances as clearly indicate an intention to effect a complete and permanent abandonment, no certificate of public convenience and necessity is required. Public Convenience Application of M. & E. T. Ry., 67 I. C. C. 365, 366.

(c) The Commission recognizes a distinction between abandonment of a line and a cessation of operations on such line. Where the cessation of operation of a particular road amounted to a complete abandonment, not only of the operation of the line, but of the line itself as an instrumentality of interstate commerce, evidenced by the commencement of proceedings in a federal court for the sale of the line as scrap, which proceeding was delayed through no fault of the carrier, and by such carrier's failure to file any annual report with the Commission, indicates that at that time it considered its status as a carrier subject to the act to be definitely at an end. Public Convenience Application of M. & E. T. Ry., 67 I. C. C. 744.

(d) The operation of the physical property of one carrier by another does not constitute an abandonment of operation of the carrier taken over within the meaning of paragraph (18), section 1 of

the act, and no certificate of public convenience and necessity is required. Acquisition of C., T. H. & S. E. Ry. by C., M. & St. P. Ry., 70 I. C. C. 24.

(e) Objection to Commission's jurisdiction to permit abandonment on grounds that petitioning railroad is an intrastate railroad not subject to paragraphs (18) to (22) of section 1 of the act; that if such paragraphs are construed as applying to intrastate railroads they are unconstitutional; that only reason assigned, i. e., that the railroad has not been and can not be operated except at a loss does not relate to present or future public convenience and necessity, which is the only ground upon which the Commission can permit the abandonment, and that an inquiry into the reason assigned is beyond the Commission's jurisdiction. HELD: Commission has jurisdiction to pass upon application as shipments originate on applicant's line destined to points outside the State. Public Convenience Certificate to D. & N. M. Ry., 70 I. C. C. 185.

(f) Principle that consideration must be given to the business of the carrier as a whole is not to be extended so as to include operating losses of a carrier in the operation of its affiliated companies, since that view would disregard rights of the minority. Nor is the question of profit and loss a matter to be passed upon by the courts alone. Such a construction of paragraph (18) of section would condemn the provision on constitutional grounds, since any refusal on the Commissioner's part to consider operating losses might very well result in a denial of the application, so that the effect of the paragraph would then be to require the carrier to continue to operate at a loss, and amount to confiscation. Abandonment of Hawkinsville & Florida Southern Ry., 70 I. C. C. 568.

(g) Past earnings and probable future earnings are evidentiary facts which enable the commission to make a finding under which an appropriate certificate for abandonment may be granted It is not the commission's duty to make a finding with respect to a bare need for the service unaffected by how far that need is evidenced by the payment forthcoming for the service rendered. Public Commend Application of D. & N. M. Ry., 71 I. C. C. 795, 800.

(h) In abandonment cases the method of procedure provided by the act was in addition to the constitutional right of the carrier existing prior thereto, and a cognate remedy was available to the public, before Congress asserted this species of control over the subject, for most of the abandonment cases that have been before the courts arose out of proceedings for a mandamus or mandatory injunction to prevent abandonment. Public Convenience Application of D. & N. M. Ry., 71 I. C. C. 795, 800.

(i) People interested in the continued operation of a line of railroad, especially those dependent upon it, must realize that they have a duty to perform and that the future of the line rests largely in their hands. The mere desire to have a railroad is not enough. There must exist the will to cooperate in its operation and the ability to support it adequately. Abandonment of Branch by Pere Marquette, 72 I. C. C. 267, 271.

(j) It is incumbent upon a carrier seeking to abandon a line of railroad to establish by clear and convincing proof every element of the case from which the commission is expected to determine that the present or future public convenience and necessity will permit of a proposed abandonment. Where losses are claimed the commission can not accept the carrier's conclusions as to such losses, but must have before it the items thereof in sufficient detail to leave no reasonable doubt as to the justification for the carrier's claim. Abandonment of Branch by Pere Marquette, 72 I. C. C. 303, 307.

(k) Where branch line is located wholly within a State, and constitutes a part of an interstate system of transportation and is being used for the purpose of transporting interstate as well as intrastate traffic, the commission has jurisdiction to pass upon an application for its abandonment. Abandonment of Branch Line by Great Northern, 72 I. C. C. 25; Abandonment of Line by C. & S. Ry., 72 I. C. C. 315, 316.

C. C. 825, 826.

V. STOCK AND CAPITAL ISSUES

§5. In general.

CASES 1887-1908

(a) Competition between railways as well as between other industries is the established policy of the nation. And while the acquisition of a small minority of the stock of a competing line might

not decrease the competition, yet the acquisition of any considerable amount of stock, with representation on the board of directors of such railway, unquestionably has the effect of diminishing competition and lessening to that extent its effectiveness. So long as it is the policy of the general government and of the States to maintain competition between naturally competing lines, the ownership of any stock by one railway in a competing railway should not be permitted, and such lines of railway should be prohibited from having any common directors or officers. Consolidations and Combinations of Carriers, 12 I. C. C. 277, 306.

(ab) The time has come when some reasonable regulation should be imposed upon the issuance of securities by railways engaged in interstate commerce. We are aware that in the construction of new lines of railway, developing new territory, it has been necessary in many instances to sell railway securities at large discount, and to sell bonds with stock bonuses, and even in such cases it has many times been difficult to raise the necessary capital. Men will not invest their money and take the risk for small rates of interest. But this principle does not apply to old established railway systems having good credit. Such railways should be prevented from inflating their securities for merely speculative purposes. Railroads should be encouraged to extend their systems and develop the country. It is of the utmost importance, also, that railway securities should be safe and conservative investments for the public, and should yield good and ample return for the money invested. Reasonable regulation will tend to make them safer and more secure investments, and thereby benefit not only the railway companies but the public. Consolidations and Combinations of Carriers, 12 I. C. C. 277, 306.

IMPORTANT CASES SINCE 1908

(ac) Authority to issue stock can not be claimed as a right. It is within the Commission's discretion, subject to the limitation that it shall grant authority only if it is able to make the necessary finding as provided in section 20a of the act. If a carrier is lawfully entitled to earn a return upon the fair value of property acquired out of surplus, this right will persist whether or not a stock issue is permitted. Stock of D., L. & W. R. R., 67 I. C. C. 426, 431.

(b) To render a proposed issuance of stock for distribution as a dividend "compatible with the public interest," within the meaning of the statute, a substantial surplus should remain uncapitalized as a support for the applicant's credit, providing for emergency needs, offsetting obsolescence and necessary investments in nonrevenue producing property, and serving as a general financial balance wheel. Stock of Delaware, Lackawanna & Western R. R., 67 I. C. C. 426, 433.

(c) Carrier not permitted to issue capital stock against its net account with the United States Railroad Administration, which is merely an adjusted balance, or its investments in non-operating properties where no reasons for acquiring and holding these properties are stated, and no present or contemplated future use of them in connection with the carrier's transportation service is shown. Stock of Delaware, Lackawanna & Western R. R., 67 I. C. C. 426, 434.

(d) Stocks of advertising, mining, timber, and land companies, United States government bonds and certificates of indebtedness, municipal bonds, and steel company bonds, are flexible assets which the Commission deems improper to permit applicant to capitalize. If it should be thought desirable to distribute the portion of surplus invested in such securities stockholders, applicant would be able to apportion the securities themselves or distribute the proceeds thereof. They are neither property used or useful in rendering the public service nor an assured part of any surplus. Stock of Delaware, Lackawanna & Western R. R., 67 I. C. C. 426, 433, 434.

(e) Bonds issued and delivered without authorization of the Commission having first been obtained, as provided in section 20a of the act, are, by the plain terms of the statute, void, and no means are provided for validating them. They are not obligations of the applicant, and may not be carried on its books as such. Bonds of Chicago & Western Indiana R. R., 67 I. C. C. 609.

(f) The judgment of a court of competent jurisdiction can not be made the subject of collateral attack before the Commission in a proceeding involving a proposed issue of stock. Stocks of Denver & Rio Grande Western R. R., 70 I. C. C. 106.

(g) Carrier sought authority to issue

stock dividends from time to time, as further expenditures shall be made from income for additions and betterments, thus capitalizing such expenditures. HELD: Authority therefore should be requested when such expenditures have been made. Securities Application of D. & T. S. L. R. R., 70 I. C. C. 322, 323.

(h) It is merely the commission's duty to inquire whether the securities offered by a carrier in acquiring control of another carrier are worth what the applicant proposes to pay, and an affirmative finding can not in any sense be taken as establishing or tending to establish the market value of the stock. Neither does such a finding impose upon a stockholder any obligation, or persuasion, to exchange an interest-bearing security for an equity in the applicant's property, since he is entirely free to do so or not, according to the dictates of his own judgment. If in his view the bargain is an improvident one, he is free to refuse the offer. Control of Big Four by N. Y. C., 72 I. C. C. 96, 98.

(i) While it is within the commission's province to give authorization and consent under section 20a of the act for the issuance of receiver's certificates, it is not to be understood that by giving such authority, it passes upon or in anywise determines or affects the nature of the rights or liens to be enjoyed under such certificates or the priority of the certificates in their relation to other liens. St. Louis, El Reno & Western Receiver's Certificates, 72 I. C. C. 257, 258.

(j) Transportation Act §20a, giving the Interstate Commerce Commission exclusive control over issuance of securities by railroads engaged in interstate commerce and depriving the states of power to regulate the issuance of such securities, HELD not void as an attempt to regulate the purely internal and governmental functions of railroads, since the statute is a regulation of the business of the railways, in view of the financial problem with which they are constantly faced, and the relation between such problems and the problem of rates, and therefore is within the power of Congress to regulate interstate commerce. Minneapolis, St. P. & S. S. M. Ry. Co. v. Railroad Commission (Wisc. 1924) 197 N. W. 352.

VI. GOVERNMENT GUARANTY.

See Interstate Commerce Commission §9½.

§6. In General.

IMPORTANT CASES SINCE 1908

(a) The guaranty under section 209 of the transportation act is wholly independent of any damages which carriers may have suffered by reason of the temporary taking of their property during the period of Federal control. For all such damage the Government must render just compensation; and by their acceptance of the provisions of section 209 the carriers have in no way surrendered or abated any claims arising out of Federal operation. Maintenance Expenses under Section 209, 70 I. C. C. 116.

(b) The guaranty under section 209 of the transportation act was not founded upon a legal obligation, but upon the thought that in fairness it was the duty of the Government to protect the income of the carriers, following the termination of Federal control, until such time as higher rates could be made effective under the provisions of section 15a of the interstate commerce act. Maintenance Expenses under section 209, 70 I. C. C. 116, 117.

(c) The danger of the guaranty, as provided under section 209 of the transportation act, at a time when expenditures were wholly within the control of the private managements, was that the carriers might utilize the opportunity to profit unduly at the expenses of the public treasury. The danger was particularly acute in the case of maintenance, and for this reason it was plainly desirable to set some limit upon the sums which might be allowed for this purpose in computing amounts payable under the guaranty. Paragraph (3) of subdivision (f) of section 209 was the means of accomplishing this end. Maintenance Expenses under Section 209, 70 I. C. C. 117.

(d) Section 1 of the Federal control act authorized the President to agree with and to guarantee to each carrier that it should receive as just compensation during Federal control an annual sum "not exceeding a sum equivalent as nearly as may be to its average annual railway operating income for the three years ended June 30, 1917." This fixed maximum compensation, known as the "standard return" which the President might voluntarily agree to pay did not preclude him from offering less or the carriers from seeking more, and provision was made for reference, in default of agreement to a board of referees and ultimately to the Court of Claims. Maintenance Expenses under Section 209, 70 I. C. C. 117, 118.

(e) The "standard return," fixed as the maximum which might voluntarily be offered, was based on the results from operation in the so-called test period of three years ended June 30, 1917, these being the most prosperous three consecutive years in the history of the carriers. It was therefore a liberal standard of compensation for the war use of property at a time when the country was enduring grievous burdens. Maintenance Expenses under Section 209, 70 I. C. C. 118.

(f) Paragraph (a) of section 5 of the standard contract set forth a rule for measuring the compliance of the director general with the covenant of upkeep by reference to the accounts of the carriers, when kept in accordance with the Commission's requirements; the basic measure is the expenditure for maintenance during an average six months of the test period, adjusted to differences in the cost of labor and materials and in the amount and use of the property, in accordance with the provisions of paragraph (c); and differences in the "cost of labor," as these words are used in paragraph (c), do not include changes in quality or effectiveness of labor, but only changes in wages. Maintenance

Expenses under Section 209, 70 I. C. C. 123.

(g) It is not proper in determining amounts payable under the guaranty, under section 209 of the transportation act, to take into consideration differences in cost of labor and materials which would not have affected the account if guaranty-period conditions had been substituted for those of the test period, and neither depreciation nor retirement accounts will be adjusted for such differences. In fixing maximum maintenance allowances for the guaranty period, charges representing depreciation and retirements will be computed upon the same basis as those which were used during an average six months of the test period. Maintenance Expenses under Section 209, 70 I. C. C. 127.

(h) Principle that consideration must be given to the business of the carrier as a whole is not to be extended so as to include operating losses of a carrier in the operation of its affiliated companies, since that view would disregard rights of the minority. Nor is the question of profit and loss a matter to be passed upon by the courts alone. Such a construction of paragraph (18) of section 1 would condemn the provision on constitutional grounds, since any refusal on the Commission's part to consider operating losses might very well result in a denial of the application, so that the effect of the paragraph would then be to require the carrier to operate at a loss, and amount to confiscation. Abandonment of Hawkinsville & Florida Southern Ry., 70 I. C. C. 568.

(i) The intention of Congress was to be as specific as possible in designating those carriers for whose benefit the guaranty provisions of section 209 of the transportation act, 1920, should operate. The fact that the definition of the term "carrier" was made precludes the view that section was intended to apply generally to all agencies of transportation over which in the time of war Federal control was assumed; and the fact that it limits the meaning of "carrier" to (1) "a carrier by railroad or party by railroad and partly by water," and (2) "a sleeping-car company," deprives the Commission of authority to certify a payment under the guaranty to any claimant which can not bring itself clearly within these terms. Guaranty Claim of C., N. Y. & B. Refrigerator Co., 70 I. C. C. 578.

(j) December 31, 1921, fixed as the date as of all accounts pertaining to the guaranty period shall be considered closed for the purpose of computing the guaranty under section 209 of the transportation act. Final settlement under Section 209, 70 I. C. C. 712.

(k) For the purpose of the guaranty under section 209 of the transportation act, 1920, charges to operating expenses for maintaining will be limited to those applying to work done between March 1 and August 31, 1920, inclusive, and to charges accrued or equalized in accordance with the Commission's accounting rules. No charges for deferred maintenance will be considered. Final Settlement under Section 209, 70 I. C. C. 712, 713.

(l) For the purpose of the guaranty under section 209 of the transportation act, 1920, charges to operating expenses for maintenance will be limited to those applying to work done between March 1 and August 31, 1920, inclusive, and to charges accrued or equalized in accordance with the Commission's accounting rules. No charges for deferred maintenance will be considered. Final settlement under Section 209, 70 I. C. C. 712, 713.

(m) Estimates made by the Commission and agreed to by the carrier under the provisions of paragraph (b) of section 212 of the transportation act, 1920, will be considered as actual expenditures and shall be so treated in the computation of operating expenses for the guaranty period. Final Settlement under Section 209, 70 I. C. C. 713.

(n) In the computation of railway operating income or any deficit therein for the guaranty period for the purposes of section 209 of the transportation act, the Commission shall treat the provisions of subdivision (f) of that section as provisions limiting consideration to the amounts actually charged on the carrier's books of account under the accounting rules prescribed by the Commission pursuant to section 20 of the interstate commerce act, and shall not for the purpose of the guaranty make or permit any increase or addition to charges actually on the books in accordance with the accounting rules. Final Settle-

ment under Section 209, 70 I. C. C. 713, 714.

(o) Estimates of the net effect of deferred debit and credit items made by the Commission and agreed to by carriers under the authority of paragraph (b) of section 212 of the transportation act, 1920, will be considered in computing the guaranty under section 209. Final Settlement under Section 209, 70 I. C. C. 714.

(p) All carriers which accepted the provisions of section 209 of the transportation act, 1920, required to file on or before March 1, 1922, final statements of amounts due to them or to the United States thereunder. No further partial payments will be certified until the information necessary for final settlement is at hand. Forms for rendition of statements prescribed. Final settlement under Section 209, 70 I. C. C. 714.

(q) Announcement of general rule for adjustment of differences in cost of labor and material in establishing the maximum amounts to be included in operating expenses for maintenance of way and structures and for maintenance of equipment for the purposes of the guaranty under section 209 of the transportation act, 1920. Final Settlement under Section 209, 70 I. C. C. 714, 715.

(r) The commission is without authority to certify any account for payment under section 204 of the transportation act, unless the claimant during that part of the period of Federal control in which it operated independently was, in fact and in law, a carrier by railroad engaged as a common carrier in general transportation, and the burden rests upon a claimant to establish its status under that section. Deficit Claims of A. & S. S. Ry., 71 I. C. C. 90, 91.

(s) The statute makes no provision for a conditional acceptance of the transportation act, 1920. The duty and obligation of determining railroad operating income for the test and guaranty periods is imposed upon the commission, and it is required to make such determination in accordance with rules laid down in the section. If a "condition" merely contemplates the application of some rule in the statute, it might be treated as surplusage, but it is invalid if it attempts to control the computation of income in a manner not contemplated by the statute. Guaranty Status of Potato Creek R. R., 71 I. C. C. 457.

(t) The commission can not construe the act as imposing the stupendous and seemingly impractical task of analysis of every means of financing equipment for all carriers, or as precluding it from determining the most appropriate method for financing the equipment needs of a single carrier. This seems particularly true if the commission is to consider the purposes of loans under section 210 as limited by the necessities of the period immediately following the termination of Federal control. Loan to Seaboard-Bay Line, 71 I. C. C. 464, 468.

(u) The advantages which a carrier may derive by the purchase of equipment during a period of low prices and by the repair of its bad-order cars under favorable conditions make it the part of good management to do so, and form a proper basis for a loan under section 210 of the transportation act, 1920. Loan to Seaboard-Bay Line, 71 I. C. C. 464, 468.

(v) Fact that there is a general condition of over supply of cars would not justify the commission in considering the application of a carrier for a loan for the acquisition of equipment taking a stand that would require it to continue it to pay from its revenues excessive car hire to other carriers, especially when it is considered that this car hire is paid at the current per diem rate. Loan to Seaboard-Bay Line, 71 I. C. C. 464, 468.

(w) Contributions toward the purchase of equipment acquired either from the carrier's own funds or from private sources, to meet the contributions of the Government, have customarily amounted to 50 per cent of the whole in respect of locomotives and to 75 per cent in respect of freight-train cars. In loans made through the National Railway service Coropration a composite percentage for both cars and locomotives contemplating an investment of 60 per cent of private capital to 40 per cent of Government funds has usually been employed. Loan to Seaboard-Bay Line, 71 I. C. C. 464, 469.

(x) The director general regarded certain elevator and warehouse companies as a part of the system of transportation, but the commission is unable to accede to the view that the director general's determination of that question

in relation to Federal control is conclusive upon the commission in determining their status for a guaranty payment under section 209 of the transportation act, 1920. Guaranty Claim of Central Elevation & Warehouse Co., 72 I. C. C. 169, 174.

(y) The wording of section 209 of the transportation act, 1920, clearly indicates that Congress intended that of the carriers retained under Federal control at the end of the period thereof the guaranty should apply only to carriers by railroad and sleeping-car companies and not necessarily to every system of transportation which might have been taken and retained under Federal control. Guaranty Claim of Central Elevator & Warehouse Co., 72 I. C. C. 169, 174, 175.

(z) The particularity with which Congress defined the carriers which should be entitled to the guaranty forbids that the commission should, without exercising its own judgment in each case arising under section 209, accept the director general's grouping of systems of transportation made under conditions very different from those that obtained when the guaranty provisions were enacted. Guaranty Claim of Central Elevator & Warehouse Co., 72 I. C. C. 169, 175.

(aa) No definition of the term "system of transportation" appears in either the transportation act or interstate commerce act is of doubtful value as an aid in determining the meaning of "system of transportation" as used in section 209 of the transportation act, 1920. Guaranty Claim of Central Elevator & Warehouse Co., 72 I. C. C. 169, 175.

(bb) The commission is required by section 15a of the act to initiate rates which will yield as nearly as may be a fair return to carriers as a whole, or as a whole by such rate groups as the commission may fix. Reduced Rates from New York Piers, 81 I. C. C., 312, 331.

VII. FINANCIAL OPERATION.

§7. In General.

CASES 1887-1908

(a) Recommendations. Confining carrier to transportation, restricting stock ownership. Forbidding stock ownership of competing railway or common officials. Inflating securities for speculative purposes forbidden. In the Matter of Consolidations and Combinations of Carriers, 12 I. C. C. 277.

(aa) The Commission on its own motion instituted an investigation as to consolidations and combinations of common carriers. The investigation was directed principally as to the amalgamations brought about by the machinations of Mr. E. H. Harriman controlling the Union Pacific system. The function of a railroad corporation should be confined to the furnishing of transportation. Railroads should not be permitted to invest generally in stocks, bonds, and securities of other railway or of steamship companies, except connecting lines, for the purpose of forming through routes of transportation, including branches and feeders. It is in the interest of the public to facilitate the consolidation of connecting lines. Railroad securities should be safe and conservative investments for the people. To this end the risks of the railroad should be reduced to a minimum. It is contrary to public policy as well as unlawful for railways to acquire control of parallel and competing lines. Competition between railways as well as between other industries is the established policy of the nation. The time has come when some reasonable regulation should be imposed upon the issuance of securities by railways engaged in interstate commerce. Railways should be prevented from inflating their securities for merely speculative purposes. Railways should be encouraged to extend their systems and develop the country. Reasonable regulation will tend to make railway securities safer and more secure investments and thereby benefit not only the railway companies but the public. Consolidations and combinations of carriers, 12 I. C. C. 277.

(b) The function of a railroad corporation should be confined to the furnishing of transportation. Railroads should not be permitted to invest generally in the stocks, bonds, and securities of other railway and of steamship companies, except connecting lines, for the purpose of forming through routes of transportation, including branches and feeders. It is in the interest of the public to facilitate the consolidation of connecting lines. The credit of a railway company is founded upon the resources and prosperity of the country through which it runs. Its surplus funds and credit should be used for the betterment of its lines and in extensions and branches to develop the country contiguous to it. Consolidations and Combinations of Carriers, 12 I. C. C. 277, 305.

(c) Railroad securities should be safe

and conservative investments for the people. To this end the risks of the railroad should be reduced to a minimum. Everyone knows that railway securities fluctuate more or less, according to the prosperity of the times, and also by reason of the wide speculation in such securities. It therefore adds an element of hazard to a railroad's capital and credit to have its funds invested in the stocks of other companies, thereby endangering its solvency and its ability to pay reasonable dividends upon its own capital stock. It is a serious menace to the financial condition of the country to have large railway systems fail to meet their obligations or go into the hands of receivers, and the object of legislation and administration should be to lessen the risks of railway investments. Consolidations and Combinations of Carriers, 12 I. C. C. 277, 306.

IMPORTANT CASES SINCE 1908

(d) It is difficult to separate accurately the two functions of a railroad as an operating carrier and as an investing corporation, and where the financial relationship of the two is close, the consideration of the operating function by itself is misleading in arriving at the net income of the carrier. Pittsburgh Steel Co. v. L. S. & M. S. Ry., Co., 27 I. C. C. 173, 181.

(e) For many years the railroad monopoly of New England has been more complete than in any other considerable section of this country. New England Investigation, 27 I. C. C. 560, 572.

(f) Leasing roads concentrates too much power in too small a stock holding. New England Investigation, 27 I. C. C. 560, 600.

(g) The Boston & Maine system is not overcapitalized. New England Investigation, 27 I. C. C. 560, 603.

(h) No interstate railroad should be permitted to lease or purchase any other railroad, nor to acquire the stocks or securities of any other railroad, nor to guarantee the same, directly or indirectly, without the approval of the Federal government. New England Investigation, 27 I. C. C. 560, 600.

(i) A most prolific source of financial disaster and complication to railroads in the past has been the desire and ability of railroad managers to engage in enterprises outside the legitimate operation of their railroads, especially by the acquisition of other railroads and their securities. New England Investigation, 27 I. C. C. 560, 616.

(j) It may be unwise to attempt to specify the price at which and the manner in which railroad stocks and securities shall be disposed of, but it is easy and safe to define the purpose for which they may be issued and to confine the expenditure of the money realized to that purpose. The New England Investigation, 27 I. C. C. 560, 616.

(k) The use of dummy individuals and dummy devices are but feeble and futile devices, and the use of them by a railway company indicates a low state of financial morality. Financial Investigation of N. Y. N. H. & H. R. R. Co., 31 I. C. C. 32, 60.

(l) The practice of one man serving on many boards of directors cannot be too strongly condemned. He may be thoroughly honest in his relations with each corporation, but it is not practicable for him to give the stockholders of each the full benefit of his ability and energy, when he can afford only a small fraction thereof to each. A director should be an active, not passive, force. He should understand the affairs of the corporation to which he gives the prestige of his name, at least to the extent of knowing the integrity of its designs and the absence of law-breaking methods in its operation, and he should not accept positions which he cannot so fill. Financial Investigation of N. Y. N. H. & H. R. R. Co., 31 I. C. C. 32, 66.

(m) A resolution authorizing the president and directors of a railroad company to lease for such length of time and on such terms as they may deem best, railroad property, franchises, etc., of other railroad companies in which the company owns or may own a majority of the capital stock, is manifestly unfair to the minority stockholders of subsidiary companies. Financial Relations Ect., L. & N. R. R. Co., 33 I. C. C. 168, 199

(n) Common carriers are expressly exempt from application of Clayton Anti Trust Act, making it unlawful for any person at the same time to be a director in two or more competing corporations, any one of which is capitalized, etc, at more than $1,000,000. Financial Transactions, C. R. I. & P. Ry., 36 I. C. C. 43, 61.

(o) Inflations of capital stock were incidents of the C., H. & D. consolidation in 1895 and of the P. M. consolidation in 1900. Pere Marquette R. R., and C., H. & D. Ry., 44 I. C. C. 1, 218.

(p) Exploitation of railroad securities would be more difficult if the issuance and marketing were subject to federal regulation. Pere Marquette R. R., and C. H. & D. Ry., 44 I. C. C. 1, 223.

(q) A senate resolution directing the Commission to investigate and report the relations between the Louisville & Nashville Railroad and the Nashville, Chattanooga & St. Louis Ry. and the relation and conduct of these and other railroads in respect to various matters set out in a resolution, including the number of free passes issued by the carriers since January 1, 1911, to public officials or at their request, with the total mileage and money value thereof and which does not appear either to have been concurred in by the House of Representatives or approved by the President, is not a law of the United States and does not enlarge in any manner the authority or jurisdiction of the Commission under the Interstate Commerce Act. U. S. v. N. C. & St. L. Ry., 217 Fed. 254, 260.

(r) A Senate resolution directing the Commission to investigate the financial and other operations of the N. C. & St. L. Ry. and the L. & N. R. R. is not a law and does not vest any authority in the Commission. U. S. v. L. & N. R. Co., 35 Sup. Ct., 363, 366.

(s) Abstractly speaking, the Supreme Court of the United States is not disposed to say that a carrier may not attempt to mold or enlighten public opinion, but it is quite clear that its conduct and the expenditures of its funds are open to inquiry. If it may not rest inactive and suffer injustice, it may not, on the other hand, use its funds and its power in opposition to the policies of government. Beyond this generally it is not necessary to go. Concerning the amount of expenditures and the manner of their charge upon the books of the companies, this is within the power of the Commission to investigate. Smith v. I. C. C., 38 Sup. Ct. 30, 33, 34, 245 U. S. 33, 62 L. Ed. 135.

(t) Valuation amendment of the act authorizes commission to find a single sum as value of common-carrier property for purposes under the act; and such finding as to each carrier will ultimately be made, supplementing tentative valuations in which a single sum is not stated by such findings. Texas Midland, 75 I. C. C. 1, 6.

(u) Contention that decision of Supreme Court in Minnesota Rates cases, 230 U. S., 352, condemns method employed by commission in securing, and that cost should be ascertained as it stands on valuation date without taking into consideration any expense which would be incurred by reason of fact that it would be rebuilt, not sustained. Texas Midland, 75 I. C. C. 12, 14.

(v) Cost of reproduction, new is at best an estimate, but as now reported by the commission is derived under same general rules, and estimates regarding different properties are comparable in all cases. Texas Midland, 75 I. C. C. 16.

(w) Unit price of 69 cents per tie as basis for estimating cost of reproduction new, approved. Texas Midland, 75 I. C. C. 1, 42.

(x) Prices of $34.55 per ton as cost of new rails, and $24 per ton for relay rails, approved. Texas Midland, 75 I. C. C. 1, 42, 43.

(y) Unit price of 15 cents to cover expense of placing cinders and sand at where used, made up of 10 cents for loading and 5 cents for unloading, to which has been added one-half cent per ton-mile for estimated average haul, approved. Texas Midland, 75 I. C. C. 43.

(z) Unit prices of 65 cents per cubic yard for crushed stone ballast, and $1 per cubic yard for burnt clay ballast, to cover expense of placing at points where used, approved. Texas Midland, 75 I. C. C. 43, 44.

(aa) Sum of $900 per mile of road as cost of reproduction new of tracklaying and surfacing, approved. Texas Midland 75 I. C. C. 44.

(bb) The Minnesota Rate cases, 230 U. S., 352 and Knoxville v. Water Co., 212 U. S., 1, are full authority for proposition that depreciation is not deferred maintenance but covers loss of capacity for use due to age, inadequacy, etc. Texas Midland, 75 I. C. C. 49, 51.

(cc) In making valuations of steam railroads entire country was divided into five districts, each containing approximately 50,000 miles of railway. This division was generally a territorial one

by State lines, but an entire railway system has been usually assigned to one district, even though it extended into territory of another district. Texas Midland, 75 I. C. C. 1, 108.

(dd) Valuation act makes clear intent of Congress to provide for investigation and marshaling of every fact bearing upon value of carrier property, basis of which is inventory or list of physical property; valuation to be revised and corrected by commission from time to time. Such inventory, prepared so as to put beyond cavil physical property possessed by carrier at date of inventory and kept current to a like degree as long as may be necessary, will be of underlying and permanent value; inspection of property by some representative of the commission or his ascertainment of such facts as demonstrate existence of property to a reasonable certainty, for preparation of inventory, being necessary. Texas Midland, 75 I. C. C. 1, 109, 110.

(ee) Of telegraph and telephone property owned jointly 50 per cent of total cost of reproducing it assigned to carrier, and of property owned separately such cost of reproduction assigned directly to owner in each instance. San Pedro Los Angeles & Salt Lake, 75 I. C. C. 463, 481.

(ff) Rate of 6 per cent per annum regarded as fair in estimating cost of reproduction now. It seems clear that 6 per cent should be ample if work of reconstruction were undertaken by a construction company with a good standing and credit. Application of that rate of interest to total expenditures stated for road accounts for one-half of construction period plus three months, and for three months upon total of equipment accounts, is in accordance with method approved in Texas Midland case, 75 I. C. C., 1, pages 31, 32, and 35. San Pedro Los Angeles & Salt Lake, 75 I. C. C. 463, 485.

(gg) Rate of 0.5 cents per ton per mile has been used for a great many years by carriers, and has generally been regarded as fairly representing cost of handling company material. Investigations made by commission's engineers, taking into consideration experience of carriers generally throughout the country, disclose that 0.5 cents per ton-mile approximates very closely probable actual expense in handling this class of traffic. More reasonable and accurate results will be obtained by application of a rate which appears to be ample under average conditions than a rate which may at a particular time be developed from experience of a particular carrier. San Pedro, Los Angeles & Salt Lake, 75 I. C. C. 485, 486.

(hh) Congress was aware of Supreme Court decisions in 169 U. S. 466, and 174 U. S., 739, when it enacted section 19a of the act, and it is proper to assume that doctrine of these cases led it to provide that property owned or used by common carrier for its purposes as such should be treated separately from property held for purposes other than those of common carrier in ascertaining and reporting value the commission is required to make by the act. San Pedro, Los Angeles & Salt Lake, 75 I. C. C. 463, 508.

VIII. ACTIONS AT LAW.

§8. In general.

IMPORTANT CASES SINCE 1908

(a) The Pittsburg and W. Va., Ry. Co. owns the entire capital stock of the West Side Belt R. R. amounting to $1,080,000. In addition it had advanced to it over $6,000,000.00 for construction purposes, for which it held interest bearing notes. It proposed to purchase the entire property of the Belt for $7,400,000.00 by issuing its capital stock for that amount, and then take back the stock in liquidation of its notes and the stock of the Belt. The Belt was then to be dissolved. Its application to do this to the Commission was denied. HELD, such decision could not be reviewed in a U. S. District Court by injunction. Pittsburgh & W. V. Ry. Co. v. Interstate Commerce Commission. 293 F. 1001.

(b) Where a bill to set aside an order of the Interstate Commerce Commission permitting a railroad company to acquire control of terminal railroads alleged as a fact that the Commission's finding that such acquisition of control would be in the public interest was unsupported by evidence, and the motions to dismiss did not suggest that such fact was not well pleaded, or that a copy of the evidence should have been annexed to the bill, such fact will be treated as admitted on appeal from a decree of dismissal. The Chicago Junction Case, 44 Sup. Ct. 317.

(c) An order of the Interstate Commerce Commission, under Interstate Commerce Act, §5, par. 2, as amended by Transportation Act 1920 authorizing a railroad company to acquire control over terminal railroads located within the Chicago switching district is void, and may be set aside by the court, when the commission's finding that such an acquisition will be for the interest of the public is unsupported by evidence. The Chicago Junction Case, 44 Sup. Ct. 317.

(d) In a suit against the United States, a railroad company, by competitors of defendant railroad company, and others to set aside an order of the Interstate Commerce Commission authorizing defendant railroad company to acquire control over terminal railroads located within the Chicago switching district, HELD, that it was proper to join the terminal companies and their stockholders as defendants and demand a restoration of the status quo, in view of Act Feb. 11, 1903, Judicial Code, §212 and Act Feb. 19, 1903, §2 notwithstanding a contention that Act Oct. 22, 1913, does not confer consent to sue the United States in an action in which it is sought to set aside an order and rights acquired by private persons thereunder. The Chicago Junction Case, 44 Sup. Ct., 317.

(e) Where plaintiffs were competitors of defendant railroad company, and users of terminal railroads located within the Chicago switching district, and were parties to the proceeding before the Interstate Commerce Commission, they had, under Judicial Code, § 212 such a legal interest in an order of the Interstate Commerce Commission authorizing defendant railroad company to acquire control over such terminal roads, resulting in diversion of traffic to defendant, as entitled plaintiffs to challenge the validity of the order by suit. The Chicago Junction Case, 44 Sup. Ct. 317.

FISH CARS

See Cars and Car Supply § 8½.

FLOATAGE

See Ferries; Lighterage.

CASES 1887-1908

(a) A through rate of $3.40 per ton on roofing slag in carloads from Leesport, Pa., to Harlem River Station is grossly unreasonable and is rendered so by the exclusive share of $2.10 to the New York, New Haven, & Hartford Railroad Company for transfer by its car floats from Communipaw to Harlem River, the reasonable compensation for which service would not exceed $1.00, which, with the rate of $1.30 allowed

carriers to Communipaw, would constitute the reasonable and lawful rate of $2.30 per ton. Warren-Ehret Co. v. Central R. of New Jersey, 8 I. C. C. 598.

(ab) The rate on roofing slag, carloads, from Leesport, Pa., to Harlem River station, is $3.40 per ton, of which the carriers to Communipaw, N. J., on the Hudson river, receive $1.30 per ton, the balance going to the New Haven for its service in carrying the slag by its car floats from Communipaw around New York City to its Harlem river station. Such through rate aso applies as a group rate to numerous stations on the New Haven in what is known as the Hartford group, including Waterbury, Conn. The freight could be transferred by an independent lighterage company from Communipaw to Harlem for 80c per ton, and the railroads terminating on the New Jersey shore generally allow 60c per ton for lighterage to points within the New York lighterage limits. HELD, that the through rate of $3.40 to Harlem River is grossly unreasonable, and is rendered so by the excessive share of $2.10 to New Haven for transfer by its car floats from Communipaw to Harlem River; that reasonable compensation for such delivery by car float should not exceed $1.00 per ton or a through rate of $2.30 per ton, reparation awarded. Warren-Ehret Company v. C. R. R. of N. J. 8 I. C. C. 598.

IMPORTANT CASES SINCE 1908

(ac) Carriers are justified in requiring shippers to load and unload freight to and from cars on floats when ordered and placed at vessels or outside piers. Swift & Co. v. N. Y., N. H. & H. R. R., 44 I. C. C. 481, 486.

(b) Car floats carry loaded cars and lighters carry freight which has been unloaded. Export Freight Free Time, 47 I. C. C. 162, 165.

(c) The burden is on the carrier who proposes to increase the minimum of cars for which car-float service in lieu of lighterage on lighterage free freight will be furnished. Car Float Service New York Harbor, 49 I. C. C. 259, 266.

See Control and Regulation.

§½. In General.

CASES 1887-1908

(a) The decision of the Commission in New York Board of Trade & Transportation v. Pennsylvania R. Co. et al, having been overruled by the U. S. Sup. Ct. in T. & P. Ry. Co. vs. Interstate Commerce Commission, 162 U. S. 197, 40 L. ed. 940, 5 Inters. Com. Rep. 405, it follows that carriers are not, as a matter of law, prohibited from making rates from points in the United States to points in foreign countries, or from points in foreign countries to points in the United States, of which the inland division or share accruing to carriers within the United States is less than the tariff rate of such carriers on domestic shipments of similar commodities. Kemble v. Boston & Albany R. R. Co., 8 I. C. C. 110.

(b) Carrier's inland share of rates to or from foreign countries may be less than the tariff rate on domestic shipments. Kemble v. Boston & A. R. Co., 8 I. C. C. 110.

(c) The Act to Regulate Commerce does not, as a matter of law, prohibit a carrier by railroad from making a through rate from a point within the United States to a foreign destination of which its division shall be less than the amount charged by it for the corresponding transportation of domestic merchandise to the port of export. Nor is it, as a matter of law, in violation of the Act for such carrier to make a lower rate to the port of export upon traffic which is exported than upon that which is locally consumed, for the export rate is in essence the division of a through

rate. Texas & Pacific R. Co. v. Interstate Commerce Commission, 162 U. S. 197, 40 L. ed. 940, 5 Inters. Com. Rep. 405, cited and applied. Kemble v. Boston & Albany R. Co., 8 I. C. C. Rep. 110, cited and approved. Export & Domestic Rates, v. 8 I. C. C. 214.

(d) The Act to Regulate Commerce was intended to and does apply, not only in cases of direct injury to particular individuals or industries, but also in cases involving indirect injury to the community as a whole, and in the absence of some justifying reason, it would not be right for American railroads to permanently transact business for foreigners at a less rate than that for which they render a corresponding service to American citizens. Export & Domestic Rates, v. 8 I. C. C. 214, 265.

(e) The Act to Regulate Commerce applies to the transportation of export and import traffic, and the jurisdiction of the Commission over such traffic is not denied, but is distinctly affirmed in 162 U. S. 197. Export and Domestic Rates, 8 I. C. C. 214, 255.

(f) Having elected to enter into the carriage of interstate freights and thus subjected itself to the control of the Commission, it would not be competent for the company to limit that control, in respect of foreign traffic, to certain points on its roads and exclude other points. In the matter of alleged violations of the act by the St. L. & S. F. R. Co., 8 I. C. C. 290, 302.

(g) Public policy urgently requires that the inland transportation of import and export commerce should be subject to the act, and the publishing and maintaining of tariffs upon such traffic imposes in most instances no hardship upon the carrier. There may be cases in which a modification of this rule would be of service to the carrier without detriment to the public, and perhaps other instances in which such a modification should be granted in the interest of both the carrier and the public. This can only be accomplished by an amendment of the act, since the provisions of that statute are mandatory, and the Commission has no power to modify their requirements. If carriers are to any extent relieved from giving the notice now required of advances and reductions in rates upon foreign commerce, they should in all cases file with the Commission the rates actually made, and give such further notice to the public as may be possible. Re Tariffs on Export and Import Traffic, 10 I. C. C. 55, 81.

(h) The act now requires the publication of import and export tariffs in the same manner as domestic tariffs. In the matter of the publication and filing of tariffs on export and import traffic, 10 I. C. C. 55, 63.

(i) If carriers are to any extent relieved from giving the notice now required of advances and reductions in rates upon foreign commerce, they should in all cases file with the Commission the rates actually made, and give such further notice to the public as may be possible. Re Tariffs on Export and Import Traffic, 10 I. C. C. 55.

(j) While the regulating statute may be applied to the reasonableness of a rate from a point in Canada to a point in the United States, it is clear that no law of the United States can apply to a discrimination between places in a foreign country. Cist v. Michigan C. R. Co., 10 I. C. C. 217.

IMPORTANT CASES SINCE 1908

(k) Regulatory power of Congress extends to transportation of foreign commerce within United States, but jurisdiction to Commission does not. Seymour v. M. L. & T. R. R. & S. S. Co., 35 I. C. C. 492, 493.

(l) The so-called Elkins Act is inapplicable to the continuous transportation of goods in bond from a foreign country through the United States to a foreign country. Canales v. G. H. & S. A. Ry., 37 I. C. C. 573, 574.

(m) The Commission is of the opinion that the Cummins Amendment does not apply to transportation from a point in the United States to a point in an adjacent foreign country. Export Bill of Lading, 64 I. C. C. 347, 354.

(n) The act does not require that rates of Ocean S. S. Co. of Savannah on shipments moving on export bills of lading from Savannah, Ga., to nonadjacent foreign countries be published and filed with commission. This transportation has been conducted without filing of tariffs for nearly seven years; no complaint has been made; and no objection is made to its continuance. If steamship company is subjected to limitations of the act it will be deprived of a substan-

tial portion of its total traffic, and such requirement would operate to disadvantage of carriers and the public through loss of service over an available route. Ocean Steamship Co. of Savannah, 78 I. C. C. 251.

ALL OTHER CITATIONS

Hamlen & Sons v. I. C. R. R. Co., 212 Fed. 324, 327; Express Classification, 59 I. C. C. 347, 354; Ocean Steamship Co. of Savannah, 78 I. C. C. 251, 256.

§1. Jurisdiction of Commission.

See Export Rates and Facilities; Interstate Commerce Commission I.

CASES 1887-1908

(a) Import and export traffic is not removed from the jurisdiction of the Commission by the decision of the United States Supreme Court in Texas & Pacific Railway Company v. Interstate Commerce Commission, 162 U. S. 197, 40 L. ed. 940, 5 Inters. Com. 405, but, on the contrary, the effect of that decision is to extend such jurisdiction; and the Commission has full authority to pass upon the grievance of any individual or locality, which is alleged to arise from rates upon export or import goods as compared with rates on domestic merchandise. Kemble v. Boston & A. R. Co., 8 I. C. C. 110.

(ab) If carriers are to any extent relieved from giving the notice now required, of advances and reductions in rates upon foreign commerce, they should in all cases file with the Commission the rates actually made, and give such further notice to the public as may be possible. Re Publication & Filing of Tariff, 10 I. C. C. 55.

(ac) The carriers will be afforded an opportunity to adjust their tariffs and arrangements, and, if so advised, present the subject to Congress, provided, however, that in the meantime all carriers which do not publish and maintain import and export tariffs shall file with the Commission as promptly as possible a statement of the rates actually charged. If the Act is not amended within a reasonable time, it will be the duty of the Commission to enforce the publication of import and export rates in the manner now provided by law. Re Tariffs on Export and Import Traffic, 10 I. C. C. 55.

IMPORTANT CASES SINCE 1908

(b) The Commission may regulate interstate traffic, whether by rail or by a combined rail and water route, from point of receipt to point of delivery; but the Commission in its control over foreign commerce is limited to the regulation of such traffic, whether by railroad or by a combination of rail and water carriers, from and to the point of transshipment. Cosmopolitan Shipping Co. v. Hamburg-American Packet Co., 13 I. C. C. 266, 271.

(c) A rail carrier may control or connect with a line of steamships engaged in foreign commerce, with which it may interchange business as freely as with another rail carrier, and it may quote a combined rate for the through movement, the agent of the railroad company acting as the agent of the steamship company in so doing. An inland carrier may go into the foreign shipping business without contravening any provision of the Act to Regulate Commerce; nor is there anything in such statute which denies to a rail carrier the right to quote a rate from an inland point to a foreign destination over its own through route or by any other route. But as to such carriers engaged in foreign business, the rail carrier has, so far as this law is concerned, a purely contractual or proprietary relation, not a relation related or controlled in any manner by the Act. On foreign commerce the rate to be published with the Commission should be the rate to the port and from the port, an open rate, which any who desire to do so may use with equal advantage. The publication of such rates does not in any manner limit the very valuable privilege of through billing. Such through billing should clearly separate the liability of the rail and the ocean carrier and show the published rate of the inland carrier. The routing of the freight, however, should remain with the shipper and upon him may be imposed no greater charge to the port when his freight goes by one ocean line than by another. Cosmopolitan Shipping Co. v. Hamburg-American Packet Co., 13 I. C. C. 266, 281.

(d) The Commission has no control over the steamships from New York to foreign countries. Ullman v. Adams Express Co., 14 I. C. C. 340, 345.

(e) No joint through rates are recognized with water carriers beyond the seas. Borgfeldt & Co. v. S. P. Co., 18 I. C. C. 552, 553.

(f) Commission has no power to establish through routes or joint rates to destinations in a foreign country. Aransas Pass Channel & Dock Co. v. G. H. & S. A. Ry. Co., 27 I. C. C. 403, 414.

(g) Transportation of sugar from Germany, through the United States in bond, to destinations in Mexico is not subject to jurisdiction of Commission. Seymour v. M. L. & T. R. R. & S. S. Co., 35 I. C. C. 492, 493.

(h) Commission has no power to require the issuance of through bills of lading to foreign destinations, but may require the discontinuance of practices which create unjust discriminations or undue preferences. Evans Lumber Co. v. C. of G. Ry. Co., 43 I. C. C. 476, 479.

(i) The Act to Regulate Commerce specifically confers jurisdiction upon the Commission over traffic shipped from a foreign country to any place in the United States and carried to such place from a port of entry either in the United States or in an adjacent foreign country. Carlowitz & Co. v. C. P. Ry., 46 I. C. C. 290, 291.

(j) The Commission's jurisdiction over transportation to or from a foreign country is limited to that part of the transportation which takes place within the United States. Payment of Charges in United States Currency, 59 I. C. C. 263, 264.

(k) The Commission has jurisdiction over the rail transportation which takes place wholly within a state on traffic moving to ports by water from interstate or foreign points of origin. International Agricultural Corp. v. Director General, as Agent, 60 I. C. C. 726.

(l) The Commission's territorial jurisduction carries up to the international boundary line, at which that of Congress itself halts, and as to foreign commerce is thus coextensive with that of the federal government. No act of Congress has force of law beyond that boundary line, but up to it, as everywhere else within the United States, the interstate commerce act has full effect just as the federal control act had effect when these shipments moved. International Nickel Co. v. Director General, as Agent, 66 I. C. C. 627, 629.

(m) The extent of the jurisdiction of the Commission over commerce between this country and a foreign country is limited to that part of the transportation within the United States. But all carriers parties to joint rates are jointly and severally liable for any damages resulting from their application. California Sugar & White Pine Co. v. Director General, 73 I. C. C. 338, 339.

(n) The Commission's jurisdiction over commerce between the United States and a foreign country is limited to that part of the transportation within the United States. But all carriers parties to joint rates are jointly and severally liable for any damages resulting from their application. California Sugar & White Pine Co. v. Director General, as Agent, 73 I. C. C. 338, 339.

(o) In view of the parenthetical clause in paragraph (4) of section 15 of the act, the limitation put upon the commission's authority to establish through routes and joint rates does not apply where the Commission finds it to be in the public interest to require one carrier to afford another carrier the use of its terminals. Port Arthur Chamber of Commerce v. T. & F. S. Ry. Co., 73 I. C. C. 361, 363.

(p) The Commission has no jurisdiction or control over ocean rates to foreign ports, and the equalization of port rates on basis of the water rates from the ports would place upon the rail lines the burden of the disabilities of the several ports, arising from such causes as distance from foreign markets, difference in harbor facilities, and other conditions affecting ocean rates. No stabilization of rail rates would be possible under such an adjustment. Tobacco from Ohio River Crossings, 73 I. C. C. 384, 387.

(q) Complaint attacking failure of Pacific Ocean carriers to comply with routing instructions shown in through prepaid bills of lading in connection with shipments from Australia and New Zealand to Boston, Mass., in that shipments were forwarded all-water instead of water-and-rail as routed; assessment of charges on such shipments in addition to those collected at point of origin; failure to refund amount in excess of charges applicable over route of movement; and seeking establishment of through routes and joint rates on such shipments; dismissed for want of jurisdiction. Complainant's members must seek recourse against Pacific Ocean steamship companies under their contracts of carriage elsewhere than before this commission. Boston Wool Trade

Asso. v. A., T. & S. F. Ry. Co., 83 I. C. C. 445.

(r) Commission has no jurisdiction to prescribe conditions of contract of carriage entered into at point in adjacent foreign country so far as movement to border is concerned; or of misrouting by carrier prior to receipt of shipment by American carrier at border point. This is equally applicable to shipment from nonadjacent foreign country up to time American rail carrier receives shipment. Boston Wool Trade Asso. v. A., T. & S. F. Ry. Co., 83 I. C. C., 445, 449.

(s) No specific reference whatever in the act relates to through import bills of lading. Although specific jurisdiction over through export bills of lading is conferred by section 25, and some jurisdiction is acquired because traffic originates on rail carriers within United States, the commission has refused to determine and prescribe terms and provision of export bills respecting service after delivery to steamship company at port of export, in view of limitations on commission's jurisdiction over ocean carriers. It follows that the commission has no jurisdiction over traffic, or an ocean carrier of that traffic, from nonadjacent foreign country prior to delivery at port by ocean carrier to American rail carrier. Boston Wool Trade Asso. v. A., T. & S. F. Ry., Co., 83 I. C. C. 445, 449, 450.

(t) Traffic moving from a foreign country through the United States to a foreign country is not subject to the jurisdiction of the Commission. U. S. Steel Products Co. v. Director General, 88 I. C. C., 57, 58.

W. 315; Pacific Mail S. S. Co. v. Western Pac. R. Co., 251 Fed. 218, 220.

§2. Determination of Status.

See Interstate Commerce I.

IMPORTANT CASES SINCE 1908

(a) The character of the commerce not its mere accidents, must determine whether a shipment is local or foreign. But the mere intention of the shipper to export his traffic, unaccompanied by any circumstances or outward indication that the traffic is in fact for export, is not sufficient to stamp it as foreign commerce. Port Arthur Milling Co. v. T. S. F. Ry. Co., 28 I. C. C. 697, 700.

ALL OTHER CITATIONS

Texas & N. O. R. Co. v. Sabine Train Co., 33 Sup. Ct. 229, 227 U. S. 111; Curry & Whyte Co. v. D. & I. R. R. Co., 32 I. C. C. 162, 171; Application S. P. Co. in re Operation S. S. Co., 32 I. C. C. 690, 697; Bailey v. M. P. Ry. Co. (Mo.), 171 S. W. 44, 46; Virginia-Carolina Chemical Co. v. S. A. L. Ry., 39 I. C. C. 660.

FORWARDERS

See Aggregate Shipments; Classification §12; Loss and Damage §10⅞.

CASES 1887-1908

(a) Refusal to permit a forwarding company to perform an act involving the use of the tracks and terminal facilities of a receiving company is not a discrimination or denial of equal facilities by one carrier to a conecting carrier within the prohibition of the Interstate Commerce Act. Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co., 4 I. C. R. 537.

(b) Before allowing a carload rating to a carload shipment a carrier is entitled to require that the goods shall be loaded at one time and place, that but a single bill of lading shall be issued, and that the shipment shall be from one consignor to one consignee, but when the goods are so loaded and by the terms of sale become the property of the consignee upon delivery to the carrier, the

carrier has no right to inquire whether the consignee obtained his title from one or several owners; and if it accords the carload rate in case the consignor is the owner, failure on its part to extend the same privilege when the consignee is the owner, violates sections one, two and three of the Act to Regulate Commerce. The rule in defendant's classification covering the application of carload rates to carload lots should be so modified as to accord the same rating to consignor and consignee when the condition of ownership after the property is delivered to the carrier is the same. Buckeye Buggy Co. v. C., C., C. & St. L. Ry. Co., et al., 9 I. C. C. 620.

(c) Neither a carrier nor an agent of a carrier may act as forwarding or reconsigning agent for shipper in such manner as to evade or defeat the terms or intent or purpose of the law. Morgan v. M. K. & T. Ry. Co., 12 I. C. C. 525.

IMPORTANT CASES SINCE 1908

(d) Where shipments belonging to, and ultimately intended for, various consignees have been united in a bulk shipment from one consignor to one consignee, it is unlawful for the carrier to refuse to apply the rate applicable upon the shipment as a whole and to insist upon making a separate charge upon the package or packages intended for each ultimate consignee. California Commercial Ass'n v. Wells Fargo & Co., 21 I. C. C. 300.

(e) Under a decision of the Commission holding that carrier can not refuse to accept at carload rates carloads of goods assembled by forwarding agents, the findings of the Commission as to the operation of the business of forwarding agents and as to the difficulties involved in the efforts of carriers to determine the nature and character of a person tendering goods for shipment are findings of fact not open to review by the courts. I. C. C. v. D. L. & W. R. R., 20 U. S. 235, 256, 31 Sup. Ct. 392, 55 L. ed. 448.

(f) A forwarding agent is a person within the meaning of that word as employed in the second section of the Act. I. C. C. v. D. L. & W. R. R., 220 U. S. 235, 254, 31 Sup. Ct. 392, 55 L. ed. 488.

(g) A carrier cannot, when goods are tendered to it for transportation, make the mere ownership of the goods the test of the duty to carry or discriminate in fixing the charge for carriage, not upon any difference inhering in the goods or in the cost of the service rendered in transporting them, but upon the mere circumstance that the shipper is or is not the real owner of the goods. Hence a forwarding company is entitled to aggregate package shipments so as to take advantage of a carload rate. I. C. C. v. D. L. & W. R. R. Co., 220 U. S. 235, 252, 31 Sup. Ct. 392, 55 L. ed. 448.

(h) A finding of the Commission that to permit forwarding agents to avail themselves of carload rates does not result in unjust discrimination to shippers is one of fact and is not open to review in the courts. I. C. C. v. D. L. & W. R. R., 220 U. S. 235, 255, 31 Sup. Ct. 392, 55 L. ed. 448.

(i) Complainant consignee employed a forwarding company at New York to assemble a number of packages of goods belonging to complainants individually, and offered same in bulk to defendant express company to be carried to San Francisco at its bulk rates. Dedendant's rules forbade its agents from receiving goods so assembled and complainants were charged the individual package rate on them. HELD, said rules were unjustly discriminatory as permitting defendant to collect a greater compensation from certain persons for the transportation of property than it collected from other persons for a like and contemporaneous transportation of a like kind of traffic under substantially similar circumstances and conditions, and complainants were entitled to reparation on the basis of bulk rates (Knapp and Harlan, Comm'rs, dissenting.) California Commercial Ass'n v. Wells-Fargo & Co., 14 I. C. C. 422, 434; sustained, I. C. C. v. D. L. & W. R. R., 220 U. S. 235, 252, 31 Sup. Ct. 392, 55 L. ed. 448, reversing 166 Fed. 499, enjoining the Commission's order.

FREIGHT AGENCIES

CASES 1887-1908

(a) Nearly all of the railroads south of the Ohio river, and east of the Mississippi, including the three railroad defendants in this case, are members of an association known as the Southern Railway & Steamship Association. Said association, in making rates, is governed by competition. The same influences control in the association in making rates, as would control without it; and while the influences may not go to the same extent, and there may be produced by the association more harmonious relations between its members, competition influences, and, to a large extent, controls, the rates agreed upon by the association. Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 4 I. C. R. 332.

(ab) The lien of carriers upon freight for charges earned is satisfied by the payment of rates for their services which they are lawfully entitled to demand, and a guaranty executed to a carrier by consignee or third parties, which might be construed to enable the carrier, in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made. Phelps & Company v. The Texas & Pacific Railway Company 4 I. C. R. 363.

(ac) An agreement of a transcontinental association to promote harmony of action between carriers and the maintenance of joint rates, with a proper division of through rates, is not on its face unlawful. Duncan v. Atchison, T. & S. F. R. Co. (Com.) 4 I. C. R. 385.

(ad) An association of railroad companies cannot be held to create a monopoly within the meaning of the Anti-Trust Act of Congress, where it is not intended to have any trade of its own, but to be a mere adviser of its members, who are competitors of each other. U. S. v. Trans-Missouri Freight Asso. (C. C. App. 8th C.), 4 I. C. R. 443.

(b) An association of railroad companies for mutual protection by establishing and maintaining reasonable rates, rules, and regulations, is not illegal as in restraint of trade, under the Anti-Trust Act of Congress, merely because it incidentally tends to restrict competition in some degree, where each member of the association must still compete with other members for business, and while regular monthly meetings are provided for, at which action may be taken, five days' notice of any proposed reduction of rates or change of rules must be given, and members are bound by the decision of the association unless they give written notice in ten days thereafter to the contrary, and any member may withdraw on thirty days' notice. United States v. Trans-Missouri Freight Asso. (C. C. App. 8th C.), 4 I. C. R. 443.

(ba) The division of territory between

the eastern and western lines provided for in the Southern Railway & Steamship Association Agreement, is without warrant in law and appears to be made for the benefit of the carriers without regard to the interests of shippers in the territory so divided, to whom it is in effect a denial of the privilege of shipping their goods or produce to market by the line or route they may prefer. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 592.

(c) An agreement of a transcontinental association to promote harmony of action between carriers and the maintenance of joint rates, with a proper division of through rates, is not on its face unlawful. Duncan v. Atchison, T. & S. F. R. Co., 6 I. C. C. 85.

(d) Joint traffic agreement not within act of 1890. A contract between railroad companies by which a joint traffic association is made, which does not lessen the number of carriers, their facilities, or raise the rates except expressly as they shall not be contrary to law, and leaves each road to carry on its own business within the lawful limits as before is not within the act of Congress of 1890 (26 Stat. at L. 209), prohibiting a contract, combination in the form of trust, or conspiracy in restraint of trade or commerce among the several states, although it dispenses with soliciting agents or with the control of them. U. S. v. Joint Traffic Asso., 7 I. C. C. App. XXXVI.

(e) United States cannot enjoin carrying out of joint traffic agreement. The right of the United States government to control carriers engaged in interstate and foreign commerce and in carrying the mails does not extend to the maintenance of a suit in equity to enjoin railroad companies not chartered by the United States from making or carrying out a joint traffic agreement which does not violate the statutes against pooling of freight or earnings. U. S. v. Joint Traffic Asso., 7 I. C. C. App. XXXVI.

(f) Association for securing proportional rates valid. A joint traffic agreement between railroads providing for reasonable, although equal or proportional, rates for each carrier, or a just and proportional rate for each carrier, or a just and proportional division of traffic among carriers,—is not a pooling of their traffic or freights, or a division of the net proceeds of their earnings within the prohibition of their Interstate Commerce Law, §5 U. S. v. Joint Traffic Asso., 7 I. C. C. App. XXXVI.

IMPORTANT CASES SINCE 1908

(g) Upon investigation in response to United States Senate resolution, the maintenance and operation of the Trans-Continental Freight Bureau found not to violate any of the provisions of the act, and facts regarding its organization, management, control, duties, activities, influences upon competition between rail carriers, and other matters ascertained. Trans-Continental Freight Bureau, 77 I. C. C. 252.

(h) Transcontinental Freight Bureau as at present organized and operated serves many useful purposes, promotes economy and efficiency, and is of advantage to shippers as well as carriers. Its operation tends to obviate or remove discrimination as between persons and localities which the law condemns. Trans Continental Freight Bureau, 77 I. C. C. 279.

FREIGHT BILLS

IMPORTANT CASES SINCE 1908

(a) The Commission considered the form of freight bills; the question being whether upon reconsignment the freight bill presented at the ultimate destination might disclose to the new consignee the name of the original consignor, original point of shipment, or route of shipment to the consigning point. HELD, (1) that the freight bill upon a reconsigned shipment must not show the name of the original consignor, except with the consent of the original consignee; and (2) must not show the point of origin or routing, except where the ultimate consignee is required to pay the through charges. In the Matter of Freight Bills, 38 I. C. C. 91.

ALL OTHER CITATIONS

In the Matter of Freight Bills, 29 I. C. C. 496, 497; Michigan Steel Boat Co. v. M. C. R. R. Co., 32 I. C. C. 576, 577.

FREIGHT CHARGES

See Credit Account; Export Rates and Facilities; Overcharges; Transportation §4; Undercharges.

CASES 1887-1908

(a) A railroad company receiving freight from a connecting road is under no obligation to advance to the latter the charges due it for transportation, although if it does so it has a lien for payment on the goods. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. D. Or.) 4 I. C. R. 249.

(aa) The insistence by a railway company upon its rights to prepayment of the freight upon goods received from a connecting carrier rather than to consent to retain a lien upon the goods until payment is made or to hold the consignee responsible in case of delivery before payment as is done in case of freight received from other carriers cannot be construed to be a denial of equal facilities or a discrimination against the former. Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co., 4 I. C. R. 537.

(ab) In the absence of some prohibition or restraint, common law or statutory, a common carrier may lawfully demand or contract for such compensation for carriage as he may be able to obtain, without regard to its unreasonableness. Swift v. Philadelphia & R. R. Co. (C. C. N. D. III) 4 I. C. R. 633.

(b) The lien of carriers upon freight for charges earned is satisfied by the payment of rates for their services which they are lawfully entitled to demand, and a guaranty executed to a carrier by consignees or third parties, which might be construed to enable the carrier, in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made. Phelps & Co. v. Texas & Pacific Railway Co., 6 I. C. C. 36.

(ba) A railroad company which has agreed with connecting lines upon a joint tariff of rates in compliance with the Interstate Commerce Act is required to collect the interstate rate for freight passing over its own and such lines and which it delivers to the consignee, and not a smaller sum named in the bill of lading issued by the initial carrier. Mo. Kans. & Tex. Ry. Co., v. P. B. Stover, 7 I. C. C. App. XV.

(c) Payment for transportation. Nothing but money can be lawfully received or accepted in payment for transportation subject to the act, whether of passengers or property, or for any service in connection therewith, it being the opinion of the Commission that the prohibition against charging or collecting a greater or less or different compensation than the established rates in effect at the time precludes the acceptance of services, property, or other payment in lieu of the amount of money specified in the published schedules. Railroad Telegraph Contracts, 12 I. C. C. 11.

IMPORTANT CASES SINCE 1908

(d) A carrier has, as a matter of law, the right to require the prepayment of all charges before accepting a shipment for transportation. New York Produce Exchange v. B. & O. R. R., 46 I. C. C. 666, 671.

(e) It is well settled that the interstate shipper is liable to pay the rate fixed by the printed and published schedules of the carrier on file with the Commission. Joseph L. Lieberman Iron Co. v. Director General, 61 I. C. C. 21, 22.

(f) Payment for that part of the transportation within the United States can only be made in the currency thereof. Abrasion Co. v. Director General, 69 I. C. C. 630, 634.

(g) Refusal of carriers to adjust in United States currency, without discount, claims for charges collected in Canadian currency in excess of those applicable on traffic from points in United States to points in Canada, found not to have resulted in unjust, unreasonable, or discriminatory charges. In tendering in lawful money of the United States the difference between the charges collected in Canadian money, discounted at the then current rate of exchange, and those applicable in lawful money of the United States, carriers offered to do all that the law requires. California Sugar & White Pine Co. v. Director General, as Agent, 73 I. C. C. 338.

(h) The act prohibits a carrier from charging, demanding, collecting, or receiving a greater or less or different compensation than that specified in its tariffs, and nothing but money can be lawfully accepted in payment for transportation subject to the act. California Sugar & White Pine Co. v. Director General, 73 I. C. C. 338, 339.

(i) Nothing but money can be lawfully accepted in payment for transportation subject to the act. California Sugar & White Pine Co. v. Director General, as Agent, 73 I. C. C. 338, 339, 340.

(j) The uniform bill of lading contains an agreement that the owner or consignee shall pay the freight and all other lawful charges accruing on the property. The receipt of goods under such a bill of lading is evidence of a contract by the person receiving them to pay the freight. 4 Ruling Case Law, 858. Keith Co. v. Director General, 83 I. C. C. 167, 172.

(ja) The rule is that the consignor is primarily liable for the payment of the freight, and this rule is enforced, independent of the question whether the consignor is the owner, and regardless of the question whether the payment of freight is secured by a lien on the cargo, because the consignor is the party for whom the service is performed. Missouri Portland Cement Co. v. Director General, 88 I. C. C. 492, 495.

(k) One to whom goods are shipped on consignment and has no other interest in the goods is liable for unpaid freight charges. Great Northern Ry. v. Hyder, 279 Fed. 783.

(l) A consignee, who is not at any time the owner of goods shipped, who has not agreed with either the shipper or the carrier that he will pay the freight, and who accepts the goods on the carrier's mistaken representation that the freight has been prepaid, is bound by such acceptance to pay the freight; shipper, carrier, and consignee all being agents and trustees for the public in the matter of the enforcement of freight rates. Great Northern Ry. Co. v. Hyder, 279 Fed. 783.

(m) Where the statement of claim, in an action by carrier against shipper for deficiency resulting after deducting price for which carrier sold the coal shipped from the amount claimed for freight and demurrage, alleged that the coal was refused by consignee and it was necessary for carrier to sell it, as shipper, after notice, had failed to give orders, and that the selling price was the highest amount which could be obtained at public sale after notice, was defective, in that it stated the pleader's conclusions, rather than the ultimate facts. Davis v. Smutzinger, 281 Fed. 640.

(n) In an action by a carrier against a shipper for a deficiency resulting after deducting price for which carrier sold coal shipped from the amount claimed for freight and demurrage, where it did not appear in the statement of the claim that carrier notified shipper of consignee's refusal, as required by the demurrage rules, under the conformity section of the Revised Statutes, in view of Pennsylvania Practice Act 1915, §§5, 20 (P. L. 483; Pa. St. 1920, §§ 17185, 17200), the statement of the claim was insufficient. Davis v. Smutzinger, 281 Fed. 640.

(o) A shipper of goods is entitled to notice of the time when and the place where the goods are to be sold to pay carriage and storage charges. Davis & Smutzinger, 281 Fed. 640.

(p) A carrier brought suit against a shipper for freight on ten carloads of coal not accepted by the consignee. The freight on the shipment amounted to some $4400.00 and the coal was sold for some $370.00, and suit was brought to recover the difference. It appears that Order 34-A of the Director General, as amended provided that shipments could be sold sixty days after notice of arrival is given consignee, but was not to be construed as permitting carriers to hold the commodities referred to until the freight and demurrage charges might equal the sale value of the shipments. It did not appear whether the sale of the coal was public or private nor that any notice of the sale was sent to the shipper, and it did not appear the shipper was given any opportunity to protect itself. HELD, that the railroad could not recover the deficiencies in the charges. Davis v. Smutzinger, 281 Fed. 640.

(q) Where a car of strawberries consigned to Denver, Colo., was delivered to an express company at Troy, Kan., and while in transit shipper reconsigned the strawberries to Boston, Mass., and an agent of the express company issued a second receipt, merely showing receipt of strawberries at Troy for shipment to Boston, and this receipt was attached to a draft, the Boston consignee, taking up the draft, was liable only for transportation charges between Troy and Boston, as express company could not profit by their agent's misstatement of fact at the expense of innocent parties. American Express Co. v. Sweeney, 283 Fed. 691.

(qa A settlement between carrier and shipper by the payment and acceptance of a charge different from the rate in

the published tariff does not preclude either party from enforcing the lawful rate. Galveston, H. & S. A. Ry. Co. Lykes Bros. 294 Fed. 968.

(r) The consignee designated in the bill of lading is presumptively the owner of the goods shipped. New York Cent. R. Co. v. Warren Ross Lumber Co. (N. Y. 1922), 137 N. E. 324.

(s) The usual stipulation in a bill of lading that the consignor shall pay the freight imposes no obligation on the carrier to collect the freight before delivery to the consignee, and does not deprive the carrier of its right to collect of the consignor. New York Cent. R. Co. v. Warren Ross Lumber Co. (N. Y. 1922), 137 N. E. 324.

(t) The consignor of goods is ordinarily liable for the freight charges, since he requires the carrier to perform the service, and thereby obligates himself to pay therefor. New York Cent. R. Co. v. Warren Ross Lumber Co. (N. Y. 1922), 137 N. E. 324.

(u) Where a consignee exercises ownership over the goods by directing their delivery to another, and thereby becomes obliged to pay the freight charges, it is not relieved from its obligation merely because, in the written directions to deliver to another, it specified that delivery was to be upon collection of the freight charges, and the carrier may thereafter collect its charges from the original consignee, notwithstanding its delivery without collecting the charges. New York Cent. R. Co. v. Warren Ross Lumber Co. (N. Y. 1922), 137 N. E. 324.

(v) Consignee's direction to deliver to another on collection of freight does not relieve its liability for freight. New York Central R. Co. v. Warren Ross Lumber Co., 234 N. Y. 261, 137 N. E. 324.

(w) A stipulation that the consignee shall pay freight does not relieve consignor of duty. New York Central R. Co. v. Warren Ross Lumber Co., 234 N. Y. 261, 137 N. E. 324.

(x) Where defendant shipped certain goods under an order bill of lading, with directions to notify a certain party, and the railroad company delivered the goods without collecting freight charges, HELD, that such delivery did not waive the company's right to collect the charges from the shipper, since the company could not be held to make an election as to the party from which it desired to collect freight, nor be held to an estoppel without violating the purpose and spirit of the Interstate Commerce Commission Act, it being obliged to collect its freight charges in order to prevent preferences. New York Cent. R. Co. v. Federal Sugar Refining Co., (N. Y. 1923), 139 N. E. 234.

(y) The consignor is primarily liable for the carrier's charges, and under the Interstate Commerce Act the carrier cannot bind itself to collect the charges from the consignee, and not from the consignor, to permit which would permit discrimination between shippers, which that act was intended to prevent. New York Cent. R. Co. v. Federal Sugar Refining Co., 194 N. Y. S. 467.

(z) Where goods were shipped on a bill of lading to the order of the consignor, with instructions to notify the buyer, and the bill of lading showed on its face that the freight charges had not been prepaid, so that they should have been collected from the buyer, the delivery of the goods to the buyer without requiring payment of the freight charges, because of the negligence of the carrier's clerk in stating in the waybill that the charges were prepaid, prevents the carrier from recovering the freight charges from the consignor after the buyer had become insolvent. New York Cent. R. Co. v. Federal Sugar Refining Co., 194 N. Y. S. 467.

(aa) Where a carrier accepted a shipment of goods under an order notify bill of lading, it had no right to deliver the goods to the notify party without requiring the payment of its charges in accordance with the terms of the bill of lading, and thereafter to hold the consignor for such charges because of the insolvency of the notify party, since a rule permitting the carriers so to do would give them an opportunity to discriminate between shippers, contrary to the purpose of the Interstate Commerce Act. New York Cent. R. Co. v. Federal Sugar Refining Co., 194 N. Y. S. 467.

(bb) Even if the negligence of the carrier delivering goods shipped under an order notify bill of lading to the notify party without requiring payment of the freight by the notify party as required by the bill of lading does not relieve the consignor of its liability for the payment of such charges, the consignor can

set off against such liability its claim for damages caused by the carrier's negligence in billing the shipment as prepaid and delivering it without requiring payment of the charges. New York Cent. R. Co. v. Federal Sugar Refining Co., 194 N. Y. S. 467.

(cc) By accepting merchandise, consignees become liable for transportation charges. American Ry. Exp. Co. v. Heilbrunn, 198 N. Y. S. 801.

(cca) Where a carload of cucumbers were consigned to defendants in Buffalo, and they unloaded part of them and reshipped the car containing the balance to Rochester, with directions to deliver to a named firm on payment of freight, and this firm started unloading the car without having paid the freight charges, but on being interfered with by defendant's agent refused to accept the cucumbers, HELD, that defendants were liable for the freight. New York Cent. R. Co. v. Satuloff et al. 202 N. Y. C. 297.

(dd) Where a consignee is to pay freight, a court may take judicial knowledge of the method usually employed for the final carrier to pay the initial and the intermediate carriers their part. Southern California Commercial Co. v. Alberti, (Calif. 1922), 207 Pac. 1023.

(ee) In an action by a carrier against a shipper to recover freight, failure to plead the defense that the goods were destroyed through negligence in transportation prevents setting up the defense. Southern California Commercial Co. v. Alberti (Calif. 1922), 207 Pac. 1023.

(ff) Where a shipper consigned goods to himself, he was primarily liable to the carrier for the freight, and this obligation was not affected by the fact that the freight was not prepaid, nor by the shipper's transfer of the bill of lading, subject to the lien for freight charges, to a third party with whom the carrier had no contractual obligation. Southern California Commercial Co. v. Alberti (Calif. 1922), 207 Pac. 1023.

(gg) The carrier is entitled to its freight charges, notwithstanding a delay in shipment and its liability for such delay. Ulrich Mill Work Co. v. Missouri Pac. R. Co. (Kans. 1923), 212 Pac. 654.

(hh) Where a railroad company transports goods under a bill of lading which shows that the freight charges were to be collected from the consignee, and when the carrier, through its negligence, fails to collect, or even to attempt to collect, the charges from the consignee (although it could have collected them if it acted promptly) until after the consignee has become insolvent, the carrier can nevertheless recover the charges from the consignor. Southern Railway Co. v. Southern Cotton Oil Co., 19 Ga. App. 453, 91 S. E. 876. This ruling would not be affected by the fact that at the time of the delivery of the goods by the carrier to the consignee there existed an agreement between them that the carrier should deliver to the consignee all goods shipped, "charges collect" and allow the consignee one week in which to pay the transportation charges. Seaboard Air Line Ry. Co. v. Montgomery (Ga. 1922), 112 S. E. 652.

(ii) A common carrier may collect freight charges on goods either from the consignor or the consignee, unless it has entered into a special contract binding itself to collect the charges from one of them only. And a mere agreement between the shipper and the carrier that the goods should be shipped "charges collect" and a memorandum in the bill of lading to this effect would not constitute such a special contract. Southern Cotton Oil Co. v. Southern Railway Co., 147 Ga. 646, 95 S. E. 251. Seaboard Air Line Ry. Co. v. Montgomery (Ga. 1922), 112 S. E. 652.

(jj) A contract to pay carrier's charges will ordinarily be implied from consignee's acceptance of the freight. Davis v. Allen (S. C. 1923), 117 S. E. 547.

(kk) Consignor with whom the contract of shipment is made is primarily liable for the payment of freight charges, whether he is owner of the goods or not. Davis v. Allen (S. C. 1923), 117 S. E. 547.

(ll) In the absence of an acceptance of the goods by consignee or of other facts tending to prove that the ownership and jus disponendi is in consignee, a contract on the consignee's part to pay carrier's charges may not be implied from the mere presumption of ownership arising from his designation by shipper as consignee. Davis v. Allen (S. C. 193), 117 S. E. 547.

(mm) In an action to recover the difference between the interstate through rate and the sum of the interstate and

intrastate rates on lumber shipped to defendants at O., and reshipped to M., that possession of railroad cars was taken by the shipper at O., and that they were not rebilled to M., a point in the same state, for several days, would have justified the jury in finding, if shipper's intention had been in issue, that it was originally intended to end the movement at O., and that there was no through interstate shipment from the original shipping point to M. Baltimore & O. S. W. R. Co. v. Settle, 43 Sup. Ct. 28.

(nn) Money paid under duress or unlawful compulsion may be recovered. Bowers v. Missouri, K. & T. Ry. Co. of Texas (Tex. 1922), 241, S. W. 509.

(oo) The consignee of an interstate shipment of goods, who had made no contract with the carrier for the payment of the freight, and who assigned his interest in the goods before their delivery to him, and directed the delivery to the assignee which was made by the carrier, is not liable for the freight charges. Cleveland, C. C. & St. L. Ry. Co. v. Southern Coal & Coke Co. (Tenn. 1923), 248 S. W. 297.

(pp) The shipper's primary liability for payment of interstate freight charges based on the fact that he contracted for the shipment, cannot be released by express contract with the carrier and agreement to look to the consignee. Cleveland C. C. & St. L. Ry. Co. v. Southern Coal & Coke Co. (Tenn. 1923), 248 S. W. 297.

(qq) The consignor with whom the contract to ship is made is primarily liable for the freight, and his liability can only be discharged by a full payment either by the consignor or consignee. Cleveland C. C. & St. L. Ry. Co. v Southern Coal & Coke Co. (Tenn. 1923), 248 S. W. 297.

FUMIGATION IN TRANSIT

See Transit.

IMPORTANT CASES SINCE 1908

(a) Through rates on imported Egyptian cotton from Mystic Wharf, Boston, Mass., to New Bedford, Mass., stopped in transit for fumigation at a point in Boston, not found unreasonable or unduly prejudicial, it not being shown that the charges are improper for the respective services performed or that they are out of line with those for similar services in New England generally. New Bedford Board of Commerce v. Director General, as Agent, 58 I. C. C. 601.

FURNACE ALLOWANCES

See Allowances §8 (3⅛).

GAS COMPANIES

CASES 1887-1908

(a) A State Legislature has no power to prohibit the conducting of natural gas from points within to points without the State. State, Corwin, v. Indiana & O. Oil, G. & Min. Co. (Ind.) 2 I. C. R. 758.

(ab) Natural gas, when brought to the surface and placed in pipes for transportation, is an article of commerce. State Corwin, v. Indiana & O. Oil, G. & Min. Co. (Ind.), 2 I. C. R. 758.

(ac) State regulation of the pressure of natural gas transported in pipes within the State, which operates upon all alike, is not an unlawful regulation of interstate commerce. Jamieson v. Indiana Natural Gas Co. (Ind.) 3 I. C. R. 613.

(ad) The regulation of the pressure of natural gas transported in pipes is within the police power of the Legislature to be exercised according to its discretion in the absence of facts showing oppression or usurpation under a pretext of exercising police power, at least so far as constitutional provisions protecting vested or contract rights are concerned. Jamieson v. Ind. Natural Gas & Oil Co. 3 I. C. R. 613.

IMPORTANT CASES SINCE 1908

(ae) Since the Act of Congress to Regulate Commerce as amended June 9, 1906, expressly excepts gas companies, there is no implied exclusion of the police power of the states to regulate the sale of gas within their borders, although in interstate commerce, if they do not impose new rather than remote and incidental burdens thereon or discriminate against foreign products or introduce diversity and conflict where there is need of uniformity and harmony. In re Pennsylvania Gas Co. (N. Y. 1919), 12 N. E. 260.

(b) Though a gas company's franchise required it to disclose the source of its supply, a company supplying it with natural gas brought into the state from other states held not to have thereby voluntarily submitted itself to the jurisdiction of the state. State of Missouri v. Kansas Natural Gas Co., 282 Fed. 341.

(c) A state or its Public Service Commission has no authority to regulate the rate chargeable for gas by a company transporting it from another state and delivering it in interstate commerce to a distributing company. State of Missouri v. Kansas Natural Gas Co., 282 Fed. 341.

(d) The transportation of natural gas from one state to another is "interstate

Valley Coal Co. v. Director General, as commerce." State of Missouri v. Kansas Natural Gas Co., 282 Fed. 341.

(e) A state Public Utilities Commission can not regulate the price chargeable to local distributing companies for gas by one transporting the gas in interstate commerce by pipe line, and exercising no franchise rights acquired from the state, though Congress has not exercised its power of control over such rates. Central Trust Company of New York v. Consumers' Light, Heat & Power Co., 282 Fed. 680.

(f) Where natural gas is bought in an adjoining state by a Pennsylvania company for delivery at the state line, the quantity to be there ascertained by meter measurement, the interstate character of the shipment ended as such line, and it did not continue while the gas was being taken by the company in its pipes through the state for sale in installments at various points therein. Peoples National Gas Co. v. Public Service Commission (Penn. 1924), 123a 799.

(g) The question whether a state may withdraw a natural product, such as natural gas, from interstate commerce, by requiring companies handling it to prefer local consumers, is essentially a judicial question, and no less so in suits between state than in suits between private parties. Commonwealth of Pennsylvania v. State of West Virginia (1923) 43 Sup. Ct. 658.

GRAIN DOORS

See Allowances §8 (2); Facilities and Privileges §9.

GRAZING-IN-TRANSIT

IMPORTANT CASES SINCE 1908

(a) Defendant's agent erroneously quoted rate in effect via other routes as applying via route of movement, but tariff did not, at time shipment moved, permit grazing in transit at point here involved. Subsequently such lower rate established via route of movement. HELD, misquotation of a rate by a carrier does not of itself afford a basis for an award or reparation, and the Commission refuses to give retroactive effect to a transit arrangement except to remove unlawful discrimination. Taylor v. v. Director General, as Agent, 61 I. C. C. 109.

GROUND STORAGE

IMPORTANT CASES SINCE 1908

(a) Shipments arrived at Philadelphia Pa., and were unloaded on ground by carrier. Tariff provided for assessment of ground-storage charges, less than demurrage charges, upon written request for storage. No request for ground storage having been made, demurrage charges assessed. HELD: Following Kidston & Co., 74 I. C. C., 135, demurrage charges assessed found not unreasonable or discriminatory. International Steel Corp. v. P. R. R. Co., 78 I. C. C. 89.

GROUP RATES

See Blanket Rates

GUIDE BOOK

See Tariffs §12½.

HEAD LIGHT LAW

IMPORTANT CASES SINCE 1908

(a) Locomotive Headlight Law (Acts 1915, p. 257), has no application to engines engaged in interstate commerce; the federal Safe Locomotive Boilers Act having excluded the states from the right to legislate on the matter of interstate locomotive equipment, though the final federal rules on the subject of headlights on interstate locomotives were not promulgated by the Interstate Commerce Commission until after a railroad charged with violating the Locomotive Headlight Law of the state committed the offense. (Response of Supreme Court to certified question.) Louisville & N. R. R. v. State (Ala. 1917), 76 So. 505.

HOURS OF SERVICE LAW

IMPORTANT CASES SINCE 1908

(a) The penalty of $100 per day prescribed by the Interstate Commerce Act for the failure of a carrier to file such reports as may be required by the Interstate Commerce Commission, will not be exacted because the names of several employees were omitted by the carrier from its sworn report of violations of the Hours-of-Service Act which was required by an order of the Interstate Commerce Commission, where such omission was caused by an honest mistake in a genuinely doubtful case. U. S. of America v. Nor. Pac. Ry., 37 Sup. Ct. 22, 242 U. S. 190, 61 L. ed. 40.

(b) A terminal company, incorporated as a railroad company, which owned a terminal passenger station and the track leading thereto, used by various interstate railroads, which sold tickets and checked and loaded baggage for their trains, maintained a telegraph office through which their train orders were transmitted, operated all switches to and from its tracks, and through its station master directed the movements of all trains while on such tracks, HELD, a common carrier engaged in transportation of passenegrs and baggage by railroad in interstate commerce, and subject

to the provisions of the Hours of Service Act, as respects to its telegraph operator, who transmitted the train orders. United States v. Atlanta Terminal Co., 260 Fed. 779.

United States, 232 Fed. 349; United States v. Colorado W. & E. Ry. Co. 292 Fed. 916; United States v. Brooklyn East District Terminal, 39 Sup. Ct. Rep. 283; U. S. v. East Dist. Terminal, 39 Sup. Ct. Rep. 283.

ICING

See Refrigeration §3½.

IMMUNITY OF WITNESSES

See Procedure Before Commission §21.

CASES 1887-1908

(a) The bare possibility that by disclosure a witness may be subjected to the criminal laws of some other sovereignty, and that he may be put to the annoyance and expense of pleading his immunity by way of confession and avoidance, notwithstanding the law has given him immunity from prosecution therefor, is not sufficient to render such immunity insufficient to satisfy the constitutional guaranty of protection against being compelled to be a witness against himself. Brown v. Walker, 5 I. C. R. 369.

IMPORTANT CASES SINCE 1908

(aa) Witnesses who voluntarily appear before the Interstate Commerce Commission and give testimony concerning the financial operations of a carrier investigated by the Commission under a senate resolution and who do not claim the constitutional privilege of refusing to testify on the ground of self-incrimination cannot set up the fact of such testimony as a bar to a subsequent criminal prosecution. U. S. v. Skinner, 217 Fed. 870, 877.

(b) In view of the purpose of Congress in enacting the Immunity Act, viz., to make available compulsory incriminating testimony, and to remove the obstacle to the use of such testimony, and in view of the fact that the only obstacle to the disclosure of such testimony that needed removal was that presented by the fifth amendment, and that it applied only in favor of witnesses who assert their constitutional privilege, and so are in the attitude of being compelled to testify, and does not apply to those who testify without asserting their privilege, and who are in the attitude of voluntary witnesses, the immunity would be limited to the class of witnesses in whose favor alone the obstacle existed, i. e., those who assert their privilege to decline to answer upon the constitutional ground of a tendency to incriminate. United States v. Skinner, 218 Fed. 870, 878.

(c) It is not the duty of the government to inquire of a witness about to give testimony which may incriminate him, whether he claims his constitutional privilege to refuse to testify. United States v. Skinner, 218 Fed. 870, 879.

(d) The Immunity Act was intended only to make available testimony compulsorily given, and only to reward the unwilling giver of such evidence; that testimony given without the assertion of the constitutional privilege, or declined to be given upon any other ground than that of its incriminating tendency, is not compulsory testimony under the fifth amendment, and has always been available without new remedial legislation; and so, there being no necessity for conferring immunity on the giver of it, Congress will not be construed to have done so, where its language may be reasonably otherwise construed. U. S. v. Skinner, 218 Fed. 870, 880.

See Interstate Commerce I.

§1. In General.

CASES 1887-1908

(a) The Act to Regulate Commerce specifically provides for the regulation of the transportation of foreign merchandise when brought from a foreign

port of shipment to a port of entry of the United States and transported from such port of entry to a place within the United States upon a through bill of lading or when transported from a foreign port to a port of entry of a foreign country adjacent to the United States and transported from such port of entry to a place of destination within the United States upon a through bill of lading. N. Y. Board of Trade & Transportation v. Penn. R. Co., 3 I. C. R. 417.

(b) The regulation thus provided is such as regulates the rates, charges, facilities afforded and treatment of the foreign merchandise from the port of entry in either instance, as the case may be, to the place of destination of the merchandise within the United States, but it is not a regulation that extends to the control of rates made upon such foreign merchandise in the foreign port of shipment for its carriage to the port of entry of the United States or to the port of entry in a foreign country adjacent to the United States. N. Y. Board of Trade & Transportation v. Penn. R. Co., 3 I. C. R. 417.

(c) The regulation of the transportation of foreign merchandise from a port of entry to a place within the United States upon a through bill of lading does not extend to the control of rates made in the foreign port for its carriage to the port of entry of the United States or to a foreign country adjacent. New York Bd. of Trade & Transp. Co. v. Pennsylvania R. Co. (Com.), 3 I. C. R. 417.

(d) The circumstances and conditions surrounding the making of the rates upon such foreign merchandise in the foreign port of shipment have had their weight and operation in its foreign carriage to the port of entry and in the charges made and facilities afforded for that service, but after such foreign merchandise has been brought within the United States it encounters other circumstances and conditions that are controlling in this part of its carriage, namely, the laws of the United States made for the regulation of its rates and carriage. N. Y. Board of Trade & Transportation v. Pa. R. Co., 3 I. C. R. 417.

(e) With respect to that part of the carriage of such foreign merchandise between the ports of entry and the place of destination in the United States, the rule of the Statute is that it is entitled to no preference in rates, charges, facilities afforded and treatment over domestic merchandise or other merchandise when these are a like kind of traffic transported from such ports of entry to such places of destination, but as to that service stands upon the same basis of equality with domestic merchandise or other freight as to rates, charges, facilities afforded and treatment, and must be carried upon this part of its journey under the inland tariffs of the carriers established for the transportation of domestic merchandise or other freights, and under the same rules governing their carriage, as to weight, bulk, value, expenses of carriage and all such other circumstances and conditions as enter into the making of just and reasonable rates and of avoiding unlawful prejudice and unjust discriminations, such as is provided by the Statute. N. Y. Board of Trade & Transportation v. Pa. R. Co., 3 I. C. R. 417.

(f) The publication of inland joint tariffs for the transportation of foreign merchandise under the statute and of advances and reductions should be made at the port of entry and also at the point of destination of freight in the United States by posting the same in a public place at the depot of the carrier where the freight is received in the port of entry and where it is delivered at the place of destination in the United States. New York Board of Trade v. Pennsylvania R. Co., 3 I. C. C. 417, 442.

(g) The Act to Regulate Commerce specifically provides for the regulation of the transportation of foreign merchandise when brought from a foreign port of shipment to a port of entry of the United States and transported from such port of entry to a place within the United States upon a through bill of lading, or when transported from a foreign port to a port of entry of a foreign country adjacent to the United States and a place of destination within the United transported from such port of entry to States upon a through bill of lading. New York Board of Trade v. Pennsylvania R. Co., 3 I. C. C. 417, 439, 443.

(h) Complainant attacked rates charged on freight delivered to carriers at New York and Philadelphia as compared with rates charged on import traffic originating in a foreign country and moving within this country from New York and Philadelphia, as unreasonable and unjustly discriminatory. HELD, with respect to that part of the carriage

of such foreign merchandise between the ports of entry and the place of destination in the United States, the rule of the statute is that it is entitled to no preference in rates, charges, facilities offered and treatment over domestic merchandise or other merchandise when these are a like kind of traffic transported from such ports of entry to such places of destination, but as to that service stands upon the same basis of equality with domestic merchandise or other freight as to rates, charges, facilities afforded and treatment, and must be carried upon this part of the journey under the inland tariffs of the carriers established for the transportation of domestic merchandise, and under the same rules governing their carriage, as to weight, bulk, value, expense of carriage and all such other circumstances and conditions as enter into the making of just and reasonable rates and of avoiding unlawful prejudice and unjust discriminations, such as is provided by the statute. New York Board of Trade v. Pennsylvania R. Co., 3 I. C. C. 417.

(i) Upon the petition of the Interstate Commerce Commission, filed in this court under the sixteenth section of the Act to Regulate Commerce, for the enforcement of its order requiring the defendant to cease and desist from carrying an article of imported traffic shipped from any foreign port upon through bills of lading to any place within the United States at any other than the same rates established by the inland tariff of the defendant for the carriage of other like kind of traffic, HELD, (1) that the proceeding is not defective because the Southern Pacific Company, a connecting carrier participating with defendant in the carriage between certain points, was not made a party defendant herein. If the defendant is violating a proper order of the Commission it should be restrained from doing so and it cannot escape upon the objection that another wrong-doer is also violating it. (2) The Interstate Commerce Act would be emasculated in its remedial efficacy, if not practically nullified, if a carrier can justify a discrimination in rates merely upon the ground that, unless it is given, the traffic obtained by giving it would go to a competing carrier. A shipper having a choice between competing carriers would only have to refuse to send his goods by one of them unless given exceptional rates to justify that one in making the discrimination in his favor on the ground of the necessity of the situation. The order prayed for in the petition is grantel. The Interstate Commerce Commission v. Texas & Pacific R. Co., 4 I. C. R. 114.

(j) Disobedience of an order of the Interstate Commerce Commission prohibiting the carriage of traffic from foreign ports upon any other than the published inland tariff rates for similar freight from the port of entry to the point of destination, not permitted by the United States circuit court on the ground of the existence of competing water routes; but the general question whether rates for the inland carriage or foreign and domestic traffic must be the same, without regard to any circumstances which may exist in the foreign country, is not decided. Interstate Commerce Commission v. Texas & Pacific Ry., 4 I. C. R. 408.

(k) A carrier is not free to make dissimilarities to any extent it may choose in the freight rates on foreign and domestic traffic from the fact of the existence of some dissimilarity of conditions. Interstate Commerce Commission v. Texas & Pacific Ry., 4 I. C. R. 408.

(l) In deciding as to the lawfulness of a lower rate to import traffic than to domestic traffic in order to secure foreign freights which would otherwise go by other competitive routes, the fair interests of the carrier companies and the welfare of the community which is to receive and consume the commodities are to be considered. Texas & P. R. Co. v. Interstate Commerce Commission, 5 I. C. R. 405.

(m) That the disparity in rates between import and domestic traffic was too great to be justified by ocean competition cannot be made by the circuit court of appeals the basis of an affirmance of a decision by the circuit court sustaining an order of the Interstate Commerce Commission denying that ocean competition should be regarded, when there was no allegation or testimony in the court below as to the extent to which a disparity in rates could be justified by ocean competition if that could be considered. Texas & P. R. Co. v. Interstate Commerce Commission, 5 I. C. R. 405.

(n) Congress may prescribe standard for import. The act of Congress of March 2, 1897, prohibiting the im-

portation of tea inferior in purity, quality, and fitness to the standard established under the act, is a valid exercise of the police power of Congress to regulate commerce. Lung v. Jackson, 8 I. C. C. App. XLV.

(o) Congress may prohibit maintenance of rates on interstate railroad. Congress has the power to prohibit, as in restraint of interstate commerce, a contract or combination between competing railroad companies to establish and maintain interstate rates and fares for the transportation of freight and passengers on any of the railroads, parties to the contract or combination, even though the rates and fares thus established are reasonable. So, Congress has the power to forbid any agreement or combination among or between competing railroads for interstate commerce, by means of which competition is prevented. The court says, "The question really before us is whether Congress, in the exercise of its right to regulate commerce among the several states or otherwise, has the power to prohibit, as in restraint of interstate commerce, a contract or combination between competing railroad corporations entered into and formed for the purpose of establishing and maintaining interstate rates and fares for the transportation of freight and passengers on any of the railroads, parties to the contract or combination, even though the rates and fares thus established are reasonable. Has not Congress, with regard to interstate commerce and in the course of regulating it in the case of railroad corporations, the power to say that no contract shall be legal which shall restrain trade and commerce by shutting out the operation of the general law of competition? We think it has. We think it extends at least to the prohibition of contracts relating to interstate commerce which would extinguish all competition between otherwise competing railroad corporations, and which would in that way restrain interstate trade or commerce. We do not think that when the grantees of this public franchise are competing railroads seeking the business of transportation of men and goods from one state to another, that ordinary freedom of contract in the use and management of their property requires the right to combine as one consolidated and powerful association for the purpose of stifling competition among themselves, and of thus keeping their rates and charges higher than they might otherwise be under the laws of competition. And this is so, even though the rates provided for in the agreement may for the time be not more than reasonable. They may easily and at any time be increased. It is the combination of these large and powerful corporations, covering vast sections of territory and influencing trade throughout the whole extent thereof, and acting as one body in all matters over which the combination extends, that constitutes the alleged evil, and in regard to which, so far as the combination operates upon and restrains interstate commerce, Congress has the power to legislate and prohibit." U. S. v. Joint Traffic Asso. et al., 8 I. C. C. App. LIV.

(p) The Interstate Commerce Commission has jurisdiction over import traffic. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(q) The Act to Regulate Commerce applies to the transportation of import traffic. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(r) Whether rates upon import traffic contravene provisions of the Act to Regulate Commerce is a question of fact. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

IMPORTANT CASES SINCE 1908

(s) And its jurisdiction over import traffic attaches at ports of entry. Carey Mfg. Co. v. G. T. W. Ry. Co., 36 I. C. C. 203, 207.

(t) So the Commission has jurisdiction over the domestic movement of traffic originating in Canada. Emery & Co. v. B. & M. R. R., 38 I. C. C. 636.

(u) The Act specifically confers jurisdiction upon the Commission over traffic from a foreign country to any place in the United States and carried to such place from a port of entry either in the United States or in an adjacent foreign country. It does not, however, give to the Commission any extra territorial authority, but merely defines the nature of the traffic to which its jurisdiction extends. The extent of its jurisdiction in connection with the transportation to or from adjacent foreign country is over that portion of the transportation within the confines of the United States. The Commission can not prescribe joint through rates from points in adjacent or non-adjacent foreign country to points in

the United States, but can control the charges for that portion of the service by carriers in the United States. Carlowitz & C. v. C. P. Ry., 46 I. C. C. 290, 291, 292.

Director General, as Agent, 63 I. C. C. 93.

II. REASONABLENESS OF RATES AND DISCRIMINATION.

§2. In General.

See Evidence §13 (4).

CASES 1887-1908

(a) In deciding as to the lawfulness of lower rates to import traffic than to domestic traffic in order to secure foreign freights which would otherwise go by other competitive routes, the fair interests of the carrier companies and the welfare of the community which is to receive and consume the commodities are to be considered. Texas & P. R. Co. v. Interstate Commerce Commission (U. S. Sup.) 5 I. C. R. 405.

IMPORTANT CASES SINCE 1908

(b) Carriers may make import rates lower than domestic rates, but what carriers may do and what the Commission may compel them to do are distinct questions. Cairo Milling Co. v. M. & O. R. R. Co., Unrep. Op. 2119.

(c) A rate applied upon an imported commodity has been fixed largely with reference to the competition of other ports, and is not a proper standard with which to compare domestic rates. 1915 Western Rate Advance Case, 35 I. C. C. 497, 611.

(d) The publication of import rates on certain traffic lower than those on domestic traffic does not of itself constitute unjust discrimination against the domestic shipper, and the question of whether or not unjust discrimination exists is one of fact to be determined by considering whether the circumstances and conditions controlling the import rates are dissimilar from those surrounding the domestic rates. Import and Domestic Rates, 36 I. C. C. 389, 396.

(e) The action of carriers in maintaining lower rates on import traffic is not of itself unlawful, and unjust discrimination, if alleged, is a question of fact to be determined by the circumstances and conditions in each case. Import and Domestic Rates—Clay, 39 I. C. C. 132, 139.

(f) It is well established that the maintenance of rates and practices in connection with import traffic differing from those on domestic traffic does not of itself constitute undue prejudice against the domestic shipper, and that the question of whether or not undue prejudice exists is one of fact to be determined by considering whether the circumstances and conditions controlling the import rates are dissimilar to those surrounding the domestic rates. Storage in Transit Rules at Minnesota Transfer, 78 I. C. C. 265, 267.

(g) The Commission in determining whether the difference made by the carrier between the import and domestic rate or practice is unduly prejudicial, should consider all the circumstances and conditions, including the interests of carriers, producers, dealers, and consumers. Texas & Pac. Ry. v. Interstate Com. Com., 162 U. S. 197. Storage in Transit Rates at Minnesota Transfer, 78 I. C. C. 265, 267.

III. CONTROL AND REGULATION.

§3. In General.

CASES 1887-1908

(a) Public policy urgently requires that the inland transportation of import and export commerce should be subject to the Act to Regulate Commerce, and the publishing and maintaining of tariffs upon such traffic imposes in some instances no hardship upon the carrier. There may be cases in which a modification of this rule would be of service to the carrier without detriment to the public, and perhaps other instances in which such a modification should be granted in the interest of both the carrier and the public. This can only be accomplished by an amendment of the Act, since the provisions of the statute are mandatory, and the Commission has no power to modify their requirements. Re Publication & Filing of Tariff, 10 I. C. C. 55.

IMPORTANT CASES SINCE 1908

(aa) The director general's contention that the Commission is without juris-

diction to award reparation on the shipments which moved from Vancouver through Canada to destinations in the United States on joint rates is not sustained. American Trading Co. v. Director General, 78 I. C. C. 387, 391.

ALL OTHER CITATIONS

Import and Domestic Rates on Vegetable Oils from Pacific Coast Points to Central Freight Association and Western Trunk Line Points, 78 I. C. C. 421.

IV. TARIFFS AND CONSTRUCTION.

IMPORTANT CASES SINCE 1908

§4. In General.

(a) Complainant attacked fifth class rate of$2.375 charged on imported pickled sheep skins, carloads, from Pacific ports to various destinations in Atlantic seaboard territory between June 25, 1918 and Feb. 15, 1919, unreasonable to extent it exceeded domestic rate of $1.25 applicable on sheep slats, green, carloads. In 66 I C..C. 415, rate attacked found unreasonable and reparation awarded. The tariff provision published in connection with the rate of $1.25 to the effect that 3 per cent of the gross weight at point of origin would be deducted for preservatives makes it clear that the application of that rate was not restricted to green hides in the strict sense of the word but was intended to cover untanned skins which had undergone some temporary preserving process. HELD, rate charged inapplicable and illegal to extent it exceeded $1.25, reparation awarded. Tanners Council of the United States of America v. Director General, 78 I. C. C. 27.

(b) Complainant attacked rule of defendant's that upon all goods imported from the Orient in less carload lots and combined into car load lots at Seattle and Tacoma for shipment to various points in eastern states the charge of 65c per ton exacted for loading into cars from the warehouse on G. N., docks at Seattle and C. M. & St. P., at Tacoma was unjustly discriminatory and that the charge of $7.50 per car for switching from the dock to team tracks was unjust and unreasonable. There is no way of knowing at the time of unloading into the warehouse which consignments may afterwards be consolidated into carloads. The loading charges were lawfully assessed. There appears to be no necessity for intermediate switching to a team track. Nor does it, appear that any switching service distinct from the service of handling the car from the warehouse to the assembling yard, which is included in the line haul rate, is performed. HELD, rates attacked not unreasonable nor unjustly discriminatory but collection of switching charges attacked was without tariff authority, reparation awarded. Frank P. Dow Company v. G. N. Ry., 81 I. C. C. 649.

(c) The Commission has no jurisdiction to prescribe conditions of contract of carriage entered into at point in adjacent foreign country so far as movement to border is concerned; or of misrouting by carrier prior to receipt of shipment by American carrier at border point. This equally applicable to shipment from nonadjacent foreign country up to time American rail carrier receives shipment. Boston Wool Trade Asso. v. A., T. & S. F. Ry. Co., 83 I. C. C. 445, 448, 449.

(d) No specific reference whatever in the act relating to through import bills of lading. Although specific jurisdiction over through export bills of lading is conferred by section 25, and some jurisdiction is acquired because traffic originates on rail carriers within United States, the commission has refused to determine and prescribe terms and provisions of export bills of lading respecting service after delivery to steamship company at port of export, in view of limitations on commission's jurisdiction over ocean carriers. It follows that the commission has no purisdiction over an ocean carrier or of that traffic, from a nonadjacent foreign country prior to delivery at port, by ocean carrier to American rail carrier. Boston Wool Trade Asso. v. T. & S. F. Co., 83 I. C. C. 445, 448, 449, 450.

INDEX

INDICTMENTS

See Crimes VII.

INDIRECT ROUTES

See Circuitous Routes.

INDUSTRIAL RAIL ROADS

See Common Carrier; Tap Lines.

CASES 1887-1908

(a) The Hutchinson & Arkansas River R. R. Co. owns between four and five thousand feet of railway siding adjoining one of several plants belonging to the

Hutchinson-Kansas Salt Company, in Hutchinson, Kans., designated as so-called "trust mills." This railroad company does not own any equipment or rolling stock nor is it in any way engaged as a common carrier. Three railway companies entering Hutchinson made joint tariffs with the H. & A. R. R. Co., which, on salt shipped to Missouri River points, gave the latter 25 per cent of the rate, but not exceeding 50 cents per ton. The H. & A. R. R. Co., is controlled by officers of the Salt Company and the earnings of the railroad company are subject to that control. Since this division was allowed to the H. & A. R. R. Co., the Salt Company has sold salt at Missouri River points at prices with which the independent salt mills in Hutchinson could not compete. The declared purpose of making this joint rate with the H. & A. R. R. Co. was to enable the salt manufacturers to meet competition from other quarters, and the division of the joint rate to the H. & A. R. R. Co. could not have that effect unless it inured to the benefit of the salt producers. HELD, That granting the division of the rate to this so-called railroad is a mere subterfuge to give a concession in the rate, and is therefore unlawful. Re Transportation of Salt from Hutchinson, 10 I. C. C. 1.

(ab) The Commission instituted an investigation as to divisions allowed companies owned by industries. The Granite City, Alton & Eastern Ry. was organized for the purpose of operating several thousand feet of railway used in the business of the St. Louis Sirup and Preserving Company and located on the latters private grounds at Granite City, Ill. The Granite City company has constructed a short track outside the limits of the grounds of the Preserving company and uses, jointly with other parties, another track about 3,000 feet in length. By means of these tracks the Granite City company connects with other railroad companies and is paid by the latter certain divisions and transportation charges on traffic shipped by the Preserving Company and hauled to such connections by the Granite City company. Assuming the Granite City company and the Preserving company are identical in ownership, concerning which a definite finding is not made, HELD, that the payments to the Granite City company constitute rebates and are illegal. In the matter of divisions of joint rates and other allowances to terminal railroads, 10 I. C. C. 661.

IMPORTANT CASES SINCE 1908

(ac) Where the industrial line acts only in the capacity of a plant facility and not a common carrier, the trunk lines need not, in the absence of unjust discrimination, make any allowance so long as they are ready to perform the switching wherever by custom and general usage the line haul rate covers that service. Stewart Furnace Co. v. P. R. R. Co., 68 I. C. C. 528, 532.

(b) The payment by an industrial railway of per diem with or without reclaims is not the proper basis for settlement for the use or detention of foreign cars. Mount Hope Mineral Railroad v. C. R. R. of N. J., 74 I. C. C. 195, 200.

(c) The question of per diem reclaim allowances to industrial common carriers has been before the Commission for many years in connection with the general investigation concerning industrial railways and their relationship to proprietary industries. In 61 I. C. C. 551, the Commission required the industrial roads, in substance, to settle their car hire accounts with their trunk line connections on the basis of rates equivalent to the contemporaneous charge, computed as if there were an average demurrage agreement with each connection, three days free time being allowed the industrial carrier on cars received loaded and returned empty, or received empty and returned loaded, and six days on cars received loaded and returned empty under load. Certain industrial carriers requested a rehearing on the subject for the purpose of eliminating this rule so far as they were concerned. CHICAGO SHORT LINE. The controlling interest is held by interests which also have holdings in two industries which furnish over 90 per cent of the cars handled annually. The short line owns 1.18 miles of main track and 6.17 miles of yard track and has trackage rights over 9.18 additional miles of track. It has no tracks within the plant of any shipper served by it and does only such interplant service as is performed generally by railroads throughout the district. MANUFACTURERS JUNCTION RAILWAY. This railway operates 1.86 miles of main track, and 5.07 miles of siding and has trackage rights over 9.8 miles of track. The propriety industry is the Western Electric Company. ILLINOIS NORTHERN RAILWAY. It operates over 6.95 miles of main track and 29.99 miles of siding. The proprietary industry

is the International Harvester Company. PULLMAN RAILROAD. It owns 6.21 miles of main track and 6.719 miles of spur track and leases 3.03 miles of main track and 5.596 miles of spur track. It serves fourteen industries in addition to the proprietary industry. Pullman Company. All of the above companies are located in the Chicago switching district. BAY STATE RAILROAD. Fully described in 58 I. C. C. 680, located in the Toledo, O., switching district, proprietary industry, Sun Co. HELD, Previous finding in 61 I. C. C. 551, as herein modified provides a proper basis for settlement of car hire by the Chicago Short Line, Manufacturers Junction, Illinois Northern, Pullman, Bay Terminal, Lake Erie & Fort Wayne, Lakeside & Marblehead, and Valley roads; that the free time allowed in the previous order is sufficient in the case of the four carriers last named but in case of the Chicago Short Line, Manufacturers Junction, Illinois Northern and Pullman roads a proper free time would be 96 hours in case of cars received empty and returned loaded or received loaded and returned empty, and 192 hours in the case of cars received loaded and returned loaded, except cars received loaded and reconsigned or reshipped to points off the lines of these carriers without being loaded as to which the free time should be 72 hours. The Birmingham Southern rules, as applied to the eight companies named above, shall be further modified by providing that the rules shall not apply to private cars or to cars delivered to the industrial carrier through railroad error; that 24 hours free time shall be allowed on cars handled in intermediate switching service; that except in the Chicago switching district 48 hours free time shall be allowed on cars received loaded and reconsigned or reshipped to points off the lines of the industrial common carrier without being unloaded; that in the case of cars destroyed, or held for repairs, on the tracks of the industrial common carrier, car hire shall accrue or cease in the same manner as does per diem under the per diem and master car builders rules of the American Railroad Association; and that debits or demurrage accruing on cars while held for repairs shall be charged at the lowest contemporaneous demurrage rate. Lake Erie & Fort Wayne Railroad Company, 78 I. C. C. 475.

(d) The per diem agreement is not a proper basis for settlement by an industrial railway for the use or detention upon its lines of foreign cars. Lake Erie & Fort Wayne R. R. Co., 78 I. C. C. 475, 477.

(e) The possiblity of undue prejudice is just as great where there is a common ownership of the stock of the railway and the industry, and the Commission has made no distinction in this class of cases because of the different manner in which the stock was held where there was in fact an identity of interest. Lake Erie & Fort Wayne R. R. Co., 78 I. C. C. 475, 480.

INSPECTION

See Bill of Lading §9½; Cars and Car Supply §7½; Classification §12¾; Express Companies §31; Facilities and Privileges §9¼; Loss and Damage §7½; Weights and Weighing §12.

IMPORTANT CASES SINCE 1908

(a) The inspection of grain is now provided for by law. The purpose of this inspection, whether performed by government or otherwise, is the determination by a competent and impartial authority, independent of both vender and vendee, of the grade of commodities offered for sale, insuring fair treatment, avoiding disputes, and promoting trade in the commodities. While it is apparent that inspection is primarily for the benefit of the trade, it indirectly benefits the carriers by tending to increase the tonnage of the commodities and, in some cases, by reducing the detention of shipments at destination through their more prompt acceptance by consignees. It cannot be assumed that these benefits to the carriers are

a fair offset to the regular detention of equipment and the other services necessitated by inspection at reconsigning points. The carriers are as clearly entitled to compensation for these services as for others. Reconsignment Case, 47 I. C. C. 590, 636, 637.

(b) Inspection is a necessary and valuable commercial adjunct of the marketing of commodities, and the stoppage and necessary detention of shipments for the purpose is a reasonable and proper service. However, the Commission can not hold that the carriers must perform this service without adequate compensation. Reconsignment Case, 47 I. C. C. 590, 641.

(c) Inspection of grain shipments springs from requirements of law based on business usage, and it is a general custom to perform this service without charge, provided disposition orders are furnished within a specified time, and it falls within the rule laid down in 35 I. C. C. 47, as being a service included in the freight rate. Reconsignment Case No. 3, 53 I. C. C. 455, 468.

(d) While it is true that in isolated cases lines at certain markets have imposed a charge upon cars held for inspection, without allowing any free time for the furnishing of disposition orders, such charges have usually been levied upon delivery of the car to a connecting line, have apparently had for their purpose retention of the traffic upon the carriers own rails, have ordinarily been absorbed by the connecting carriers, and are not at all typical of the general situation. Reconsignment Case No. 3, 53 I. C. C. 455. 469.

(e) Inspection of grain has been general for many years and the transit services of various kinds in connection with that traffic have been urged by the carriers in defending their rates on grain. Reconsignment Case No. 3, 53 I. C. C. 455, 469.

(f) There seems to be no good reason why the rules and charges which are applicable on grain held for inspection should not also extend to seeds, for no substantial differences in character or treatment have been disclosed; but this can not be said of hay or straw. Reconsignment Case No. 3, 53 I. C. C. 455, 471.

(g) It is the practice to inspect grain for export from north Atlantic ports at the elevators, most of which are owned by the railroad. Frequently the unloading tracks of these elevators are congested, with the result that the cars are held up in the railroad yards. Instead of waiting for such cars to be placed on the elevator tracks, the inspectors draw their samples while the cars are standing in the railroad yards. In such cases the cars are not held for inspection but for the convenience of the carriers. Reconsingnment Case No. 3, 53 I. C. C. 455, 472.

(h) No charge may be made when cars are inspected while being held in railroad yards or at outside points for the convenience of the carrier. Reconsignment Case No. 3, 53 I. C. C. 455, 472.

(i) The making of two charges for inspection, one at intermediate points and the other at destination market, will not arise under proposed rules, in the case of grain and seed, since the charge is made dependent upon the time when inspection is reported. Reconsignment Case No. 3, 53 I. C. C. 455, 472.

(j) Conplaint attacked as unreasonable carrier's practice of inspecting lumber in transit rather than at a point of shipment to determine whether or not the cars are loaded to full visible capacity. In their exceptions to the report proposed by the examiner complainants expressed the belief that the new minimum and loading rules prescribed in Lumber Carload Minima, 68 I. C. C., 98, will enable them to load cars in such a way as not to incur a penalty and therefore withdrew the request for inspection at point of origin. Brooks-Scanlon Lumber Co. v. Director General, as Agent, 73 I. C. C. 109, 111.

INSULATED CARS

See Cars and Car Supply §9⅝; Facilities and Privileges §7½.

INSURANCE

See Marine Insurance.

CASES 1887-1908

(a) The business of marine insurance is not interstate commerce. Hooper v. California (U. S. Sup.) 5 I. C. R. 610.

(b) Corporations engaging in marine

insurance, like other insurance companies, may be entirely excluded by a state from doing business therein, or allowed to enter only on performance of specified conditions. Hooper v. California (U. S. Sup.), 5 I. C. C. 610.

IMPORTANT CASES SINCE 1908

(c) The reasonableness of insurance premiums paid by the carrier for the shippers account for property stored by the carrier in a public warehouse pending acceptance by consignee is not within the jurisdiction of this Commission; and the Act does not require that rates for such insurance be published in the carriers tariffs. No part of the insurance charges are shown to have resulted from the carriers demand for payment of an illegal rate. Cottonseed Products Co. v. St. L. & S. F., 53 I. C. C. 574.

(d) The act does not require that rates for such insurance be published in the carriers' tariffs. Cottonseed Products Co. v. St. L. S. & S. F. Ry. Co., 53 I. C. C. 574, 577.

(e) Joint tariffs limited liability for marine risk on shipments moving rail and water. Subsequently tariffs amended to include marine insurance in the rate for full value, the same as provided on shipments moving all rail. HELD, subsequent amendment amounted in effect to a voluntary reduction in the rate by amount of insurance premiums, but such voluntary reduction is not of itself sufficient ground for a finding that the rate previously in effect was unreasonable. Old Dominion Co. v. Director General, as Agent, 63 I. C. C. 43.

(f) Complainant seeks to recover as reparation the amount of certain insurance premiums paid by them to various marine insurance companies to cover the marine risk on carloads of copper bullion, copper matte and blister copper. Shipments moved from Douglas, Globe, Morenci and Clarksdale, Ariz., by rail and water through Galveston, Tex., to New York City and points in that district. There were in effect lower rail and water rates on copper bullion from Cananea, Mexico through Galveston to New York via the S. P. without limitation of marine risk to any designated value. Subsequently the Director General assumed marine insurance for the full value of the shipments. The subsequent tariff amendments by which marine insurance was included in the freight rate for the full value of the shipments amounted in effect to a voluntary reduction in the rate by the amount of the insurance premiums, which of course vary with fluctuations in value of the copper transported. HELD, failure of defendant to include marine insurance for the full value of the shipments did not result in charges which were unreasonable, unduly prejudicial or otherwise unlawful. Old Dominion Co. v. Director General, 63 I. C. C. 43.

INTERCHANGE OF TRAFFIC

See Cars and Car Supply §20, §30; Switch Tracks and Switching §6, §7; Through Routes and Joint Rates VII; Transfer; Water Carrier.

CASES 1887-1908

(a) A carrier is not liable for rates made by a connecting road. Allen v. Louisville, N. A. & C. R. Co., 1 I. C. C. 621; Crews v. Richmond & D. R. Co., 1 I. C. R. 703.

(ab) Nor can a common carrier, as a reason for refusal to afford to another common carrier the customary reasonable and equal facilities for the interchange of traffic, assign the fact that such other common carrier supplies no public necessity, the public having been fully accommodated without it. All railroads created by competent public authority must be conclusively presumed to be conveniences, and other common carriers cannot refuse to exchange traffic with them on any suggestion or showing to the contrary. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R Co., 2 I. C. R. 102.

(ac) Where the charter of a railroad company provided "that any and all such railroad or railroads hereafter constructed may connect and join with the road hereby contemplated, the connection thus authorized is a physical, and not a business connection, and it does not require an interchange of traffic at the point of junction. Kentucky & In-

diana Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. C. 351; Overruling Decision of the Interstate Commerce Commission in the same case, 2 I. C. R. 102.

(ad) A carrier cannot be compelled by a new connection formed with its road by another railroad, at a point where there are no facilities for handling freight, to concede the use of its own track and terminal facilities to the new company, and accomplish the interchange of traffic at its own yards and with its own employes. The use of such advantages can be acquired only by mutual agreement. Kentucky & Indiana Bridge Co. v. Louisville & N. R. Co., (C. C. D. Ky.), 2 I. C. C. 351. Overruling decision of the Interstate Commerce Commission in the same case, 2 I. C. R. 102.

(ae) Complainant, Kentucky & Indiana Bridge Co., alleged the L. & N. R. R. refused to interchange traffic with it and to join in through rates and routes to interstate points. The K. & I. B. Co., has the chartered powers of a common carrier and is such de facto. It is, therefore, under the Act entitled to demand of railroad companies whose lines are intersected by its tracks, the same reasonable, proper and equal facilities for the interchange of traffic and for the receiving, forwarding and delivering of property that may lawfully be demanded by other carriers under the act. HELD, refusal unlawful. Kentucky & Indiana Bridge Co. v. L. & N. R. R., 2 I. C. C. 102.

(b) A common carrier, as a reason for refusal to afford to another common carrier the customary reasonable and equal facilities for the interchange of traffic, can not assign the fact that such other common carrier supplies no public necessity, the public having been fully accomodated without it. All railroads created by competent public authority must be conclusively presumed to be conveniences, and other common carriers can not refuse to exchange traffic with them on any suggestion or showing to the contrary. Kentucky & Indiana Bridge Co. v. L. & N. R. R., 2 I. C. C. 102, 111.

(c) Little Rock & Memphis Railroad Company attacked refusal of the East Tennessee, Vicksburg & Georgia R. R., to provide equal facilities for interchange of traffic. HELD, the Commission under the present act is not authorized to prescribe through arrangements and interchange of traffic. Little Rock & Memphis R. R. v. E. T. V. & G. R., 2 I. C. C. 454.

(d) Proceeding to compel respondent to transfer freight cars from the tracks of one company to those of another. HELD, the National regulations are not in all respects co-extensive with the power of Congress, and do not provide for ordering thru routes and through rates. While it is the duty of a state carrier which engages in interstate commerce to forward traffic offered from a connecting line, there is no authority under the Act to compel the carrier to forward the traffic over a route not operated or selected by itself. Mattingly v. Pennsylvania Company, 2 I. C. C. 806, 813.

(e) A railroad company can require a connecting company to receive through cars and take freight in them over its line without transfer, although the use of the latter's terminals and terminal facilities will necessarily be rendered for the service, and although the roads are parallel and rival lines and the service of transporting the freight has been practically performed by one company, which needs the assistance of its rival simply to deliver the freight at points near the terminus of its road; for this purpose no contract between the companies is necessary. The connecting company may be required to receive passengers under similar circumstances. Oregon Short Line & U. N. R. Co. v. N. P. R. Co., 3 I. C. R. 205.

(f) A railroad company may be compelled to offer the same facilities for interchange of cars and freight in bulk with one connecting road that it does with another. The Interstate Commerce Act prohibits such discrimination. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. D. Or.), 3 I. C. R. 205.

(g) The intervention between two railroads of a terminal system owned by an independent company will not prevent the roads from being connecting lines, within the meaning of the Interstate Commerce Act, requiring such lines to interchange business; at least where the stock of the terminal company is owned by the two roads jointly, or by one of them in such manner that the terminal in reality forms a part of its road. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. D. Or.), 3 I. C. R. 205.

(h) A railroad company can require a connecting company to receive through cars and take freight in them over its line without transfer, although the use of the latter's terminals and terminal facilities will necessarily be required for the service, and although the roads are parallel and rival lines, and the service of transporting the freight has been practically performed by one company which needs the assistance of its rival simply to deliver the freight at points near the terminus of its road. For this purpose no contract between the companies is necessary. The connecting company may be required to receive passengers under similar circumstances. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. D. Or.), 3 I. C. R. 205.

(i) What are reasonable facilities for an interchange of business between connecting railroad companies, within the requirements of the Interstate Commerce Act, depends upon the state of the traffic and the business; and the question is to be determined by what is considered reasonable by the public, and what is required to conveniently transact the business. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. D. Or.), 3 I. C. R. 205.

(j) An interest in another road, whether great or small, is not an excuse to a railroad company for discrimination in its favor against a third company. New York & N. R. Co. v. New York & N. E. R. Co. (Com.), 3 I. C. R. 542.

(k) Discrimination between connecting lines. The respondent, which is a carrier by a railroad running through the State of Connecticut to a point in New York, had had for some time a through billing arrangement and an agreement upon through rates for traffic over its own line destined to New York City, with petitioner's road, which connecting therewith at its New York terminus. This arrangement respondent broke up, and declined to enter into any new one in its place. The reason for breaking up the arrangement was that respondent had entered into a new arrangement with another road connecting with it at a point in Connecticut whereby a New York City line was formed over which it was intended to take the business which formerly passed over respondent's line to petitioner's. It was not complained that petitioner's road was insolvent or not responsible for its contracts, or that arrangement as before existing was unfair or unequal as between the parties thereto. Such action of the respondent is held to be in violation of the second paragraph of section three of the Act to Regulate Commerce, which provides that "every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business." N. Y. & N. R. Co. v. N. Y. & N. E. R. Co., 3 I. C. R. 542.

(l) One reason assigned for breaking up the arrangement with petitioner was that respondent was joint owner with the road making the new line, of a terminal company for delivery of freight in New York. This interest is not an excuse under the Statute for discrimination against petitioner's line, and this whether the interest in the terminal company was large or small. Petitioner did not require or ask the services of the terminal company, but only to be allowed to continue as competitor for the business affected by the discrimination, and to offer its services to the public as such. It is found in the case that the public interest was injuriously affected by the discrimination. N. Y. & N. R. Co. v. N. Y. & N. E. R. Co., 3 I. C. R. 542.

(m) A railroad company is not compelled to enter involutarily into contract relations with other companies by a statute requiring the adoption of joint rates, or, in default thereof, the fixing of such rates by railroad commissioners, as in the latter case the obligation of the company as to the rates is one imposed by law, and not by contract. Burlington, C, R. & N. R. Co. v. Dey (Iowa), 3 I. C. R. 584.

(n) Upon the petition of the New York & Northern Railway Company, filed in this court under the 16th section of the Act to Regulate Commerce, for the enforcement of an order of the Interstate Commerce Commission requiring

the defendant, under the third section of said Act, to cease and desist from discriminating in facilities and rates between petitioner and another connecting line. HELD, (1) The motion to dismiss must be determined upon the assumption that the averments of the petition and the findings of fact of the Commission (made by the statute prima facie evidence) correctly set forth the matters therein stated. (2) Neither the case before the Commission, nor its decision therein, was confined to the question of discrimination in rates and charges, and the requirement in the order to cease and desist from refusing to interchange traffic was proper. (3) The respondent has restored the joint through tariff and desisted from refusing to accept freight on through bills, but has so arranged the running of its trains that the facilities for interchange, forwarding and delivery are (as is alleged) substantially no better than before, and not equal to those afforded to the competing lines; and respondent contends that because no question of the hours of running trains was presented to the Commission its acts in that respect may not be shown before this court, acting summarily under section 16 of said Act. To refuse altogether to receive traffic from one connecting line; to receive it only under arrangements which impose such obligations upon the shippers as to transfer and rebilling as would make the transaction of the business impracticable in competition with a more favored line; to receive it without reshipment and transfer indeed, but to systematically neglect to forward it; to receive and forward it, but to so arrange the hours or manner of delivery as to deprive it of facilities equal to those afforded to traffic coming from the competitor; these and a great variety of other devices which might be suggested, while differing some in detail, are in substance practically the same. To require petitioner to bring a new proceeding each time the ingenuity of the offending carrier may devise some slight variation of the methods by the means of which its violation of the statute is persisted in, would be to fritter away the system of procedure provided in the statute to secure obedience to its requirements. The order of the Commission was no broader than the petition and proofs before them warranted; and this court may properly investigate the charge that respondent is disobeying the requirements of such order by acts and omissions in substance the same as those considered by the Commission, directed to the same end, and accomplishing precisely the same result. (4) There is nothing in the Act which makes mere distance between connecting points, whether a furlong, a mile, or ten or twenty, controlling of the question of discrimination in facilities to connecting lines. In the face of the finding of the Commission that "the physical conditions for interchange of traffic with both the connecting lines are suitable, adequate, and substantially equal," the requirements of the second clause of the third section seem to be plainly applicable. Until such finding is questioned, and the record in this court completed, further discussion of this point is unnecessary (5) The only link between respondent and its favored connecting line is such community of interest as springs from the existence of the contract for the interchange of traffic. If it be that such a contract makes each line a mere continuation or extension of the other, it is hard to conceive how a case of refusing equal facilities could ever be made out. The very granting of superior facilities to one line would make it a part of the one that favored it, and no longer a connecting road, when compared with its unsuccessful rival. (6) The "arrangments" between the respondent, the Housatonic road, and the New England Terminal Company, are such that they form a combination of carriers, within the meaning and effect of section 1, so as to make them a legal unit within the provisions of the Act, and, as such, jointly responsible for affording equal facilities in proper cases to competing lines connecting with such continuous lines. But, besides the duty which any one of these corporations may owe, jointly or with the others, it is not relieved from its obligation under the Act to all the roads which connect directly with itself. New York & N. R. Co. v. New York & N. E. R. Co., 4 I. C. C. 116.

(o) Combination with the other railroads, even if it charges one railroad with some duty toward lines connecting physically with another,, cannot excuse it from fulfilling its own obligations to roads which connect physically with itself, unless its union with the other combined lines is of such a character that their lines have become its own. New York & N. R. Co. v. New York & N. E. R. Co., (C. C. D. N. Y.), 4 I. C. R. 116.

(p) A railroad company which accepts freight in the cars of a connecting road, and transports it therein when it has cars of its own not in use, is not liable for mileage upon such cars, in the absence of an arrangement to that effect; but the existing custom that when a railroad takes the freight in the foreign cars because it has none of its own out of use, or because the freight would be injured by the transfer it shall pay certain mileage on the cars used, is reasonable and will be enforced. Oregon Short Line & U. N. R. Co. v. Northern Pacific R. Co., 4 I. C. R. 249.

(q) A railroad company is not, as a carrier of freight and passengers, under any obligation to take freight from a connecting road in the cars of the latter and transport it in such cars while its own cars are not in use, in the absence of any controlling custom among railroads. Oregon Short Line v. U. N. R. Co. v. Northern Pacific R. Co., 4 I. C. R. 249.

(r) The "running connections" which the Northern Pacific Railroad Company is required by its charter to make with other railroads include only such arrangements as to the time of trains and as to stations, platforms and other facilities, as will enable companies desiring to connect to do so without detriment or serious inconvenience. Oregon Short Line & U. N. R. Co. v. Northern Pacific R. Co., 4 I. C. R. 250

(s) The provision of the charter of the Northern Pacific Railroad Company that it shall permit any other railroad company to form running connections with it, imposes no obligation upon it to run the cars of another company over its road, except when the transfer of the freight contained therein would injure it Oregon Short Line & U. N. R. Co. v. Northern Pacific R. Co., 4 I. C. R. 250.

(t) No obligation to transport freight over its line in the cars of another company, when it has cars of its own not in use, to pay the charges thereon of the other company, or to honor tickets for passage over its lines issued by the other company, is imposed upon a railroad company by the Interstate Commerce Act § 3, providing that carriers shall give no undue or unreasonable preference, and shall afford all reasonable, proper, and equal facilities for the interchange of traffic. Oregon Short Line & U. N. R. Co. v. Northern Pacific R. Co., 4 I. C. R. 250.

(u) The provision of the Act of Congress of Feb. 4, 1887, § 3, that common carriers shall afford equal facilities for the interchange of traffic between their lines, but need not give the use of their tracks and terminal facilities to other carriers, does not affect a contract made by a railroad upon being given permission to use the streets of a city for its tracks, that it will pass the cars of other railway companies over its tracks when necessary to reach their customers' warehouses, and that it will not exceed a certain rate in its charges for switching. State v. Chicago, M. & St. P. R. Co. (C. C. N. D. Iowa), 4 I. C. R. 425.

(v) A railroad company receiving freight from a connecting road is under no obligation to advance to the latter the charges due it for transportation, although if it does so it has a lien for payment on the goods. Oregon Short Line & U. N. R. Co. v. Northern Pacific R. Co., 4 I. C. R. 450.

(w) A railroad company cannot be compelled to receive freight from a connecting road in cars other than its own, although it receives freight from another competing road in the cars of the latter and transports them over its road. Anthony Salt Co. v. Missouri P. R. Co. (Com.), 4 I. C. R. 537.

(x) The fact that one connecting railway company has a contract for the interchange of interstate commerce freight, which involves the use of the receiving railway's tracks and terminal facilities, will not authorize a court of equity to compel the receiving railway to grant a like contract or compensation to another connecting company. Anthony Salt Co. v. Missouri P. R. Co. (Com.) 4 I. C. R. 537.

(y) A railroad company cannot be compelled to receive connecting carriers' cars to facilitate transportation if it has idle cars of its own, although it receives freight from another competing road in the cars of the latter and transports them over its road. Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co., 4 I. C. R. 537.

(z) The refusal of a railroad company to honor tickets or coupons for passage issued by another company over its line does not constitute a discrimination

within the Interstate Commerce Act, as, in the absence of arrangement between the companies, there is no obligation on the part of either to honor tickets issued by the other. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co., (C. C. App. 9th C.), 4 I. C. R. 718 Aff'g, 249.

(aa) The provision of the Act incorporating the Northern Pacific Railroad Company, that it shall be its duty to permit any other railroad to form running connections with it on fair and equitable terms, does not require it to permit the use of its road by the cars of other companies or to honor tickets of such other companies. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. App. 9th C.), 4 I. C. R. 718 Aff'g. 249.

(bb) The refusal by a railroad company to transport freight on foreign cars originating east of a certain meridian, when its own cars are not in use but are free to be employed in the transportation desired, or where a transfer of freight will not be injurious to it, is not an unreasonable discrimination against another railroad company, or a denial to it of reasonable and proper facilities, under the Interstate Commerce Act, although it accepts in such cars freight originating west of such meridian. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. App. 9th C.) 4 I C. R. 718, Aff'g., 249.

(cc) The provisions of the interstate commerce law requiring connecting railroads to receive and deliver passengers and freight from other roads, and afford equal facilities for the interchange of traffic, apply with equal force to their officers and employees. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C C. N. D. Ohio), 5 I. C. R. 545.

(cca) It is not within the prohibition of the act of July 2, 1890, against contracts in restraint of trade for several railroad companies to enter into a contract for the interchange of through freight among themselves to the exclusion of rival roads, since such action was not illegal at common law and is not forbidden by the Interstate Commerce Act, and the act of 1890 is directed solely against contracts which would have been unlawful before its passage. Prescott & Arizona Central Ry. Co. v. Atchison, Topeka & Santa Fe Ry. Co. 7 I. C. C. app XLVIII.

(ccb) An agreement between railroad companies for the interchange of traffic and through transportation of passengers and freight is not illegal as giving exclusive privileges to either of the companies in the use of the other's roads to the detriment of other shippers or transporters, although a clause of the contract may contemplate a violation of law under circumstances not existing at the time it is made. Cumberland Valley R. R. Co. v. Gettysburg & Harrisburg R. R. Co., 7 I. C. C. App. LXXXVII.

(dd) The Act to Regulate Commerce does not confer upon the Commission authority to make an order affirmatively requiring a railway carrier to deliver carloads of interstate freight to a connecting carrier. Railroad Commission of Kentucky v. Louisville & N. R. Co. 10 I. C. C. 173, 189.

(ee) The Act provides no means for determining when carriers shall be compelled to interchange cars, or for fixing the conditions upon which it shall be made, and in construing that Act the courts have, with practical unanimity, held that carriers were free to make arrangements of this sort by contract among themselves, and that there was nothing in the Act which authorized the Commission or the courts to compel one railroad company to deliver its cars to another. Railroad Commission of Kentucky v. L. & N. R. Co., 10 I. C. C. 173, 188.

(ff) On shipments of flour and other grain products defendant had in force certain rate for transportation between points on its own line and an arbitrary of 5 cents per 100 pounds to be applied in addition to its regular transportation charges to shipments received from connecting lines, but it discontinued imposition of the arbitrary, effective February 11, 1907: HELD, That the 5-cent arbitrary was unjust and unreasonable, and that defendant be required to refrain from applying the same during a period of two years hereafter. Complainant awarded reparation. Blackwell Milling & E. Co. v. M., K., & T. R. Co., 12 I. C. C. 23.

City of Nashville v. L. & N. R. R. Co., 33 I. C. C. 76; Hastings Commercial Club v. C. M. & St. P. Ry. Co., 69 I. C. C. 489, 493.

INTEREST

See Evidence §26½; Reparation §17½.

IMPORTANT CASES SINCE 1908

(a) Neither costs nor interest paid by complainants, incidental to unsuccessful litigation in the courts, of which the unreasonable freight charges were not the proximate cause, can be included in an award of reparation. But allowance of interest was the equivalent of payment of claims in suit when due and payable, or of the judgments when entered, and fixes the date as of which interest on the unreasonable charges is allowable. Portland Cattle Loan Co. v. Director General, 55 I. C. C. 597, 600.

CASES 1887-1908

(a) Transportation of property from one State to another is interstate commerce, whether carriers engaged in moving it or vehicles on which it is borne, cross line of State or not. Ex parte Koehler (U. S. C. Ct. Or.) 1 I. C. R. 28.

(b) A transportation of goods under one contract and by one voyage from the interior of Illinois to New York is interstate commerce. Wabash etc. R. Co. v. People (U. S. Sup. Ct.) 1 I. C. R. 31.

(c) Telegraphing from one State to another is interstate commerce. (U. S. Sup. Ct.) 1 I. C. R. 307.

(d) Transportation of passengers from one State to another is interstate commerce. 1 I. C. R. 806.

(e) Commerce among the States consists of intercourse and traffic between their citizens and includes the transportation of persons and property, and the navigation of public waters, for that purpose, as well as the purchase, sale and exchange of commodities. Glouchester Ferry Co. v. Commonwealth of Pa., 1 I. C. R. 382.

(f) Business of ferriage between different States is interstate commerce. (U. S. Sup. Ct.), 1 I. C. R. 384.

(g) Whether a special privilege, granted by railroad companies to manufacturers in a single line of trade, but not to manufacturers in general, is consistent with the rule of equity and justice which the Interstate Law undertakes to establish, is a question upon which an opinion ought to be expressed only after the most careful consideration; and the Commission ought clearly to see that duty requires an answer, befor it proceeds to give one on ex parte application. Re Iowa Barb Steel Wire Co. v. 1 I. C. R., 605.

(h) Interstate commerce consists of intercourse and traffic between citizens of different States, and includes the transportation of property and the navigation of public waters for that purpose as well as the purchase, sale and exchange of commodities. Glouchester Ferry Co. v. Pennsylvania (U. S. Sup. Ct.) 382 S. P. cited in Bowman v. Chicago & N. W. R. Co. (U. S. Sup. Ct.) 1 I. C. R. 830.

(i) The right of transportation of an article of commerce from one State to

another includes the right of the consignee to sell it in unbroken packages at the place where the transportation terminates. Leisy & Co. v. Hardin 3 I. C. R. 36.

(j) Where the business of a through line of railroad consists in part of carrying passengers and freight into Pennsylvania from other states and out of that State into other States, and a railroad company which is a corporation of Virginia is a link in that line, such company in engaged in interstate commerce in Pennsylvania. Norfolk & W. R. Co. v. Pennsylvania (U. S. Sup Ct.) 3 I. C. R. 178.

(k) The essentiality of the business of a soliciting agent to the commerce of the road he represents is not the test as to whether that business was a part of interstate commerce. McCall v. People of State of Cal., 3 I. C. R. 181.

(l) The solicitation of orders for books within a city by an agent, who is, like his principle, a citizen of another State to which all orders are sent to be filled, such agents neither delivering the books nor collecting any money, consititutes interstate commerce, and an ordinance requiring a license for doing such business is void. Re White 3 I. C. R. 531.

(m) The shipment of fruit by local bill of lading to a forwarding agent in the same State, to be reshipped by him without unloading, breaking bulk, or delay, to ultimate consignees in another State, is interstate commerce, the rates for which cannot be prescribed by the state railroad commission. Cutting v. Florida R. & Nav. Co. (C. C. N. D. Fla.), 3 I. C. R. 665

(n) The shipment of mechandise from one state to another is interstate commerce, and any requirement of a state in respect of such commerce in conflict with the requirements of the Intestate Commerce Act is of no validity. Baird v. St. Louis, I. M. & S. R. Co., 4 I. C. R. 422.

(o) Commerce among the states consists of intercourse and traffic between their citizens, and includes the transportation of persons and property and the navigation of public waters for that purpose, as well as the purchase, sale, and exchange of commodities. Re Charge to Grand Jury (No. 3) (D. C. N. D. Cal.), 4 I. C. R. 784.

(p) Commerce among the States consists of intercourse and traffic between their citizens, and includes the transportation of persons and property and the navigation of public waters for that purpose as well as the purchase, sale and exchange of commodities. United States v. John Cassidy, 7 I. C. C. App. IX.

(q) A shipment of cattle from a place in Texas, under contract of shipment consigning them to parties at a place in Indian Territory, is an interstate shipment, although the initial carrier by such contract simply agrees to carry the cattle to a specified point in Texas, from which place they are to be shipped by the shipper over other roads to their final destination by a continuous trip. Mexican National Ry. Co. v. Savage, 7 I. C. C. App. LX.

(r) A shipment from one point to another within the same State is interstate commerce, although a bill of lading is given and charges are collected to the latter point only, where the destination of property is in a foreign State to which a continuous voyage is contemplated, with only a stop to change carriers at the terminal point mentioned in the bill of lading. Houston Direct Navigation Co. v. Insurance Co. of North America, 7 I. C. C. LXXX.

(s) A contract of shipment purporting to be for transportation from a point within a State to its boundary line, the goods being consigned to a person in another State, at a stipulated rate, is an interstate shipment. Texas & Pacific Ry. Co. v. Avery, 7 I. C. C. App. LXXX.

(t) A steamship company running a line of steamships between New York and Jacksonville stopping at the port of Charleston for receiving and landing passenges and freight, in leasing a wharf or landing, maintaining a plant and machinery for taking in and discharging freight, and engaging stevedores and longshoremen, having an agent and clerks and an office with its usual furniture, and keeping a bank account as incidental to its business, is engaged only in interstate commerce, and is not subject to a license tax by the City of Charleston. Clyde Steamship Co. v. City Council of Charleston, et al., 7 I. C. C. App. LXXXV.

(u) All internal commerce is either state or interstate. Commerce carried on between Maryland and the District of Columbia is not subject to regulation

by Maryland laws, and is therefore within the jurisdiction of Congress. Willson v. Rock Creek Ry. Co., 7 I. C. C. 83, 89.

(v) Defendant common carriers undertake to carry live stock through different States to the Union Stock-Yards in Chicago, and until delivery is made at such yards the live stock is interstate commerce and subject to the Act to Regulate Commerce. Cattle Raisers' Association v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(w) That the place of business of an association of commission merchants to restrict, control, and monopolize the trade at a certain stock yards is located on both sides of the line between certain states is not of importance in determining whether the business in which they are engaged is interstate commerce. U. S. v. Hopkins et al., 8 I. C. C. App. XXII.

(wa) An original package for the purpose of interstate commerce is the package delivered by the importer to the carrier at the initial place of shipment, in the exact condition in which it is shipped. If in single bottles shipped singly, or if in packages of three or more fastened together and marked, or if in a box, barrel, crate, or other receptacle, the single bottle, in the first instance, the three or more bottles in another instance, the barrel, box, crate or other receptacle, respectively, constitute the original package. Guckenheimer v. Sellers, 8 I. C. C. App. XXVII.

(x) Commerce among the States consists of intercourse and traffic between ther citizens, and includes the transportation of persons and property, and the navigation of public waters for that purpose, as well as the purchase, sale, and exchange of commodities. U. S. v. Coal Dealers' Asso. of California et al, 8 I. C. C. App. XLII.

(y) A shipment of stock whose final destination is without the State, to a point within the State, because the freight charges are less if the stock is shipped to such point and then forwarded to the point of destination than if through rates were obtained, is interstate commerce, and not subject to regulation by the State or its railroad commission. St. of Tex. v. Gulf, Colorado & Santa Fe Ry. Co., 8 I. C. C. LII.

(z) Commerce between an Indian reservation and other places in the same State does not constitute interstate commerce. Plaintiff was an Indian and an actual inhabitant of White Earth Indian reservation, situated within the limits of the State of Minnesota, and a trader thereon under a license from the United States, she purchased upon the reservation from Indians residing thereon and who are members of the tribes located thereon, a quantity of game birds which were killed thereon by the Indians, and attempted to ship them out of that State. The game warden of the State seized the birds, and having sold them, paid the proceeds thereof into the State treasury under a State law providing for the protection of game. Plaintiff thereupon brought suit to recover the value of the property, claiming the State had no control over it. The court said: 'It is immaterial whether the shipment of the game in question commenced on the reservation or off it, for if it commenced on the reservation no question of interstate commerce can arise, for the reservation is a part of the state and it had jurisdiction over it,' for the purposes of this action. Selkire v. Stevens, 8 I. C. C. LXV.

(aa) A shipment from a point in one State to a point just within the line of another State, where the goods are reloaded and rebilled to final destination in the latter State to gain the benefit of rates fixed by the railway commission of the latter State, is interstate commerce until it reaches its final destination. The court places its ruling on State v. Gulf, C. & S. F. R. Co. (Tex. Civ. App.), 44 S. W. 542. St. of Texas v. Southern Kansas Ry. Co. of Texas, 8 I. C. C. App. XC.

(bb) Whenever a commodity has begun to move as an article of trade from one state to another commerce in that commodity between the states has commenced. Railroad Commission of Ohio v. H. V. Ry., 12 I. C. C. 398, 403.

IMPORTANT CASES SINCE 1908

(cc) The inherent character of the traffic rather than incidents of billing determine whether it is interstate or intrastate. Hood Coal Co. v. M. V. T. Co., 73, I. C. C. 54, 57.

(cca) Waybills are mere incidents of service which in no wise determine its character as line haul or switching. Western Meat Co. v. Director General, as Agent, 78 I. C. C. 77, 80.

(ccb) Where there is an original and continuing intention to ship goods from

a point in one state to a point in another state the commerce is interstate and its character as such, is not changed by mere accidents or incidents in billing. Trojan Powder Co. v. Director General, 88 I. C. C. 447, 448.

(dd) The character of any freight shipment must be determined at the time the shipment begins and cannot be changed so far as the application of rates is concerned, by the subsequent conduct of either the consignor or the consignee. Consignor's exercise of his right to stop a shipment in transit cannot relieve him of his obligation to pay the freight charges based upon the character of the shipment as it was originally begun. Nor would consignor's determination, after a shipment was begun, to handle the freight differently from what it was originally billed, change the character of the shipment. Swift & Co. v. United States, 255 Fed. 291, 293.

(ee) In determining whether Commerce is interstate or intrastate, regard must be had to its essential character. Mere billing, or the place at which title passes, is not determinative. If the actual movement is interstate, the power of Congress attaches to it and provisions of the Act to Regulate Commerce, enacted for the purpose of preventing and redressing unjust discrimination by interstate carriers, whether in rates or facilities, apply. Rearick v. Pennsylvania, 203 U. S. 507, 512, 51 L. Ed. 295, 297, 27 Sup. Ct. Rep. 159; Southern P. Terminal Co. v. Interstate Commerce Commission, 219 U. S. 498, 526, 527, 55 L. Ed. 310, 320, 31 Sup. Ct. Rep. 279; Railroad Commission v. Worthington, 225 U. S. 101, 108, 110, 56 L. ed. 1004, 1008, 32 Sup. Ct. Rep. 653; Savage v. Jones, 225 U. S. 501, 520, 56 L. ed. 1182, 1189, 32 Sup. Ct. Rep. 715; Texas & N. O. R. Co. v. Sabine Tram Co. 227 U. S. 111, 127, 57 L. ed. 442, 448, 33 Sup. Ct. Rep 229; Railroad Commission v. Texas & P. R. Co., 229 U. S. 336, 57 L. ed. 1215, 33 Sup. Ct. Rep. 837; Illinois C. R. Co. v. DeFuentes, 236 U. S. 157, 163, ante, 275, 35 Sup. Ct. Rep. 275; Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 899; 238 U. S. 456, 59 L. ed 1406.

C. 551, 558; Eureka Pipe Line Co. v. Hallanan (W. Va. 1921,105 S. E. 506; O'Brien v. U. S. R. R. Administration, 185 N. Y. S. 447; Boyd v. U. S. 275 Fed. 16; Hood Coal Co. v. M. V. T. Co., 73 I. C. C. 54, 57; Phillips & Sons Co. v. B. & A. R. R. Co. 74 I. C. C. 381.

§1. Beginning and End of Transit. See Through Routes and Joint Rates §19; Transportation §11.

IMPORTANT CASES SINCE 1908

(a) Interstate commerce begins with the shipment of the article in one state directed and destined to another state. It ends only with the delivery at destination. All common carriers by railroad which participate in its actual transportation from the time of shipment to the time of delivery are engaged in the transportation of property from one state to another, whether their services be performed wholly within one state or in more than one state, whether such services be primary and called carriage or incidental, and called "switching," whether the carriers be paid a flat sum per car or a percentage of the through rate, and whether such payment be made directly by a shipper or consignee on the one hand, or by the initial or final carrier on the other hand. U. S. v. Union S. & T. Co., 192 Fed. 330, 339.

(b) The essential character of the commerce and the real and ultimate destination of the shipment, and not the billing, determines whether it is "interstate commerce. United States v. Philadelphia & R. Ry. Co., 232 Fed. 946.

W. 1080, 1081; Baldwin Land Co. v. Columbia Ry. Co., 58 Or. 285, 288, 114 P. 469; Galveston, H. & S. A. Ry. Co. v. Wood (Tex. 1912), 146 S. W. 538, 541; In re Pipe Lines, 24 I. C. C. 1; Transit Case, 24 I. C. C. 340, 351; Missouri K. & T. Ry. of Texas v. Pace (Tex. 1916), 184 S. W. 1051, 1053, State v. Public Service Commission, (Mo. 1916), 189 S. W. 377; O'Brien v. U. S. R. R. Administration, 185 N. Y. S. 447; Gardner Shipping Co v. Pennsylvania R. R. Co., 74 I. C. C. 461, 462.

§2. State Shipment Through Another State.

CASES 1887-1908

(a) The fact that transportation between two points in one state is accom-

plished by passing through territory outside of the State does not make the transportation interstate commerce so as to invalidate a law imposing a tax upon receipts derived from such commerce Lehigh Valley R. Co. v. Com. (Pa.), 2 I. C. R. 226.

(b) Commerce between points in the same State, but which in being carried from one place to the other passes through another State is interstate commerce, and subject to regulation by the provisions of the Act to Regulate Commerce. New Orleans Cotton Exchange v. Cincinnati, N. O. & T. P. R. Co., 2 I. C. R. 289, 293.

(c) Transportation between points in the same State, but which passes through another State, is interstate commerce, and subject to regulation by the provisions of the Act to Regulate Commerce. New Orleans Cotton Exch. v. Cincinnati, N. O. & T. P. R. Co. (Com.). 289. See also, to same effect, Sternberger v. Cape Fear & Y. V. R. Co. (S. C.), 426; Deyaware & H. C. Co. v. Com. (Pa.), 222; State v. Chicago, St. P. M. & O. R. Co. (Minn.), 2 I. C. R. 519.

(d) Shipments between points within the same State do not constitute interstate commerce because made on a railroad which runs for part of the trip in another state. Campbell v. Chicago, Milwaukee & St. P. R. Co., 4 I. C. R. 203.

(e) In the carriage of freight and passengers between two points in one state, the mere passage over soil of another state does not render that business foreign which is otherwise domestic. Lehigh Valley R. Co. v. Pennsylvania (U. S. Sup. Ct.), 87; Campbell v. Chicago, M. & St. P. R. Co. (Iowa), 4 I. C. R. 203.

(f) Railway traffic beginning and ending in the same state is not under the authority of the Federal government, even though in the course of transportation it passes through another state. Where the entire transit is within the limits of a single state, Federal regulation is excluded by the provisions of the Act. The termination of the shipment from a point in a state at another point within the state without the contemplation of any further movement seems to stamp and characterize the movement as purely state as distinguished from interstate commerce. Chamber of Commerce of Minneapolis v. G. N. R. Co., 4 I. C. C. 230, 234.

(g) Merely crossing a portion of another state in the course of transportation between points in the same state does not constitute interstate commerce so as to prevent an application of state statutes regulating the business of the carrier. Seawell v. Kansas City, Ft. S. & M. R. Co. (Mo.), 5 I. C. R. 262.

(h) Transportation from one point to another in the same state with incidental passage through territory of an adjoining state is not interstate commerce subject to the regulation of Congress. Dillon v. Erie Ry. Co., 7 I. C. C. App. XXXVII.

(i) Traffic from one state through another state to destinations in the first state named is interstate. Milk Producers Protective Asso. v. D. L. & W. R. Co., 7 I. C. C. 92, 162.

IMPORTANT CASES SINCE 1908

(j) A shipment which moves out of a state and passes for a short distance through another state to reach a destination in the state of origin is subject to the Act. Louisiana & Pine Bluffs Divisions, 40 I. C. C. 470, 472.

(k) A telegraphic message sent between points within the state, but routed through another state, is an "interstate" message. King v. Western Union Telegraph Co. (S. C. 1923), 120 S. E. 715.

Ry. v. Shields Co. & Coal Co. (Tex. 1920), 220 S. W. 183.

§3. Participation in Interstate Movement

See Through Routes and Joint Rates §3½, §6½.

CASES 1887-1908

(a) The transportaion of property from one State to another is interstate commerce, whether the carriers engaged in moving it or the vehicles on which it is borne cross the line of the State or not. Ex Parte Koehler, Receiver of Ore. & Cal. R. Co., v. 1 I. C. R. 28.

(b) Interstate Commerce Act does not apply to carriage wholly within a State of property shipped from or destined to a point without, not in a foreign country. Ex Parte Koehler (U. S. C. C. Or.), 1 I. C. R. 28.

(c) So far as a railroad company, whose line is entirely within one State issues through bills of lading over its connecting lines to points in other States, and makes through rates, it falls under the provision of the Interstate Commerce Act. Re Annapolis, Washington & Baltimore R. R. Co. et al., v. 1 I. C. R. 315.

(d) A carrier wrote the Commission asking if its line is subject to the provisions of the law lying as it does wholly within the State of Maryland. HELD, so far as a railroad company, whose line is entirely within one State, issues through bills of lading over its connecting lines to points in other States, and makes through rates, it falls under the provision of the Interstate Commerce Act. Re Annapolis, Washington & Baltimore R. R. Co., 1 I. C. C. 315, 316.

(e) Knowledge of carrier, whose line is wholly within State, that the ultimate destination of freight is without State will not make it subject to Interstate Commerce Act. Missouri Etc. Lumber Co. v. Cape Girardeau & S. R. Co., 1 I. C. R. 607.

(ea) Where it appears that a carrier to whom freight is delivered for transportation from one point to another in the same state has nothing to do with its transportation out of the state, the fact that the ultimate destination of the freight is another state, to the knowledge of such carrier, will not bring the transportation by such carrier within the jurisdiction of the Commission. Missouri & Illinois Railroad Tie & Lumber Co. v. C. G. & S. W. R. 1. I. C. C. 607, 608.

(f) Where transportation of goods, destined for a point without the State has been actually begun, temporary stoppage within the state, without the intention of abandoning the original movement (which movement is ultimately completed), will not deprive the transportation of the character of interstate commerce. Delaware & Hudson Canal Co. v. Commonwealth, 2 I. C. R. 222.

(g) The carrying of freight and passangers from a point within a State to their destination in the same State, by continuous transit, does not become interstate commerce merely because the railroad passes through another State on a part of the route between the points of departure and destination. Lehigh Valley R. Co. v. Commonwealth, 2 I. C. R. 226.

(h) When a state carrier engages in interstate commerce it becomes a national instrumentality for the purposes of such commerce and it is subject to regulations prescribed by the national authority. It cannot limit its obligations in that business, but must serve the business offered impartially and without preference or discrimination. Mattingly v. Pennsylvania Company, 2 I. C. C. 806, 812.

(i) A Company whose road lies wholly within the state in which it was organized is engaged in interstate commerce in transporting property between points without the State and points within the State under a common arrangement for a continuous carriage or shipment, where it receives any receipts for its

part of through freight, as provided for in a joint freight tariff, upon through waybills, although the proportion received is the same in amount as its regular local rate. U. S. ex rel. I. C. C. v. Seaboard Ry. Co., 8 I. C. C. App. XXV.

(j) A railroad company whose road wholly lies within the State in which it was organized is engaged in interstate commerce in transporting property between points without the State and points in the State under a common arrangement for a continuous carriage or shipment, where it receives and receipts for its part of through freight, as provided for in joint freight tariff, upon through waybills, although the proportion received is the same in amount as its regular local rate. U. S. ex rel. Interstate Commerce Commission v. Seaboard Ry. Co., 8 I. C. C. App. XXV.

(k) A railway company whose road is wholly within a single State, and which voluntarily engages as a carrier in interstate commerce business, making an arrangement for a continuous carriage or shipment of goods and merchandise, is subjected, so far as such traffic is concerned, to the provisions of the Act to Regulate Commerce. Pennsylvania Millers' State Asso. v. Philadelphia & R. R. Co., 8 I. C. C. 531.

IMPORTANT CASES SINCE 1908

(l) Where rough rice from originating points is shipped to mills in the same State and the clean product reshipped to points in other States, HELD, inasmuch as the transportation charges on the clean rice are, on this traffic, adjusted on basis of through rates from the rough rice originating points to ultimate destinations, the shipments into the milling points become parts of interstate movements. Lake Charles Rice Milling Co. v. A. & N. Ry. Co., 77 I. C. C. 708.

(m) Interstate commerce begins with the shipment of the article in one state directed and destined to another state. It ends only with the delivery at destination. All common carriers by railroad which participate in its actual transportation from the time of shipment to the time of delivery are engaged in the transportation of property from one state to another, whether their services be performed wholly within one State or in more than one State, whether such services be primary and called "carriages," or incidental, and called "switching," whether the carriers be paid a flat sum per car or a percentage of the through rate, and whether such payment be made directly by a shipper or consignee on the one hand, or by the initial or final carrier on the other hand. U. S. v. Union S. & T. Co., 192 Fed. 330, 339.

(n) The test of through billing is not necessarily determinative in deciding whether commerce is state or interstate. Ohio R. R. Comm. v. Wothington, 225 U. S. 101, 110, 32 Sup. Ct. 653,, 56 L. ed. 1004.

(o) A car of grain billed from a point in one state to a point in another state bearing an order on the face of the bill of lading to notify the consignor, care the Santa Fe railway for shipment, "makes it apparent that it is not contemplated that the shipment should terminate at such destination" but that the car should move on as a result of such direction as might be given while it was in transit, and therefore, where such car is reconsigned in transit, to a new destination and an exchange bill of lading issued covering such shipment, it is, as to its movement from its original point of shipment to its ultimate destination a continuous interstate shipment. Atchison, T. & S. F. Ry. Co. v. Harold, 36 Sup. Ct. 665, 667, 241 U. S. 371, 60 L. ed. 1050.

II. CONTROL AND REGULATION.

See Constitutional Law; Control and Regulation.

§3½. In General.

CASES 1887-1908

(a) The control of commerce, being in the federal government, is not to be restricted by state authority. Pembina Consol. Silver Min. & Mill. Co. v. Pennsylvania (U. S. Sup. Ct.), 2 I. C. R. 24.

(b) Corporations are not citizens, within the meaning of the clause of the Constitution declaring that "citizens of each State shall be entitled to all privileges and immunities of citizens in the several States." Pembina Consol. Silver Min. & Mill. Co v. Pennsylvania (U. S. Sup. Ct.), 2 I. C. R. 24.

(c) The Legislature, in the exercise of its power of regulating fares and

freights, may classify the railroads according to the length of their lines. If the same rule is applied to all railroad of the same class, there is no violation of the constitutional provision securing to all the equal protection of the laws. Dow v. Beidelman (U. S. Sup. Ct.), 2 I. C. R. 56.

(d) Railroad companies are subject to legislative control as to their rates of fare and freight, unless protected by their charters. Dow v. Beidelman (U. S. Sup. Ct.), 2 I. C. R. 56.

(e) Where property has been clothed with a public interest, the Legislature may fix a limit to that which in law shall be reasonable for its use. This limits the courts as well as the people. If it had been improperly fixed, the Legislature, not the courts, must be appealed to for the change. Dow v. Beidelman, 2 I. C. R. 56.

(f) When a state carrier engages in interstate commerce it becomes a national instrumentality for the purposes of such commerce, and is subject to regulations prescribed by the national authority. Mattingly v. Pennsylvania Co. (Com.), 2 I. C. R. 806.

(g) The business of an agent, to solicit passenger traffic out of California into and through other States to New York City, is a part of interstate commerce. McCall v. People of State of Cal., 3 I. C. R. 181.

§4. State.

See Courts V; Crimes XI; Discrimination §11; Evidence §35; Express Companies §1½; Loss and Damage §9; State Rates and Regulation; Transportation §9, §11.

CASES 1887-1908

(a) With reference to the subjects of commerce which are local and limited in their nature or sphere of operation the States may prescribe regulations until Congress intervenes and assumes control. Glouchester Ferry Co. v. Commonwealth of Pa., 1 I. C. R. 382.

(b) Laws passed by the individual States, under their general authority over internal concerns, may incidentally affect foreign and interstate commerce without conflicting with the Constitution of the United States, provided they do not discriminate against such commerce and are not inconsistent with the Acts of Congress. State, Waterbury, v. Newton (N. J.), 2 I. C. R. 63.

(c) It is only after the importation is completed and the property imported is mingled with and becomes a part of the general property of the State by a sale by the importer, that state regulations can act upon it. Lines & Company v. Harden, 3 I. C. R. 36.

(d) A law of a State which forbids the receipt of an imported commodity, or its sale before it has ceased to be an article of trade between one State and another, is a regulation of commerce between the States, and void. Leisy v. Hardin (U. S. Sup. Ct.), 3 I. C. R. 36.

(e) A law of a State which forbids the receipt of an imported commodity, or its sale before it has ceased to be an article of trade between one State and another, is a regulation of commerce between the States, and void. Lewis & Co. v. Hardin, 3 I. C. R. 36.

(f) A State cannot exclude, directly or indirectly, the subjects of interstate commerce, or, by the imposition of burdens thereon, regulate such commerce, without congressional permission. Lyng v. Michigan (U. S. Sup. Ct.), 3 I. C. R. 143.

(g) No State has the right to lay a tax on interstate commerce, by way of duties laid on the transportation of the subjects of that commerce, or on the receipts derived from that transportation, or on the occupation or business of carrying it on. Lyng v. Michigan, (U. S. Sup. Ct.), 3 I. C. R. 143.

(h) A statute compelling railroad companies to furnish double decked cars for sheep under a penalty for failure to do so, and limiting the price per carload, is void as an attempted regulation of commerce, when applied to interstate shipments. Stanley v. Wabash St. L. & P. R. Co. (Mo.), 3 I. C. R. 176.

(i) A State, under the guise of a license tax, cannot exclude from its jurisdiction a foreign corporation engaged in interstate commerce, or impose any burden upon such commerce within its limits. Norfolk & W. R. Co. v. Pennsylvania (U. S. Sup. Ct.), 3 I. C. R. 178.

(j) A license cannot be required, by State or municipal authority, of an agent whose business it is to solicit passenger traffic for an interstate carrier. McCall v. California (U. S. Sup. Ct.), following cases 3 I. C. R. 181; Norfolk & W. R. Co. (U. S. Sup. Ct.) 3 I. C. R. 178.

(k) The commerce clause of the

United States Constitution not only prohibits a State from taxing interstate commerce when it passes through its own territory, but also when it passes through another state. McCall v. People of California (U. S. Sup. Ct.), 3 I. C. R. 181.

(l) The Commerce clause not only prohibits a State from taxing interstate commerce when it passes through its own territory, but also when it passes through other states. McCall v. People of State of Cal., 3 I. C. R. 181.

(m) The business of an agent, being to solicit passenger traffic out of California into and through other States to New York City, is a part of interstate commerce, which cannot be restricted or taxed by a municipal corporation McCall v. California (U. S. Sup. Ct.), 3 I. C. R. 181.

(n) A burden imposed by a state upon interstate commerce is not to be sustained simply because the statute imposing it applies alike to the people of all the States, including the people of the State enacting such statute. Minnesota v. Barber (U. S. Sup. Ct.), 3 I. C. R. 185.

(o) The statute of Virginia which prohibits the running of through passenger trains on Sunday is in conflict with U. S. Const. art 1, §8, vesting in Congress the power to regulate commerce among the several States. Com. v. Chesapeake & O. R. Co., (Lynchburg Corp Ct.), 3 I. C. R. 398.

(p) The police power of the State cannot be exercised over the interstate transportation of subjects of commerce. Commonwealth of Va. v. Chesapeake & Ohio R. Co., 3 I. C. R. 398.

(q) The Statute of Virginia, prohibiting the running of freight trains on Sunday, so far as it applies to trains carrying freight from another State into and through it, is in conflict with the Constitution of the United States, vesting in Congress the power to regulate interstate commerce. Commonwealth of Va. v. Chesapeake & Ohio R. Co., 3 I. C. R. 398.

(r) A State cannot, under the guise of exerting its police powers, or of enacting Inspection Laws, make discriminations against the products and industries of some of the States in favor of the products and industries of its own or of other States. Brimmer v. Rebman, 3 I. C. R. 485.

(s) The Virginia Statute of 1890 to prevent the sale of unwholesome meats is a regulation of commerce beyond the power of the State to establish. Brimmer v. Rebman, 3 I. C. R. 485.

(t) A city ordinance, prohibiting any railroad company from allowing the sale of fruit, vegetables or perishable freight arriving in the city over its lines from cars on the tracks, from any platform, shed or building at the depot on the grounds of the company, is, where the merchandise affected largely comes from other States, an interference with interstate commerce, and, if not based on considerations of public health, or intended to prevent the crowding and obstruction of streets and public places, but solely to hinder competition between nonresident shippers and resident licensed dealers in the same line, it is a regulation of commerce and threfore unconstitutional and void. Spellman v. City of N. Orleans, 3 I. C. R. 575.

(u) A statute giving railroad commissioners authority to fix joint rates for a railroad makes the rates thus fixed only prima facie evidence of their reasonableness, although not expressly limiting them to that effect where the only penalties are for charging unjust and unreasonable rates, and a former statute which did not extend to joint rates, and of which this was an amendment, expressly limited the effect of the commissioners' orders as to rates to prima facie evidence. Burlington, Cedar Rapids & N. R. Co. v. Dey, 3 I. C. R. 584.

(v) A state statute prohibiting freight trains running on Sunday between sunrise and sunset, except with livestock or perishable freight or to complete a trip which can be finished before 9 a. m., is invalid as a regulation of commerce so far as it applies to interstate freight trains. Norfolk & W. R. Co. v. Com. (Va.), 3 I. C. R. 671.

(w) A state statute prohibiting game birds to be killed for the purpose of conveying them out of the state is not unlawful interference with interstate commerce. State v. Geer (Conn), I. C. R. 732.

(x) A state statute compelling the shipment of freight within a certain time after receiving it, under penalty for default, is not an unconstitutional regulation of interstate commerce as to freight for shipment out of the state, as

it tends, not to trammel or obstruct, but to expedite such commerce. Bagg v. Wilmington, C. & A. R. Co. (N. C.), 3 I. C. R. 803.

(y) The title of an Act "To Regulate the Planting and taking of Oysters in the Waters" of the state, is sufficient to cover provisions against the taking of oysters by non-residents and the transportation out of the state by any person of oysters in shells. State of Alabama v. Harrub, 4 I. C. R. 99.

(z) A statute prohibiting the shipment out of the state of oysters taken in the public waters of the state, while they are in shells, and which also prohibits the taking of such oysters by any person who is not a resident of the state, is not unconstitutional as a regulation of interstate commerce. State of Alabama v. Harrub, 4 I. C. R. 99.

(aa) A state statute making railroad tickets good for six years, and giving the holder of one the right to stop off at as many stopping places as he pleases before reaching his destinations, cannot, in view of the power of Congress over commerce, be applied, contrary to their terms, to tickets sold beyond the limits of the state and entitling their holders to passage from a point in a foreign state or country to one in the state which enacted the statute. Lafarier v. Grand Trunk R. Co. (Me.), 4 I. C. R. 198.

(bb) A state statute regulating the rights of carriers and declaring what rates shall be regarded as extortionate does not apply to the case of interstate stipments. Mobile & O. R. Co. v. Dismukes (Ala.), 4 I. C. R. 200.

(cc) The provisions of Ga. Code §4578 making it a misdemeanor to run a freight train upon any railroad in that state on the Sabbath Day, is a regulation of internal police, and not a regulation of interstate commerce, even as to freight trains passing through the state from and to adjacent states, and laden exclusively with goods and freight received on board before the trains entered the state, and con signed to points beyond its limits. Hennington v. State (Ga.), 4 I. C. R. 413.

(dd) The shipment of merchandise from one state to another is interstate commerce, and any requirement of a state in respect of such commerce, in conflict with the requirements of the Interstate Commerce Act, is of no validity. Baird v. St. Louis, I. M. & S. R. Co. (C. C. E. D. Ark.), 4 I. C. R. 422.

(ee) The imposition by a state of a condition, upon giving permission to lay railroad tracks in the streets of a city, that such tracks shall be public and open to the use of citizens; and a regulation by the state of the switching rates to be charged by such railroad in the city.—do not clearly show an unconstitutional interference with or regulation of commerce between the states, although cars engaged in interstate traffic may be switched over such tracks. State v. Chicago, M. & S. P. Ry. Co., (C. C. N. D. Iowa), 4 I. C. R. 425.

(ff) A state law prohibiting the exaction by carriers of unreasonable rates is, as applied to a contract for shipment from one state to another, an interference with interstate commerce and cannot be so applied. Swift & Co. v. Philadelphia & R. R. Co., 4 I. C. R. 633.

(gg) A contract for interstate shipment does not come within a state law regulating rates because made in that state so that such law will introduce a new term into the contract, but its utmost effect would be to forbid a contract for an unreasonable rate and make the contract unlawful, leaving the transaction open to adjustment under the laws of the United States. Swift & Co. v. Philadelphia & R. R. Co., 4 I. C. R. 633.

(hh) A statute regulating the sale of transportation tickets is not an interference with interstate commerce. State v. Corbett (Minn.), 4 I. C. R. 694.

(ii) If a business, as that of common carriers, is a proper subject of police regulation, so are its incidents and accessories; as, for example, the issue and sale of transportation tickets. State v. Corbett, 4 I. C. R. 694.

(jj) The regulation of the charges of a grain elevator is not a regulation of interstate commerce, although the gain passing through it is brought from another state. Pudd v. New York (U. S. Sup. Ct.), 45; Brass v. North Dakota Stoesser (U. S. Sup. Ct.), 4 I. C. R. 670.

(kk) The clause in the charter of the Union Pacific Railroad Company giving Congress power over the rates of freight to be charged thereon, does not preclude the several states from interfering with such rates. Ames v. Union Pacific R. Co., 4 I. C. R. 835.

(ll) A state statute limiting the rates to be charged by freight carriers does not interfere with interstate commerce because it adopts a different classification for freight from that which has been established by the railroads for the section of country in which such state is located. Ames v. Union P. R. Co., (C. C. D. Neb.), 4 I. C. R. 835.

(mm) The fact that a contract was for the carriage of goods from one state to another does not relieve a corporation of the state in which the contract was made from the rule of law existing in that state, which prohibits special contracts limiting liability. St. Joseph & G. I. R. Co. v. Palmer (Nebr.), 4 I. C. R. 494.

(nn) All internal commerce is either state or interstate. Commerce carried on between the State of Maryland and the District of Columbia is not subject to regulation by Maryland laws, and is therefore within the jurisdiction of Congress. Willson v. Rock Creek R. Co., 7 I. C. C. 83.

(oo) A state statute prescribing a penalty for failure of a carrier to deliver goods in its possession on demand of the consignee and tender of the freight specified in the bill of lading is inoperative so far as it imposes a penalty against a carrier engaged in interstate commerce. The decision is based upon that of Gulf, C. & S. R. R. Co. v. Hefley, 158 U. S. 98, 39 L. ed. 910, and the court says that the act of Congress and the state statute operate on the same subject-matter and prescribe different rules concerning it; and this is so they conflict, and the state law must necessarily give way to the Federal. Houston, East & West Texas Ry. Co. v. Peters, 7 I. C. C. App. XCIX.

(pp) The police power of the state cannot be set up to control the inhibitions of the Federal Constitution or the powers of the United States government created thereby. People of the St. of N. Y. v. Hawkins, 7 I. C. C. App. CIII.

(qq) Discrimination by a railroad company between its customers in delivering on spur tracks at the point of delivery carloads of coal shipped from another state is within the control of Congress as interstate commerce; and no penalty for such discrimination can be recovered under a state statute. The court says: The right of Congress to control interstate commerce is not solely limited while the commerce is in actual transportation, but extends to and includes the necessary handling of that commerce at terminal points. It is as much necessary to the interest of interstate commerce and the uniformity of rule that should apply to transportation of that character of commerce, which is one of the objects intended to be accomplished by reserving this power solely to Congress, that it should retain control and dominion over the shipments at the beginning and terminal points, as well as during the actual transportation of the commerce. Fielder v. Miss., Kans. & Tex. Ry. Co. of Texas, 7 I. C. C. App. CIV.

(rr) Interstate commerce originating within the state may be subject to the a mileage basis so that a portion thereof within the state bay be subject to the control of the state over its rates. Northern Pacific Ry. Co. v. Keyes, 8 I. C. C. App. LVII.

(ss) A state has no jurisdiction to reduce excessive income of a carrier derived from interstate business. Northern Pacific Ry. Co. v. Keyes, 8 I. C. C. App. LVII.

IMPORTANT CASES SINCE 1908

(tt) In the absence of Congressional action the states may legislate with respect to matters which are strictly local in character, even though by so doing they may to some extent regulate interstate commerce, but whatever subjects of this power are in their nature national or admit only of one uniform system or plan of regulation may justly be said to be of such a nature as to require exclusive legislation by Congress. Wilson Produce Co. v. Penn. R. R. Co., 14 I. C. C. 170, 174.

(uu) The Interstate Commerce Act of Feb. 4, 1887, applies only to interstate commerce and does not prevent states from passing laws regulating the facilities to be supplied by carriers in intrastate commerce. S. P. Co. v. Campbell, 189 Fed. 696, 698.

(vv) The deafening noise from seaplanes going at frequent intervals up and down a small body of water may well constitute a nuisance, which is within the power of the Legislature to abate. People v. Smith, 196 N. Y. S. 241.

(ww) Over interstate commerce transportation rates a state has no juris-

diction, and an attempt to regulate such rates by the state or under its authority is void. Ohio R. R. Comm. v. Worthington, 225 U. S. 101, 107, 32 S. Ct. 653, 56 L. ed. 1004.

(xx) Where a state statute provides penalties against a carrier for refusing to accept goods for interstate transportation, even though for the carrier so to do would violate the provisions of the Interstate Commerce Act forbidding carriers to transport property in the absence of lawfully published rates, is invalid and must give way to such Act. Southern Ry. Co. v. Reid, 222 U. S. 424, 442, 32 Sup. Ct. Rep. 140, 56 L. ed. 257; Southern Ry. Co. v. Reid & Beam, 222 U. S. 445, 32 Sup. Ct. 145; Southern Ry. Co. v. Burlington Lumber Co., 225 U. S. 99, 32 Sup. Ct. 657.

Faulkner (Ark. 1914), 164 S. W. 763, 764; Howard & Callaghan v. I. C. R. R. Co., (Ky. 1914), 171 S. W. 442, 444; A. C. Cheney P. A. Co. v. N. Y. C. & H. R. R. Co., 152 N. Y. Suppl. 285, 290; C. M. & St. P. Ry. Co. v. State Utilities Comm'n (Ill. 1915), 108 N. E. 729, 731; Illinois C. R. Co. v. Mulberry Hill Coal Co., 35 Sup. Ct. 760; Castle v. Mason (Ohio 1915), 110 N. E. 463, 465; Chicago M. & St. P. Ry. Co. v. Rock County Sugar Co., (Wisc. 1916), 156 N. W. 607, 609; Western Union Telegraph Co. v. Foster; Macleod, Public Service Commission v. Western Union Telegraph Co., 113 N. E. (Mass. 1916), 192; Lusk v. Atchison, (Mo. 1916), 186 S. W. 703; Kaw Valley Drainage Dist. v. Mo. Pac. Ry., (Kans. 1916), 161 Pac. 937, 938; M. P. Ry. v. McGrew Coal Co., 37 Sup. 518, 244 U. S. 191, 61 L. ed; W. U. Tele. Co. v. Bailey (Tex. 1917), 196 S. W. 516, 517; Southern Ry. Co. v. Morris (Ga. 1918), 95 S. E. 84; Arkansas rates and fares,

59 I. C. C. 471, 473; Florida rates, fares and charges, 60 I. C. C. 551, 558; Public Service Commission, Second Dist. v. N. Y. C. R. R. Co., 185 N. Y. S. 267, 274; People v. Long Island R. R. et al., 185 N. Y. S. 594; Public Service Commission, Second Dist. v. N. Y. C. R. R. Co., 230 N. Y. 149; 129 N. E. 455 N. Y. S. Suppl. Vol. 185, No. 7 (Index-Digest). Jones v. Southern Express Co., (Miss., 1913) 61 So. 165, 166. State v. Public Service Commission, (Mo., 1923), 249 S. W. 65; Purchase v. State, (Nebr., 1922), 191 N. W. 677; Minneapolis, St. P. & S. S. M. Ry. Co., v. Railroad Commission, (Wisc., 1924), 197 N. W. 352.

§5. United States.

See Constitutional Laws.

CASES 1887-1908

(a) Where its power is exclusive, the failure of Congress to make express regulations indicates its will that the subject shall be left free from any restriction or impositions. Robbins v. Taxing District of Shelby County 1 I. C. R. 45.

(b) The power of Congress to regulate commerce is exclusive when its subjects are national in character, or admit only of one uniform system or plan of regulation. Robbins v. Taxing District of Shelby County, 1 I. C. R. 45.

(c) Regulation of fares and freights for transportation between different states is within power of Congress. Philadelphia etc. Steamship Co. v. Pennsylvania (U. S. Sup Ct.), 1 I. C. R. 308.

(d) The regulation of fares and freights receivable for the transportation of persons and goods between different states, and between the states and foreign countries, is within the power of Congress equally with the regulation of such transportation itself. Phil. v. Southern Mail S. S. Co. v. Penn., 1 I. C. R. 308.

(e) The failure of Congress to make express regulations indicates that the subject shall be free. Gloucester Ferry Co. v. Pennsylvania (U. S. Sup. Ct.) 382; Phila. etc. Steamship Co. v. Pennsylvania (U. S. Sup. Ct.) 308; Robbins v. Taxing District of Shelby Co. (U. S. Sup. Ct.) 45; S. P. cited in Bowman v. Chicago & N. W. R. Co. (U. S. Sup. Ct.), 1 I. C. R. 829.

(f) The power of Congress is supreme over interstate commerce, unembarrassed by state laws. Id.; Stockton v. Baltimore etc. R. R. Co. (U. S. C. Ct., N. J.) 411, S. P. cited in Bowman v. Chicago & N. W. R. Co. (U. S. Sup. Ct.), 1 I. C. R. 833.

(g) The power to regulate interstate and foreign commerce vested in Congress is the power to prescribe the rules by which it shall be governed—that is, the conditions upon which it shall be conducted; to determine when it shall be free from, and when subject to, duties or other exactions. Gloucester Ferry Co. v. Commonwealth of Pa., 1 I. C. R. 382.

(h) When the subjects of commerce are national in character and require uniformity of regulation affecting alike all of the states, the power of Congress is exclusive. Gloucester Ferry Co. v. Commonwealth of Pa., 1 I. C. R. 382.

(i) The commerce with foreign nations and between the states, which consists in the transportation of persons and property between them, is a subject of national character and requires uniformity of regulation. Congress alone can deal with such transportation, and its non-action is a declaration that it shall remain free from burdens imposed by state legislation. Gloucester Ferry Co. v. Commonwealth of Pa., 1 I. C. R. 382.

(j) United States may condemn land within state without consent of state. Stockton v. Baltimore etc. R. Co. (U. S. C. Ct., N. J.), 1 I. C. R. 411.

(k) The United States, when it does not seek to acquire exclusive jurisdiction over land within a state, may condemn such land for its purposes without the consent of the state. Stockton v. Balt. & N. Y. R. R. Co., 1 I. C. R. 411.

(l) The power of Congress is supreme over the whole subject of interstate commerce, unimpeded and unembarrassed by state lines or state laws. Stockton v. Balt. & N. Y. R. R. Co., 1 I. C. R. 411.

(m) In carrying on foreign and interstate commerce, corporations, equally with individuals, are within the protection of the commercial pawer of Congress and cannot be molested in another state by state burdens or impediments. Stockton v. Balt. & N. Y. R. R. Co., 1 I. C. R. 411.

(n) Congress can confer upon a state corporation powers not contained in its original charter. Stockton v. Balt. & N. Y. R. R. Co., 1 I. C. R. 411.

(o) The power to regulate commerce between the states extends not only to the control of the navigable waters of the country and the lands under them for the purpose of navigation, but for the purpose of erecting piers, bridges, and all other instrumentalities of commerce which in the judgment of Congress may be necessary or expedient. Stockton v. Balt. & N. Y. R. R. Co., 1 I. C. R. 411.

(p) Where it appears that a carrier to whom freight is delivered for transportation from one point to another in the same state has nothing to do with its transportation out of the state, the fact that the ultimate destination of the freight is another state, to the knowledge of such carrier, will not bring the transportation by such carrier within the jurisdiction of the Commission. Mo. & Ill. R. Tie & Lumber Co. v. Cape Girardeau & Southwestern R. Co., 1 I. C. R. 607.

(q) In the absence of any legislation upon the subject, the courts must decide for the company, as they do for private persons, when controversies arise, what is reasonable. Dow v. Beidelman, 2 I. C. R. 56.

(r) Where property has been clothed with a public interest, the Legislature may fix a limit to that which in law shall be reasonable for its use. This limits the courts as well as the people. If it has been improperly fixed, the Legislature, not the courts, must be appealed to for the change. Dow v. Beidelman (U. S. Sup Ct.), 2 I. C. R. 56.

(s) Congress may, in the exercise of its power to regulate interstate commerce, construct or authorize individuals or corporations to construct railroads across the state and territories of the United States. California v. Central P. R. Co. (U. S. Sup. Ct.), 2 I. C. R. 153.

(t) Congress, under its sovereign exclusive power to regulate commerce among the several states, has the power to create a commission, for the purpose of supervising, investigating, and reporting upon, matters or complaints, connected with, or growing out of, interstate commerce. And no valid constitutional objection can be urged against making the findings of the Commission "prima facie" evidence, in subsequent judicial proceedings. Such a provision, merely prescribes a rule of evidence, clearly within well recognized powers of the Legislature, and in no way encroaches upon the court's proper functions. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(u) The grant to the Federal government of the power to regulate interstate commerce is full and complete and cannot be narrowed or encroached upon by state authority, either directly or indirectly. The fact, therefore, that one or more states have adopted a particular regulation is not a reason for applying it in interstate commerce, if in itself it appears to be objectionable. State action will always be treated with the highest deference and respect, but cannot be allowed to control in matters within the federal jurisdiction. Leonard v. C. & A. R. Co., 2 I. C. C. 600, 603.

(v) The provisions of the Act, construed in the light of the principles that apply to interstate commerce as enumerated by the courts, must be understood as intended to regulate all the commerce subject to the exclusive jurisdiction of Congress, including the agents and instrumentalities employed and the commodities carried, with only the limitations found in the act itself. Mattingly v. Pennsylvania Company, 2 I. C. C. 806, 812.

(w) The absence of a law by Congress as to any article of commerce is equivalent to its declaration that the importation of that article into the states shall be unresricted; and it is for the courts to determine what state action is or is not a regulation of such commerce. Lewis & Co. v. Hardin, 3 I. C. R. 36.

(x) Commerce between the states has been confided exclusively to Congress by the Constitution and is not within the jurisdiction of the police power of the state, unless placed there by Congressional action. Lewis & Co. v. Hardin, 3 I. C. R. 36.

(y) The power vested in Congress to regulate commerce among the states cannot be stopped at the external boundary of a state., but is capable of authorizing the disposition within the state of the article imported. Leisy v. Hardin, (U. S. Sup. Ct.), 3 I. C. R. 36.

(z) The absence of a law by Congress as to any article of commerce is equivalent to its declaration that the importation of that article into the states

shall be unrestricted; and it for the courts to determine what state action is or is not a regulation of such commerce. Leisy v. Hardin (U. S. Sup. Ct.), 3 I. C. R. 36.

(aa) Commerce between the states has been confided exclusively to Congress by the Constitution, and is not within the jurisdiction of the police power of the state, unless placed there by congressional action. Leisy v. Hardin, (U. S. Sup. Ct.), 3 I. C. R. 36.

(bb) The power vested in Congress to regulate commerce among the states cannot be stopped at the external boundary of a state, but is capable of authorizing the disposition within the state of the article imported. Lewis & Co. v. Hardin, 3 I. C. R. 36.

(cc) The power to regulate commerce among the states is absolute in Congress, and rates on such commerce may be regulated by Federal authority with reference to trade conditions and circumstances of localities without infringing the rights or immunities of such commerce under the Constitution. Kauffman Milling Co. v. Missouri Pac. R. Co., 3 I. C. R. 400, 407.

(dd) Contracts concerning interstate transportation must be regarded as made upon the basis and with the understanding that changes in the law applicable to them may be made by Congress; and there is no vested right in the law as it existed at the time they were made. Fitzgerald v. Grand Trunk R. Co. (Vt.), 3 I. C. R. 633.

(ee) The grant to Congress of the power to regulate commerce among the states does not embrace that commerce which is completely internal or between different parts of the same state. Lehigh Valley R. Co. v. Pennsylvania (U. S. Sup. Ct.), 4 I. C. R. 87.

(ff) Congress has plenary power, subject to the limitations imposed by the Constitution, to prescribe the rule by which commerce among the several states is to be governed. Interstate Commerce Commission v. Brimson (U. S. Sup. Ct.), 4 I. C. R. 545.

(gg) Congress may in its discretion employ any appropriate means not forbidden by the Constitution, to carry into effect, and accomplish the objects of, a power given to it by the Constitution. Interstate Commerce Commission v. Brimson (U. S. Sup. Ct.), 4 I. C. R. 545.

(hh) Several railroad companies which bill and carry freight from points in one state to points in another will not be heard to say that the carriage by each is local and that they are not engaged in interstate commerce for the purpose of avoiding the requirements of the Interstate Commerce Act. Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 582.

(ii) Congress has not adopted the common law of England as a national municipal law. The enforcement of the common law by the courts of the United States has in every instance been as the municipal law of the state by which the subject-matter was affected. Swift & Co. v. Philadelphia & R. R. Co., 4 I. C. R. 633.

(jj) Outside of the Interstate Commerce Act there is no law of the United States, as a distinct sovereignty, imposing upon the imposition by a carrier of unreasonable rates. Swift & Co. v. Philadelphia & R. R. Co., 4 I. C. R. 633.

(kk) The duties and obligations of carriers to their patrons when engaged in interstate commerce are governed by the common law, in the absence of any legislation of Congress on this subject. Murray v. Chicago & N. W. Ry. Co., 4 I. C. R. 806.

(ll) Interstate shipments only are affected by the United States Act of March 2, 1889, against obtaining transportation for property over railroads at less than regular rates. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(mm) A carrier which has elected to enter into the carriage of interstate freights, and thus subjected itself to the control of the Interstate Commerce Commission, cannot limit that control in respect to foreign traffic to certain points on its road and exclude other points. Cincinnati, N. O. & T. P. R. Co. v. Interstate Commerce Commission (U. S. Sup.), 5 I. C. R. 391.

(nn) A state railroad company, having elected to engage in the carriage of interstate freight, and thus subjected itself to the control of the Interstate Commerce Commission, cannot limit that control in respect to interstate traffic to certain points on its road, and exclude other points. C. N. O. & T. P. R. Co. v. Inters. Com. Commission, 5 I. C. R. 391.

(oo) The entire commerce of the United States, foreign and interstate, is subject to the provisions of the act of Congress to regulate commerce. Texas & P. R. Co. v. Interstate Commerce Commission (U. S. Sup.), 5 I. C. R. 405.

(pp) The legitimate interests of carrying companies, as well as of traders and shippers, should be considered in determining the lawfulness of rates under the act of Congress to regulate commerce. Texas & P. R. Co. v. Interstate Commerce Commission, 5 I. C. R. 405.

(qq) Interstate commerce is not subject to common law regulations as to discriminating charges of common carriers in the absence of congressional action. Gatton v. Chicago, R. I. & P. R. Co. (Iowa), 5 I. C. R. 474.

(rr) The act of a railroad company in carrying coal from one point to another in the same state is not within the scope of interstate commerce regulations, although such coal was originally shipped from another state, if the carrier receives it without any understanding or arrangement, express or implied, that it shall become a link in a chain of interstate transportation. Ft. Worth & Dodge City Ry. Co. v. Whitehead, 7 I. C. C. App. VIII.

(ss) A railroad engaged in forwarding merchandise in the course of commerce between state is subject to the operations of the Interstate Commerce Act, although it is wholly within one state. Augusta Southern Ry. Co. v. Wrightsville & Tennville Ry. Co., 7 I. C. C. App. XXXVIII.

(tt) The validity of a contract for interstate transportation will be determined in accordance with the principles of the common law in the absence of any legislation to the contrary by Congress under its power to regulate commerce. Davis v. Chicago, Milwaukee & St. Paul Ry. Co., 7 I. C. C. App. XLI.

(uu) It is well settled that a railway company whose road is wholly within the bounds of a single state, "when it volutarily engages as a common carrier in interstate commerce by making an arrangement for a continuous carriage or shipment of goods and merchandise, is subjected, so far as such traffic is concerned to the regulations and provisions of the Act to regulate commerce." Interstate Commerce Commission v. Detroit, G. H. & M. R. Co., 167 U. S. 642, 42 L. ed 309, 17 Sup. Ct. Rep. 986; Cincinnati, N. O. & T. P. R. Co. v. Interstate Commerce Commission, 162 U. S. 184, 40 L. ed. 935, 5 Inters. Com. Rep. 391 16 Sup. Ct. Rep. 700; The Daniel Ball, 10 Wall. 565, 566, sub nom; The Daniel Ball v. United States, 19 L. ed. 1002; Pa. Millers' State Asso. v. Philadelphia & R. Ry. Co., 8 I. C. C. 531.

IMPORTANT CASES SINCE 1908

(vv) Congress has power to regulate interstate commerce to prevent favoritism, and to secure equal rights to all engaged in interstate trade. N. Y. Central v. U. S., 212 U. S. 481, 495, 29 Sup. Ct., 304, 53 L. ed. 613.

(ww) The power granted to Congress to regulate commerce among the states and foreign nations is complete in itself, is unrestricted except by the limitations upon its authority to be found in the Constitution. L. & N. R. R. v. Mottley, 219 U. S. 467, 480, 31 Sup. Ct. 265, 55 L. ed. 297.

(xx) Whatever amounts to a more or less constant practice and threatens to obstruct or unduly burden the freedom of interstate commerce is within the regulatory power of Congress under the commerce clause. Stafford v. Wallace, 42 Sup Ct. 397.

CASES 1887-1908

(a) The Commission has no authority to call a railroad company to account for any wrong of which such company may have been guilty prior to April, 1887, when the Interstate Commerce Act went into operation. Holbrook v. St. Paul, M. & M. R. Co. 1, I. C. R. 323.

(b) If, at the hearing before the Commission of a complaint against a railroad company, the defendant avows a purpose to comply with the law, the Commission must not only assume that the company will do so but must act upon that assumption until it has evidence that the purpose is not lived up to. Holbrook v. St. Paul, M. & M. R. Co., 1 I. C. R. 323.

(c) The Commission has no authority to call a railroad company to account for a wrong committed prior to time when Act went into effect. Holbrook v. St. Paul, M. & M. R. Co., 1 I. C. R. 323.

(d) The Commission has only a limited power, expressly defined by the Act, to interfere to prevent wrong and oppression in specified cases. Traders & Travelers Union v. Phila., etc., R. R. Co. 1 I. C. R. 371. Re Iowa Barb Steel Wire Co., I I. C. R. 605.

(e) Every ground of the jurisdiction of the Commission relates directly or indirectly to the transportation of persons and freight by carriers at fair and reasonable rates, and with absolute impartiality as to facilities and accommodations. Traders & Travelers Union v. P. & R. R. Co. 1 I. C. C. 371, 374.

(ea) The Commission will not express an opinion whether neither by complaint nor by application for relief is a case stated which will come within its jurisdiction. Re Iowa Barb Steel Wire Co., 1 I. C. C. 605.

(f) The Commission has not been given a general dispensing power to relieve hardships under the Law, but its power in that regard is strictly limited. Re Iowa Barb Steel Wire Co. 1 I. C. R. 605, 606.

(g) The Commission will not determine a collateral inquiry or question presented by evidence admissible only for other purposes, until an opportunity has been furnished the parties to be heard in a proceeding such as is provided for by the statute. Business Mens Asso. v. Chicago & N. W. R. Co. (Com.) 2 I. C. R. 48.

(ga) Traffic destined to another State is not interstate so as to be within the jurisdiction of the Interstate Commerce Commission, if the delivery by the carrier is made in the same State where the rates were made and the traffic originated. New Jersey Fruit Exchange v. Central R. Co. (Com.) 2 I. C. R. 84.

(h) The Commission has no power to impose penalties for violations of the Law, the penal provisions of which are only enforceable through the ordinary machinery of the courts of the United States. Slater v. N. P. R. Co., 2 I. C. C. 243, 244.

(i) The Act to Regulate Commerce does not undertake either to create an inferior court", or to invest the Commission, appointed thereunder, with judicial powers,

or functions. Kentucky and Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(j) The Interstate Commerce Commission is invested with only administrative powers of supervision and investigation, which fall far short of making it a court or its action judicial, in the proper sense of the term. Its action or conclusion upon matters brought before it for investigation is neither final nor conclusive. Nor is it invested with any authority to enforce its decision or award. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.) 2 I. C. R. 351.

(ja) The Commission is charged with the duty of investigating and reporting upon complaints; and the facts, found or reported by it, are only given the force and weight of "prima facie" evidence, in such judicial proceedings, as may thereafter be had, for the enforcement of its recommendation, or order. The functions of the Commission are those of referees, or special commissioners, appointed to make preliminary investigation of, and report upon, matters for determination. In respect of interstate commerce matters, covered by the Law, the Commission may be regarded as the general referee of each and every Circuit Court of the United States, upon which the jurisdiction is conferred, of enforcing the rights, duties, and obligations, recognized and enforced by said law. Kentucky and Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(jb) The Interstate Commerce Commission is invested with only administrative powers of supervision and investigation, which fall far short of making it a court, or its action judicial, in the proper sense of the term. Its action, or conclusion, upon matters brought before it for investigation, is neither final, nor conclusive. Nor is it invested with any authority to enforce its decision, or award. It hears, investigates, and reports upon complaints made before it, but subsequent judicial proceedings are contemplated, and provided for, as the remedy for the enforcement of the order or report of the Commission, in all cases, where the party against whom its decision is rendered, does not yield voluntary obedience thereto. Kentucky and Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(jc) Congress, under its sovereign and exclusive power to regulate commerce among the several States, has the power to create a commission for the purpose of supervising, investigating, and reporting upon matters or complaints connected with or growing out of interstate commerce. Kentucky & I. Bridge Co. v. Louisville & N. R. Co., (C. C. D. Ky.) 2 I. C. R. 351.

(k) Investigation by the Commission, on its own motion, concerning a course pursued by certain carriers in respect to compliance with the provisions of the Act to Regulate Commerce. Re Altanta & W. P. R. Co., (Com.) 2 I. C. R. 461.

(ka) When a question of general public interest is involved, the Commission, in its own discretion and in furtherance of justice, may open a case to give parties the benefit of a more extended investigation of the same subject matter in other pending cases. Rice v. Western New York & P. R. Co. (Com.) 2 I. C. R. 496.

(l) The Interstate Commerce Commission has authority to institute investigations and to deal with violations of the law independently of a formal complaint, or of direct damage to a complainant. Re Grand Trunk R. Co. (Com.) 2 I. C. R. 496, 497, 504.

(m) Complainant attacked as unreasonable rates on lumber from Covington, Va., to New York City, N. Y. Rate charged 24 cents, via N. N. & M. V., R. F. & P., and Pennsylvania, which included lighterage within limits of New York. This route was cancelled and a new route entered with the B. & O., as a party but with an additional charge of 5 cents per 100 pounds on all less than lots of 5 cars to the same consignee and at the same point of delivery. At time of movement tariffs did not have to be filed and a circular was issued containing this information. Shipments moved thereunder. Subsequently the law of 1887 was passed making it necessary to file tariffs with the Commission at which time the rate and privilege was withdrawn. HELD, as the Act as amended was not in effect at time of movement, Commission has no jurisdiction, complaint dismissed. Rawson v. N. N. & M. V. R. Co. 2 I. C. C. 626.

(n) A complaint, under the Act to Regulate Commerce, based on acts which were done before the passage of the statute, charge no violation of the Act, within the cognizance of the Interstate Commerce Commission. White v. Michigan C. R. Co. (Com.) 2 I. C. R. 641.

(o) When applied to by petition the Commission must investigate matters complained of and must, to enforce the Act, make investigations and prosecute inquiries instituted on its own motion. On making any investigation, the Commission is required to make a report in writing of its recommendations, conclusions and findings of fact on which its conclusions are based, which recommendations and conclusions, if not complied with, can only be enforced through the courts, after trial, in accordance with established procedure. In such trial the facts found by the Commission, in conformity with the Statute, have legal effect and are prima facie evidence; but the recommendations, conclusions, and orders of the Commission are of no binding force in the courts. Rates & Charges on Food Products, 3 I. C. R. 151.

(p) The Commission is a special tribunal whose duties, though largely administrative, are sometimes semi-judicial, but it is not a court empowered to render judgments and enter decrees. The rule of estoppel by record, which is at all times technical in character and applies to the record of courts and proceedings before federal officials whose acts are final, is not applicable to the complaint of Kemble who had appeared before the Commission in a representative capacity as member of a committee of a complaining mercantile society in proceedings heretofore dismissed which involved questions similar to those presented in the case now under consideration and brought by him as an individual. Toledo Produce Exchange v. Lake Shore & M. S. R. Co. 3 I. C. R. 830, 835.

(q) The fact that the property and affairs of a carrier have been placed by a United States court in the hands of a receiver does not effect the jurisdiction of the Interstate Commerce Commission under a complaint charging such carrier with violations of the Act to Regulate Commerce. Troy Bd. of Trade v. Alabama Midland R. Co. (Com.) 4 I. C. R. 348.

(r) The opinion of the Interstate Commerce Commission has not the effect of a judicial determination, and in a proceeding to enforce it the court proceeds to hear the complaint de novo. Shinkle W. & K. Co. v. Louisville & N. R. Co. (C. C. S. D. Ohio) 5 I. C. R. 282.

(s) The Commission is an administrative board, and the courts are only to be resorted to when the Commission prefers to enforce the provisions of the statute by a direct proceeding in court, or when the orders of the Commission have been disregarded. The purposes of the act to regulate commerce call for full inquiry by the Commission into all the circumstances and conditions pertinent to the question involved in any proceeding under the statute, and the facts of the case are to be disclosed before the Commission. A procedure under which railroad companies withhold the larger part of their evidence from the Commission and first adduce it in the circuit court,—disapproved. C., & N. O. & T. P. R. Co. v. Inters. Com. Commission, 5 I. C. R. 391.

(t) The Interstate Commerce Commission is made a body corporate with legal capacity to be a party plaintiff or defendant in the Federal courts, by the acts of Congress creating the Commission, providing that it shall have an official seal and making it lawful for it to apply by petition for the enforcement of its orders. Texas & P. R. Co. v. Interstate Commerce Commission (U. S. Sup.) 5 I. C. R. 405.

(u) An order by the Interstate Commerce Commission, based upon an estimate which rests upon an erroneous principle and is unreliable, will not be judicially enforced. Interstate Commerce Commission v. Lehigh Valley R. Co. (C. C. E. D. Pa.) 5 I. C. R. 643.

(v) An order of the Interstate Commerce Commission is administrative and not final or conclusive in the sense of a court judgment or decree, and the order of the court giving effect to that of the Commission does not make it a final judgment so that change or modification cannot be made when changed traffic conditions arise. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.) 5 I. C. R. 656.

(w) Where, in a given case, it is the duty of the Commission to receive and take into account evidence of certain facts, its failure to do so is error of law. And so, where an issue of fact is raised before the Commission, its failure to dispose of it is an error of law. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(x) The function of the Commission is both quasi-judicial and administrative in its nature. The Commission is required to make reports in writing in respect

to complaints made to it. Such reports must include the findings of fact upon which the conclusions of the Commission are based, and such findings so made are to be deemed prima facie evidence as to each and every fact so found in any judicial proceeding thereafter had. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(y) The exceptional and special nature of the cases in which such discretion may be exercised, renders the application of any general rule impracticable, and every special case must be determined upon its own facts and special circumstances and in view of the objects for which the law was enacted. Petition of Cincinnati, Hamilton & Dayton R. Co., 6 I. C. C. 323.

(z) Under the "Act to Regulate Commerce" the Commission has continuing jurisdiction over the rates and practices of carriers subject to its provisions, and is not precluded from rehearing a particular case, and amending or modifying its original order therein, by the refusal of a Circuit Court of the United States to enforce such order against the carriers affected thereby,—especially when the reasons assigned for such refusal do not relate to the principal question in controversy and are consistent with an approval of the amended or modified order. Page v. Delaware, L. & W. R. Co., 6 I. C. C. 548.

(za) The Interstate Commerce Commission is authorized and required by the Act to Regulate Commerce to determine in appropriate proceedings whether the rates or practices of carriers complained of are unlawful, and if so, to what extent, and to require such carriers by suitable order to cease from doing what is ascertained to be unlawful, and also from omitting to do that which is found to be lawful. Page v. Delaware, L. & W. R. Co. 6 I. C. C. 548.

(aa) The Commission is authorized and required in appropriate proceedings to determine whether rates or practices of carriers complained of are unlawful, and, if so, to what extent; and to require such carriers by suitable order to cease and desist, not only from doing what is ascertained to be unlawful, but from omitting to do what is found to be unlawful. Page v. Delaware, L. & W. R. Co., 6 I. C. C. 548, 554.

(bb) The Interstate Commerce Commission cannot correct wrongs caused by improperly adjusted rates over independent lines from connecting cities to a common destination, as it is without authority to prescribe a maximum and minimum rate. Savannah Bureau of F. & T. v. Charleston & S. R. Co., 7 I. C. C. 458.

(cc) In proceedings involving issuance of an order concerning the publication and enforcement of transportation or terminal charges, rules and regulations, investigation is useful to enable the Commission to determine what, if any, administrative order should be directed to defendant carriers, and whether such order should be made to apply to all carriers subject to the regulating statute. American Warehousemen's Asso. v. Illinois Cent. R. Co., 7 I. C. C. 556.

(cca) Newly organized companies into which the railroads of two companies, violating an order of the Interstate Commerce Commission in pursuance of a common arrangement between them and other roads, pass, are properly made defendants in a suit to enforce the order of the Commission. Interstate Commerce Commission v. Western N. Y. & Philadelphia R. R. Co. 7 I. C. C. App. LXII.

(dd) Manifestly, the power of the Commission can not be greater than the power of Congress or of a state legislature to control or prescribe the rates of railroad carriers. And if the courts would not uphold an act of legislation which required defendants to grant special rates to complainants and others in like situation, it is plain that an order of the Commission directing them to do so would be equally invalid for want of authority to make it. Sprigg v. B. & O. R. Co., 8 I. C. C. 443, 454.

(ee) A decision of the Supreme Court sustaining the view of the Commission as to the illegality of certain terminal charges, but dismissing the proceeding on account of a subsequent reduction in the through rate, which had been made from certain territory, and which reduction amounted to more than the terminal charges involved; and authorizing the Commission to commence proceedings to correct any unreasonableness in the rate resulting from the additional terminal charge as to any territory to which the reduction referred to did not apply,—does not estop the Commission from further proceeding and investigation as to the legality of a terminal charge for the future, without the institution of a

new proceeding, as the Commission is not functus officio; and the mere use by the Supreme Court in its decree of the word "commencing," with reference to further proceeding, is not construed to require the formal institution of a new proceeding. The case will, therefore, stand reopened for further investigation and order, with leave to complainant to show to what territory the through rate reduction applied. Cattle Raiser's Asso. v. Chicago, B. & Q. R. Co., 10 I. C. C. 83.

(ff) To prescribe future rates, may be exercised upon complaint filed prior to time when jurisdiction was conferred. Cattle Raisers' Asso. v. M. P. & T. R. Co., 12 I. C. C. 1.

(gg) Not the proper form to which to appeal for the enforcement either of a charter, statutory, or common-law obligation to provide station facilities, and possesses no common-law jurisdiction. Jones v. St. Louis & S. F. R. Co., 12 I. C. C. 144.

(hh) The jurisdiction of the Commission and the purposes of the law cannot be defeated by the omission or failure of carriers to include in their schedules and to keep posted and open to public inspection the rates, fares and charges for the entire service, both transportation proper and refrigeration, which under the law they are bound to provide. Maxelbaum & Co. v. Atlantic Coast Line R. R. Co., 12 I. C. C. 178.

(ii) Analogy to court of equity. Railroad Commission of Ohio v. Hocking Valley R. Co., 12 I. C. C. 398.

(jj) There is an analogy between the jurisdiction of the Commission and that of a court of equity. A court of equity will not assume to dictate the policy or business management of a common carrier aside from its clear duty under its charter or the statutes. That function belongs exclusively to the company itself, and will not be interfered with because changes ought to be made as apparently reasonable, necessary or otherwise. But where the common carrier itself adopts as a part of its business policy any advantageous facility for handling freight it must not discriminate in its use by the public, but must afford the facility equally to all, and to this extent equity will interfere by injunction to prevent such favored use thereof and compel its equal service to all. Railroad Commission of Ohio v. H. V. Ry., 12 I. C. C. 398, 404.

(kk) An administrative body, to be unembarrassed by technical considerations in the examination of formal complaints. Missouri & K. Shippers' Asso. v. M. K. & T. R. Co., 12 I. C. C. 483.

(ll) The Commission is essentially an administrative body, and in the examination of formal complaints ought to get at the real substance of the issue presented unembarrassed by technical considerations. Mo. & Kan. Shippers' Association v. M. K. & T. Ry. Co., 12 I. C. C. 483.

(mm) HELD, that the decree of a court dismissing a bill brought to enforce an order of the Commission made previous to the amendment of June 29, 1906, is not a bar to the right of the Commission to examine with respect to a date subsequent to June 29, the same rate involved in that proceeding. Cattle Raisers' Asso. v. C., B. & Q. R. R. Co., et al, 12 I. C. C. 507.

IMPORTANT CASES SINCE 1908

(nn) The law contemplates the exercise of the Commission's judgment upon facts disclosed, and implies the right or duty to require or decline to require publications of joint rates. Chicago, Ottawa & Peoria Ry. Co. v. C. & N. W. Ry. Co., 33 I. C. C. 573, 576.

(oo) The powers of the Commission are only such as are conferred by the Act. Streever Lumber Co. v. C. M. & St. P. Ry. Co., 34 I. C. C. 1, 2.

(pp) The whole scope of the Act shows it to have been intended that the Commission and not the courts shall pass upon administrative questions. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 190.

(qq) It is not the function of the Commission to prescribe either the public policy or the managerial policy of carriers. Western Passenger Fares, 37 I. C. C. 1, 41.

(rr) It was urged that the Commission is not in the attitude of a traffic manager. The Act to Regulate Commerce, however, makes it the duty of the Commission to intervene between shippers and misdirected judgment of traffic officials where the result would so plainly produce an unlawful discrimination. Stonega Coke & Coal Co. v. L. & N. R. R. Co., 39 I. C. C. 523, 544.

(ss) By the amendment of June 29, 1906, the Commission was for the first time given power to prescribe a reason-

able maximum rate for the future. Sloss-Sheffield Steel & Iron Co. v. L. & N. R. R., 51 I. C. C. 635, 643.

(tt) The Commission's plenary power under section 15, to correct unreasonable practices on the part of common carriers, as having had fullest confirmation in cited decisions of the Supreme Court, was declared in Missouri & Illinois Coal Co., 22 I. C. C. 39, 48, 49. Postal Telegraph-Cable Co. v. Western Union Telegraph Co., 59 I. C. C. 512, 516.

(uu) The Commission's opinion is that the manifest intent of Congress was to repose in the Commission full and final authority to provide the revenues found necessary to yield the specified return by considering the entire structure of rates, both state and interstate, and the aggregate value of the railroad property held for and used in the service of transportation without regard to state lines, and to protect interstate commerce against any rate, fare, charge, classification, regulation, or practice that causes any undue, unreasonable or unjust discrimination. Intrastate rates within the state of Texas. 60 I. C. C. 421, 426.

(vv) Section 206 c of the act confers upon the Commission jurisdiction to hear and decide complaints arising during the period of federal control. Wasatch Coal Co. v. Director General, 66 I. C. C. 118, 120.

(ww) It is an intent clearly disclosed that the Commission shall keep continually in view of the public interest, the public need for a transportation system strong in all its parts, and the consequent necessity that carriers shall receive compensation fairly proportioned to the amount and character of the service which they perform and adequate to enable them to perform it efficiently. Divisions of joint rates and fares of M. & N. A. R. R., 68 I. C. C. 47, 51.

(xx) The function of the Commission is not that of mere computers and can not thus be atrophied. The duty to prescribe rates for the future carries with it the obligations to exercise an informed judgment upon all pertinent facts, present and past, in order to forecast the future as best it may. Reduced Rates 1922, 68 I. C. C. 676, 730.

(yy) The Commission is given authority to determine the lawfulness of a new rate, whether it be increased or decreased. The duty of specifying in what respect and to what extent the new rate will be lawful or unlawful is not laid upon the Commission, although it may make any order which would be proper in a proceeding pending upon complaint. Salt from Louisiana mines to Chicago, 69 I. C. C. 312, 313.

(zz) The law does not require the performance of a vain act. Gardner Shipping Co. v. Pennsylvania R. R. Co., 74 I. C. C. 461, 462.

(3a) The Commission should not set up its judgment as to the possible and proper thing to do as against the judgment of other public officers, presumed to be performing their duty lawfully, who met a situation of extreme difficulty as best they could under the limitations imposed by war, and with existing or procurable facilities overtaxed. Clearly it should not do so when the preponderance of evidence supports the action as having been taken in good faith, in a timely manner, to the extent reasonably necessary, and so as to apply with substantial uniformity upon all similarly circumstanced persons and traffic. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 52, 57.

(3b) It is the Commission's duty to apply a statute as it finds it, and for the courts to determine its validity where that question arises. Interchangeable Mileage Ticket Investigation, 77 I. C. C. 200, 202.

(3c) Under section 6 of the act a carrier must abide by published tariff rule, just as it must charge a published rate; but there is no reason why, when it is found that the rule has resulted in unreasonable charges under section 1, the Commission should fail to afford relief. The Commission's powers should not be construed so narrowly as to defeat justice. Hawkins & Sons v. Director General, as Agent, 80 I. C. C. 225, 227.

(3d) If paragraph (12) of section 1 of the act is at all doubtful in construction, the construction adopted by the Commission as administrative agency in its enforcement, followed for many years, without any attempt of Congress to change it, even when a bill for that purpose was long pending before it, and without any challenge of its correctness by any other department of the Government, while not controlling, is not to be disregarded without most cogent and persuasive reasons. Robertson v. Downing, 127 U. S., 607, 80 I. C. C. 529.

(3da) Fact that rates to certain points are maintained under contract between carriers and shippers does not affect authority of the commission to require carriers to desist from violations of the act. Ohio Rates, Fares, and Charges, 64 I. C. C., 493; Cape Girardeau Commercial Club, 51 I. C. C., 105. Graham & Gila Counties Traffic Asso. v. A. E. R. R. Co., 81 I. C. C. 134, 143.

(3db) The commission has no jurisdiction to construe or enforce contracts, and may inquire into contractual relations only in so far as is necessary to determine who, in fact, paid and bore freight charges as such. International Coal Products Corp. v. Director General, as Agent, 81 I. C. C. 435, 438, 439.

(3de) Desire of competitive manufacturing points to be each accorded its "fair share" of business in common destination territory does not, standing alone, justify exercise of commission's power to fix minimum rates. Sugar Cases of 1922, 81 I. C. C., 448, 454, 462, 472.

(3df) Reasonableness of charge during Federal control for use of motive power, cars, and crew in intraplant movement over plant tracks found not within commission's jurisdiction under section 206 (c) of transportation act, 1920. Such intrastate transactions were no more within purview of that act than they would now be if a State line were crossed in a similar intraplant movement. Furnishing of cars, locomotive, and crew did not make act performed a service of common carriage merely because owner was a common carrier. Movement was part of operation of complainant's plant, which defendant was under no legal duty to perform, and charges therefor was matter of contract. Grasselli Chemical Co. v. Director General, as Agent, 81 I. C. C. 562.

(3dg) The function of the Commission under the law is not that of mere computers and can not thus be atrophied. The duty to prescribe rates for the future carries with it the obligation to exercise an informed judgment upon all pertinent facts, present and past, in order to forecast the future as best it may. Express rates, 1922, 89 I. C. C. 297, 311.

(3e) The Interstate Commerce Commission is an administrative body, and is not to be hampered in its proceedings by the hard and fast rules as to pleading and practice which governs courts of law. Pennsylvania R. Co. United States, (Pa. 1923), 288 Fed. 88.

(3f) The Interstate Commerce Commission cannot conduct a fishing expedition into the affairs of strangers on the chance that something discreditable might turn up. Ellis v. I. C. C., 35 Sup. Ct. Rep. 646, 647; 237 U. S. 434; 59 L. Ed.

(3g) The jurisdiction of the Commission is determined by the essential character of the commerce in question. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 900; 238 U. S. 456, 59 L. ed.

(3h) Though the Interstate Commerce Commission has broad powers, and may investigate and decide whether a rate has been, is, or would be discriminatory, it cannot pass on the question whether a hypothetical lower rate would under conceivable conditions have been discriminatory, in order to enable a shipper to sue for damage for conspiracy to fix a higher rate. Keogh v. Chicago & N. W Ry. Co., 43 Sup. Ct. 47.

C. 389, 391.

II. PRIMARY JURISDICTION.

§2. In General.

See Actions at Law; Courts §7.

IMPORTANT CASES SINCE 1908

(a) The reasonableness of a published rate is a question for the Commission and not for the courts. While that rate stands in the published tariffs of the carriers, it is the only legal rate, and binds shipper and carrier alike. The regulating statute on this point is explicit, and neither party can avoid its provisions. Hocking Valley Ry. Co. v. Lackawanna Coal & L. Co., 224 Fed. 930, 932.

(b) Transportation Act of 1920, § 206a, does not require that claims arising out of federal control, or which prior to such control, an action might have been brought against the carrier, without first resorting to the Interstate Commerce Commission under subdivision "c," before action may be brought thereon. Collins Co. v. Davis, 283 Fed. 837.

(c) A report or an opinion of the Interstate Commerce Commission, that existing rates are unreasonable, without an order to change them, neither authorizes

nor permits a departure therefrom. North American Co. v. St. Louis & S. F. R. Co., 288 Fed. 612.

§3. Finality of Findings.

See Adjacent Foreign Country III; Allowances §3; Courts §2; Discrimination; Procedure Before Commission §11.

CASES 1887-1908

(a) The Interstate Commerce Commission is charged with the duty of investigating and reporting upon complaints; and the facts found or reported by it are only given the force and weight of prima facie evidence in such judicial proceedings as may thereafter be had for the enforcement of its recommendation or order. Kentucky & I. Bridge Co. v. Louisville & N. R. Co., (C. C. D. Ky.), 2 I. C. R. 351.

(b) The final judgment in a suit or proceeding before the Interstate Commerce Commission, unreversed and remaining of record, in full force and effect, is a bar to an action in the United States circuit court brought to recover damages alleged to be sustained by the plaintiffs from the same acts of infringement and violation of the provisions of the Act of Congress entitled an Act to Regulate Commerce, approved the second day of March, 1889, as they complained of in their statement and declaration in that case. (Section 9 of the Interstate Commerce Act cited.) Riddle Dean & Co. v. N. Y. L. E. & W. R. Co., 3 I. C. R. 230.

(c) The provision of the Interstate Commerce Act, that the findings of fact of the Commission shall be prima facie evidence of the matters therein stated, does not make them nonconclusive in proceedings before the court to enforce the order of the Commission; but the court must consider all evidence submitted, and base its judgment thereon. Interstate Commerce Commission v. Atchison, T. & S. F. R. Co., (C. C. D. Cal.), 4 I. C. R. 323.

(d) An order made by the Commission is essentially an administrative order, and is not final or conclusive in the sense of a court judgment or decree. And an order of the United States circuit court, enforcing an order of the Commission, does not change its character or make it a final judgment. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

IMPORTANT CASES SINCE 1908

(e) The courts have repeatedly held that in so far as rulings of the Commission are administrative they may be availed of by any person in a position to do so. Plymouth Coal Co. v. L. V. R. R., 36 I. C. C. 143, 144.

(f) It has been settled by repeated decisions of the Supreme Court that findings of fact by the Commission are always prima facie correct and in most instances conclusively so. Louisville & N. R. Co. v. United States, 225 Fed. 571.

(g) All presumptions are in favor of a finding of the Interstate Commerce Commission, made in the exercise of its especial functions and after full investigation, that a rate in force is not so low as to be unremunerative and that a proposed increase is not justified; but the Commission cannot condemn a rate without a finding based on substantial evidence that it is unjust, unreasonable or discriminatory. St. Louis Southwestern Ry. Co. v. United States, 234 Fed. 668.

(h) Under the express provisions of the Interstate Commerce Act, § 16, the findings and order of the Interstate Commerce Commission are prima facie evidence of the facts therein stated, in an action on a reparation order of the Commission. Pennsylvania R. Co. v. Weber, 42 Sup. Ct. 18.

(i) As to administrative orders operating in futuro, the Interstate Commerce Commission's findings of fact are conclusive, subject to certain qualifications, and a finding that discrimination is unjust is ordinarily a finding of fact. Central R. Co. of New Jersey v. United States, 42 Sup. Ct. 80.

(j) Proceedings before the Interstate Commerce Commission on complaint respecting rates filed by carriers, in which the Commission, after investigation and hearings, approved the rates, settled the questions of their reasonableness and nondiscriminatory character. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47.

United States, et al, 272 Fed. 768.

III. OVER PROCEDURE

§3¼. In General.

See Procedure Before Commission.

CASES 1887-1908

(a) The Commission having entered upon inquiry and investigation as to the reasonableness of transportation rates on food products and given notice of the time and place of taking testimony and afforded opportunity for calling and cross-examination of witnesses: HELD, That such proceeding was a substantial

compliance with the Statute. Rates & Charges on Food Products, 3 I. C. R. 151.

(b) While the investigation and report of the Interstate Commerce Commission and its order do not constitute a judicial proceeding, it was the intention of Congress that the procedure should substantially conform to that before a court charged with the duty of finding the facts and giving judgment thereon, or to the investigation or report of a referee or a special master in chancery passing upon both facts and law. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.), 5 I. C. R. 656.

§3½. Conference Rulings.

IMPORTANT CASES SINCE 1908

(a) The conference rulings of the Interstate Commerce Commission respecting the construction of statutes regulating commerce, though not conclusive, are entitled to great weight and should not be lightly overruled. Chicago, G. W. Ry. v. Postal Telegraph-Cable Co., 245 Fed. 592.

§4. Examiners.

ALL CITATIONS

Goodrich Transit Co. v. I. C. C., 190 Fed. 943, 965; United States v. N. C. & St. L. Ry. (Tenn., 1914), 217 Fed. 260, 264; U. S. V. L. & N. R. Co., 35 Sup. Ct. 363, 366, 368, 369; 235 U. S. 314; 236 U. S. 318; 59 L. ed.

§5. Orders.

See Advanced Rates §21½; Allowances §3; Courts; Long and Short Hauls §11; Procedure Before Commission IV.

CASES 1887-1908

(a) When applied to by petition the Commission must investigate matters complained of and must, to enforce the act, make investigations and prosecute inquiries instituted on its own motion. On making any investigation the Commission is required to make a report in writing of its recommendations, conclusions, and findings of fact on which its conclusions are based, which recommendations and conclusions, if not complied with, can only be enforced through the courts, after trial, in accordance with established procedure. In such trial the facts found by the Commission, in conformity with the statute, have legal effect and are prima facie evidence; but the recommendations, conclusions and orders of the Commission are of no binding force in the courts. In the matter of alleged excessive freight rates and charges on food products. 3 I. C. C. 151, 153.

(b) It is not sufficient for the Interstate Commerce Commission in a report of its findings of fact and conclusions, to make statements in such a general way as not to disclose its view upon particular phases of the evidence, or its conclusions of law upon facts found with reference to the particular issues in the case, and make up the report of mere conclusions. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.), 5 I. C. R. 656.

(c) It is not sufficient for the report of the Commission to be made up of mere conclusions with respect either to law or fact. It should make suitable reference to the evidence where there is a conflict in the proof, and show how the Commission settles the disputed fact; or if the evidence in regard to any fact is undisputed, it should be so stated by the Commission. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(d) The fact that the Commission is composed of men of ability and experience, selected with reference to their particular qualifications therefor, and whose entire time is devoted to questions arising under the act, gives to its findings and opinion great weight. But, in order that the finding and opinion of the Commission shall have the value intended, it should conform to the purpose of Congress in requiring such proceedings. Its opinion or report should show what the issues in the case are, and what facts it finds in regard to such issues. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(e) A final order by the Interstate Commerce Commission promptly obeyed by the carrier will not be amended, several years after its rendition, as to reparation for damages resulting from unlawful practices, so as to subject the carrier to further requirements in favor of the complainants. Rice v. Western N. Y. & P. R. Co., 6 I. C. C. 455.

IMPORTANT CASES SINCE 1908

(f) Orders with respect to rates are not conclusive beyond a period of two years. National Hay Ass'n v. M. C. R. R. Co., 19 I. C. C. 34, 37.

(g) The Commission has complete power to suspend or modify its orders. Loftus v. Pullman Co., 19 I. C. C. 102, 104.

(h) The Interstate Commerce Commission is not required to make formal marked and numbered findings, but its findings may be contained in the colloquial statements of an opinion. Lehigh Valley R. Co. v. American Hay Co., 219 Fed. 539, 540.

(i) A provision in an order made by the Interstate Commerce Commission June 29, 1908, relating to payments by a railroad company to an elevator company for services in elevating grain, which forbade payment for elevation of grain not reshipped within 10 days, etc., HELD part of the Commission's administrative order, and cannot, in view of the decisions of the courts, be treated as a part of a previous definition of elevation made in an attempt by the Commission to prevent rebating under a contract between the parties; hence the 10-day limitation expired on the expiration of the order affecting payments. Omaha Elevator Co. v. Union Pac. R. Co., 249 Fed. 827.

(j) The Interstate Commerce Commission HELD to have power to amend an order previously made, to remove ambiguity, without notice to a party, where the subject-matter of the amendment was within the original inquiry on which evidence was introduced at the hearing. Pennsylvania R. Co. v. United States, (Pa. 1923.), 288 Fed. 88.

(k) Orders of the Interstate Commerce Commission on the subject of rates are quasi judicial in character and are void, if made without notice. Pennsylvania R. Co. United States, (Pa. 1923), 288 Fed. 88.

(l) A report of the Interstate Commerce Commission need only state the ultimate facts rather than the evidentiary facts, and where in a report awarding reparation for discrimination in furnishing coal cars the report of the Commission showed: (1) the relation of the parties as shipper and carrier in interstate commerce; (2) the character and amount of the traffic out of which the claims arose; (3) the rates paid by the shipper for the service rendered and whether they were according to the established tariff; (4) whether and in what way unjust discrimination was practiced against the shipper from November 1, 1900, to August 1, 1901; (5) whether, if there was unjust discrimination, the shipper was injured thereby, and, if so, the amount of his damages; (6) whether the rate collected from the shipper from August 1, 1901, to July 17, 1907, was excessive and unreasonable, and, if so, what would have been a reasonable rate for the service; and (7) whether, if the rate was excessive and unreasonable, the shipper was injured thereby, and, the amount of his damages, such report was a compliance with the requirements of the Interstate Commerce Act, since such findings were easily separated from other matter contained in the report. Meeker v. Lehigh Valley R. Co., 35 Sup. Ct. Rep. 328, 335; 236 U. S. 412, 434; 59 L. ed.

(m) Where the finding and order of the Interstate Commerce Commission in a reparation suit contains every fact essential to a recovery in a suit brought in a United States district court to enforce the order except the service of the order itself, and the refusal of the carrier to comply with it, such findings and order are admissible in evidence although they contain some irrelevant matter. Meeker v. Lehigh Valley R. R., 35 Sup. Ct., 337, 339; 236 U. S. 412, 434, 59 L. ed.

(n) If the order made by the Commission does not contravene any constitutional limitation, and is within the constitutional and statutory authority of that body, and not unsupported by testimony, it cannot be set aside by the courts, as it is only the exercise of an authority which the law vests in the Commission. Pennsylvania Co. v. United States, 35 Sup. Ct. Rep. 370, 373; 236 U. S. 351, 59 L. ed.

See Immunity of Witness.

CASES 1887-1908

(a) The act makes it the duty of the Commission to execute and enforce the provisions of the act which require rates and charges to be reasonable. In the performance of this duty the Commission has authority to inquire into the management of the business of common carriers and to require the attendance of witnesses, the production of books and papers, tariffs and contracts relating to any matter under investigation. To enforce this authority in this respect the Commission must invoke the aid of a court of the United States. In the matter of alleged excessive freight rates and charges on food products, 3 I. C. C. 151, 152.

IMPORTANT CASES SINCE 1908

(b) Where the Commission has no power to regulate a witness to an investigation it cannot extend its jurisdiction by making such witness a party to the proceedings and serving it with notice. Ellis v. I. C. C., 35 Sup. Ct. Rep. 646, 647; 237 U. S. 434, 59 L. ed. 1036.

(c) The Interstate Commerce Act confers upon the Commission powers of investigation in very broad language and this court has refused by construction to limit it so far as the business of the carriers is concerned and their relation to the public. And it would seem to be a necessary deduction from the cases that the investigating and supervising powers of the Commission extend to all of the activities of carriers and to all sums expended by them which could affect in any way their benefit or burden as agents of the public. If it be grasped thoroughly and kept in attention that they are public agents, we have at least the principle which should determine judgment in particular instances of regulation or investigation; and it is not far from true—it may be it is entirely true, as said by the Commission—that "there can be nothing private or confidential in the activities and expenditures of a carrier engaged in interstate commerce." Turning to the specialties of the Interstate Commerce Act we find there that all charges and treatment of all passengers and property shall be just and reasonable, and there is a specific prohibition of preferences and discriminations in all the ways that they can be executed, with corresponding regulatory power in the Commission. And authority and means are given to enable it to perform its duty. By section 12 it is authorized to inquire into the management of the business of carriers and keep itself informed as to the manner and method in which the same is conducted, and has the right to obtain from the carriers full and complete information. It may (section 13) institute an inquiry of its own motion, and may (section 20) require detailed accounts of all the expenditures and revenues of carriers and a complete exhibit of their financial operations and prescribe the forms of accounts, records and memoranda to be kept. And it is required to report to Congress all data collected by it. It would seem to be an idle work to point out the complete comprehensiveness of the language of these sections and we are not disposed to spend any time to argue that it necessarily includes the power to inquire into expenditures and their proper assignments in the accounts, and the questions under review, we have seen, go no further. They are incidental to an investigation as to the "manner and method" (section 12) in which the business of the carriers is conducted; they are in requisition of a detailed account of their expenditures and revenues and an exhibit of their financial operations (section 20), and the answers to them may be valuable as information in Congress (section 21). A limitation, however, is deduced from section 13. It is said to be confined to cases where an inquiry is instituted "as to any matter or thing concerning which a complaint is authorized to be made, or concerning which any question may arise under any provisions" of the act "or relating to the enforcement of any of the provisions" of the act. In other words, that the inquiry is determined by the manner of procedure. The objection overlooks the practical and vigilant function of the Commission. To sustain it appellant seems to urge that there must be put into words by some complainant or by the Commission, if it move of itself, some definite charge of evil or abuse, and put into expression some definite remedy, and that an inquiry must not transcend either charge or remedy. To so transcend, appellant urges, would be an exercise of autocratic power and is condemned in Harriman v. Interstate

Commerce Commission, 211 U. S. 407, 29 Sup. Ct. 115, 53 L. ed. 253. Appellant presses that case beyond its principle. And we may observe that section 13 has been amended and broadened since the decision of that case. The inquiry in the present case is more immediate to the function of the Commission than the inquiry in that and comes within Interstate Commerce Commission v. Chicago, R. I. & P. Ry., supra., where it was said, at page 103 of 218 U. S. at page 656 of 30 Sup. St. (54 L. ed. 946) "The outlook of the Commission and its powers must be greater than the interest of the railroads or of that which may effect those interests. It must be as comprehensive as the interest of the whole country. If the problems which are presented to it therefore are complex and difficult, the means of solving them are as great and adequate as can be provided." And they must necessarily be expressed in generalities. A precise specification of powers might work a limitation and all not enumerated be asserted to be withheld. Smith v. I. C. C., 38 Sup. Ct. 30, 32, 33, 245 U. S. 33, 62 L. Ed. 135.

Harriman v. I. C. C., 211 U. S. 407, 419, 29 Sup. Ct. 115, 53 L. Ed. 253; U. S. v. Skinner, 218 Fed. 870, 872, 873; Pere Marquette R. R., and C., H. & D. Ry., 44 I. C. C. 1, 223.

§6½. Investigations in General.

See Advanced Rates §21; Allowances §1.

IMPORTANT CASES SINCE 1908

(a) The Act gives the Commission the power "to investigate matters complained of in such manner and by such means as it shall deem proper." Interstate Packing Co. v. C., M. & St. P. Ry. Co., 41 I. C. 396, 399.

(b) Under the Interstate Commerce Act, the Interstate Commerce Commission has power to institute and pursue an investigation concerning practices represented to be unduly preferential or prejudicial, even though arising on a division of joint rates, and to stop such practices when found by an order that will prevent their continuance. Chestnut Ridge Ry. Co. v. United States, 248 Fed. 791.

(c) But the Act does not require that some definite charge of evil or abuse and some definite remedy be put into words by some complainant, or by the Interstate Commerce Commission to authorize it to make an investigation as to whether expenditures by a railroad company in political activities and to suppress competition have been charged to operating or legal expenses. Smith v. I. C. C., 38 Sup. Ct. 30, 245 U. S. 33, 62 L. Ed. 135.

(d) The purpose of an investigation is the penetration of disguises or to form a definite estimate of any conduct of the carriers that may in any way affect their relation to the public. It cannot be assumed that an investigation will be instituted or conducted for any other purpose or in mere wanton meddling. Smith v. I. C. C., 38 Sup. Ct. 30, 33, 34, 245 U. S. 33, 62 L. Ed. 135.

Holmes & Hallowell Co. v. G. N. Ry. Co., 69 I. C. C. 11, 17; Owensboro Wheel Co. v. Director General 69 I. C. C. 503; Rates on Grain, Grain Products, and Hay, 80 I. C. C. 362, 365; New Mexico Central Ry. v. A., T. & S. F. R. Co., 81 I. C. C. 718, 722; United States v. L. & N. R. R. Co., 212 Fed. 486, 492.

IV. OVER RAILROADS

§6½a. In General.

IMPORTANT CASES SINCE 1908

(a) Undoubtedly the Commission has the right and duty, as occasion may require, to investigate and determine whether or not a carrier or a group of carriers is operated and managed efficiently and economically, in order that poor and inefficient management may not result in higher rates than would otherwise be necessary. But while it may thus take the character of management and operation into consideration in fixing the level of rates, it is unable to find any provision of the act, which authorizes it by order to require a carrier to conduct its affairs along lines which may seem to the Commission more efficient and economical than those now followed. New Mexico Central Ry. v. A. T. & S. F. R. Co., 81 I. C. C. 718, 722.

§6¾. Documents, Correspondence and Reports.

See Correspondence.

CASES 1887-1908

(a) The Interstate Commerce Commission has authority to inquire into the management of the business of common carriers, and to require the attendance and testimony of witnesses, the produc-

tion of books and papers, tariffs and contracts, relating to any matter under investigation. To enforce its authority in this respect the Commission must invoke the aid of a court of the United States. Re Rates & Charges on Food Products (Com.), 3 I. C. R. 151.

(b) A railroad company whose line is entirely within the lines of a single state, and which never issues a bill of lading to any point beyond its own line, and receives no freight under through bills of lading, although it pays advance charges when necessary and collects its own charges from the company which takes interstate freight to its final destination, is not within the Interstate Commerce Act, and cannot be compelled to make the report required by the supplementary act of August 7, 1888, §6. The court says: I have no doubt that Congress would have the power to amend the act so as to require them and other companies occupying like relations to file reports, inasmuch as they all carry freight destined for points beyond the state in which the road is located. But the act is not so framed as to include the defendant company, and while it is a proper act of courtesy for the defendant company to furnish annual copies of its report to the state commissioner of roads and telegraphs it cannot be forced to make such reports. The provisions of the supplemental act is to be strictly construed for the reason that § 6 enacts that the failure or refusal to make report shall operate as a forfeiture in each case in a sum of not less than $1,000 nor more than $5,000. Interstate Commerce Commission v. Bellaire, Zanesville & Cincinnati Ry. Co., 7 I. C. C. App. XXXV.

IMPORTANT CASES SINCE 1908

(c) The Interstate Commerce Commission cannot conduct a fishing expedition into the affairs of a stranger to an investigation proceeding for the chance that something discreditable may be disclosed. Ellis v. Interstate Com. Com., 35 Sup. Ct. 645, 647; 237 U. S. 434, 59 L. ed. 1036.

ALL OTHER CITATIONS

United States v. N. C. & St. L. Ry., 217 Fed. 260, 263; U. S. v. L. & N. R. Co., 35 Sup. Ct., 363, 369; 235 U. S. 314; 236 U. S. 318; 59 L. ed.

§7. Capitalization.

See Evidence §7; Express Companies §24; Reasonableness of Rates §5.

ALL CITATIONS

Advances in Rates—Western Case, 20 I. C. C. 307, 334; Morgan Grain Co. v. A. C. L. R. R. Co., 19 I. C. C. 460, 471.

§8. Physical Valuation.

See Physical Valuation.

IMPORTANT CASES SINCE 1908

(a) Under an order of the Interstate Commerce Commission, providing that the data on which the Commission based its tentative finding of the valuation of a carrier's property would not be open for inspection, unless and until offered in evidence either in a valuation hearing under Interstate Commerce Act, §19a, as added by Act March 1, 1913 (Comp. St. §8591), or in a court of competent jurisdiction, the carrier is not denied an opportunity to offer the data in evidence at the hearing, if it desires to do so. United States v. Interstate Commerce Commission, 290 Fed. 264.

(b) Under Act March 1, 1913, adding section 19a to the Interstate Commerce Act (Comp. St. §8591), requiring the Commission to fix the value of the property used by common carriers, and providing that after a tentative valuation is fixed the Commission shall give notice to the carrier affected and to other persons, and if protest is made, afford a hearing before fixing the final valuation, the Commission acts only as an appraiser in fixing the tentative value, and can base its finding on ex parte hearings, or on information obtained by it with other methods. United States v. Interstate Commerce Commission 290 Fed. 264.

(c) The construction by the Interstate Commerce Commission of Interstate Commerce Act, §19a, as added by Act March 1, 1913 (Comp. St. §8591), Providing that, unless otherwise ordered by the Commission, with reasons therefor, the records and data of the Commission shall be open to the inspection and examination of the public, as permitting the Commission to forbid inspection of the data by the carrier interested, as well as by the public, unless it is offered in evidence, is a reasonable construction by the Commission, in the exercise of discretion committed to it, and therefore cannot be controlled by mandamus. United States v. Interstate Commerce Commission 290 Fed. 264.

ALL OTHER CITATIONS

Case, 20 I. C. C. 243, 256; Increased In Re Advances in Rates—Eastern Rates, 1920, 58 I. C. C. 220, 226.

§8¼. Earnings.

See Government Guaranty.

IMPORTANT CASES SINCE 1908

(a) The duty cast upon the Commission by section 15a is continuing and looks to the future. It does not constitute a guaranty to the carriers, nor is the obligation cumulative. The Commission is not restricted by past or present statistics of operations and earnings. These are serviceable only as they illuminate the future. What is contemplated by the law is that in this exercise of rate-making power the result shall reflect the Commission's best judgment as to the basis which may reasonably be expected for the future to yield the prescribed return. Rates on Grain, Grain Products, and Hay, 64 I. C. C. 85, 99.

(b) The determination of what will constitute a fair return under paragraph 3 of the act, in judgment of the Commission, is a function distinct from that of initiating and adjusting rates under paragraph 2 of that section. Reduced rates 1922, 68 I. C. C. 676, 680.

(c) In the recapture provisions of the act Congress recognized that uniform rates on competitive traffic which would adequately sustain all the carriers would produce substantially and unreasonably more than a fair return for some carriers. The Commission should not take the few, and the highest type of their securities, as the basis for determining what shall be a fair return for all. It can hardly be disputed that the carriers of this country should not continue to provide for all needed capital by successive bond issues. Reduced Rates 1922, 68 I. C. C. 676, 681.

V. OVER RATES.

ALL CITATIONS

Reduced rates, 1922, 68 I. C. C. 730.

§8½. In General.

CASES 1887-1908

(a) But the Commission has power to regulate fares and freights for transportation between different States. Phila. etc. Steamship Co. v. Pennsylvania (U. S. Sup. Ct.), 1 I. C. R. 308.

(ab) The Commission has not the power to make rates generally, but only to determine whether rates imposed by the railroads are in conflict with the statute. Thatcher v. Fitchburg R. R. Co. 1 I. C. C. 356, 357.

(b) The Commission has no power to make rates generally, but only to determine whether rates imposed by railroads are in conflict with statute. Thatcher v. Fitchburg R. R. Co., 1 I. C. R. 365.

(c) The Commission has no power to compel a railroad company to increase its rates which are supposed to be so low as to be ruinous to itself or to its rivals. Re Chicago, St. Paul & Kansas City R. Co., 2 I. C. R. 137.

(d) The Act to Regulate Commerce makes it the duty of the Interstate Commerce Commission to execute and enforce the provisions of the Act which require rates and charges to be reasonable. In the performance of this duty the Commission has authority to inquire into the management of the business of common carriers and to require the attendance and testimony of witnesses, the production of books and papers, tariffs and contracts relating to any matter under investigation. To enforce its authority in this respect the Commission must invoke the aid of a court of the United States. Rates & Charges on Food Products v. 3 I. C. R. 151.

(e) The Interstate Commerce Commission has the duty of determining what are reasonable and unreasonable rates. Coxe v. Lehigh Valley R. Co. (Com.), 3 I. C. R. 460.

(f) The Act to Regulate Commerce declares every unreasonable charge unlawful, requires the Commission to enforce its provisions and confers the power, and imposes on the Commission the duty, of determining what are reasonable rates, as well as what are unreasonable. Cox Bros. & Co. v. Lehigh Valley R. Co., 3 I. C. R. 460.

(g) If the duty of the Commission in respect to unjust and unlawful rates ends when it has been convinced that rates are unreasonable, and so decided them to be, and for any reason the Commission may not determine what are, as well as what are not, reasonable, the regulation provided by the statute begins with complaint and ends in confusion. Coxe Bros. & Co. v. L. V. R. R. Co., 3 I. C. C. 460, 478.

(h) The power and duty of the Commission to fix maximum rates in cases of complaints against rates as unjust, excessive and unreasonable, re-affirmed. Murphy, Wasey & Co. v. Wabash R. Co., 3 I. C. R. 725.

(i) The Interstate Commerce Com-

mission is not restricted to finding that an existing rate is unreasonable and forbidding its continuance, but has the further authority to ascertain, order, and enforce a rate that is reasonable. Perry v. Florida C. & P. R. Co. (Com.), 3 I. C. R. 740.

(j) The Northern Pacific Railroad Company is not exempt under its charter from the authority to regulate rates conferred on the Commission by the Act to Regulate Commerce. Raworth v. Northern P. R. Co. (Com.), 3 I. C. R. 857.

(k) The power of the Interstate Commerce Commission to pass upon the reasonableness of existing rates of carriers does not necessarily imply a right on the part of the Commision to prescribe rates for carriers, but the function of the Commission is to consider and give proper weight to the facts on which the reasonableness of a rate in a given case depends. Cincinnati, N. O. & T. P. R. Co. v. Interstate Commerce Commission (U. S. Sup.), 5 I. C. R. 391.

(l) The Commission is not authorized itself to fix rates. The power vested in the Commission to pass upon the reasonableness of existing rates does not imply authority to prescribe or prejudice reasonable rates in advance of an issue being made and its findings and consideration of facts in the particular case. C., N. O. & T. P. R. Co. v. Inters. Com. Commission, 5 I. C. R. 391.

(m) The Interstate Commerce Commission has no power to fix maximum rates for transportation under the provision of the act to regulate commerce empowering them to pass on the reasonableness of existing rates. Interstate Commerce Commission v. Lehigh Valley R. Co. (C. C. E. D. Pa.), 5 I. C. R., 643.

(n) The Commission is not clothed with the power to fix rates. Interstate Commerce Commission v. Lehigh V. R. Co., 5 I. C. R. 643.

(o) The Interstate Commerce Commission has no power under the act to regulate commerce to fix rates to be charged by carriers. Interstate Commerce Commission v. Alabama Midland R. Co. (C. C. App. 5th C.) 685; Interstate Commerce Commission v. Northwestern R. Co. (C. C. D. S. C.), 5 I. C. R. 650.

(p) The Commission is not warranted by the act of Congress to fix rates. Interstate Commerce Commission v. N. R. Co., 5 I. C. R. 650.

(q) The Commission has no power to make rates; and especially has the Commission no power to order that rates from a given point to one city shall bear a certain relation to the rates from the same point to another city. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(r) If the Interstate Commerce Commission has power to make rates at all, a rate should not be made to a place dependent upon that to another, to be increased or diminished as the latter rate is changed. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.), 5 I. C. R. 656.

(s) There is no provision in the act that expressly or by necessary implication confers upon the Commission power to fix rates. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(t) Where a complainant has invoked the aid of the law to secure what he, with the acquiescence of the carrier had previously obtained in apparent contravention of law, the carrier cannot plead violations of the law by complainant in bar of a decision on the merits, nor will the individual interests of the complainants be taken into consideration; but the Commission will examine the evidence and make such report thereon as, under the provisions of the law, the rights of other shippers and the public generally may require. Page v. Delaware, L. & W. R. Co., 6 I. C. C. 148.

(u) The Interstate Commerce Commission should, where the rates to a complaining town are asserted to be unjust on the ground that more favorable charges are allowed a competing locality, investigate the facts and circumstances affecting the transportation, and order such readjustment as seems to be required. Daniels v. Chicago, R. I. & P. R. Co., 6 I. C. C. 458.

(v) Under the act the Commission has continuing jurisdiction over the rates and practices of carriers subject to its provisions, and is not precluded from rehearing a particular case, and amending or modifying its original order therein, by the refusal of a Circuit Court of the United States to enforce such order against the carriers affecting thereby. Page v. D. L. & W. R. Co., 6 I. C. C. 548, 553.

(w) The Interstate Commerce Commission has no power to prescribe maximum rates to be charged by the carrier, but the Act to Regulate Commerce leaves common carriers free to fix their own charges, subject to the leading prohibitions that they shall not be unjust or unreasonable and shall not unjustly discriminate. Interstate Commerce Commission v. Cincinnati, New Orleans & Texas Pacific Ry. Co. et al, 7 I. C. C. L.

(x) Incorporating into the Interstate Commerce Act the common-law obligation resting upon a carrier to make all its charges reasonable and just, and directing the Commission to execute and enforce the provisions of the act, do not by implication carry to the Commission or invest it with power to exercise the legislative function of prescribing rates which shall control in the future. The Interstate Commerce Commission has no power to prescribe a tariff of rates which shall control in the future and therefore cannot invoke a judgment in mandamus from the courts to enforce any such tariff by it prescribed. Interstate Commerce Commission v. Cincinnati, New Orleans & Tex. Pacific Ry. Co., 7 I. C. C. App. LX.

(y) The important duties of the Interstate Commerce Commission in respect to railroad rates include the duty of inquiry as to the management of the business with the right to compel complete and full information concerning it and the duty of seeing that there is no violation of the long and short haul clause of the act or any prohibited discrimination, rebate, or other device to give undue preferences and also that the publicity required by § 6 is observed. The court says: The power of fixing rates under the Interstate Commerce Act is not to be determined by any mere considerations of omission or implication. The power to prescribe a tariff or rates for carriage by a common carrier is a legislative and not an administrative or judicial function. If Congress had intended to grant such a power to the Interstate Commerce Commission it cannot be doubted that it would have used language open to no misconstruction, but clear and direct. Interstate Commerce Commission v. Cincinnati, New Orleans & Tex. Pacific Ry. Co., 7 I. C. C. App. LV.

(z) Congress has not conferred upon the Interstate Commerce Commission the legislative power of prescribing rates either maximum or minimum or absolute, nor has it authorized the Commission to obtain from the courts a peremptory order that in the future the railroad companies should follow the rates which it has determined to have been in the past reasonable and just. Interstate Commerce Commission v. Alabama Midland Ry Co., 7 I. C. C., App. CIX.

(aa) Under the Act the Commission has no power to prescribe the tariff of rates which shall control in the future. Cary v. Eureka Springs R. Co., 7 I. C. C. 286, 319.

(bb) Under the law as construed by the court the Commission has power to say what in respect to the past was reasonable and just, but as to rates complained of as unreasonable, unjust and unlawful, and so found to be by the Commission, it can make no provision or order for their reduction which the courts are required to enforce or the carriers obliged to obey. Carey v. Eureka Springs R. Co., 7 I. C. C. 286, 321.

(cc) "Under the Interstate Commerce Act the Commission has no power to prescribe the tariff of rates which shall control in the future." Interstate Commerce Commission v. Cincinnati, N. O. & T. P. Co., 167 U. S. 479, 42 L. ed. — "The reasonableness of the rate in a given case depends on the facts, and the function of the Commission is to consider the facts and give them their proper weight." Cincinnati, N. O. & T. P. R. Co. v. Interstate Commerce Commission, 162 U. S. 184, 40 L. ed. 935, 5 Inters. Com. Rep. 391. Under the law as construed by the court the Commission has power to say what in respect to the past was reasonable and just, but as to rates complained of as unreasonable, unjust and unlawful, and so found to be by the Commission, it can make no provision or order for their reduction which the courts are required to enforce or the carriers obliged to obey. When rates are found to be unreasonable the Commission can declare them unlawful and recommend their reduction, and where, after investigation, rates of carriers complained of are found to have been in the past, and still to be, unjust, unreasonable and in violation of the statute, it is made the duty of the Commission, by section 15 of the Act to regulate commerce, to notify and require such carriers to cease and desist from such violations. Cary v. Eureka Springs R. Co., 7 I. C. C. 286.

(dd) Although the Act to Regulate Commerce requires that transportation charges shall be reasonable and just, and complainant prayed in his petition that defendants be ordered to establish and maintain such rate on coal in carloads from Cumberland, Md., to North Garden, Va., as should be deemed just, reasonable and lawful, the Act as recently interpreted by the courts makes no provision under which carriers can be ordered or required to establish or maintain any rate other than such rate of charges as any such carrier may fix and establish for itself. Montell v. Baltimore & Ohio R. Co., 7 I. C. C. 412, 430.

(ee) Wrongs caused by improperly adjusted rates over independent lines from competing cities to a common destination cannot be corrected without authority to prescribe both the maximum and the minimum rate, and the Commission is not empowered to do either. Savannah Bureau of Freight & Transportation v. C. & S. R. Co., 7 I. C. C. 458, 475.

(ff) Although carriers serving but one of two competing cities may, by reducing their rates to the city served by them prevent the correction of an unjust relation of rates to the two places from common points of supply, nevertheless it is the duty of the Commission to condemn such a relation of charges, and to indicate the basis upon which the rates should be readjusted. Chamber of Commerce of Milwaukee v. C. M. & St. P. R. Co., 7 I. C. C. 481, 510.

(gg) An order of the Interstate Commerce Commission forbidding carriers to charge any greater rates than fixed by such order is invalid, as the Commission has no power to fix rates. I. C. C. v. Northeastern R. R. Co. of S. Carolina, 8 I. C. C. App XXXV.

(hh) An order of the Interstate Commerce Commission fixing rates for the carriage of merchandise by railroads to a designated point is null and void. So an order of the Interstate Commerce Commission generally declaring the duty of railroad companies as defined by law, and prescribing the maximum rates which may be charged by the railroads for carriage to a certain point of freight not affected at coast and terminal points by competition of ocean carriers,—is void. Farmers' Loan & Trust Co. v. Northern Pacific R. R. Co., 8 I. C. C. App. XXXV.

(ii) The Supreme Court of the United States, while denying power in the Interstate Commerce Commission to enforce the provision of the Act to Regulate Commerce, § 1, that all rate charges "shall be reasonable and just," by orders prescribing reasonable maximum rates, expressly recognizes the authority and duty of the Commission to enforce §§ 2, 3 and 4 of the act. Phillips, Bailey & Co. v. Louisville & N. R. Co., 8 I. C. C. 93, 107.

(jj) The Commission has no power to fix rates for the future. Sprigg v. B. & O. R. Co., 8 I. C. C. 443, 452.

(kk) The Commission has no power to prescribe rates, maximum, minimum or absolute, but it may order the carriers to desist from the continuance of an unlawful practice. The Commission may therefore after investigation, find a particular rate to be unlawful and prohibit the exaction of that rate, or find the time allowed for loading or unloading unlawful or, in other words, unreasonably small, and forbid the charging of demurrage at the expiration of that time and before the expiration of a reasonable time. Pennsylvania State Millers' Asso. v. P. & R. R. Co., 8 I. C. C. 531, 558.

(ll) A decision of the Supreme Court sustaining the view of the Commission as to the illegality of certain terminal charges, but dismissing the proceeding on account of a subsequent reduction in the through rate, which had been made from certain territory, which reduction amounted to more than the terminal charges involved; and authorizing the Commission to commence proceedings to correct any unreasonableness in the rate resulting from the additional terminal charge as to any territory to which the reduction referred to did not apply,—does not estop the Commission from further proceeding and investigation as to the legality of a terminal charge for the future, without the institution of a new proceeding, as the Commission is not functus officio; and the mere use by the Supreme Court in its decree of the word "commencing," with reference to further proceedings, is not construed to require the formal institution of a new proceeding. The case will therefore stand reopened for further investigation and order, with leave to complainant to show to what territory the through rate reduction applied. Cattle Raisers' Asso. v. Chicago, B. & Q. R. Co., 10 I. C. C. 83.

(mm) The Commission can direct

only carriers to cease and desist from imposing rates now in effect; it has no power to prescribe the rate which shall be put in effect. Barrow v. Y. & M. V. R. Co., 10 I. C. C. 333, 336.

(nn) The Commission has no power to name a rate for the future, and its finding as to what rate would be reasonable is, therefore, only equivalent to a recommendation in that respect. Denison Light & Power Co. v. M. K. & T. R. Co., 10 I. C. C. 337, 341.

(oo) Under old law no power, under new law Commission may fix future rates. Cattle Raisers' Ass'n of Tex. v. M. K. & T. Ry. Co., 12 I. C. C. 1.

(pp) The Commission has no power to make rates generally, but only to determine whether rates imposed by railroads are in conflict with statute. Thatcher v. Fitchburg R. R. Co., 1 I. C. R. 356; Re Theatrical Rates,, 1 I. C. R. 18.

(qq) Where undue discrimination is not shown, the rates complained of can only be reduced by the Commission when in its opinion they are shown to be unreasonable in themselves. Commercial and Industrial Asso. of Union Springs, Ala. v. L. & N. R. R., 12 I. C. C. 372.

(rr) The Supreme Court has declared that the determination of a rate for the future, which is the function exercised by the Commission, is legislative rather than judicial. Cattle Raisers Asso. v. C. B. & Q. Ry., 12 I. C. C. 507, 514.

IMPORTANT CASES SINCE 1908

(ss) Where a transportation service has been rendered for which no tariff authority exists and where the shipper has paid the sum demanded by the carrier for the service, the question as to what would have been a reasonable charge for the service is within jurisdiction of the Commission and that it can order the repayment of whatever the carrier has collected over and above such a reasonable charge. Sulzberger & Sons Co. v. M. St. P. & S. Ste. M. Ry., 40 I. C. C. 173, 174.

(tt) The Commission has not the power to require the railroads, in the face of varying trade conditions, to adjust their rate schedules in such manner as to insure to a market the continuance of a trade it has once enjoyed. Lake Cargo Coal Rates, 46 I. C. C. 159, 165.

(uu) In a general investigation the Commission has authority to establish just and reasonable rates and groupings throughout the territory involved. C. F. A. Territory Milk and Cream Rates, 46 I. C. C. 601, 615.

(vv) The Supreme Court has held that the Act of prescribing a rate for the future is legislative, while the Act of awarding a sum of money in reparation of damage sustained because of a violation of the law, is judicial in its nature. Sloss-Sheffield Steel & Iron Co. v. L. & N. R. R., 51 I. C. C. 635, 638.

(ww) Whatever may be the limitation upon the exercise of a sound discretion or a reasonable flexibility of judgment in prescribing maximum rates for the future, the Commission holds, as has frequently been held, that "The Commission is not justified in awarding damages except on a basis as certain and definite in law and in fact as is essential to the support of a final judgment or decree requiring the payment of a definite sum of money by one party to another." Sloss-Sheffield Steel & Iron Co. v. L. & N. R. R., 51 I. C. C. 635, 638, 639.

(xx) The plenary power of the Commission under Section 15 to correct unreasonable practices on the part of common carriers, was decided in 22 I. C. C. 39, 48-9; and under Section 13 any common carrier may complain of anything done or omitted to be done by another common carrier in contravention of the provisions of the act. Postal Telegraph-Cable Co. v. W. U. Telegraph Co., 59 I. C. C. 512, 516.

(yy) Under the transportation act of 1920 the Commission was given power to establish minimum rates. Under this law the Commission must of course bear in mind that the carriers should be allowed to earn from all their rates a specified return. Southern Hardwood Traffic Asso. v. Director General, 61 I. C. C. 132, 141.

(zz) There must exist range for "the flexible limit of judgment which belongs to the power to fix rates. Reparation as relating to increase of rates, 68 I. C. C. 5, 6.

(3a) There could be no flexible limit of judgment if all rates were to measured by their relation to cost or by a predetermined rule. Reparation as relating to increase of rates, 68 I. C. C. 5, 6.

(3b) The mandate laid upon the Commission by the statute to see to it that transportation charges shall be just

and reasonable as between the various parties to the transportation does not shift with the shifting interests of shippers or carriers. Kansas City Board of Trade v. A. T. & S. F. R. R. R., 69 I. C. C. 185, 191.

(3ba) Under section 15 (a) of the act authority of commission to prescribe just and reasonable rates and to initiate, modify, establish, or adjust rates is not a mere transitory authority to establish in first instance a general rate structure calculated to produce a fair return, but is a continuing authority to see to it that such rate structure shall not be undermined and its purpose thwarted by new rates, either increases or reductions, proposed by particular carriers for purpose of augmenting traffic of such carriers. Truck Line and Ex-Lake Iron Ore Rates, 68 I. C. C., 580. Rules for Storing and Sacking Cement, 78 I. C. C. 693, 698.

(3c) Where proceeding is one of investigation into reasonableness and propriety of rates the commission's determination might well result in fixation of rates related to each other, although relationship of rates as such may not have been contemplated within issue as originally presented. Rates on Grain, Grain Products, and Hay, 80 I. C. C. 362, 365.

(3ca) If usual tests of reasonableness of rates, approved by experience and valid in law, show basis as to any commodity to be too high, it would be duty of the commission under section 1 of the act to find such rates unreasonable. Kansas Public Utilities Com. v. A., T. & S. F. Ry. Co., 83 I. C. C., 105, 115.

(3cb) Carriers may for competitive or other reasons establish rates which the commission could not initiate for them. Eric Corp. v. I. & G. N. Ry. Co., 83 I. C. C. 325, 327.

(3cc) Though the Interstate Commerce Commission has broad powers, and may investigate and decide whether a rate has been, is, or would be discriminatory, it cannot pass on the question whether a hypothetical lower rate would under conceivable conditions have been discriminatory, in order to enable a shipper to sue for damages from conspiracy to fix a higher rate. Keogh v. Chicago & N. W. Ry. Co. (192), 43 Sup. Ct. 47.

(3d) The Interstate Commerce Commission has power to declare a rate unreasonable. Mobile & O. R. Co. v. Southern Sawmill Co., (Mo. 1923), 251 S. W. 434.

(3e) The Interstate Commerce Commission has exclusive original jurisdiction in all administrative matters affecting the reasonableness and uniformity of rates. St. Louis Southwestern Ry. Co. v. Goldstein, (Tex. 1922), 245 S. W. 226.

§9. Over Interstate Rates.

See Commerce Courts §4.

IMPORTANT CASES SINCE 1908

(a) The statute contemplates that the Interstate Commerce Commission shall not only have power to determine as to whether any given rate is reasonable, but shall also have the power to determine whether any given rate is confiscatory, and that in a case like the one at bar, if the railroad, the complainant here, is dissatisfied as to the decision of the Interstate Commerce Commission, that it is its duty under the statute, (sec. 16a) to apply to the Commission for a rehearing, in order that it may offer any additional evidence bearing on the question of the unreasonableness of the rate and as to whether the rate is confiscatory. This is subject to the exception: That, if the Commission had refused to hear any testimony that was material on the question as to whether the rates were confiscatory or unreasonable, then a state court would be inclined to hear such testimony; but, it appear ing that no effort has been made on the part of the railroad to present to the Commission this additional testimony bearing on the question as to whether the rates were confiscatory, it would not be proper for such a court to consider evidence of that character; and we will exclude the evidence presented by the complainant as contrary to that act and void in that the parties contract with reference to the law. Southern Pac. Co. v. Frye & Bruhn, 143 Pac. 163, 165.

Co., 98 Atl. (Pa. 1916) 873.

§9½. Government Guaranty.

See Government Guaranty.

IMPORTANT CASES SINCE 1908

(a) In the exercise of its power to prescribe reasonable rates, the Commission is now required by section 15a to initiate, modify, establish. or adjust rates so that carriers as a whole or in designated rate groups will, under proper standards of operation, earn an aggregate annual net railway operating income equal, as nearly as may be, to a fair return upon the aggregate value of the railway property of such carriers held for and used in the service of transportation. Rates on Grain, Grain Products and Hay, 64 I. C. C. 85, 98.

(b) The purpose of section 15a of the act was undoubtedly to better stabilize the credit of railroads, reassure investors and attract capital to the railroad industry. It is plainly the duty of the commission to do everything in its power to carry out this purpose. Rates on Grain, Grain Products and Hay, 64 I. C. C. 85, 99.

(c) The duty cast upon the commission by section 15a is a continuing duty and looks to the future. It does not constitute a guaranty to the carriers nor is the obligation cumulative. The commission is not restricted by past or present statistics of operation and earnings. These are serviceable only as they illuminate the future. What is contemplated by the law is that in this exercise of our rate making power the result shall reflect the best judgment of the commission as to the basis which may reasonably expected for the future to yield the prescribed return. Rates on Grain, Grain Products and Hay, 64 I. C. C. 85, 99.

(d) The authority of the commission under section 15a to prescribe just and reasonable rates and to initiate, modify, establish and adjust rates is not a mere transitory authority to establish in the first instance a general rate structure calculated to produce a fair return, but is a continuing authority to see to it that such a rate structure shall not be undermined and its purpose thwarted by new rates, either increases or reductions, proposed by particular carriers for the purpose of augmenting the traffic of such carriers. Rules for Storing and Sacking of Cement in Transit at Davenport, 78 I. C. C. 693, 698.

(e) The Commission is required so to adjust transportation rates that they may yield the carriers, as nearly as may be, the fair return. Its determination is to be made in the exercise of its power to prescribe just and reasonable rates, and it is within the flexible limits of judgment that it must determine what basis or bases of rates will yield as nearly as may be that return. It manifestly is incumbent upon it to take into account all circumstances and conditions disclosed of record which, in its judgment, will influence the return under any given level of rates. If it is persuaded by the record that increases in rates beyond any certain point would divert traffic to other means of transport or depress its volume, and so defeat the very end the statute is meant to attain, it clearly becomes its duty to readjust or modify the rates in such manner as will, in its judgment, produce as nearly as may be the desired result. Express rates, 1922, 89 I. C. C., 297, 311.

ALL OTHER CITATIONS

Trunk Line and Ex-Lake Iron Ore Rates, 69 I. C. C. 589, 611; Reduced Rates 1922, 68 I. C. C. 676, 730; Slating cars for Watermelons, 78 I. C. C. 732, 735; Reduced Rates from New York Piers, 81 I. C. C. 312, 331.

§10. Intrastate Rates.

See State Rates and Regulations.

CASES 1887-1908

(a) The commission has no regulating authority beyond that conferred by the terms of the Act to Regulate Commerce, and its jurisdiction does not extend to enforcing provisions in a state constitution. Railroad Commission of Kentucky v. Louisville & N. R. Co., 10 I. C. C. 173.

(b) The commission has no control over traffic moving wholly within a single state, nor has it any power to award reparation for discrimination affecting such shipments. Gallogly & Firestone v. C. H. & D. R. Co., 11 I. C. C. 1, 12.

IMPORTANT CASES SINCE 1908

(c) The law requires the commission to fix rates, fares, and charges so that carriers shall earn a certain return upon the aggregate value of the railway property held for and used in the service of transportation, and to the extent that intrastate rates, fares, and charges do not contribute their proportionate share to such return they unjustly discriminate against interstate commerce. South Carolina Fares and Charges, 60 I. C. C. 290, 297.

(d) On intrastate traffic, the commission is without jurisdiction to pre-

scribe rates for the future or to award reparation on shipment moving prior to federal control. Chesebrough Mfg. Co. v. Director General, 68 I. C. C. 555.

(e) In the transportation act, 1920, congress set forth explicitly the power of the commission to deal with intrastate rates which unjustly discriminate against interstate commerce or unduly prejudice persons or localities engaged in such commerce, but made no mention of a similar or analagous power over local port to port rates of water carriers. Corona Coal Co. v. Secretary of War, 69 I. C. C. 389, 391.

(f) The commission is without jurisdiction to award reparation on intrastate shipments which moved during the guaranty period. M. E. Case Coal Co. v. C. B. & Q. R. R., 74 I. C. C. 391.

(g) Before the commission could condemn an intrastate regulation as resulting in unjust discrimination against interstate commerce the propriety of the charge on interstate traffic must be established. Slatting Cars for Watermelons, 78 I. C. C. 732, 735.

(h) The Interstate Commerce Commission has general power and jurisdiction to fix an intrastate rate, as to which it has found the existence of discrimination and prejudice against interstate commerce. State of Tennessee v. United States, 284 Fed. 371.

(i) A complaint that an intrastate rate by a state commission was a discrimination against interstate or foreign commerce must first be made to the Interstate Commerce Commission, which is given jurisdiction over such rates by the Transportation Act. Atlantic Coast Line R. Co. v. Trammell, 287 Fed. 741.

(j) Under section 3 of the act, the courts held that the commission was authorized to control intrastate rates maintained by a carrier under state authority where it finds that unjust discrimination against interstate trade arises from the relation of intrastate to interstate rates, the proviso in section 1, exempting transportation "wholly within one state" from the provision of the act, not applying in such case. H. E. & W. F. Ry. Co. v. United States, 34 Sup. Ct. 833, 839; 234 U. S. —; 58 L. ed. —.

(k) A general finding that the intrastate rates to border points worked an undue discrimination against interstate commerce does not justify an order by the Interstate Commerce Commission, requiring a change of all intrastate rates, but such change should be limited to the rates affecting the discrimination, and the change of other intrastate rates made necessary thereby left to the determination of the state. Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

(l) Whenever a rate, rule, or practice of carriers is attacked as unreasonable or as unjustly discriminatory, there must be a preliminary resort to the Interstate Commerce Commission, whether the function exercised is in its nature administrative, because directed to the determination of future practice, or judicial, because seeking to determine whether the shipper has been wronged, since in either case the inquiry is essentially one of fact and of discretion in technical matters, and uniformity can be secured only if its determination is left to the commission. Great Northern Ry. Co. v. Merchants' Elevator Co., 42 Sup. Ct. 477.

C. 118.

§10¼. Minimum Rates.

See Minimum Rates.

IMPORTANT CASES SINCE 1908

(a) Under the Transportation Act, 1920, the commission may prescribe the same rates for oranges and lemons, although the result may be an increase in the rates of one of them. California Citrus League v. Director General, 58 I. C. C. 373, 396.

§10½. Territorial Rates.

CASES 1887-1908

(a) The amendment of August 28, 1906, conferred jurisdiction of the commission over transportation wholly within a territory. Blackwell Milling & Elevator Co. v. M. K. & T. R. Co., 12 I. C. C. 24, 25.

(b) No jurisdiction over shipment between two points in a territory, prior to the amendment of August 28, 1906. Ponca Milling Co. v. M. K. & T. R. Co., 12 I. C. C. 26.

ALL OTHER CITATIONS

Ft. Smith & W. R. Co. v. Chandler Cotton Oil Co., 25 Okla. 82, 83, 106 p. 10.

§11. Suspension.

See Advanced Rates §1 (4); Suspended Rates.

CASES 1887-1908

(a) The mere probability that injury will result from the operation of the act will not authorize the commission to direct a suspension. Jurisdiction of the Commission, 1 I. C. R. 73.

IMPORTANT CASES SINCE 1908

(b) Section 15 of the act gives commission power to suspend operation of a schedule stating a new rate or practice pending an examination of the propriety of the same. Protection of the Potato Shipments in Winter, 26 I. C. C. 681, 683.

(c) Under section 15, paragraph 1, the commission, on its own initiative, whenever it is of the opinion that any rates demanded, charged, or collected are in any way unlawful, may enter upon an investigation, hold full hearings, and determine and prescribe just and reasonable rates. Where new rates are filed the commission, under section 15, paragraph 2, is authorized by similar means to determine the propriety of such new rates and, pending such determination, to suspend the operation of the schedules stating such new rates. In connection with the latter hearing the statute casts upon the carrier the burden of justifying any increased rates. Coal Rates from Oak Hills, Colo., 30 I. C. C. 505, 508.

(d) Because the act requires the commission to give preference to suspension proceedings over all other questions pending before it and to decide such proceedings as speedily as possible, the commission proceeded to a disposition of such a proceeding in advance of other cases with which it had been consolidated. Coal from Detroit, Toledo & Ironton R. R. Mines, 64 I. C. C. 564, 565.

(e) It was not the intention of congress to require the commission in every suspension proceeding to specify what rates would be lawful in lieu of the new rate proposed. Salt from Louisiana Mines to Chicago, 69 I. C. C. 312, 313.

(f) It is the duty of the commission under the law to give preference to questions involved in suspension proceedings and to decide the same as speedily as possible. Burlap Bags to Texas Destinations, 69 I. C. C. 458.

(g) Where, pending proceedings on complaint of a terminal railway and its controlling stockholder, which was also the largest shipper, asserting that the action of trunk lines in refusing to absorb charges of such terminal railway was discriminatory, one of the trunk lines filed a new tariff absorbing the charges of the terminal to a greater extent than had been previously done, the commission, in view of the fact that normal and precise findings are unnecessary under the Interstate Commerce Act, section 14, unless damages are awarded, was warranted in suspending the new tariff for more than 120 days authorized by section 15, as amended in 1910, though no formal hearings were had on the question of the suspended tariff, and in treating the

matter as ancillary to the original proceedings, for the question whether the controlling stockholder of the terminal railway would obtain an undue preference or rebate because of the absorptions was involved in both proceedings. Manufacturers' Ry. Co. v. United States, 38 Sup. Ct. 383.

§12. Undercharges.

See Undercharges §1.

IMPORTANT CASES SINCE 1908

(a) The commission is without authority to enter an order requiring a shipper to make good an undercharge. Falls & Co. v. C. R. I. & P. Ry. Co., 15 I. C. C. 269, 273.

§13. Unpublished Rate.

See Evidence §60; Unpublished Rates.

IMPORTANT CASES SINCE 1908

(a) Where a transportation service has been rendered for which no tariff authority existed and shipper has paid the sum demanded by the carrier for that service, the commission may determine what would have been a reasonable charge and order repayment of the excess, if any. Gateway Produce Co. v. American Ry. Exp. Co., 61 I. C. C. 347, 348, 349.

(b) There having been no applicable rate in effect concerning movement such as those for which charges assailed were collected, it is necessary for the commission to determine whether such charges were reasonable, and, if not, what charges would have been reasonable. Memphis Freight Bureau, 17 I. C. C., 90, Mitsui & Co. v. Director General, as Agent, 81 I. C. C. 489, 491.

ALL OTHER CITATIONS

Memphis Freight Bureau v. K. C. S. Ry. Co., 17 I. C. C. 90, 91, 92; Goldenberg v. Clyde S. S. Co., 20 I. C. C. 527, 528; Maxwell v. W. F. & N. W. Ry. Co., 20 I. C. C. 197, 198; Hampton Mfg. Co. v. Old Dominion S. S. Co., 27 I. C. C. 666, 668; Mercantile Lumber & Supply Co. v. St. L. S. W. Ry. Co., 28 I. C. C. 701, 702; Zelnicker Supply Co. v. St. L. S. W. Ry., 45 I. C. C. 185.

§13½. Government Control.

See Government Operation; War Legislation.

IMPORTANT CASES SINCE 1908

(a) The Federal Control Act of March 21, 1918, expressly provides that rates initiated by the president "shall be reasonable and just." Under section 4 of the Act to Regulate Commerce certain widely prevalent forms of unjust, unreasonable, and unduly prejudicial charges are condemned and the burden is placed upon the carriers of showing that the situations apparently within the scope of the prohibition are in reality "special cases," justifying the exercise by the commission of a sound, legal discretion in authorizing departures from the general rules laid down. It is difficult to see how the enforcement of this section can interfere with a unified, coordinated national control, or in any wise hinder the prosecution of the war. As the situations covered by the fourth section can be reached by orders under the first three sections of the Act to Regulate Commerce, the suggestion is equivalent to saying that the Commission can not do in form what is lawful to do in substance. Johnston v. A. T. & S. F. Ry., 51 I. C. C. 356, 361.

(b) The statute provides that in exercise of the commissions power to prescribe just and reasonable rates it shall establish rates such that carriers collectively shall earn a fair return under honest, efficient and economical management. Reduced Rates, 1922, 68 I. C. C. 676, 689.

(c) The duty cast upon the commission by section 15a is a continuing duty and looks to the future. It does not constitute a guaranty to the carriers, nor is the obligation cumulative. It is not restricted by past or present statistics of operation and earnings. They are serviceable only as they illuminate the future. What is contemplated by the law is that in this exercise of the rate making power the result shall reflect the best judgment of the commissnon as to the basis which may reasonably be expected for the future to yield the prescribed return. Reduced Rates, 1922, 68 I. C. C. 676, 730.

(d) The authority of the commission under section 15a in the exercise of its power to prescribe just and reasonable rates is not a mere transitory authority to establish in the first instance a gener-

al rate structure calculated to produce a fair return, but is a continuing authority to see that such a rate structure shall not be undermined and its purpose thwarted by new rates, either increases or reductions, proposed by particular carriers for the purpose of augmenting the traffic on certain carrier lines, or for the immediate and special benefit of particular companies, persons, firms, corporations, localities, or particular descriptions of traffic, in disregard of the more general and seemingly inevitable consequences of such rates newly proposed. Trunk Line and Ex-Lake Iron Ore Rates, 69 I. C. C. 589, 611.

ALL OTHER CITATIONS

Kaw River S. & M. Co. v. A. F. & S. F. Ry., 51 I. C. C. 350, 354.

VI. TO AWARD DAMAGES.

§14. In General.

See Reparation.

CASES 1887-1908

(a) The question whether rates paid ought to be refunded having been presented to a judicial tribunal, where it is pending, the commission will not take cognizance of it. Bishop v. Duval, 2 I. C. R. 514.

(b) The question whether rates paid ought to be refunded having been presented to a judicial tribunal, where it is pending, the Interstate Commerce Commission will not take cognizance of it. Harris v. Duval (Com.), 2 I. C. R. 514.

(c) A procedure for the enforcement of lawful orders of the Interstate Commerce Commission, founded upon controversies requiring trial by jury, having been provided by the amendment of March 2, 1889, of the Act to Regulate Commerce, §16, it is the duty of the commission to pass upon the question of reparation for past damages whenever a claim is made therefor. Macloon v. Chicago & N. W. R. Co. (Com.), 3 I. C. R. 711.

(d) In determining the question of reparation in a suit to declare a terminal charge excessive and unlawful, where the question of reparation was held open pending determination of another branch of the case, and during which time a reduction in the through rate was made from certain territory, which reduction amounted to more than the terminal charge, the following procedure was directed by the commission: Damages to be allowed on shipments from all territory down to the date in the reduction in the through rates, and, from territory to which that reduction did not apply, down to the date of the hearing; but it was directed that those damages accruing before and those accruing after the original order of the commission holding the terminal charge unlawful and unjust be shown separately, with leave to defendants to show any change in the conditions since the date of the order of the commission, which would render the entire through rate, including the terminal charge, a reasonable one. Cattle Raisers Asso. v. Chicago B. & Q. R. Co., 10 I. C. C. 83.

IMPORTANT CASES SINCE 1908

(e) The commission has power to award damages only when they are suffered in consequence of a violation of the Act to Regulate Commerce. Pittwood & N. P. Ry., 51 I. C. C. 535.

(f) If a carrier is shown to have been negligent in failing to place shipments in public storage, the commission has no jurisdiction to award damages resulting therefrom. Claims for such damages are cognizable by the courts. Huffman Bros. Motor Co. v. N. Y. C. R. R. Co., 74 I. C. C. 671, 672.

(g) The commission is an administrative body created to effect substantial justice in the matters under its control and is not bound or limited by the strict rules of pleading and the actual damage sustained is a matter for determination by the commission from the facts before it. N. & G. Taylor Company v. Director General, 81 I. C. C. 663, 665.

(h) When a complainant applies to the Interstate Commerce Commission for relief against an unreasonable rate he has the option of limiting the prayer of his petition to the one subject of rates or of adding a prayer for reparation. If he exercises his first choice, and only a rate finding is made, he must then bring his action in the courts, as he would bring any other action, using the finding of the commission as evidence (as indeed it is the only evidence) of the unreasonableness of the rates, and establishing by other evidence the money measure of his injury. Whatever judgment is recovered in such action is a judgment in all respects as any other judgment. If the complainant exercises his second choice, by asking for reparation, and it is

awarded, the defendant of course may pay the award. If payment is made, the award is to all intents and purposes a judgment, to which the doctrine of res adjudicata is applicable, and the complainant is concluded thereby. G. B Markle Co. v. Lehigh Valley R. Co., 271 Fed. 989, 991.

C. C. 286, 288; Pacific Grain Co. v. Director General, as Agent, 81 I. C. C. 679, 692.

VII. APPEALS TO COURT.

§15. In General.

See Courts §5.

CASES 1887-1908

(a) In a proceeding before a United States court to enforce an order of the Interstate Commerce Commission, that court must investigate the whole merits of the controversy and form an independent judgment upon them; and in such investigation the findings of fact made by the commission are only prima facie evidence. Interstate Commerce Commission v. Lehigh Valley R. Co. (C. C. E. D. Pa.), 3 I. C. R. 796.

(b) The principal office, within the meaning of the act of Congress authorizing a Circuit Court, where such office is situated, to enforce orders of the Interstate Commerce Commission, of a railroad corporation created by an Act of Congress which does not prescribe where such office shall be kept is the one where its principal officers have their business domicil, the meetings of stockholders, directors, and executive committee are held, the stock books kept and the dividends declared, rather than the place where the subordinate officers in charge of the operating, traffic and accounting departments of the business discharge their duties. The Interstate Commerce Commission v. The Texas & Pacific Ry. Co., 4 I. C. R. 62.

(c) If a railroad company is violating a proper order of the Interstate Commerce Commission, it should be restrained from doing so; and it cannot escape upon the objection that another wrongdoer is also violating it. Interstate Commerce Commission v. Texas & P. R. Co. (C. C. S. D. N. Y.), 4 I. C. R. 114.

(d) A suit brought by the Interstate Commerce Commission in the United States circuit court to enforce an order of the Commission is an original and independent proceeding to be heard de novo upon proper pleadings and proof. Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co. (C. C. N. D. Ga.), 332, Rev'd. on Other Grounds in 4 I. C. R. 582.

(e) In proceedings to enforce an order of the Interstate Commerce Commission fixing rates, the carrier will not be required to keep an account with every shipper and pay into registry of the court the excess over the rates fixed by the Commission as a condition of refusing a preliminary order, in the absence of a very strong showing of right in

favor of the complainant. Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 5 I. C. R. 131.

(f) It is not necessary to file with a petition for the enforcement of an order of the Interstate Commerce Commission the transcript of the evidence taken before it, under the statute making the findings of fact of the Commission prima facie evidence of the matter stated; but either party may introduce and use as evidence any competent and relevant testimony taken before the Commission. Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 5 I. C. R. 131.

(g) The court cannot, upon a certificate of the Interstate Commerce Commission that in making an order which the court is asked to enforce the Commission did not design to make it so broad as its terms import, enforce the order in such restricted sense, where it otherwise would not be enforceable. Interstate Commerce Commission v. Delaware, L. & W. R. Co. (C. C. N. D. N. Y.), 5 I. C. R. 146.

(h) It is not proper for railroad companies to withhold the larger part of their evidence from the Interstate Commerce Commission, and first adduce it in the circuit court in proceedings by the Commission to enforce its order; but the purposes of the act of Congress to regulate commerce call for a full inquiry by the Commission in the first instance. Cincinnati, N. O. & T. P. R. Co. v. Interstate Commerce Commission (U. S. Sup.) 5 I. C. R. 391.

(i) Said act approved March 2, 1887, authorizes a resort by the Commission to the United States circuit court only in case of the violation of, or neglect or refusal to obey or perform, a lawful order or requirement of the Commission. Interstate Commerce Commission v. N. R. Co., 5 I. C. R. 650.

(j) The sole authority of the Commission to institute proceedings in the United States circuit court to enforce its orders is derived from the act of Congress approved March 2, 1887 (25 Stat. at L. 855, §5); and in its exercise it is bound by, and must confine itself within, the terms of that statute. Interstate Commerce Commission v. N. R. Co., 5 I. C. R. 650.

(k) The finding and opinion of the Interstate Commerce Commission is entitled to great consideration both by the parties affected and by the courts when called upon to enforce obedience to its mandates. Interstate Commerce Commission v. Louisville & N. R. Co., (C. C. M. D. Tenn.), 5 I. C. R. 656.

(l) The opinion or report of the Interstate Commerce Commission should show what the issues in the case are, and what facts it finds in regard to such issues, and should make suitable reference to the evidence adduced in regard to any particular question, where there is a conflict in the proof, or, if the evidence is undisputed, state the facts. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.), 5 I. C. R. 656.

(m) Proceedings before the Interstate Commerce Commission against common carriers for discriminations and preferences will be stayed until final determination by the courts in suits pending therein for the enforcement of an order of the commission, compliance with which by carriers operating in the territory will remove the discriminations and preferences complained of. Southern Paint & G. Co. v. Lake Erie & W. R. Co., 6 I. C. C. 284.

(n) The decision of the Interstate Commerce Commission on a charge that rates are unjust and unreasonable or make unjust discriminations and preferences in violation of §3 of the Act to Regulate Commerce is subject to review in the courts on a consideration of the allegations and evidence of the parties, giving effect, however, to the findings of fact by the Commission as prima facie evidence of the matters therein stated. Interstate Commerce Commission v. Alabama Mildland Ry Co., 7 I. C. C. App. CIX.

(o) No order of the Commission can be made binding upon the defendant until it has passed the scrutiny of the courts, while if the Commission errs in its construction of the Law against the complainant, he has no relief, since from the decision of the Commission he cannot appeal. Miner v. N. Y., N. H. & H. R. Co., 11 I. C. C. 422, 428.

IMPORTANT CASES SINCE 1908

(p) On appeal from a judgement for shippers for the excess of rates collected by the carrier, a general order of the Interstate Commerce Commission increasing the rates, which was not presented to the court below, cannot be

considered by the appellate court. Davis v. Parrington, 281 Fed. 10.

(q) A state may maintain a bill to enjoin enforcement of an order of the Interstate Commerce Commission forbidding preferences to the state or municipalities, in alleged violation of Interstate Commerce Act, §22 (Comp. St. § 8595), permitting such preferences, whether an order of the state Railroad and Public Utilities Commission prescribing a reduced rate for the state and municipalities was within its jurisdiction or not, as the order would prevent negotiation with the railroads for preferential treatment. State of Tennessee v. United States, 284 Fed. 371.

(r) An erroneous decision of the Interstate Commerce Commission, acting within its jurisdiction, can only be reviewed by proceedings in error, not by mandamus or certiorari. Donner Steel Co. v. Interstate Commerce Commission 285 Fed. 955.

(ra) A writ of mandamus, directing the Interstate Commerce Commission to permit a carrier to inspect the papers and data used by the Commission in fixing the tentative value of the carrier's property, and to permit the introduction of the same in evidence, was properly refused, where it did not appear that any demand had been made on the Commission to produce at the hearing any specific paper or record, or that the production of any such paper or record was refused by the Commission. United States v. Interstate Commerce Commission, 290 Fed. 264.

(s) Though in making an order for reparation on account of unjust discrimination by a railroad company in the distribution of coal cars to shippers, the Interstate Commerce Commission improperly used percentages which placed plaintiff on a basis of equality with the favored companies, where, in an action on the order, there was testimony tending to show that had the cars been distributed on a basis of general equality approved by the Commission and without resort to practices condemned by it, there would have been cars enough to have furnished plaintiffs with a sufficient number to meet their trade and requirements, and the case was fairly and fully submitted in a charge giving a correct basis on which there might be a recovery of damages, and there was testimony tending to show damages in at least the sum awarded by the Commission, there was no prejudicial error because of the erroneous calculation by the Commission. Pennsylvania R. Co. v. Weber, 42 Sup. Ct. 18.

(t) Where in a case for reparation for discrimination in the furnishing of coal cars, the Interstate Commerce Commission awards reparation, but such an award is based on an erroneous calculation; but when an action is brought on such award in the United States District Court, the judge in his charge to the jury gives the correct basis upon which there might be a recovery of damages, and there is a discrimination tending to show damages in at least the sum awarded by the Commission, there is no prejudicial award because of the erroneous calculation of the Commission, which was the basis of its award. Pennsylvania R. Co. v. Weber, 42 Sup. Ct. 18, 20.

(u) In a suit to enjoin the enforcement of, and annul, an order of the Interstate Commerce Commission, it cannot be claimed that the order was unsupported by evidence, where only a part of the evidence taken before the Commission was introduced. Louisiana & P. B. Ry. Co. v. United States, 42 Sup. Ct. 25.

(v) Plaintiffs cannot maintain a suit to set aside an alleged void order of the Interstate Commerce Commission, without showing that the order subjects them to legal injury, actual or threatened. Hines v. United States 44 Sup Ct. 72.

(w) That manufacturers and dealers in lumber were not parties to proceedings before the Interstate Commerce Commission, in which an order was entered requiring carriers to cease charging a penalty for holding lumber cars at reconsignment points, does not prevent them from suing to set aside the order as in excess of the Commission's power. Hines v. United States 44 Sup. Ct. 72.

(x) The right of shippers and dealers in lumber respecting an order of the Interstate Commerce Commission forbidding charging of penalty by carriers against their competitors is limited to protection against unjust discrimination, and redress must be sought by proceedings before the Commission. Hines v. United States (1923) 44 Sup. Ct. 72.

(y) Where the situation of none of the defendants was affected by a brief lapse of time, HELD, that a suit to set

aside an order of the Interstate Commerce Commission permitting a railroad to acquire control of certain terminal roads was not barred by laches. The Chicago Junction Case, 44 Sup. Ct. 317.

S., 217 Fed. 80, 82; L. & N. R. R. Co. v. United States, 216 Fed. 672, 673, 679, 680, 681; Royal Brewing Co. v. M. K. & T. Ry. Co. (Kans.), 217 Fed. 146, 148; R. R. Commissioners of Florida v. F. E. C. Ry., 42 I. C. C. 616, 624; M. C. Kiser Co. v. Central of Georgia Ry. Co., 236 Fed. 573, 578; Richmond Chamber of Commerce v. S. A. L. Ry. 44 I. C. C. 455, 467; United States v. Pennsylvania R. R., 37 Sup. Ct. 95, 242 U. S. 208, 61 L. Ed. 251; United States v. Interstate Commerce Commission, 38 Sup. Ct. 408; Chicago Live Stock Exchange v. A. T. & S. F. Ry., et al., 52 I. C. C. 209, 217; Alaska S. S. Co. v. United States, 259 Fed. 713; Chicago, R. I. & P. Ry. Co., et al., v. Gist (Okla. 1920), 190 Pac. 878, 879.

§16. Concurrent jurisdiction.

IMPORTANT CASES SINCE 1908

(a) The Supreme Court has nowhere declared that there can be no concurrent jurisdiction of the Commission and the Courts. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 63.

(b) The question of expediency in granting the Commission and courts concurrent jurisdiction in suits for damages was decided by Congress and is a matter reserved for the consideration of the legislative branch of the Government into which the Commission cannot inquire. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 68.

ALL OTHER CITATIONS

Dowling v. Seabord Air Line Ry., (S. C. 1917), 93 S. W. 863.

§17. Validity of orders.

See Courts §5.

CASES 1887-1908

(a) The facts found by the Interstate Commerce Commission in conformity with the statutes have legal effect and are prima facie evidence; but the recomendations, conclusions, and orders of the Commission are of no binding force in the courts. Re Rates & Charges on Food Products (Com.), 3 I. C. R. 151.

IMPORTANT CASES SINCE 1908

(b) The power conferred on the Interstate Commerce Commission by the amended fourth section to authorize a carrier to deviate from the strict rule of that section clearly implies that the question should be determined upon testimony and after a hearing and necessarily involves the exercise of judgement and discretion and the finding of the Commission is to be given the weight due it as a body peculiarly experienced in such matters. Louisville & N. R. Co. v. United States, 225 Fed. 571, 581.

(ba) A carrier cannot complain of an order of the Interstate Commerce Commission, modifying a prior order to its benefit. Louisville & N. R. Co., v. Sloss-Sheffield Steel & Iron Co., 295 Fed. 53.

(bc) The validity of the action of the commission is not dependent on compliance with the procedural rules of pleading and practice which prevail in courts of law. Louisville & N. R. CO. v. Sloss-Sheffield Steel & Iron Co., 295 Fed. 53.

(c) An order of the Interstate Commerce Commission which does not contravene any constitutional limitation, and is within the constitutional and statutory authority of that body, and is not unsupported by testimony, cannot be set aside by the courts, as it is only the exercise of an authority which the law vests in the Commission. Pennsylvania Co. v. United States, 35 Sup. Ct. 370, 373; 236 U. S. 351, 59 L. ed. 616.

(d) A report of the Interstate Commerce Commission awarding reparation which shows the relation of the parties as shipper and carrier in interstate commerce; the general character of the traffic involved and the amount of the shipment with respect to which reparation was claimed; the determination that the rate exacted (which was specified) was unjust and unreasonable to the extent that it exceeded the established rate (also specified); and, further, the determination that the companies respectively should pay a stated amount "as reparation for the collection of unreasonable charges" on the quantities mentioned is valid. Mills v. Lehigh Valley R. Co., 35 Sup. Ct. 888, 891; 238 U. S. 473, 95L. ed.

(e) A report of the Interstate Commerce Commission, made after investigation of a shipper's complaint which showed the relation of the parties as shipper and carrier in interstate com-

merce, the general character of the traffic involved, and the amount of the shipment with respect to which reparation was claimed, the determination that the rate exacted, which was specified, was unjust and unreasonable to the extent that it exceeded the established rate, also specified, and the determination that the carriers respectively should pay a stated amount as reparation for the collection of unreasonable charges on the quantities mentioned,—satisfies the requirement of the Act that the Commission must make, upon investigating a complaint, a report which "shall state the conclusions of the Commission, together with its decision, order, or requirement in the premises," and if damages be awarded "shall include the findings of fact on which the award is made." Mills v. Lehigh Valley R. Co., 35 Sup. Ct. 888, 891; 238 U. S. 473, 59 L. ed. 1414.

(f) The ultimate facts rather than evidential facts are to be stated by the Interstate Commerce Commission in the report which that Commission, under the Act must make upon investigating a complaint, which report, under that statute, "shall state the conclusions of the Commission, together with its decision order or requirement in the premises," and if damages be awarded "shall include the findings of fact on which the award is made." Mills v. Lehigh Valley R. Co., 35 Sup. Ct. 888, 889, 890; 238 U. S. 473, 59 L. ed. 1414.

(g) Interstate Commerce Commission's determination that existing rates subjected shippers from a certain point to undue prejudice, supported by ample evidence, held conclusive in action to enjoin enforcement of order requiring railroads to cease discrimination. United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

(h) That an order of the Interstate Commerce Commission is legislative in character, and is permissive, will not preclude judicial review. The Chicago Junction Case, 44 Sup. Ct., 317.

(i) Facts conceivably known to the Interstate Commerce Commission, but not put in evidence, will not support an order of the Commission. The Chicago Junction Case, 44 Sup. Ct. 317.

INTOXICATING LIQUORS

See State Rates and Regulations.

CASES 1887-1908

(a) The provision of R. I. Pub. Stat. chap. 634, of May 4, 1887, §1, which prohibits any person from keeping any intoxicating liquors "for the purpose of sale," is not, for the reason that it may incidentally interfere with foreign or interstate commerce, obnoxious to the Federal Constitution, art. 1, §8, which confers upon Congress exclusive power "to regulate commerce with foreign nations and among the several states." State of R. I. v. Fitzpatrick, 1 I. C. R. 713.

(b) Such statute constitutes no de-

fense to an action brought against a railroad company for refusing to carry beer into the state of Iowa from another state. Bowman v. Chicago & Northwestern R. Co., 1 I. C. R. 823.

(c) Section 1553 of the Iowa Code, as amended by the Act of April 5, 1886, forbidding any common carrier to bring within the state any intoxicating liquors, from any other state or territory, without first having the certificate therein required, is a regulation of commerce among the states and is void, as repugnant to the constitution of the United States. Bowman v .Chicago & Northwestern R. Co., 1 I. C. R. 823.

(d) Iowa Code, §1553, forbidding carrier to bring into state intoxicating liquors without first having certificate therein required is regulation of commerce and void. Bowman v. Chicago & N. W. R. Co. (U. S. Sup. Ct.), 1 I. C. R. 823.

(e) Such statute is not an inspection law, nor a quarantine or sanitary law, and is not a legitimate exercise of police power by the state. Bowman v. Chicago & Northwestern R. Co., 1 I. C. R. 823.

(ea) The Iowa code forbidding carriers to transport intoxicating liquor into the state is not a legitimate exercise of police power. Bocoman v. Chicago & N. W. R. Co., (U. S. Sup. Ct.) 1 I. C. R. 823.

(f) Rhode Island, Public Statute, chap. 634, §1, prohibiting the keeping of intoxicating liquors for sale is not obnoxious to federal constitution conferring exclusive power to regulate commerce upon Congress. State v. Fitzpatrick (Sup. Ct. R. I.), 1 I. C. R. 713; S. P. cited in Bowman v. Chicago & N. W. R. Co. (U. S. Sup. Ct.), 1 I. C. R. 835.

(g) A state has the right to prohibit or restrict the manufacture of intoxicating liquors within its limits, to prohibit all sale and traffic in them in the state, to inflict penalties for their manufacture and sale, and to provide regulations for the abatement, as a common nuisance, of property used for such forbidden purposes. Kidd v. Pearson (U. S. Sup. Ct.), 2 I. C. R. 232.

(h) The law of Iowa authorizing the abating as a nuisance of a distillery used for the unlawful manufacture and sale of intoxicating liquors (chap. 6 tit. 11 of the Code of Iowa, amended by chapter 143 of the Laws of 1884) does not conflict with section 8, article 1 of the constitution of the United States, by undertaking to regulate commerce between the states. Kidd v. Pearson, 2 I. C. R. 232.

(i) Whether a state in the exercise of its undisputed power of local administration, can enact a statute prohibiting within its limits the manufacture of intoxicating liquors except for certain purposes, is no longer an open question before this court. Kidd v. Pearson, 2 I. C. R. 232.

(ia) A state law prohibiting the manufacture of liquors does not deprive the owners of a distillery of their property without due process of law. Kidd v. Pearson (U. S. Sup. Ct.), 2 I. C. R. 232.

(j) Up to such sale, the state has no power to interfere, by seizure, or any other action, to prevent the importation and sale by a foreign or nonresident importer. Leisy & Co. v. Hardin, 3 I. C. R. 36.

(k) A citizen of one state has the right to import beer into another state, and the right to sell it there in its original packages. Leisy & Co. v. Hardin, 3 I. C. R. 36.

(l) The right of transportation of ardent spirits, distilled liquors, ale, and beer from one state into another, includes a right of sale in the original package at the place where the transportation terminates. Leisy v. Hardin (U. S. Sup. Ct.), 3 I. C. R. 36; Lyng v. Michigan (U. S. Sup. Ct.), 3 I. C. R. 143.

(m) A representative of importers into a state of malt or brewed liquors cannot be convicted for selling, in original casks, at the place where the transportation terminated, the liquors imported, without having paid a tax imposed by the state on the business. Lyng v. Michigan (U. S. Sup. Ct.), 3 I. C. R. 143.

(ma) The right of importation of ardent spirits, distilled liquors, ale and beer from one State into another, includes the right of sale in the original packages at the place where the importation terminates. Lung v. People of the State of Michigan, 3 I. C. R. 143.

(n) The Arkansas statute of 1889 prohibiting the sale of wine at any place in that state except as authorized therein, so far as it permitted such sale of wine made from grapes grown on the premises, and prohibited the sale of that

made from grapes grown out of the state, is void under the constitution of the United States. State v. Deschamp (Ark.), 3 I. C. R. 576.

(o) Where it appears that one of the defendants, who resides at St. Paul, Minn., is, through the agency of the other defendant, engaged in carrying on the business of keeping for sale and selling intoxicating liquor at a place of business located at Fargo, in the state of North Dakota, in violation of the Prohibitory Liquor Law, HELD, that such place of business is a common nuisance, whether such liquor was or was not drunk by purchasers at such place of business, with the knowledge and consent of the agent in charge of such place of business. State of N. Dakota, ex, rel., Bartlett v. Fraser, 3 I. C. R. 577.

(p) HELD, further, since the passage by congress of the law commonly known as the Wilson Bill, that sales of intoxicating liquor in violation of the prohibitory legislation of North Dakota, which are made in this state by a nonresident, through an agent living in this state, are unlawful sales, whether the liquor sold is or is not imported liquor, or whether it is or is not contained in the original cask or package in which it was shipped out of another state or country. State of N. Dakota, ex, rel., Bartlett v. Fraser, 3 I. C. R. 577.

(pa) A nonresident of the State who through the agency of another carries on the business of selling liquor within the state is guilty of maintaining a common nuisance under N. D. Laws, chap. 110, §13, whether such liquor was or was not drank by the purchasers at such place of business, with the knowledge and consent of the agent. State, Bartlett, v. Fraser (N. D.) 3 I. C. R. 577.

(pb) Sales of intoxicating liquor in violation of the laws of a State, made by a nonresident by an agent living therein, are unlawful, whether the liquor sold is or is not imported or contained in the original package in which it was shipped into the State. State, Bartlett, v. Fraser (N. D.) 3 I. C. R. 577.

(q) A package of intoxicating liquors transported by a common carrier from one state into another in which its sale was forbidden by law, remaining unbroken and undelivered to the consignee, cannot be seized under state process for violation of the laws of the state, because of the interstate character of the goods; and the carrier has a special title which gives a legal right to its custody. State v. Intoxicating Liquors (Me.), 3 I, C. R. 581.

(r) Beer shipped from one state to another prior to the recent legislation of congress on the subject is not subject to seizure in the original packages, under the laws of the latter state. State v. Corrick (Iowa), 3 I. C. R. 669.

(s) Bottles of intoxicating liquors sealed and labeled, which are shipped from another state in open frame boxes with compartments, or packed in barrels, constitute original packages. State v. Coonan (Iowa), 3 I. C. R. 670.

(t) A sale of the contents merely of the packages in which liquor was imported into the state, the purchaser being required to open them and empty the liquor into glasses furnished by the seller, is not a sale by original packages, exempt as interstate commerce from the operations of state laws regulating the sale of intoxicating liquors. Hopkins v. Lewis (Iowa), 4 I. C. R. 63.

(u) The provision of S. C. act of Dec. 24, 1892, §25, subd. 2, that any servant, agent, or employe of a railroad or express company or other carrier, who shall remove any intoxicating liquors from any railroad car, vessel or other vehicle of transportation, at any place other than the usual and established stations or places of business of such carriers within an incorporated city or town where there is a dispensary, shall be punished,—is not a valid exercise of the police power of the state, since it singles out one class of persons from the whole community for prosecution and punishment in contravention of S. C. Const. art. 1, §12, providing that no person shall be liable to any other punishment or subjected in law to any other restrictions or disqualifications in regard to any personal rights, than such as are laid on others under like circumstances. Re Langford, 4 I. C. R. 437.

(v) Liquors imported into a state arrive therein so as to be subject to its police power under the Wilson Act, providing that all intoxicating liquors shall, upon arrival in a state or territory, be subjected to the operation and effect of its laws enacted in the exercise of its police powers, to the same extent as if produced in such state or territory, when they reach their destination in such state, although they are not then delivered by the carrier to the consignee.

Re Langford (C. C. D. S. C.), 4 I. C. R. 437.

(w) A state statute forbidding the inbringing of any intoxicating liquors into the state by a common carrier engaged in interstate and foreign commerce is void as an interference with interstate commerce; and no new power to prohibit such importation is given to the states by the Wilson Act of 1890. Ex parte Edgerton (C. C. D. S. C.), 4 I. C. R. 635.

(x) No authority to punish the agent of a carrier engaged in interstate commerce, under a state law, for receiving in the course of his employment liquors imported from another state, is given by the Wilson Law of 1890, which makes liquors subject to the operation of state laws upon their arrival in the state. Ex Parte Edgerton, 4 I. C. R. 635.

(y) A consignment of intoxicating liquors arrives in the state within the meaning of the Wilson bill, which makes liquors subject "upon arrival in such state" to the laws of the state, as soon as it crosses the state boundary and enters the state, although the contract of carriage is not then completed. State of Iowa v. Rhodes, 7 I. C. C. App. II.

(z) The sale of, as well as the conditions upon which intoxicating liquors shall be transported after entering the territorial limits of a state, is left to state legislation by the act of Congress of 1890 known as the Wilson Act. The court said, in discussing the question, that the liquors arrive in the state within the meaning of the act when they cross the borders and enter the territorial limits of the state. St. of S. Carolina, ex, rel. of v. George, et al v. City Council of Aiken, 7 I. C. C. App. XVII.

(aa) Sales of intoxicating liquors shipped to another state in the original packages before the passage of the Wilson bill are not subject to the laws of that state respecting the recovery of money paid on such sales. N. P. Wind, et al v. Iler & Co., 7 I. C. C. App. XVIII.

(bb) The drawing of a bung from a barrel in which intoxicating liquors were shipped from another state, in order to obtain a small quantity for testing the article to determine an option to reject the purchase, does not destroy the nature of the original package. The court says: "We do not think that the inspecting or testing of an imported article to determine whether it shall be returned has the effect to make it a part of the general mass of property in the state."(Wind, et al v. Iler & Co., 7 I. C. C. App. XVII.

(cc) Prior to the federal legislation upon the question, a state statute entitling a person who paid money for intoxicating liquor sold in contravention of law to recover back the amount paid for it did not apply to the case of a person who purchased the liquor from a citizen of the state who had imported it from another state and sold it in the original package. Edward Yearteau v. Joseph Bacon's Estate, 7 I. C. C. App. XXIII.

(dd) Liquors coming into a town in South Carolina in which by valid statute and ordinance no one can lawfully sell intoxicating liquors, from another state in original packages, are subject under the Wilson Act to the laws and ordinances prohibiting the sale, although in the state at large intoxicating liquors are an article of commerce under the dispensary act. Bailey Liquor Co. v. Austin, 7 I. C. C. App. XXXVII.

(ee) Where bottles of intoxicating liquor are wrapped separately in papers and sealed and the packages thus made packed for shipment in a box, the box and not the sealed packages is the original package, so that the opening of the box and sale of the packages would be a violation of the state liquor law. Harley v. State of Nebraska, 7 I. C. C. App. XLII.

(ff) A state statute which forbids a citizen to purchase in other states and import for his own use alcoholic liquors, the products of other states, discriminates against such products in a way which cannot be permitted under the guise of the police power. And if the act further permits the chief dispenser of liquor within a state to purchase in other states alcoholic liquors and to import them into the state for the purpose of selling them for use and consumption, at retail, within the state and forbids all other persons from so purchasing and importing for their individual use and consumption, it unlawfully discriminates against all other citizens. Donald v. Scott et al, 7 I. C. C. App. XLIX.

(gg) A state statute forbidding the importation of intoxicating liquor from another state and providing

for the arrest of persons who violate its provisions is in conflict with a power of congress to regulate commerce and is not within the exceptions of the Wilson Bill, since that act only permits state regulation of the liquor after it has arrived within the state. The court was pressed to stay its hand in deference to the state court and permit the matter to be delayed on the way. But it is said, the question involved affects the commerce of every port in the state. Delay would work irreparable mischief. Let the channels of trade become once diverted and it would take the life of a generation to restore them. If it be accepted that the master and crew of any vessel arriving at any port in South Carolina may be arrested and imprisoned simply for carrying goods in the course of foreign and interstate commerce, and while engaged in such transportation, and that they would have no protection, no vessel would venture to touch at any of them. It is for the interest of all citizens of the state that the question be settled and the constitutionality of all parts of the statute be ascertained and that speedily. But were this matter to be remanded to the trial justice who issued the warrant, and the cause take its slow course through that tribunal, then on appeal to the circuit court, then to the state court, then to the supreme court of the state, and by writ of error to the supreme court of the United States, years might intervene before a final decision could be reached. The cause can go up from this court direct to the supreme court of the United States and the prisoners be discharged from custody. Ex Parte E. V. Jersey, et al, 7 I. C. C. App. LII.

(hh) A statute providing that any conveyance transporting liquors at night, other than regular passenger or freight steamers and railroad cars, shall be liable to seizure and confiscation, cannot be enforced against a small schooner which entered a port during the night laden with liquor, since it is an interference with commerce as well as unlawful discrimination in favor of freight steamers. Jersey v. The Carolina et al, 7 I. C. C. App. LIII.

(ii) Where a state recognizes the manufacture, sale, and use of intoxicating liquors as unlawful it cannot discriminate against bringing such articles in and importing them from other states. Scott v. Donald, 7 I. C. C. App. LVI.

(jj) The South Carolina dispensary law of January 2, 1895, is unconstitutional and void as a hindrance to interstate commerce and an unjust preference of the products of that state as against prdoucts of other states, and is not within the scope of the act of August 8, 1890, subjecting liquors brought into any state or territory to its police laws. The court says: "It is sought to defend the act as an inspection act within the meaning of that provision of the constitution of the United States which permits the states to impose excise duties as far as they may be absolutely necessary for executing their inspection laws. The act does indeed contain provisions looking to the ascertainment of the purity of liquors and to that extent may be said to be in the nature of an inspection law. But those provisions such as they are do not redeem the act from the charge of being an obstruction and interference with foreign and interstate commerce. It is not an inspection law. The prohibition of the importation of the wines and liquors of other states by citizens of South Carolina for their own use is made absolute and does not depend on purity or impurity of the article. Only the state functionaries are permitted to import in the state, and thus those citizens who wish to use foreign wines and liquors are deprived of the exercise of their own judgment and taste in the selection of commodities. To empower a state chemist to pass upon what the law calls the alcoholic purity of such importations by chemical analysis can scarcely come within any definition of a reasonable inspection law. Scott v. Donald, 7 I. C. C. App. LVI.

(kk) The fact that intoxicating liquor, which is the subject of a sale made in violation of the terms of the Vermont statute, was brought into the state in original packages does not exempt the sale from the operation of the statute in view of the act of Congress of August 8, 1890, which provides that all intoxicating liquors transported into any state shall, on arrival therein, be subject to the operation and effect of the laws of such state enacted in the exercise of the police powers to the same extent and in the same manner as though it had been produced in such state and shall not be exempt therefrom by reason of being introduced therein in original

packages. Starace v. Rossi, 7 I. C. C. LX.

(ll) A city ordinance requiring every person selling vinous liquors in quantities of one gallon or more to obtain a license, as applied to one selling wines for houses or manufacturers in other states, is not an exercise of the police power of the state, but an attempted regulation of a product of interstate commerce, not in the interest of public health or morality, and is invalid. Re Lazarus E. Lebolt v. 7 I. C. C. App. LXXVIII.

(mm) A state cannot forbid the taking or solicitation of orders from inhabitants for intoxicating liquors to be supplied by dealers doing business in other states. The court says: There can be no doubt that the state under its police power can control and regulate the liquor traffic either by prohibiting it altogether or by permitting its sale only on certain prescribed limitations and conditions. Nor can this power be controlled by any law of the United States. The importation of liquor into this state, and its sale in this state, either to the importer or to anyone else, come within this provision. And, as the state has forbidden it, such sale is illegal and void. So even when one imports for his own use and consumption, if the packages come C. O. D., or to order, notify, or under a bill of lading attached to a draft, or in any other way by which the price is paid on or as a condition of the delivery of the goods in this state, this is unlawful, and the sale thus consummated is void. But the court further says that the solicitation or giving of orders upon a dealer outside of the state does not come within the prohibited conduct. The nonresident dealer has the right to receive the order and fill it, and to transport it to this state. If the order is filled abroad and the price paid there, so that the liquor becomes the property then and there of the party ordering, the transaction is perfectly legitimate; nor does it affect the legality of that transaction if the liquor is not to be paid for until it reaches its destination, provided the sale be consummated abroad. Ex parte Loeb, 7 I. C. C. App. LXXXI.

(nn) Liquor imported from another state into South Carolina for the personal use of the importer will be protected from seizure under the South Carolina dispensary act so long as such use continues, although it is kept at a bona fide club of which the importer is a member, in a locked receptacle of which he has the key. The law says: The right to import under the interstate commerce law would be idle indeed if the subject matter imported were not protected when it reached its destination. As it is protected in its importation solely because it is imported for personal use only, it will be protected so long as this personal use continues. If any attempt is made to dispose of or use it in violation of the police power of the state this protection ceases. Donald v. Scott, et al, 7 I. C. C. LXXXV.

(oo) A statute prohibiting the disposition of intoxicating liquors not tested by a chemist of a certain college and found by him to be chemically pure, and providing for their seizure, without any provisioon for an inspection by such chemist excepting of liquor purchased by the state board of control, cannot be sustained as an inspection law, but is an unlawful burden upon interstate commerce. Donald v. Scott, et al, 7 I. C. C. App. LXXXVII.

(pp) A state which conducts the business through her agents of the sale of intoxicating liquors, and takes the place of her citizens, though denying to them the right of sale cannot destroy the competition of citizens of other states by denying them the right to trade in the same commodity in every respect like that in which it is trading, save that it is not protected by a certificate which the state alone can give, and which it distinctly withholds. Donald v. Scott, et al, 7 I. C. C. App. LXXXVI.

(qq) A package of liquor imported into South Carolina from another state for the personal use of the importer is not protected by the interstate commerce law from seizure under the state statute, after the importer has given it to another person for the latter's use and consumption. Donald v. Scott, 7. I. C. C. App. LXXXVIII.

(rr) The South Carolina dispensary law of 1895 is unconstitutional and void as a hindrance to interstate commerce and an unjust preference of the products of that state as against similar products of other states, and is not within the scope of the act of August, 1890, subjecting intoxicating liquors brought into any state or territory to its police laws. Scott v. Donald, 7 I. C. C. App. XCV.

(ss) Where a state recognizes the manufacture, sale, and use of intoxicating liquors as unlawful it can not discriminate against bringing special articles in and importing them from other states. Scott v. Donald, 7 I. C. C. App. XCV.

(tt) A bond executed in Iowa and delivered and accepted in Wisconsin as security for the acts of the principal obligator in selling in the former state, in violation of the laws thereof, intoxicating liquors shipped into such state in original packages from the latter state, is void under the Iowa statutes, and the act of congress of August 8, 1890, providing that all intoxicating liquors transported into any state shall, upon arrival therein, be subject to the operation and effect of the laws of such state enacted in the exercise of its police powers to the same extent as if such liquors had been produced in the state. Fred Miller Brewing Co. v. Stevens, 7 I. C. C. App. XCVII.

(uu) The purchase price of intoxicating liquor sold to a resident of the state, by nonresidents of the state, prior to the passage of the act of Congress of August 8, 1890, may be recovered, notwithstanding the state law forbids such sales, since the statute, so far as its affects interstate sales, is void. Doherty v. Cotter, 8 I. C. C. App. III.

(vv) Under the Wilson Bill the restriction and regulations of state laws become operative on the original package of intoxicating liquors imported into a state before the sale thereof; and therefore such packages cannot be sold if the state law forbids the sale, and can be so sold only in the manner and form prescribed by the state regulations. Vance v. Vandercook Co., 8 I. C. C. App. XI.

(ww) Compelling a resident of the state who desires to order intoxicating liquor for his own use from another state, first to communicate his purpose to a state chemist; and depriving any nonresident of the right to ship into the state any intoxicating liquors unless previous authority is obtained from state officers. —are unlawful regulations of commerce. The right to carry on interstate commerce cannot be made to depend upon the permission of state officers. The court says: The right of the citizen of another state to avail himself of interstate commerce cannot be held to be subject to the issuing of a certificate by an officer of the state to which the shipment is going, without admitting the power of that officer to control the exercise of the right. But the right arises from the constitution of the United States; it exists wholly independent of the will of either the law-making or the executive power of the state. It takes its origin outside of the state, and finds its support in the constitution of the United States. Whether or not it may be exercised depends solely upon the will of the person making the shipment, and cannot be, in advance, controlled or limited by the action of the state in any department of its government. Vance v. Vandercook Co., 8 I. C. C. App. XI.

(xx) Moving intoxicating liquors from the station platform to the freight warehouse of a railroad company on their arrival at destination, upon their shipment from another state, is not a violation of a state statute making transportation of such liquors from one place to another an offense. The court says: "The language of the statute makes it impossible in reason to hold that the law intended that the word 'arrival' should mean at the state line, since it presupposes the coming of the goods into the state for 'use, consumption, sale, or storage.' The fair inference from the enumeration of these conditions, which are all embracing, is that the time when they could arise was made the test by which to determine the period when the operation of the state law should attach to goods brought into the state. If the word 'arrival' means crossing the line, then the act of crossing into the state would be a violation of the state law, and hence necessarily the operation of the law is to forbid crossing the line and to compel remaining beyond the same. Rhodes v. St. of Iowa, 8 I. C. C. App. XII.

(yy) The Wilson Bill does not cause intoxicating liquors to be subject to state laws upon their arrival at the state line in the course of interstate transportation, but only after their coming into the state and the consummation of their shipment. Rhodes v. St. of Iowa, 8 I. C. C. App. XII.

(zz) A dealer who is a citizen of a state other than South Carolina may import liquors, wines, and beers in original packages for sale in that state, so long as the state recognizes intoxicating liquor as an article of commerce; but

sales must be made under the restrictions of the state statute as to time, quantity, and persons. Moore v. Bahr, 8 I. C. C. App. XXV.

(3a) Closing of markets for alcholic liquors in South Carolina to producers in other states, by the dispensary law as amended, renders it unconstitutional although they are likewise closed to the producers of the state, as the use of liquors as a beverage and their importation for personal use are not forbidden, but they are treated as the subject of foreign and interstate commerce in behalf of the state. Vandercook Co. v. Vance, 8 I. C. C. App. XXIX.

(3b) Provision of the South Carolina dispensary law, for the inspection by an official chemist of samples of intoxicating liquors imported into the state for personal use, is unreasonable and futile in failing to protect the citizen from failure to send liquor according to sample, only subjecting him to the seizure and forfeiture of his goods if they should be inspected, and is void as a burden on interstate commerce. Vandercook Co. v. Vance, 8 I. C. C. App. XXIX.

(3c) Before a state can forbid importation and sale in original packages of alcoholic liquors under the Wilson Act, it must declare their manufacture, sale, and use as a beverage to be contraband and forbidden, and take them out of the category of legitimate articles of commerce. Vandercook Co. v. Vance, 8 I. C. C. App. XXIX.

(3d) A state cannot make it unlawful to solicit orders for spirituous liquors without a license by a person acting for a manufacturer without the state. St. of W. Virginia v. Reuben Lichtenstein, 8 I. C. C. App. XXXVI.

(3e) Congress has exclusive control over the territories, and may prohibit importation and sale of liquors therein. Endleman v. U. S., 8 I. C. C. App. XLVI.

(3f) A railroad company as a common carrier was enjoined pendente lite from refusing to receive and transport carloads of liquor in original packages where the business of the complainant in transporting liquors into the state and their destination under the lawful police regulations of the state was considered by the court to be illegitimate. Bluthenthal v. Southern R. R. Co., 8 I. C. C. App. XLVII.

(3g) Forbidding the sale of intoxicating liquors in connection with drugs does not violate the interstate commerce clause of the Federal constitution. The court says: "So far as it is contended that this ordinance interferes with interstate commerce, it is only necessary to repeat that there is not the slightest interference with complainant selling its liquors, the only restriction being not to sell them in connection with drugs. Under none of the authorities does this local regulation of the manner of keeping and selling liquors violate the interstate commerce clause of the constitution of the United States." Jacob's Pharmacy Co. v. City of Atlanta, 8 I. C. C. App. LXVI.

(3h) Intoxicating liquors purchased in another state at a distillery, for the use of the purchaser himself, and transported by him in his own private conveyance across the state line toward his home, have not arrived within the state, within the meaning of the Wilson Act, so as to become contraband under the South Carolina statutes while in course of transportation between the state boundary and the home of the purchaser. Sate of So. Carolina v Holleyman, 8 I. C. C. App. LXX.

(3i) Discrimination in favor of intoxicating liquors bought from a dispensary, as against liquors purchased beyond the limits of the state for the personal use of the purchaser, with respect to the necessity of having certificates as to the purity of the liquors or the fact that they are kept for personal use, would constitute a burden on interstate commerce. In this case a decision was at first arrived at holding that the liquors became subject to state laws the moment they crossed the state boundary, but the court being equally divided upon a constitutional question in the case, the full court was assembled to hear the appeal when the former decision was reversed and the propositions set out above held to be the law of the case. State of So. Carolina v. Holleyman, 8 I. C. C. App. LXX.

(3j) A statute making it unlawful for private persons to sell intoxicating liquors is not an unconstitutional regulation of interstate commerce because a person may have on hand some liquors imported from other states. The court places its ruling upon the ground that the state legislation is within the autho-

rity granted by the Wilson Bill. Plumb v. Christie, 8 I. C. C. App. LXXI.

(3k) A state statute may lawfully prohibit the soliciting of orders for intoxicating liquors from persons in the state, or contracting for the sale of intoxicating liquors with persons in the state other than a person authorized to sell the same, although applied to non-residents who solicit or contract for the sale of liquor within the state so that it incidentally affects interstate commerce. The court says: The purpose of the act under consideration was to restrict the sale of liquors, and this may be lawfully done, although interstate commerce may be thereby incidentally affected. Westheimer v. Weisman, 8 I. C. C. App. LXXII.

(3l) Where, under a contract for sale of intoxicating liquors to be made in one state and delivered in another, the manufacturer agrees to deliver at the residence of the purchaser, and in order to do so marks upon the package the name of the purchaser and the place of his residence, and ships to the manufacturer's agent at such place for delivery, the liquor will have arrived within the state when it is delivered to the agent so as to be subject to the state prohibitory laws under the Wilson Act, and subject the agent to the penalty prescribed by such laws, in case he delivers at the residence of the purchaser. Stevens v. St. of Ohio, 8 I. C. C. App. LXXVIII.

(3m) A non-resident may be deprived of the privilege of selling intoxicating liquors in original packages in South Carolina on account of the sale by his agent to minors in violation of the laws of the state, as the laws regulating interstate commerce will not protect one who violates valid police regulations of the state. Bluthenthal v. Long, 8 I. C. C. App. XCIII.

(3n) A division of a freight rate with another railroad company constitutes a mere subterfuge to give a concession in the rate, and is unlawful, where the railroad company receiving the division of the rate, while owning four or five thousand feet of railway siding adjoining one of several plants belonging to the shipper, does not own any equipment or rolling stock, and is not in any way engaged as a common carrier, but is in fact controlled by the officers of the shipping company, who control its earnings and receive the benefit of the division of the rate, thereby enabling it to sell its produce at prices which its competitors cannot meet. Re Transportation of Salt from Hutchison, 10 I. C. C. 1.

IMPORTANT CASES SINCE 1908

(3o) The rule providing that before intoxicating liquors may be delivered to consignee, he must present an affidavit from a physician stating its necessity for medicinal purposes, is addressed to carrier's agent and not to the shipping public; that the rule merely prescribes reasonable regulations, which, when complied with, will enable the agents to identify consignee as the lawful consignee of the interstate shipments; that it does not in any wise, change, affect, or determine any part of the aggregate of rates, fares, or charges, or the value of lawful service rendered to the shipper or consignee; and that it need not, therefore, be filed with the commission under the provisions of section 6 of the act. James J. Redmond v. Adams Express Co., 53 I. C. C. 39.

(3p) Following United States v. Hill, 248 U. S., 240, the commission accepts the view that the Reed amendment makes it unlawful for a carrier to transport intoxicating liquors in interstate commerce to points in Virginia, except for four specific uses. Redmond v. Adams Exp. Co., 53 I. C. C. 39, 41.

(3q) A proceeding under Laws Ex. Sess. 1917, p. 8, §1, for the confiscation and destruction of intoxicating liquors is neither criminal nor quasi criminal, but purely a proceeding in rem. W. A. Gaines & Co. v. Holmes (Ga. 1922), 114 S. E. 327.

(3r) There is no law of Georgia which makes contraband or unlawful the transportation of intoxicating liquors on a through bill of lading in interstate commerce on an interstate railway train from one state to another state, merely passing through this state, where there has been no delivery to any person within this state, nor any access or control exercised by any person within this state, except the common carrier in the act of transportation. Moreover, if the prohibition statutes were construed to apply to such interstate shipments, such state law would be invalid and void because in conflict with the interstate commerce clause of the constitution of the United States. W. A. Gaines & Co. v. Holmes (Ga. 1922), 114 S. E. 327.

(3s) On the interlocutory hearing of

an application for injunction to restrain the sheriff and solicitor general from confiscating and destroying a shipment of whisky seized in Dade county, Ga., while in transit as a through shipment from Glenn Creek, K., to Los Angeles, Cal., the rejection as evidence of permits, purporting to have been issued by the proper federal authorities, and authorizing the purchase and transportation of the whisky, was error, as these permits, standing alone, would constitute prima facie evidence of compliance with the law. W. A. Gaines & Co. v. Holmes (Ga. 1922), 114 S. E. 327.

JUNCTION POINT RATES

See Cars and Car Supply §14½; Routing and Misrouting §5½.

CASES 1887-1908

(a) Complainant attacked as unjust and unreasonable rates charged on flour from Ponca City, Okla., to Maud, Ind., via Santa Fe to Shawnee and M. K. & T. beyond. The latter company exacted an arbitrary of 5c per 100 pounds over its local rate from the junction on the theory that it endeavored to prevent millers located on other lines from selling on its line. HELD, rate attacked unreasonable to extent a charge of 5c per 100 pounds was exacted over and above the junction point combination basis, reparation awarded. Ponca Milling Company v. M. K. & T. Ry., 12 I. C. C. 26.

IMPORTANT CASES SINCE 1908

(b) Increased through rates on traffic to and from points on the Northampton & Bath R. R., resulting from the cancellation by trunk-line carriers of the joint rates, under which the switching charges of the N. & B. were absorbed, found to have been justified as to cement and not unreasonable, but as to other traffic found unjust and unreasonable to extent they exceeded rates to and from the junctions. Reparation awarded . Atlas Portland Cement Co. v. N. & B. R. R. Co., 73 I. C. C. 687.

(c) Extension of junction-point rates to points on branch lines is not unusual but generally has not been required unless it has appeared that carriers had adopted such practice with respect to other points similarly located and circumstanced, or that rates to junction points were made on group basis and applied over a considerable territory when conditions of operation and transportation on main and branch lines were substantially similar. Western Coal Rates, 80 I. C. C. 383, 450.

LABOR BOARD

See Newland's Act; Wages.

IMPORTANT CASES SINCE 1908

(a) Paragraph (a) of section 5 of the standard contract sets forth a rule of measuring the compliance of the director general with the covenant of upkeep by reference to the accounts of the carriers, when kept in accordance with the commission's requirements; the basic measure is the expenditure for maintenance during an average six months of the test period, adjusted to differences in the cost of labor and materials and in the amount and use of the property, in accordance with the provisions of paragraph (c) ; and differences in the "cost of labor," as these words are used in paragraph (c), do not include changes in the quality or effectiveness of labor, but only changes in wages. Maintenance Expenses under Section 209, 70 I. C. C. 115, 123.

(b) Under Transportation Act, 1920, §307, the decisions of the labor board as to matters other than those submitted to it by the parties jointly under section 301 are advisory only. Pennsylvania Railroad Co. v. United States R. R. Labor Board, 282 Fed. 693.

(c) Transportation Act of 1920, tit 3, authorizing the labor board to ascertain just and reasonable wages and working conditions, is within the power of congress under its power to regulate interstate commerce, and does not violate the right of private contract, or take property without due process of law, in violation of Const. Amend. 5. Pennsylvania Railroad Co. v. United States R. R. Labor Board, 282 Fed. 693.

(d) Transportation Act of 1920 §308 (4), authorizing the labor board to make necessary regulations for the efficient execution of the functions vested in it, gives it no right to direct or control the method of selecting persons to represent employees in conferences with employer under section 301. Pennsylvania Railroad Co. v. United States R. R. Labor Board, 282 Fed. 693.

(e) Under Transportation Act, 1920, §301, providing for conferences for the adjustment of disputes between carriers and their employees, the labor board is without power to intervene in the proceedings preceding a reference of the dispute to it by the parties jointly, except that under section 307 it may suspend the operation of a decision making a readjustment of rates necessary. Pennsylvania Railroad Co. v. United

States R. R. Labor Board, 282 Fed. 693.

(f) Under Transportation Act, 1920, §301, it was intended that disputes between carriers and their employees should be considered, and if possible decided, by conference solely between the carrier and representatives of the employees, and the only power given the labor board under that section is to hear and decide a dispute which the conferees are unable to decide and then only in the event that the parties jointly refer the matter to the board. Pennsylvania Railroad Co. v. United States R. R. Labor Board, 282 Fed. 693.

(g) The labor board, created by Transportation Act 1920, tit. 3, is a body corporate, subject to the jurisdiction of federal courts, and may sue and be sued. Pennsylvania Railroad Co. v. United States R. R. Labor Board, 282 Fed. 693.

LACHES

See Classification §5.

LAND GRANT RAILROADS

IMPORTANT CASES SINCE 1908

(a) Congress, in granting rights of way to defendants in Indian Territory, provided that the rates in that territory should not be higher than those charged in Kansas, Arkansas and Texas. HELD, the commission had no jurisdiction to enforce such provision, and even if it had, the provision was too indefinite to be capable of enforcement. Haines v. C. R. I. & P. Ry. Co., 13 I. C. C. 214, 216.

(b) Complainant shipped 11 carloads of anthracite coal from Chicago, Ill., to Sturgis, S. D., for use of the United States government at Fort Meade, S. D., purchased by the United States at a price which included delivery of the coal at Sturgis. Defendant operated between Chicago and Sturgis 248 miles of land-grant aided railroad, over which the government was required to pay only 50 per cent of the commercial rate. The shipments, however, were assessed the published rate of $6.80 per ton. The carrier, through error, quoted to complainant a rate of $5.9915 per ton, the land-grant rate. This rate was established subsequent to the shipment to coal consigned to the government at Sturgis. The reasonableness of the $6.80 rate was not questioned, the propriety of the application of the land-grant rate to the shipment being involved. HELD, that it is improper to permit the benefit of special rates on government material to accrue to anyone other than the government itself. Reparation denied. Havens & Co. v. C. & N. W. Ry. Co., 20 I. C. C. 156, 158.

(c) Land-grant deductions on shipments for the government are made on settlements between the carrier and the auditing offices of the War Department, under the provisions of a section of the Revised Statutes not incorporated in the Interstate Commerce Act, and, therefore in awarding reparation on a shipment by the government the commission cannot consider land-grant deductions. U. S. v. S. P. Co., 25 I. C. C. 255, 257.

ALL OTHER CITATIONS

U. S. v. P. R. R. Co., 28 I. C. C. 51, 518, 524; S. P. Co. v. U. S., 35 Sup. Ct. 573, 574; 237 U S. 202, 59 L. ed.

LATERAL ALLOWANCES

See Allowances §8 (3¼).

LATERAL ROADS

CASES 1887-1908

(a) Upon application of a railroad, about 1 mile long, from a point near the Southern Railway in McRae, Ga., to a point near the Sea-board Air Line, for an order requiring physical connections therewith. HELD, upon the facts and circumstances of the case, that as such connections are practicable and can be made without hazard to the public, and the complainant's prospective business is sufficient to justify the connections, they should be made, but at complainant's expense. Definite order withheld pending action of defendants and taking of further testimony. McRae Terminal Railroad v. Southern Railway Co., 12 I. C. C.

LEAKAGE

See Allowances §8 (3½).

LEASE

See Cars and Car Supply §11½; Common Carrier §2; Finance Dockets §3; Special Contracts §2 (1); Warehousing.

CASES 1887-1908

(a) Where a railroad lease provides that the rent shall be paid monthly on the last day of each month, if it is not paid in fact until a portion of the month following, the one on which it becomes due has elapsed, interest is chargeable on the deferred payments. Vermont & C.

R. Co. v .Vermont C. R. Co. (Vt.) 3 I. C. R. 488.

(aa) The agreed rental cannot be accepted as the amount which leased property, part of a system, must earn and the lessee may retain before any reduction can be made in the rates over the leased lines. Newland v. Northern P. R. Co. (Conn.) 4 I. C. R. 474.

(b) Where a road or system of roads leased and made the road of another company a part of the system. HELD, that the agreed rental cannot be accepted as the amount which the leased property must earn and the lessee may retain before any reduction can be made in the rates over the leased lines. A. S. Newland v. Northern Pacific R. R. Co. et al., 6 I. C. C. 131.

(c) The agreed rental cannot be accepted as the amount which leased property, part of a system, must earn and the lessee may retain before any reduction can be made in the rates over the leased lines. Newland v. Northern P. R. Co., 6 I. C. C. 131.

(d) A carrier subject to the provisions of the Act to Regulate Commerce cannot by leasing its road free itself from liability for practices made illegal by such act; nor can it, after resuming operation of its property pending proceedings against it to enforce the provisions violated and to recover damages for such violations, claim exemption from liability during the existence of the lease. Independent Ref. Asso v. Western N. Y. & P. R. Co., 6. I. C. C. 378.

(e) A State statute does not unlawfully interfere with interstate commerce which requires every person operating a railroad in the State under a lease to record the same in the office of the Secretary of State and in the county clerk's office of every county in which the road or any part thereof lies, within thirty days after the execution of the contract. Commonwealth of Kentucky v. Chesapeake & Ohio Ry. Co., 7 I. C. C. App CVI.

(f) The requirement of the Kentucky statutes that every person operating a railroad in the State under a lease shall have the same recorded in the office of the Secretary of State in the county clerk's office of every county in which the road or any part thereof lies, within thirty days after the contract or lease is executed, is a legislative exercise of police power, and is not an unconstitutional interference with interstate commerce. The court says: "The manifest purpose of the statute is to ascertain and identify the company having legal possession and control of each particular line of railroad within the State in order: First, that taxes and public dues may be more readily and certainly collected and obedience to law more effectually enforced; second, that persons having business intercourse with common carriers may know with whom to deal, or, if wronged or injured, may know against whom to seek remedy. In what way enforcement of such statute can possibly interfere with power of Congress to regulate commerce between the States we are unable to conceive." Commonwealth of Kentucky v. Chesapeake & Ohio Ry., 8 I. C. C. App. LXXV.

IMPORTANT CASES SINCE 1908

(g) The use of trestles leased at inadequate rental reserved in lease has each year constituted a substantial concession to coal company and unlawful discrimination against competing shippers and an offset against rates. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 251

(h) While there may be no inhibition of law against the leasing by a carrier of the tracks or property of a shipper and the payment of just rental therefor, nevertheless, if the consideration be so excessive as to effect a concession in the lawful freight rates, the articles of lease and concomitant evils are subject to appropriate legal review. Allowances on Anthracite Coal, 36 I. C. C. 164, 170.

(i) A warehouse owner, a landlord seeking to rent his property, as such, has no relation with a common carrier which could result in a discrimination against him in violation of the Act to regulate commerce. The discrimination there forbidden is in respect of transportation. Pittwood & N. P. Ry., 51 I. C. C. 535.

(j) The Commission is without jurisdiction to prescribe uniform liability clauses to be contained in leases or contracts for construction, maintenance, and use of industrial or private sidetracks, limiting liability for loss and damage caused by fire from locomotives operating over such tracks. National Industrial Traffic League v. A. & R. R. R. Co., 61 I. C. C. 120.

(k) The Commission instituted an in-

vestigation as to carriers leasing their facilities to shippers of freight, and the rentals received therefor by the carriers. LEASES BY THE NORTHERN PACIFIC. Part of the right of way of this carrier in Spokane is occupied by various industries. The leases are either for an indefinite term or for a long term. 50 per cent of the property suitable for warehouses in Spokane is adjacent to tracks of that company. In all cases the rental was ostensibly 6 per cent of the value of the land for business purposes, the lessee agreeing to pay all taxes or special assessments. Usually the leases contained provisions for a revaluation at the end of 5 or 10 years, such revaluation, however, to be determined by disinterested parties only in default of mutual agreement of the carrier and its lessee. The leases provide that where rates are as favorable the lessee would route its freight over the N. P., in preference to any other line. LEASES BY THE SPOKANE INTERNATIONAL. This is a line about 140 miles in length between Spokane and Kingsgate, Alberta, Canada. This carrier leased each of several sites for an annual rental of $10, irrespective of size or location, the lessee agreeing to pay taxes and special assessments. LEASES BY THE GREAT NORTHERN. Defendants stated its purpose was to secure as large a rental as possible; that the leases always provided that lessee would pay taxes and special assessments. IN GENERAL. Apparently the carriers concern as to the character and use of improvements upon the leased land was due to a desire that the lessees should be producers of traffic. It is quite evident not only from the terms of the contracts in evidence but also from the testimony that traffic considerations were uppermost and controlling in the minds of railroad employees and officers charged with the leasing of industry sites. The record does not satisfactorily show that the lessees pay the tax or special assessments. HELD, 1. No justification exists for the leasing of railway lands to industries at a nominal rental charge. In cases where nominal or wholly inadequate rentals are reserved in leases it is evident that traffic considerations are the moving cause so far as the carriers are concerned. Where it clearly appears that the traffic of the lessee is in part the consideration for the lease, the conclusion follows almost inevitably that the transaction amounts to a concession to the shipper-lessee, in violation of the Elkins Act and of section 2 and 6 of the act. 2. A provision in a lease of railway land whereby a shipper agrees to route over the lines of the lessor carrier or its connections all or any part of the traffic which the shipper is able to route amounts to an acknowledgement that the consideration for the making of the lease was in part the exchange of traffic by the shipper for the right to occupy the land. 3. The determination of the value of leased premises by mutual agreement of the shipper and carrier, and revaluation from time to time by similar agreement, is an arrangement inconclusive of actual values and open to serious abuse. 4. Every effort should be made by carriers to obtain, when leasing land to shippers, terms no less favorable than would be obtained under similar conditions and restrictions of use, were the land owned independently of the railroad. Proceeding discontinued. Leases and Grants by Carriers to Shippers, 73 I. C. C. 671.

(l) When a carrier permits a shipper to use valuable lands to which the carrier has title, without charge or without reasonably adequate charge, the practical effect is to reduce that shipper's transportation charges, so that there results what amounts to a refunding or remission of some portion of the published rates. Under such circumstances there may be a violation of sections 2, 3, and 6 of the interstate commerce act, or of the Elkins Act, as amended. Leases & Grants by Carriers to Shippers, 73 I. C. C., 671, 682.

(m) Violations of the act and other statutes which the commission administers may occur when the terms and conditions of leases of carrier lands to shippers are so favorable to the lessee that it is clear that the real consideration for the lease must in part be found elsewhere, namely, in the freight which he ships over the lines of the lessor carrier. Leases and Grants by Carriers to Shippers, 73 I. C. C. 671, 682.

(n) The act contains no provision authorizing the commission to prescribe or regulate the terms or conditions under which carriers may lease their lands to shippers. The authority which the commission has over such leases is wholly indirect, and comes into being only where the lease results in some violation of the act or other statute which the commission administers. Leases and Grants by

Carriers to Shippers, 73 I. C. C., 671, 682.

(na) The act contains no provision authorizing the Commission to prescribe or regulate the terms or conditions under which carriers may lease their lands to shippers. When a carrier permits a shipper to use valuable lands to which the carrier has title, without charge or without reasonably adequate charge, the practical effect is to reduce that shippers transportation charges, so that there results what amounts to a refunding or remission of some portion of the published rates. Under such circumstances, there may be a violation of section 2. Leases and Grants by Carriers to Shippers, 73 I. C. C. 671, 682.

(o) A provision in a lease of railway land whereby a shipper agrees to route over lines of the lessor carrier or its connections, all or any part of the traffic which the shipper is unable to route, amounts to an acknowledgment that the consideration for the making of the lease was in part the exchange of traffic by the shipper for the right to occupy the land. Leases and Grants by Carriers to Shippers, 73 I. C. C. 671, 683.

(p) The determination of the value of leased premises, by mutual agreement of the shipper and carrier, and revaluation from time to time by similar agreement, is an arrangement inconclusive of actual values and open to serious abuse. Leases and Grants by Carriers to Shippers, 73 I. C. C. 671, 683.

(q) Carriers, when leasing land to shippers, should make every effort to obtain terms no less favorable than would be obtained, under similar conditions and restrictions of use, were the land owned independently of the railroad. Leases and Grants by Carriers to Shippers, 73 I. C. C. 671, 683.

(r) Upon investigation, no justification found to exist for the leasing of railway lands to industries at nominal rental charges. In cases where nominal or wholly inadequate rentals are reserved in leases traffic considerations are the moving cause so far as the carriers are concerned, and where it clearly appears that the traffic of the lessee is in part the consideration of the lease, the transaction amounts to a concession to the shipper-lessee, in violation of the Elkins Act and of sections 2 and 6 of the interstate commerce act. Leases and Grants by Carriers to Shippers, 73 I. C. C. 671, 683.

(s) Where a corporation, owning a railroad and coal mines, leased the railroad for a term of 50 years at a stipulated yearly rental, and the lease provided that the lessee would transport coal from the lessor's coal mines at a sliding rate per ton, depending on the quantity transported, and that, if the quantity of coal transported in any year exceeded 100,000 gross tons, the lessee would pay back to lessor 5 cents for each ton transported, and that, if the lessor failed to ship a certain quantity of coal, the lessee could declare the agreement terminated, HELD, the 5 cents per ton paid by the lessee to the lessor was a rebate, and was not an additional rent. State Line & S. R. Co. v. Lehigh Valley R. Co. (Pa. 1923), 120 A-829.

(t) Where a lease of a railroad for a stipulated rent, provided that the lessee would transport coal mined by lessor for a sliding rate per ton, depending on the quantity transported, and that, if the quantity exceeded 100,000 tons in any year, the lessee would pay 5 cents per ton on all the coal transported, HELD, that it was clearly a rebate, and not an additional rent, and the parties by their interpretation could not alter this fact, nor make that legal which was illegal by calling it by another name, for it is only where the meaning of a contract is uncertain or ambiguous that the parties' interpretation is followed. State Line & S. R. Co. v. Lehigh Valley R. Co. (Pa. 1923), 120 A-829.

IMPORTANT CASES SINCE 1908

(a) It must not be inferred that the Commission disclaims jurisdiction over lighterage service. On the contrary, that service must be conducted in accordance with requirements and prohibitions of the act. Federal Sugar Refining Co. v. B. & O. R. R. Co., 17 I. C. C. 40, 45.

(b) A lighterage company, which offers its services to the general public for hire as a common carrier, held to be a common carrier subject to the act. Murray Lighterage & Transportation Co. v. D. & H. Co., 25 I. C. C. 388.

(c) Where shipments originating in Louisiana destined to Newark, N. J., moved in privately-owned vessels to New York Harbor and thence under separate contract to Newark, the commission has jurisdiction over the movement from New York lighterage to Newark whether or not the entire physical operation was performed within the state of New Jersey. The movement is part of an interstate transportation, though the through transportation was not made under a common control management, or arrangement for a continuous carriage or shipment. Du Pont de Nemours & Co. v. Director General, as Agent, 74 I. C. C. 191.

§3. Reasonableness and Discrimination. See Discrimination; Reasonableness of Rates.

CASES 1887-1908

(a) Complainant attacked the refusal of defendant to continue the delivery of hay in carload shipments at its freight station at Brooklyn, N. Y., after making such delivery for a period of years as unreasonable and discriminatory. Transportation between defendant's terminal in Brooklyn and its rail terminus in Jersey City is effected by water carriage across New York harbor. The action in discontinuing track delivery for hay in carloads at its station in Brooklyn, though it continued to make such delivery for other carload traffic, was taken to relieve a chronic congestion at that station resulting largely from consignments of hay thereto. It still continues delivering carload hay alongside wharves in Brooklyn as it does at other points within the lighterage district of New York. HELD, that the resulting discrimination against hay in carloads was not unjust within the meaning of the act, complaint dismissed. Palmer's Dock Hay & Produce Board of Trade v. Pennsylvania R. R., 9 I. C. C. 61.

IMPORTANT CASES SINCE 1908

(b) By extension of their lines to New York by lighterage regulations, from the exercise of business discretion and not from compliance with requirements of the act, defendants incur no liability, under the act, to extend their lines to Yonkers or other nearby communities. Federal Sugar Refining Co. v. B. & O. R. R. Co., 17 I. C. C. 40, 45.

(c) Even if the lighterage service supplied by railroads entering New York in carrying traffic across the river be regarded as a species of cartage, it would not necessarily follow that such service must be extended to Yonkers, because it is provided in Greater New York. The peculiarities of the New York situation might justify the carriers in affording to shippers in that city a facility of this kind which they would not be bound to furnish elsewhere. Federal Sugar Refining Co. v. B. & O. R. R. Co., 17 I. C. C. 40, 46.

(d) Terminals within the lighterage limits of New York Harbor are railroad terminals, none the less so because they are reached by ferries instead of bridges. To and from these places the defendants are common carriers "wholly by railroad," within the meaning of section 1. Federal Sugar Refining Co. v. B. & O. R. R. Co., 17 I. C. C. 40, 46.

(e) Unjust discrimination results from paying lighterage allowance to one shipper and refusing such allowance to another shipper performing a similar service. Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200.

(f) There is little ground for denying a lighterage privilege and allowance to complainant where its sugar crosses the lighterage limits, while according such privilege and allowance to another shipper within the lighterage limits. Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 215.

(g) A carrier must lighter sugar itself or allow each shipper to do it in his own way, and if an allowance is paid to one shipper it should be paid to another performing the same service. Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 215.

(h) When a shipper tenders its sugar to the defendants on lighters at their regular receiving stations on the Jersey shore, it must be received and carried thence to destination on rates, terms and conditions that are no less favorable to the complainants in any particular than the rates, terms and conditions governing and surrounding the sugar traffic of a competitor, brought by them on floats and lighters to the same station for carriage to the same destination. Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 217.

(i) Where charges for a particular terminal service, such as lighterage, have been absorbed and it is proposed to maintain the same rates to or from the terminal but to add thereto what the carriers consider to be a reasonable charge for the service, it should be affirmatively shown not only that the terminal charge, considered alone, is reasonable, but also that the through charge is reasonable. Manure from Jersey City, N. J., 40 I. C. C. 465, 469.

(j) Respondent proposed to eliminate from its free lighterage tariff applicable to points in New York Harbor baled hay or straw, carloads. The lighterage tariff

of the Erie, respondent, provides, among other things, that carload shipments of articles entitled to lighterage will be lightered free to or from any steamship, pier, or public landing within the free lighterage limits of New York Harbor. This has been provided by the trunk lines for many years. If respondent is permitted to withdraw from lighterage service on baled hay or straw except to the New York City stations specified, free lighterage to New York Harbor points will still be available to shippers located on the Erie in central territory to Pennsylvania, B. & O., Jersey Central, D. L. & W., and L. V., deliveries without additional charge to the shippers, provided the traffic is routed for delivery in New York via those lines. The Erie has joint through rates with those lines equal to the single line rates applicable via its own line. HELD, proposed schedules not justified. Lighterage rules on hay or straw, carloads in New York harbor, 78 I. C. C. 684.

C. 390; Lighterage and Storage Regulations at New York, 35 I. C. C. 47, 60, 61, 63; Gilman & Co. v. M. C. R. R., 38 I. C. C. 213; Handling of Heavy Articles, 47 I. C. C. 323, 331; New York Harbor Case, 47 I. C. C. 643, 738; Carfloat Service, New York Harbor, 49 I. C. C. 259, 267; International Steel Corp. v. Director General, as Agent, 73 I. C. C. 635; Compagnie Auxiliare v. D. L. & W. R. R. Co., 77 I. C. C. 60; Boston Wool Trade Asso. v. Clyde S. S. Co., 78 I. C. C. 411.

III. ALLOWANCES.

§4. In general.

See Allowances §8 (4).

IMPORTANT CASES SINCE 1908

(a) The transportation conditions surrounding the transportation of heavy iron and steel articles on the one hand, and heavy stone on the other, are so similar that it would be inadvisable to distinguish between them with respect to lighterage charges. Handling of Heavy Articles, 47 I. C. C. 323, 331.

(b) When a rail carrier's lighter or barge with a shipment on board reports to the steamship company at the point designated in the permit, the shipment so far as the rail carrier is concerned, has reached its destination, and it is then incumbent upon the consignee to take delivery. He does not perform this duty personally but employs the steamship company to perform it for him. He thereby makes the steamship company his agent for the purpose of taking delivery, and becomes responsible for any delay on its part to the same extent that he would be responsible for his own delay if he took the delivery personally. The acts or omissions of the agent are in such case the acts and omissions of the principal. New York Board of Trade v. Director General, 59 I.C. C. 205, 208.

(c) Defendant railroad companies, whose eastern freight rail terminals were on the New Jersey shore of New York Harbor, held themselves out as ready to take freight at any public or accessible private dock within the free lighterage zone, embracing the commercial and manufacturing river front of Greater New York, and lighter it across the river, without any other charge than that published in their tariffs applicable to freight delivered to them at the New Jersey shore. Within this zone defendants established freight terminal stations, some owned or operated for them by third persons under contract as their agents. One of the latter class of stations was operated by Arbuckle Bros., under contracts whereby, in consideration of operating the station and lightering freight between it and the New Jersey terminals, Arbuckle Bros. were to receive 4 1-5c per 100 lbs. on freight originating at or destined to points west of Trunk-Line Territory, and 3c on freight originating at or destined to points east thereof, consignments to or by Arbuckle Bros. being treated in the same manner as the shipments of the general public. The docks of a competitor, the Federal Sugar Refining Co., were located at Yonkers, some 10 miles beyond the limits of the free lighterage zone, and in order to participate in the allowances accorded Arbuckle Bros., it shipped its freight by lighter to pier 24 within the zone, consigned to its city office, where the master of the lighter was handed bills of lading for execution by the carrier upon delivery at the New Jersey shore. The lighter then proceeded with the freight to the New Jersey terminal, where it was delivered. The Commission, in 20 I. C. C. 200, held that upon these facts, unless the Federal Sugar Refining Co. were accorded an allowance identical

with that made to Arbuckle Bros., a discrimination in contravention of the Act, would result. HELD, that the circumstances and conditions surrounding the two shippers were so dissimilar as not to make the same rule applicable. The carriers not having established any public station at pier 24, notice and tender were essential. No tender having been made, obviously because the freight when loaded on the lighter was destined for the rail terminals at the New Jersey shore and thence to the real consignee at western points on the carrier's lines, the stopping at pier 24 and the receipt of unsigned bills of lading was not a break in the continuity of transportation, but a subterfuge to give the transaction the appearance of a shipment from pier 24. The claim by the Federal Company was for a lighterage service which the carriers were under no obligation to perform. Judgment of the Commerce Court, reversing the action of the Commission, affirmed. United States v. B. & O. Ry. Co., 34 Sup. Ct., 75, 78, 231.; Co. v. U. S., 35 Sup. Ct., 573, 574, 237 U. S. 202, 59 L. Ed.

ALL OTHER CITATIONS

Federal Sugar Refining Co. v. B. & O. R. R. Co., 17 I. C. C. 40, 45, 47; Barrett Mfg. Co. v. Central R. R. of New Jersey, 17 I. C. C. 464, 466, 465; Richardson Co. v. Director General, 56 I. C. C. 731; United States v. Interstate Commerce Commission, 277 Fed. 538, 542; Standers Shipbuilding Corporation v. Director General, 77 I. C. C. 64.

IV. THROUGH ROUTES AND JOINT RATES.

§5. In general.

See Through Routes and Joint Rates.

IMPORTANT CASES SINCE 1908

(a) Lighterage company held to be a common carrier subject to the Act and entitled to joint through rates with rail line. Murray Lighterage & Transportation Co. v. National Railways of Mexico, 25 I. C. C. 5.

(b) Complainant transportation company asked that the D. & H. Co. be required to join with it in establishing through routes and joint through rates on interstate traffic between points in the harbor of New York City and points in New York and Vermont states, and alleged that, by allowing such joint through rates to its competitor, and not to it, defendant had unjustly discriminated against complainant. On sulphur moving to Ausable Forks, N. Y., and delivered to the D. & H. Co. at Green Island, N. Y., complainant earned but 6c per 100 lbs. for the movement from New York Harbor points to Green Island, while its competitors, who enjoyed a through rate, earned 7.6c. The northbound traffic of complainant is larger in volume and its northbound service equally if not more efficient than the northbound service of its chief competitor. Its chief southbound competitor has docks and office a few miles from the Green Island docks of the D. & H. Co., while complainant has not. HELD, the D. & H. Co. may not lawfully withhold through routes and joint rates from the complainant on northbound traffic so long as it maintains such relations with its competitors similarly situated and operating in substantially the same manner. Murray Lighterage & Transportation Co. v. D. & H. Co., 25 I. C. C. 388.

(c) Whether a complaining lighterage company is wise in seeking the establishment of published joint through rates with respondent is a question which it must decide for itself. Murray Lighterage & Transportation Co. v. D. & H. Co., 25 I. C. C. 388, 391.

(d) Complainant attacks as unjust and unreasonable tariff allowances of the defendants to private lighters for handling china clay, in bulk, in New York harbor. The evidence shows that all the china clay recently imported through New York harbor by the complainant has been handled by the carriers with their own lighters. No question of allowance arises as to such shipments. For the handling of china clay, the services of private lighter men would be preferred by complainant to those provided by the carriers, because the commodity can better be kept from contamination by other substances when transported in specially arranged private lighters. The allowances for outside equipment has been 60 cents per ton for some years, apportioned by allowing 35 cents for lighters and 25 cents for loading. The lighterage concerns joined as complainants have not handled china clay since this allowance was made. The present allowance of 60 cents per ton applies to many other commodities in addition to china clay, and the record is not sufficient to take up and decide the entire

question of lighterage allowances on all commodities. HELD, complaint dismissed. Richardson Co. v. Director General, 56 I. C. C. 731.

ALL OTHER CITATIONS

Murray Lighterage & Transportation Co. v. D. & H. Co., 25 I. C. C. 388, 389.

V. OBLIGATION TO FURNISH

§6. In general.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked defendants failure to furnish free lighterage from Jersey City through New York Harbor to Long Island City on 500 sets of iron work for freight cars, shipped during the period from Nov. 30, 1918, to March 12, 1919, from Berwick, Pa., to New York, for export, compelling complainant to perform such service at its own expense, resulting in the payment of charges which were illegal, unreasonable, unjustly discriminatory and unduly prejudicial. Defendants tariffs contained a rule which provided for free lighterage from their rail terminals on the New Jersey shore to Long Island City. The rates applying from Berwick to Long Island City were the same as those applying to Jersey City. An embargo was in effect at the time of movement, and there can be no doubt as to the right of carriers to place embargoes in proper cases, and the right of the director general to place an embargo in this case is not questioned. The shipments were treated by the carriers, in so far as the embargo was concerned, as though they were domestic shipments. Complainant admitted, with respect to both the Pennsylvania and the Lackawanna shipments, that he agreed to take delivery on the New Jersey shore. HELD, defendants failure to furnish lighterage from Jersey City not shown to have resulted in the collection of charges which were unreasonable or otherwise unlawful, complaint dismissed. Compagnie Auxiliare De Chemins De Fer Au Bresil v. D. L. & W. R. R., 77 I. C. C., 60.

(b) Tariff provided for free lighterage at New York, N. Y., on staves for export when tied in bundles. Complainants shipments arrived at New York with bands on bundles loose, and carrier refused to lighter, claiming that shipments were not in bundles. Complainant had lighterage performed by an outside agency. HELD, Since tariff did not specify any particular method of tying staves in bundles to entitle them to free lighterage, reparation awarded to complainant in amount of cost of lighterage expended by him. Gledhill Co. v. Director General, as Agent, 80 I. C. C. 701.

ALL OTHER CITATIONS

Lighterage and Storage Regulations at New York, 35 I. C. C. 47, 60; International Steel Corporation v. Director General, 73 I. C. C. 635; Standard Shipbuilding Corp. v. Director General, as Agent, 77 I. C. C. 64; Campagnie Auxiliare v. D. L. & W. R. Co., 87 I. C. C. 443; Midland Linseed Products Co. v. Director General, 88 I. C. C. 247.

VI. TARIFFS AND CONSTRUCTION.

§7. In general.

See Demurrage.

IMPORTANT CASES SINCE 1908

(a) Embargo placed against domestic freight for New York Harbor delivery, except when moving under permits issued only upon condition that delivery be accepted at Brooklyn terminals. Such delivery accepted under protest necessitating hiring outside lighters or drayage to plants. Tariffs provided for free lighterage delivery but since bills of lading did not call for such delivery the contracts of carriage were fulfilled when Brooklyn delivery accepted. Permit system was lawfully established and embargo merely closed a delivery service theretofore accorded, neither of which resulted in unreasonable or unlawful rates or practices. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 52.

(b) Lighterage schedules are numerous and complicated, and once canceled can be restored only after considerable delay. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 57.

(c) Tariff provided for free lighterage at New York, N. Y., on staves for export when tied in bundles. Complainant's shipments arrived with bands on bundles loose, and carrier refused to lighter, claiming that shipments were not in bundles. Complainant had lighterage performed by outside agency. HELD: Since tariff did not specify any particular method of tying staves in bundles to entitle them to free lighterage, reparation awarded to complainant in amount of cost of lighterage. Gledhill Co. v. Director General, as Agent, 80 I. C. C. 701.

LINING AND PADDING

See Allowances §8 (4½).

LIVE STOCK SHIPMENTS

See Caretakers; Disinfecting Charges and Services; Facilities and Privileges §5½; Feeding in Transit; Limitation of Liability; Loss and Damages; Personal Injuries; Reparation §16 (11); Stock Yard Companies.

CASES 1887-1908

(a) Live stock from Covington, Ky.—Carriers cannot make the yards of a certain company their exclusive stock depot at a certain place, there being other stock yards near by charging lower rates. Keith v. Kentucky Central R. Co. et al, 1 I. C. R. 316, 601.

(b) The expense of hauling the Burton cars in one direction unloaded, since by their construction they are not suited to carry general freight, and the fact that a large percentage of ordinary cattle cars are back loaded upon long hauls of western roads, are considerations which justify difference in charge against shippers who prefer to hire improved stock cars. Burton Stock Car Co. v. Chicago, Burlington & Quincy R. R. Co., 1 I. C. R. 329.

(ba) Burton Stock Car Company, which furnishes stock cars to shippers over railroad, does not exchange with or use cars belonging to others, and is not a connecting line entitled to equal facilities for interchange of traffic under section 3, par. 2. of Act. Burton Stock Car Co. v. Chicago etc. R. R. Co., I. C. R. 329.

(c) As common carriers of livestock it is the legal duty of the defendants to provide reasonable and proper facilities for receiving on board, and for discharging from their cars, all livestock offered for shipment or brought over their respective roads free of charges other than the usual transportation charges. Keith v. Kentucky Central R. R., 1 I. C. C. 601, 603.

(ca) The legal duty of carriers is not fully discharged by receiving and discharging livestock at a depot, access to which must be purchased. Keith v. Kentucky Central R. R. 1 I. C. C. 601, 603.

(d) A railroad company engaged in the business of transporting livestock is bound to furnish suitable cars therefore upon reasonable notice, whenever it is within its power to do so without jeopardizing its other business. Scofield v. Lake Shore & M. S. R. Co. (Com.), 2 I. C. R. 67.

(e) A shipper is not entitled to have his cattle carried in cars of a special construction of his selection, belonging to a third party and superior to ordinary cattle cars, by reason of the fact that the carrier transports some cattle in other cars, available to all shippers equally, which have some of the improvements of the former, but are furnished by another party under a special contract, and which, unlike the cars desired by the shipper by reason of their peculiar construction, can be used in the chief business of the road,—that of carrying coal,—when not in use for cattle. The refusal to use the cars desired by the shipper does not constitute unjust discrimination. Re Morris's Petition (C. C. N. D. N. Y.), 2 I. C. R. 617.

(ea) Certain propositions of fact established by the evidence in this proceeding may be briefly stated as showing the character of the case and also on account of the light they throw upon the conclusions reached by the Commission. The City of Chicago is the largest pork-packing center in the country and is also the most extensive market for live hogs and all other live stock. Kansas City, Leavenworth, St. Joseph, Atchison, Omaha, Council Bluffs, Sioux City, Sioux Falls, Des Moines, Dubuque, Burlington, Cedar Rapids, Marshalltown, Fort Dodge, Keokuk, Grinnell, Ottumwa and many other points that might be named in the interior of Iowa, are extensive pork-packing centers, and the hog products packed at these cities are brought into direct competition with the hog products packed at Chicago, not only in the mar-

kets of the United States, but also in all other markets of the world where hog products are consumed. As articles of commerce the live hog and its product are in direct competition with each other at the points named and in the chief market of this country. From Sioux City to Mississippi River points and from Sioux City to eastern markets and seaboard cities via Mississippi River points, the rates are made considerably higher by the carriers on live hogs than on packing house product. With, however, the single exception of Sioux City, rates are made the same by rail carriers on live hogs and packing-house product carried from Missouri River points to Mississippi River points to Mississippi River points, or from Missouri River points to eastern markets and seaboard cities via Mississippi River points, or from intermediate points in the State of Iowa and Missouri to Mississippi River points, or from intermediate points in Iowa and Missouri to eastern markets and seaboard cities via Mississippi River points, or from Chicago to eastern markets and seaboard cities and intermediate points. But upon all shipments of live hogs and packing-house product from Missouri River points to the City of Chicago, or from intermediate points in the State of Iowa and Missouri to Chicago, the rate charged is much higher on live hogs than on packing-house products. The foregoing propositions of facts being true, the defendants and intervenors undertook to justify the discrimination made against Chicago upon various grounds, which, with the view of the Commission upon each, may be briefly stated. They claim that trains carrying live hogs had the right of way over other freight trains and were run at a higher rate of speed on account of reaching the market at Chicago. But the evidence adduced did not show that this was of a nature and character that warranted the discrimination made in rates against Chicago. They also claim that there was much greater risk to the carrier in hauling live hogs than in transporting packing-house products, but the evidence showed that there was no appreciable difference in the risk of carrying the one as compared with the other. They further claim that it is more expensive to the carrier to haul live hogs than packing-house products to Chicago. But the evidence did not sustain this ground of defense. They claim, and the evidence showed it to be true, that the lines of railway east of Mississippi and east of Chicago used double-deck cars for transporting live hogs, while the railway lines west of Chicago and between Missouri River points and Mississippi River points and Chicago, with the exception of the Chicago, Milwaukee & St. Paul Railway Company and the Atchison, Topeka & Santa Fe Railway Company, used single deck cars, and that the two exceptional roads last named had but few double-deck cars. But this was found to constitute no justification for this discrimination in rates against Chicago. They claim that, counting coal, cooperage, salt and ice used in packing-house work, live hogs brought in and packing-house products carried out, the slaughtering of hogs at the packing houses at Missouri River points and in the interior of Iowa and Missouri furnished the rail carriers more tonnage than if the live hogs were transported to Chicago and converted into packing-house product there. But this was not found to warrant the discrimination in rates made against Chicago. By some it was insisted that as the rate on the live hogs from Missouri River points and from points in the interior of the State of Iowa, for example, to the packing house at Sioux City, added to the rate on packing-house product from the packing house at Sioux City to Chicago, is but a trifle more than the rate on live hogs from the first point of shipment above named to Chicago, that this equalized the rates relatively on live hogs and hog product. But the Commission finds that there is no element of justice or fairness in making or computing rates upon any such basis as this, and that it constitutes no ground whatever for these discriminating rates against Chicago. The intervenors also defend these discriminating rates against Chicago on the ground of immense investments of capital that have been made in the establishment of packing houses at Missouri River points and in the interior of Iowa and Missouri on the faith of these rates, which give employment to a large number of persons; that the business in these States has adjusted itself to this condition of affairs, and that now to make the changes in these rates claimed by petitioner would break up and ruin these packing houses. But upon the evidence the Commission is unable to find that the preferential rates given to these large establishments in Iowa and Missouri and at Missouri River points as well as in other portions of the country are reason-

able and just when compared with the heavy discriminations laid upon the packers and buyers of Chicago. Board of Trade of Chicago v. Chicago & A. R. Co. 3 I. C. R. 233.

(eb) The act of Congress of May 29, 1894, forbidding the exportation of diseased cattle, was not intended to interfere with shipments of cattle from one point to another wholly within a state, but applies only to interstate shipments. Davis v. Tex. & Pacific Ry. Co., 7 I. C. C. App. XXXVII.

(f) Defendant's rate on beef cattle in carloads from Ft. Worth, Tex., to New Orleans, La., is 42½ cents per 100 lbs. and $15 per car additional when shipment is made in lots of less than ten carloads. Upon complaint against the imposition of the additional $15 per car, HELD: That the charge of $15 per car in addition to the rate of 42½ cents per 100 lbs. is unreasonable when applied to single carload shipments. New Orleans Live Stock Exch. v. T. & P. R. Co., 10 I. C. C. 327.

(g) Defendants' rate on horses and mules in less than carloads from Bayou Sara, La., to St. Louis, Mo., is the double first class rate of $1.80 per 100 lbs., upon an estimated weight of 2,000 lbs. for each additional animal. The distance covered is 667 miles. This rate when applied to the transportation of a single animal is not unreasonable, but it is unreasonable for the shipment of four animals, amounting in that case to $99, while the charge upon a carload of twenty-five animals is only $100. Defendants' less than carload tariff would be rendered more just by reducing the charge to 90 cents per 100 lbs., first class rate, increasing the estimated weight of the first animal to 4,000 lbs., and leaving the rates for the additional animals as they now are, at 1,500 lbs. for the second and 1,000 lbs. for all others included in the shipment. Barrow v. Yazoo & M. V. R. Co., 10 I. C. C. 333.

(h) The shippers of cattle and hogs are unduly discriminated against by the exaction of higher rates for transporting cattle and hogs than for transporting live stock products to Chicago from points west, northwest, and southwest thereof, including Missouri River points and South St. Paul, Minnesota; as such discrimination is not justified by differences in cost of transportation or otherwise. Chicago Live Stock Exchange v. Chicago G. W. R. Co., 10 I. C. C. 428.

(i) The traffic in cattle and hogs in Chicago and other points is discriminated against by the exaction of higher rates for transporting cattle and hogs than for transporting live stock products to Chicago from points west, northwest, and southwest thereof, including Missouri River points and South St. Paul, Minnesota. Chicago Live Stock Exchange v. Chicago G. W. R., 10 I. C. C. 428.

(j) The desire of a carrier to secure additional business does not justify a change in the relation of rates, resulting in a higher rate upon cattle and hogs, the raw material, than upon live stock product, the manufactured article, where, as in this case, the articles are in sharp competition with each other in markets of purchase and sale, where it appears that upon other lines and in other sections rates are generally no higher, and in many instances much lower, on the traffic prejudiced than on that favored by the change, and where numerous and important industries which have been built up and maintained under the former adjustment, and those interested in such industries, will be injuriously affected by the action taken. Chicago Live Stock Exchange v. Chicago G. W. R. Co., 10 I. C. C. 428.

(k) Where the live-stock rates to Chicago participated in by defendants constitute a reasonable compensation for the services performed, including delivery at the Union Stock Yards in Chicago, the imposition of a terminal charge of $2 per car is unreasonable. Cattle Raisers' Asso. of Texas v. Chicago, B. & Q. R. Co., 11 I. C. C. 277.

(l) A railroad company may maintain its live stock depot at a particular point, although it neither builds nor repairs nor insures the stock pens into which the stock is unloaded, and does not hire or control the men who do the unloading; and whether the Union Stock Yards at Chicago have been, in railroad phraseology or in legal definition, the depot of defendants, is immaterial, for they were, and still are, in fact, the point to which the stock is transported and unloaded under the shipping contract of defendants. Cattle Raisers' Asso. of Texas v. Chicago, B. & Q. R. Co., 11 I. C. C. 277.

(m) Excluding the territory covered by the reduction of 1896, live-stock rates to Chicago participated in by defendants

were, on May 31, 1894, reasonable compensation for the services performed including delivery at the Union Stock Yards in Chicago. At all times since that date such rates have been and now are sufficiently high to include a delivery at the stock yards as such delivery was made prior to June 1, 1894. Cattle Raisers' Asso. of Texas v. Chicago, B. & Q. R. Co., 11 I. C. C. 277.

(n) Outside the excluded territory a terminal charge for delivery to the Union Stock Yards in Chicago of $1 per car is reasonable. Cattle Raisers' Asso. of Texas v. Chicago, B. & Q. R. Co., 11 I. C. C. 277.

(o) Defendants' advances in live-stock rates during 1903, as shown in the appendix, were unjust and unreasonable, and the present rates are unjust and unreasonable to the extent of such advances. Cattle Raisers' Asso. of Texas v. Missouri, K. & T. R. Co., 11 I. C. C. 296.

(p) The present terminal charge for delivery of live stock at the Union Stock Yards in Chicago, amounting to about $2 per car is unjust and unreasonable; and a reasonable charge would be $1 per car for such terminal services. Cattle Raisers' Asso. of Texas v. Missouri, K. & T. ... Co., 11 I. C. C. 296.

(pa) This case relates to advances in rates on cattle from points north of the Texas quarantine line to northern ranges in Colorado, Western Nebraska, Wyoming, Montana, and North and South Dakota, and to advances in rates from points in Texas, Colorado, Wyoming, Nebraska, Kansas, Indian Territory and New Mexico to Chicago, St. Louis and Kansas City. After considering cost to the carriers at originating and delivering points, cost and maintenance of equipment, expense of unloading and reloading in transit incident to feeding, watering and resting the stock, character of the movement, number of cars in trains, average loading, volume and desirability of the traffic, return of empty cars, liability to damage, cost of carriage, increased cost of producing live stock, decreased selling price, method of making the advanced rates, disappearance of competition, cost of railroad labor and supplies, improved methods of operation and increased general traffic, Mileage revenue per ton per car and per train, and other pertinent circumstances and conditions, HELD, that defendant's advances in live stock rates during 1903, were unjust and unreasonable, and that the present rates are unjust and unreasonable to the extent of such advances, and that a reasonable terminal charge at the Union Stock Yards, Chicago would be $1.00 per car. Cattle Raisers Asso. v Missouri, K. & T. R. Co., 11 I. C. C. 298.

(q) Prior to April, 1904, the Texas & Pacific Railway Company had in effect with various lines of railway, including the other defendants, joint tariffs, I. C. C. No. 1015, I. C. C. No. 1038, and I. C. C. No. 1036, applying on live stock from points on its line in Texas and New Mexico to destinations therein specified, but during that month the Texas & Pacific Company canceled such joint tariffs, and since that time no through routes or joint rates applicable to live stock to and from points on its line have been in force. HELD, That the public interest requires the establishment of the through routes and joint rates provided for in such joint tariffs, with leave to any party to apply for a modification of the order which may be issued herein at any time, but that formal order herein be withheld for thirty days. The carriers are granted authority to establish such joint tariffs upon ten days' notice to the public and the Commission. American Nat. Live Stock Asso. v. T. & P. R. Co., 12 I. C. C. 32.

(r) Defendant's rate per car for the transportation of horses from New York to Columbus is $200; from Columbus to Kansas City, $350; from Columbus to St. Paul, $350. The rate per car from New York to St. Louis is $300; from St. Louis to Kansas City, $150; from New York to Chicago, $250; from Chicago to St. Paul, $200. Thus the total charge from New York to Kansas City when the shipment is stopped at St. Louis is $450; when stopped at Columbus, the total charge is $550. Similarly, the charge from New York to St. Paul is $450 when the shipment is stopped at Chicago, and $550 when the shipment is stopped at Columbus. HELD, defendant's rate of $350 per car from Columbus to Kansas City and Columbus to St. Paul is unjust and unreasonable, and should not exceed $250 per car. McLaughlin Brothers v. Adams Express Co., 12 I. C. C. 489.

IMPORTANT CASES SINCE 1908

(s) The assessment of freight charges upon hoof selling weights less fill allowances, not found unlawful. Kansas City Live Stock Exchange v. A. T. & S. F. Ry. Co., 34 I. C. C. 423.

(t) Live stock traffic involves a special service more expensive than that required for ordinary commodities. 1915 Western Rate Advance Case, 35 I. C. C. 497, 589.

(u) Carriers of live stock unquestionably must provide suitable facilities for loading, unloading, and caring for live stock, including suitable pens, but not at every point on their lines where dealers in live stock choose to establish their plants. Felin & Co., Inc. v. P. & R. Ry., 37 I. C. C. 231, 233.

(v) The question of the standard value at and below which all live stock take the same rates for the same movement involves the fact that such value should be applied to all live stock whether the shipment be in carloads or in less than carloads. The benefits of uniformity, and in order that the average animal shall not be required to pay transportation rates based upon values in excess of the actual value of such animals, present reasons why the higher valued blooded animals should not fix the standard. Natl. Soc. of Record Assns. v. A. & R. R. R. Co., 40 I. C. C. 347, 353.

(w) There appears no reason why a lower valued animal in a less-carload shipment should take the rate applicable to one of higher value, merely because both are shipped in the same car at the same time. The shipper using two cars would get a rate based on the actual value of his cheaper animal while under this provision if he used only one car he would be compelled to pay on each the rate based on the higher valued animal. National Soc. of Record Assns. v. A. & R. R. R. Co., 40 I. C. C. 347, 354.

(x) It cannot be said that in determining relative rates on the more valuable of two animals of the same species the Interstate Commerce Commission is limited to a consideration of the one factor of insurance against the increased hazard resulting from the higher value. Natl. Soc. of Record Assns. v. A. & R. R. R. Co., 40 I. C. C. 347, 355.

(y) The Commission does not feel that it should, in prescribing rates on higher valued animals, by amount in excess of basic rates, consider only the greater insurance risk as determined by the amount of loss and damage claims which past experience indicates will result. National Society of Record Assos. v. A. & R. R. R. Co., 40 I. C. C. 347, 355.

(z) A crated animal moving at the same weight and with the same minimum value of an animal of the same species shipped uncrated should take no higher rate because of the fact that it is crated. Natl. Soc. of Records Assns. v. A. & R. R. R. Co., 40 I. C. C. 347, 357.

(aa) In order to reduce damage claims on live stock a service is given superior to that afforded or required for any other traffic. Railroad Commission of Louisiana v. A. H. T. Ry. Co., 41 I. C. C. 83, 97.

(bb) The cost of expedited service given to live stock and the proportion which the loss and damage claims bear to the total charges paid is much greater than the ordinary service given to freight in general. Dimmitt-Caudle-Smith Live Stock Comm. Co. v. C. B. & Q. R. R., 47 I. C. C. 287, 302.

(cc) The transportation of caretakers held subject to the Act and to regulations of Commission, and to provision of section 1 which required all regulations or practices to be just and reasonable. Dimmitt-Caudle-Smith Live Stock Comm. Co. v. C. B. & Q. R. R., 47 I. C. C. 287, 319.

(dd) The necessity for starting the animal to its destination without delay and the fact that not all commodities may be shipped in the same car with live stock tends to limit the opportunity of the carriers to avail themselves of their right to place other freight in the car. Live Stock Classification, 47 I. C. C. 335, 339.

(ee) The charge for a carload shipment should not be determinative of the charge for less-than-carload live-stock traffic even though the transportation conditions in each case may be substantially the same. The charge on such a less-than-carload shipment should be fully compensatory, but a carrier should not expect to receive the same amount of profit as on a carload shipment. Under the present basis of charge the revenue on one animal ranges probably from one-half to one-fourth of the charge made on a carload of live stock, but with each additional animal in the less-than-carload shipment the charge for the shipment rises rapidly until the carload charge is reached. Live Stock Classification, 47 I. C. C. 335, 340.

(ff) While as a general rule there is no reason why the minimum charge on a less-than-carload shipment of live stock should be less than on ordinary

freight, some consideration must be given to the opportunity to secure added revenue by loading other freight with the live stock, which is not afforded in the case of light and bulky articles that occupy the entire car, as well as the fact that special equipment is generally required in the latter case, while an ordinary box car serves the former. Live Stock Classification, 47 I. C. C. 335, 341.

(gg) In view of the amended Cummins amendment, the Commission cannot authorize or sanction rates on ordinary live stock which are dependent upon value. Live Stock Classification, 47 I. C. C. 335, 344.

(hh) In several cases the Commission has recognized the propriety of a lower carload minimum on calves than on the matured animals. Shreveport-Texas Cattle, Lignite, Wood and Tanbark, 48 I C. C. 283, 290.

(ii) As the services of unloading and loading are part of the transportation of livestock the collection of separate charges from the shippers for unloading or loading in addition to the rates on livestock from and to interstate points to and from the stockyards was an unlawful and unreasonable practice. Loading and Unloading Charges on Livestock, 58 I. C. C. 164, 167.

(jj) The transportation of livestock requires expedited service and the maintenance of loading and unloading facilities not required for the transportation of ordinary freight. Wilson & Co. v. Director General, 62 I. C. C. 171, 173.

(kk) It was proposed to change the rule governing the transportation of livestock in mixed carloads by the insertion of words which would mean the application of the highest rate and highest minimum weight in the car. Under the interpretation the rule provides, in effect, for charges at the highest rate, and at the highest minimum weight, thereby making the basis of charge definite and certain. So construed, the rule effectuates the Commissions tariff regulations concerning definiteness and certainty in the publication of rates. The disposition of this case is wholly without prejudice to, or bearing on, the intrinsic reasonableness of the rule as applied to mixed carload shipments of livestock. HELD, proposed change justified. Minimum weight on livestock in mixed carloads, 64 I. C. C. 546.

(ll) Proposal of carriers to make the tariff rule providing the basis of charges on shipments of live stock in mixed carloads read "the highest rate and highest minimum weight" instead of "the highest rate and minimum weight," HELD to be justified as such change effectuates the Commission's tariff regulations concerning definiteness and certainty in the publication of rates. Minimum Weight on Live Stock in Mixed Carloads, 64 I. C. C. 546.

(mm) Refusal of carriers to unload ordinary live stock from their cars into stock pens adjacent to packing plants of complainants, or to make an allowance for unloading such shipments, while, pursuant to section 15, paragraph (5) of the act, performing the service of loading at point of origin or unloading at destination such live stock shipped from or to public stockyards, without charge in addition to line-haul charges, not shown to violate the act. Omaha Packing Co. v. A., T. & S. F. Ry. Co., 66 I. C. C. 44.

(nn) Charges in addition to the line-haul charges, for unloading and reloading en route ordinary live stock destined to private stockyards adjacent to packing plants of complainants, while unloading and reloading such shipments destined to public stockyards, without charge in addition to line-haul charges, found to result in undue prejudice to complainant in favor of competitors whose packing plants are adjacent to public stockyards. Omaha Packing Co. v. A. T. & S. F. Ry. Co., 66 I. C. C. 44.

(oo) Section 15, paragraph (5) is definitely limited, both as to initial loading and as to final unloading, to public stockyards. It does not apply to initial loading at other than public stockyards even for shipment to such yards. Omaha Packing Co. v. A. T. & S. F. Ry. Co., 66 I. C. C. 44, 49.

(pp) The Commission must assume that Congress legislated on the subject of the duties of common carriers by railroad concerning the receipt and delivery of live stock with full knowledge of the law as declared by the Supreme Court in Covington Stock Yards Co. v. Keith, 139 U. S., 128, and therefore with the knowledge and purpose that public stockyards would be open to all shippers and consignees as the terminals of the carriers. Omaha Packing Co. v. A. T. & S. F. Ry. Co., 66 I. C. C. 44, 49, 51.

(qq) Rules and charges governing bedding of live-stock cars found not un-

reasonable except upon railroads which assess bedding charges in excess of tariff charges after having included such charges in transportation rate. National Live Stock Exchange v. A. T. & S. F. Ry. Co., 80 I. C. C. 747.

(rr) Climatic and transportation conditions may vary kind and quantity of bedding essential to safe transportation of live stock, but whatever is reasonably necessary the carrier is by law required to furnish, and injuries to stock resulting from failure properly to bed car floors will render carrier liable in damages for its negligence. East Tennessee, etc., R. Co. v. Johnston, 75 Ala., 596; Allen v. C., B. & Q. R. Co., 82 Nebr., 726; 10 Corpus Juris, pp. 88 and 89; Michie on Carriers, sections 1742 and 1743. National Live Stock Exchange v. A., T. & S. F. Ry. Co., 80 I. C. C. 747, 748.

(rra) Proposal to establish rule which would place upon shipper duty of bedding cars, except where stock is transferred from one car to another en route for convenience of carrier, rejected. Such rule would relieve carriers of their common-carrier obligation to furnish cars properly bedded or otherwise made safe for transportation which they hold themselves out to furnish and clearly can not be sanctioned as reasonable. National Live Stock Exchange v. A., T. & S. F. Ry. Co., 80 I. C. C. 747, 749.

(ss) Contention that uniform live-stock contract, approved in 64 I. C. C. 357, places upon shipper obligation to bed cars, not sustained. Section 4 (b) of contract was prescribed by the commission in lieu of one proposed by railroads which would have required shipper to bed cars, and was drafted in light of the law which places upon carrier duty to furnish ordinary bedding and upon shipper burden of supplying extraordinary bedding when special character of his traffic or his caprice demands such bedding. Natl. Live Stock Ex. v. A., T. & S. F. Ry. Co., 80 I. C. C. 747, 749, 750.

(ssa) Rates on hogs, in single-deck carloads from Nashville, Tennessee, Oklahoma City, Okla., found unreasonable. Rate assailed is considerably higher than rate for corresponding distance under scale applicable between points in Southwest and considerably higher than rate based upon scale proposed in Live Stock to, from, and between Points in Southeast, 74 I. C. C., 419, for application in Southeast for like distance. Reasonable rates for application to single-deck and double-deck cars prescribed, and reparation awarded. Wilson & Co. v. Director General, as Agent, 81 I. C. C. 39.

(tt) Where horses were transported without a caretaker under the 36-hour rule, it was the carrier's duty at the expiration of such period to unload them in a proper place for rest, water and feeding for a period of at least 5 consecutive hours, in which case the shipper was required to pay the reasonable expense thereof; the carrier having a lien therefor collectible at their destination. H Ginsberg & Sons v. Wabash R. Co., (Mich. 1922), N. W. 1018, 1020.

W. 889.

LOADING AND UNLOADING

See Allowances §8 (4⅞); Classification §4, §13; Demurrage; Facilities and Privileges §10; Minimums; Reasonableness of Rates §15½; Transportation §10.

LOCAL RATES AND COMBINATIONS

See Class Rates; Commodity Rates; Double Advances; Evidence §13 (5), §28, §47; Passenger Fares and Facilities §5¾; Through §13½, §15, §22.

CASES 1887-1908

(a) An intermediate local rate should never exceed the through rate to the terminus of the line plus the local rate back to the intermediate point. Martin v. Southern P. Co. (Com.), 2 I. C. R. 1.

(b) A railroad company is under special obligation to give reasonable rates for its local business; but there are many influences which may affect through rates while not bearing upon local rates at all, or if at all, in less degree. L. Lippman & Co. v. I. C. R. Co., 2 I. C. C. 414, 415.

(c) Complainant attacked as unreasonable rates charged of $1.85 per bale on cotton from Yazoo City, Miss., to New Orleans, La. The complaint was brought because of the fact that the I. C., on cotton coming from north of Yazoo City pays steamboats 50c per bale and 10c per bale transfer from the boat to the railroad at Yazoo City, thus accepting less than its local rate from Yazoo City. No complaint is made as to the unreasonableness of the local rate from Yazoo City. It is quite consistent with the complaint that the rate from Yazoo City is a fair one, and that the rates from points above are unreasonably low, made so under the stress of competition or for other reasons. Cases of this kind are sometimes met with, especially where water competition exists. HELD, nothing in the complaint warrants an investigation of the Commission, complaint dismissed. L. Lippman & Co. v. I. C. R. R. Co., 2 I. C. C. 414.

(d) It is well known by all who are familiar with the influences which necessarily affect the making of rates that local rates can not be the measure of what the railroad company shall accept as its division of through rates. In the first place the through rate is almost universally less in proportion to distance than the local rate; the carriers can afford to make it lower; if they were compelled to measure the one by the other, there would be no inducement to form through lines and shippers would be annoyed by having to deal with a succession of local roads instead of with one road acting for all. L. Lippman & Co. v. I. C. R. ., 2 I. C. C. 414, 415.

(da) Section 2 and 3 of the Act are not violated by charging a local rate from a more distant point on cotton to Vicksburg, when, after pressing there, it is forwarded to its point of destination at less than Vicksburg rate to such point, the total of such two rates being made to equal the regular rate from such initial point to such destination. Cowan v. Bond, 2 I. C. R. 542.

(e) A separate local haul of freight, complete in itself, could not be added to another different and subsequent haul of the same freight as an element in the adjustment of relative rates between the last haul and a haul of similar freight from still another and different point on the same line to the same common destination. Board of Trade of Chicago v. C. & A. R. R., 3 I. C. C. 233, 245.

(ea) Where two or more roads forming a continuous connecting line between points in different States bill and carry interstate traffic through to certain stations on the last road forming such line, neither the roads together, nor any one of them, can evade the obligations of the Act to Regulate Commerce, §4, by declaring that as to such traffic destined to such stations on such terminal road it is a local carrier. James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co. (Com.) 3 I. C. R. 682.

(eb) When a local rate from a given point is alleged unreasonable, but it appears from the record that such local rate is also a proportion of through rates from that point, and as such is the real subject of controversy, the complaint should be directed against the aggregate through rate, not the share received by any initial carrier, and all the carriers composing the through line are necessary parties. Chamber of Commerce of Minneapolis v. Great Northern R. Co., 4 I. C. R. 230.

(ec) A local rate which presumably is adopted as covering both the initial and final expense of a local haul is prima facie excessive as part of a through rate over a through line composed of two or

more carriers. Troy Bd. of Trade v. Alabama Midland R. Co., (Com.) 4 I. C. R. 348.

(f) Limiting local rates of freight does not necessarily interfere with interstate commerce because the carriers for their own convenience rearrange the interstate rates to make them conform to Ames v. Union P. R. Co. (C. C. D. Neb.) the local rates prescribed by the statute. 4 I. C. R. 835.

(g) A charge of a local rate by a railroad company in excess of its proportion of a joint through rate to the seaboard for hauling grain a longer distance is not an illegal discrimination. Parsons v. Chicago & N. W. R. Co. (C. C. App. 8th C.), 5 I. C. R. 95.

(ga) A local rate, which presumably is adopted as covering both the initial and final expense of a local haul, is prima facie excessive as part of a through rate over a through line composed of two or more carriers. Board of Trade of Troy, Ala. v. Ala. Mid. Ry. Co. et al., 6 I. C. C. 1, 2.

(gb) The Louisville & Nashville Railroad Company and the Savannah, Americus & Montgomery Railway Company, the defendants, unite in a joint tariff over their lines from Birmingham, Ala., to Cordele, Ga., and connecting at Cordele with the Georgia Southern & Florida Railway Company, the three companies form a line and join in a tariff through to Macon: HELD, that the two companies first named may lawfully accept less for their haul to Cordele as a part of the through rate to Macon than they might lawfully charge for the haul to Cordele for local delivery; but when the defendants carry a ton of pig iron to Cordele destined to Macon, and receive for their share of the through tariff $1.45, and when they carry it to Cordele for complainant they charge $3.69, this charge is exorbitant and unduly prejudicial to complainant. Cordele Machine Shop. v. Louisville & N. R. Co. et al. 6 I. C. C. 361.

(h) Local rates on through freight not justified.—The exaction of local rates for freight not local is not justified where the services belonging to local rates are not offered, and such exaction is made for the purpose of diverting traffic or stifling a competitor. Augusta Southern Ry. Co. v. Wrightsville Tennille Ry. Co., 7 I. C. C. app. XXXVIII.

(i) The full local rate permitted by the state law is not necessarily, in the absence of a contract between railroads for through shipment, a just or reasonable rate on freight plainly not local or through freight. Augusta Southern Ry. Co. v. Wrightsville & Tennille Ry. Co., 7 I. C. R. app. XXXVIII.

(ia) Local rates when applied to interstate business must be published at stations. Re Export Rates from Points East and West of Miss. River, 8 I. C. C. 185.

(ib) Combination rates always afford an advantage to the basing point, and entail some disadvantage upon the town to which the combined rates are applied, and when traffic is brought to the two places to be distributed, in common territory the preferences and prejudices resulting from such rates must generally be held unreasonable and undue. Gustin v. A. T. & S. F. R. Co. 8 I. C. C. 277, 289.

(ic) Local hauls, as is well known, are much more expensive to the carrier per mile than long through hauls, or any proportion of such through hauls. Therefore local rates are properly made much higher for the same distance than through rates, and hence the charge of a local rate for a part of a through haul, when the extra expense of a local haul has not been incurred, is prima facie excessive. Board of Trade of Hampton, Fla. v. N. C. & St. L. R. Co., 8 I. C. C. 503, 521.

(id) The reasonableness or unreasonableness of rates prescribed by the State for the transportation of persons and property wholly within its limits must be determined without reference to the interstate business done by the carrier, or to the profits derived from it. The court says: The State cannot justify unreasonably low rates for domestic transportation, considered alone, upon the ground that the carrier is earning large profits on his interstate business over which, so far as rates are concerned, the State has no control. Nor can the carrier justify unreasonably high rates on domestic business upon the ground that it will be able only in that way to meet losses on its interstate business. So far as rates of transportation are concerned, domestic business should not be made to bear the losses on interstate business, nor the latter the losses on domestic business. It is only rate for the transportation of persons and property between points within the State that the State can prescribe; and when it undertakes to prescribe rates not to be ex-

ceeded by the carrier, it must do so with reference exclusively to what is just and reasonable as between the carrier and the public in respect to domestic business. The argument that a railroad line is an entirety; that its incomes goes into and its expenses are provided for out of a common fund; and that its capitalization is on its entire line, within and without the State,—can have no application where the State is without authority over rates on its entire line, and can only deal with local rates and make such regulations as are necessary to give just compensation on local business. Smyth v. Ames, 8 I. C. C., App. V.

(j) The rates from Cannon Falls, a point in Minnesota 48 miles from Minneapolis, to Chicago, East St. Louis, and Louisville, are competitive rates, as are also the rates from Minneapolis. And Cannon Falls, with its competition with Minneapolis, is entitled to as low a rate to common points as the difference in conditions will permit. In view, however, of the desirability of keeping open the Minneapolis market to Cannon Falls grain, the short distance between those points, and the low rates from Minneapolis forced by competition, it is apparently not unjust that the grain rates from Cannon Falls should be as high as the local rate to Minneapolis plus a 7½ cent rate therefrom to Chicago, provided the Cannon Falls dealer is not thereby subjected to the disadvantage as compared with the Minneapolis grain dealer. Cannon Falls Farmer's Elevator Co. v. Chicago G. W. R. Co., 10 I. C. C. 650.

(k) The combination of rates on rye and other coarse grain from Cannon Falls to Minneapolis and thence to Chicago is ½ cent less than the straight rate from Cannon Falls to Chicago, which is without justification. Cannon Falls Farmers' Elevator Co. v. Chicago G. W. R. Co., 10 I. C. C. 650.

(l) The Evansville & Terre Haute Railroad Company, having, instead of making a through rate from points in Indiana to destinations south of the Ohio River, established a local rate on hay of 8 cents per hundred pounds to Evansville, and a proportional of 6½ cents to Evansville when the shipment is billed through to a specified destination, acts unreasonably and unjustly in insisting upon the billing of these shipments to a specified destination in order to secure application of the lower proportional rate, while it declines to assume responsibility for such billing, and does not post in its stations the tariffs from which the shipper can himself ascertain the rate at which the shipment should be billed. While the proportional rate is kept in force it is reasonable and just that these shipments shall be billed to Evansville in care of the road leading southerly therefrom. T. M. Kehoe & Co. v. Evansville & T. H. R. Co., 11 I. C. C. 172.

(m) The application of combined local charges to a long-distance shipment places a wrongful burden upon the shipper. Kindel v. Boston & A. R. Co., 11 I. C. C. 495.

(ma) Under the construction of the law as announced by the courts, no undue prejudice against Griffin, or violation of the long and short haul clause, is shown in this case; and while the practice of making rates to Griffin by combining rates to Atlanta with local rates therefrom to Griffin may result in unreasonable charges, the evidence in this case is insufficient upon which to base a conclusion in that respect. Griffin Grocery Co. v. Southern R. Co., 11 I. C. C. 522.

IMPORTANT CASES SINCE 1908

(n) Local rates can not be limited according to point of origin of shipment or rates which were paid inbound. Merchants Exchange of St. Louis v. B. & O. R. Co., 34 I. C. C. 341, 351, 359.

(o) In the absence of a joint rate, a combination will be legally applicable where the tariffs are on file with the commission, notwithstanding a tariff provision that a factor is not to be used in combination in preference to a specific class or commodity rate. Herrick Refrigerator Co. v. C. G. W. R. R., 46 I. C. C. 421, 422.

(p) It is not unlawful for a carrier to maintain from a local point on its line a rate lower than another rate, from a point not on its line, in which it participates. Vulcanite Portland Cement Co. v. C. R. R. of N. J., 46 I. C. C. 483, 487.

(q) Where rates are based on combinations and tariff governing one factor contained provision for the application of a flat increase to the through rate, carriers parties to the tariff governing the other factor which contained no similar provision and who concurred in the tariff containing such provision are bound by the rule which prescribed a specific method for constructing combination rates on through shipments.

Indian Refining Co. v. Director General, as Agent, 60 I. C. C. 438, 439.

(r) The commission has generally recognized that through rates should be less than the combinations, but prompted chiefly by considerations of paramount public interest, growing out of the revenue conditions of certain carriers, it has remained from and even declined absolute condemnation of combinations. Intermediate Rate Asso. v. Director General, 61 I. C. C. 226, 246.

(s) When distances are relatively great and when transfer at rate breaking points is not attended by unusual costs, the combination basis, using local rates, ordinarily is abnormal and unscientific and often discriminatory. Intermediate Rate Asso. v. Director General, 61 I. C. C. 226, 246.

(t) One factor of a combination rate yielding somewhat high earnings found not exorbitant when consideration given to the fact that the distance was short and the country traversed mountainous. Burns & Knapp v. B. S. & K. R. Ry. Co., 62 I. C. C. 345, 347.

(u) Each factor of a combination rate increased under general order No. 28 of the Director General, but since that order provided for the application of but a specific single increase to the through rate and tariff of one of the participating carriers contained a rule to that effect, in which the remaining carriers concurred, shipment found overcharged and reparation awarded. Sligo Iron Store Co. v. W. M. Ry. Co., 62 I. C. C. 643.

(v) Where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to the increase authorized under general order No. 28 but once, and tariffs of the other carriers participating in the movement do not publish the clause or refer to any other tariff which publishes such a rule, there is a holding out to the shipper of the rate so constructed which carriers should protect. Sligo Iron Store Co. v. W. M. Ry. Co., 62 I. C. C. 643, 644.

(w) Where, in the absence of through rates or a specific manner of constructing through rates, combination rates charged exceeded lower combinations legally applicable interstate rates over route of movement, shipments found overcharged to extent that rates charged exceeded the lower combinations. Reparation awarded. Southern Veneer Asso. v. A. C. L. R. R. Co., 62 I. C. C. 669, 674.

(x) After placement on public team track at originally billed destination, shipment was refused by consignee and reconsigned. Joint rate in effect from point of origin to final destination but as tariff provision approved in several cases provided that if car is placed at original billed destination, and is reforwarded therefrom without being unloaded, it will be subject to the published rates to and from point of reconsignment, combination rates charged found not unreasonable or unlawful. Silica Sand Producers Asso. v. C., B. & Q. R. R. Co., 63 I. C. C. 217.

(y) Local and proportional rates on grain and products from Missouri River cities and points west thereof to Des Moines, Iowa, and from Des Moines to Mississippi River crossings and points east, found not unreasonable or unduly prejudicial as Des Moines, under individual and joint rates with transit service, is not laboring under such a disadvantage as a grain market, in comparison with the Missouri and Mississippi River cities, Chicago and Peoria, Ill., and other grain markets, to entitle it to be made a rate-breaking point on grain traffic. Iowa Railroad Commissioners v. Director General, 63 I. C. C. 405.

(z) The charging of a local rate for a shorter distance higher than a proportional rate for a longer distance over the same line or route in the same direction, the shorter being included within the longer distance, is not a violation of the fourth section. Iowa Railroad Commissioners v. Director General, 63 I. C. C. 405, 406.

(aa) Fact that combination of rates from certain points of origin to a certain destination is higher for shorter distances than the combination of rates from the same points to farther distant destinations does not of itself warrant a finding that the rates for the shorter distances are either unreasonable or unduly prejudicial. Comparisons based upon distance alone have but little value. Nebraska Seed Co. v. Director General, as Agent, 64 I. C. C. 75, 77.

(bb) The commission is not disposed to approve retention of the combination rule, which provides that where no through rates are published and there

are in effect separately established rates to and from junctions, the through rate will be computed by deducting specific amounts from each factor and adding a specific amount to the resulting sum of the factors, because there is an indefinite possibility that future shipments may be afftected by its cancellation. Cancellation of Combination Rule to Southwest, 74 I. C. C. 505, 509.

(cc) While the law does not permit the commission to require rail carriers to establish through routes which result in the short-hauling of one carrier which has a reasonably direct route of its own, it is not a necessary conclusion, when such routes and joint rates are established, that local rates are fair divisions for the carrier which is short-hauled. U. S. War Dept. v. A. & S. Ry., 77 I. C. C. 317, 355.

(dd) The exaction by rail lines of their local rates as divisions of through routes and joint rates with water carriers has for its purpose the protection of the long haul. It is a means of accomplishing indirectly what congress, in the law respecting the establishment of through routes and joint rates, has sought to prevent. U. S. War Dept. v. A. & S. Ry., 77 I. C. C. 356.

(ee) Strictly local rates are not properly comparable with concentration rates which are not represented in final adjustment of charges. Memphis Freight Bureau v. M. P. R. R. Co., 80 I. C. C. 88, 90.

(ff) Shipments moved from points in Canada, destined to Brooklyn, N. Y., at through rates. Due to harbor strike at New York City, complainant accepted shipments short of destination and forwarded via another route on new bills of lading. Allegation that rates from hold points to destination were unreasonable to extent they exceeded factor of through rates over normal route, not sustained. Complainant accepted delivery short of destination account of urgent necessity for raw material, and showing that combination rates for separated movements were higher than applicable rates over normal route, and that carriers were participants in joint rates on same commodity from other points to same destination, does not prove that combination rates were unreasonable. North Packing & Provision Co., 73 I. C. C., 749. Tidewater Paper Mills Co., v. B. T. R. R. Co., 80 I. C. C. 493.

(gg) Where one tariff used in making combination rates on through shipments contains a rule that such rates will be subject to increase but once, there is a holding out to shipper of rates so constructed, or, in other words, an undertaking by carrier publishing that rule to protect resulting aggregate rate. Sligo Iron Store Co., 62 I. C. C., 643; 73 I. C. C., 551, Standard Oil Co. v. M. V. R. R. Co., 81 I. C. C. 193, 195.

(hh) Combination rates composed of commodity rate and class rate held not to be affected by combination rule in tariff of one of participating carriers providing for application of but single increase under General Order No. 28 of director general to sum of factors. Acme Cement Plaster Co. v. Director General, as Agent, 81 I. C. C., 298, 302.

(ii) Rates published, subject to rule 77 are in substantial compliance with the long and short haul provisions of the fourth section. Fairbanks Co. v. B. & A. R. R., 87 I. C. C. 725, 727.
